18 RISK MANAGEMENT

18.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

18.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

PDS BRANDS MANUFACTURING FZCO

Premises No. 6EB 339-SD30, Third Floor, 6 East B, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

18.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

19 COMPARATIVE FIGURES

The fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025. The Previous year covers period of 12 months from April 1, 2023 to March 31, 2024. Previous year figures might be reclassified & regrouped to conform to the current year presentation

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
PDS Global Procurement Service FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of PDS Global Procurement Service FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

DUBAI - U.A.E

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

PDS Global Procurement Service FZCO is incorporated on **March 22, 2023 under License No.- 05624 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 3EA, 233-SD06, Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed and controlled by following persons:

Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

For the period ended March 31, 2026, the company had a net loss of AED 1,492,283 and as on March 31, 2026 company has accumulated net loss of AED 2,357,827 against share capital of AED 100,000. The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1

-Classification of Liabilities as Current or Non-current – Amendments to IAS 1

-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the provision of services is recognized when the services are provided, at which times all the following conditions are satisfied:

- The Company has rendered the contracted services to the customer, thereby transferring the significant benefits of those services.
- The Company does not retain any continuing managerial involvement or effective control over the services provided.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The costs incurred, or expected to be incurred, in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. **Equity instruments**

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. **Debt instrument**

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

PDS GLOBAL PROCUREMENT SERVICE FZCO

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

Premises 5EA 233-SD06 , Second Floor, 5 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

16 RISK MANAGEMENT

16.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

16.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

16.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

17 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from 01 April 2025, to March 31, 2026. The previous fiscal year covers the period of 12 months from 01 April 2024, to March 31, 2025. The Previous year figures have been regrouped or rearranged for classification.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
PDS Logistics FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of PDS Logistics FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

PDS LOSGITICS FZCO is incorporated on **October 03, 2022 under License No.- 05365 issued by Dubai Integrated Economic Zone Authority, Dubai, UAE**

The registered address of the company is 2E M096 Mezzanine floor, 2 East Dubai Airport Free Zone , Dubai, United Arab Emirates

The company is managed and controlled by following persons:

1. Mr. Deepak Kumar Seth
2. Mr. Rahul Khettry

2 BUSINESS ACTIVITIES :

Activity of the company is logistic services

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

For the period ended March 31, 2026, the company had a net loss of AED 28,652 against share capital of AED 100,000. The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

14 RISK MANAGEMENT

14.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

14.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

PDS LOGISTICS FZCO

2E M096, Mezzanine Floor, 2 East Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

14.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

15 COMPARATIVE FIGURES

The fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026.The previous year covers the period of 12 months from April 01, 2023 to March 31, 2024. Previous period figures may have regrouped or rearranged for better presentation.

16 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved and signed by the shareholder on May 01, 2026.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Infinity Fashion FZCO
Dubai, United Arab Emirates

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Infinity Fashion FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021. concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

INFINITY FASHION FZCO is incorporated on **December 26, 2022 under License No.05474 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed and controlled by following persons:

1.Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

18 RISK MANAGEMENT

18.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

18.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. **Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. **Currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

18.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

19 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026. The Previous fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025. Previous year figures might be reclassified & regrouped to conform to the current year presentation.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Moda And Beyond FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Moda And Beyond FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

DUBAI - U.A.E

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

5.2 New and revised International Financial Reporting Standards

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or

has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

MODA AND BEYOND FZCO

Premises No. 2 E M003, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

Notes to the financial statements - for the year ended March 31, 2026

14.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

14.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

15 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from 01 April 2025, to March 31, 2026. The Previous fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025.Previous year figures might be reclassified & regrouped to conform to the current year presentation.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Onme Soho Health And Beauty FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Onme Soho Health And Beauty FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

ONME SOHO HEALTH AND BEAUTY FZCO

Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

Onme Soho Health and Beauty FZCO is incorporated on **August 21, 2024 under License No.- 06443 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed and controlled by following persons:

1.Mr.Rahul Khettry
2.Mr.Sagarkumar Satyanarayan Ballari

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-
(a) Perfumeries and cosmetics trading
(b) Beauty and personal care requisites trading
(c) Para-Pharmaceutical Products trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

For the period ended March 31, 2026, the company had a net loss of AED 42,704 against share capital of AED 100,000. The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

ONME SOHO HEALTH AND BEAUTY FZCO

Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

ONME SOHO HEALTH AND BEAUTY FZCO

Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

ONME SOHO HEALTH AND BEAUTY FZCO

Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

12 RISK MANAGEMENT

12.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

12.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

ONME SOHO HEALTH AND BEAUTY FZCO

Premises No. 2E M067, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

12.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

13 COMPARATIVE FIGURES

The fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026. The Previous fiscal year covers the period of 07 months and 11 days from August 08, 2024 to March 31, 2025. The Previous year figures have been regrouped or rearranged for classification.

14 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved and signed by the shareholder on May 05, 2026.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Collective Near East Sourcing Service FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Collective Near East Sourcing Service FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

DUBAI - U.A.E.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

Collective Near East Sourcing Services FZCO is incorporated on **March 06, 2024 under License No.- 06133 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

The company is managed by following persons:

1.Mr.Rahul Khettry
2.Mr.Abhishekh Kanoi

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-
(a) Clothing, including sports clothes and uniforms trading
(b) Clothing accessories trading
(c) Footwear trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

For the year ended March 31, 2026, the company had a net loss of AED 48,676 against share capital of AED 100,000. The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Collective Near East Sourcing Services FZCO

IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

13 RISK MANAGEMENT

13.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

13.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

Collective Near East Sourcing Services FZCO

Premises No. 2E M043, Mezzanine Floor, 2 East, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

13.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

14 COMPARATIVE FIGURES

The fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026. The previous fiscal year covers the period of 12 months and 26 days from March 6, 2024 to March 31, 2025. Previous period figures may have regrouped or rearranged for better presentation.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Design Hub Sourcing FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Design Hub Sourcing FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to law no (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

1 LEGAL STATUS :

DESIGN HUB SOURCING FZCO is incorporated on **April 10, 2023 under License No.- 05705 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed and controlled by following persons:

1.Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

Corporate tax :

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting years beginning on or after 1 June 2023 and accordingly, it has an income tax related impact on the financial statements for the accounting years beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2023 (as amended).

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED STANDARDS (IFRSS)

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and amendments effective for the current year

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1

-Classification of Liabilities as Current or Non-current – Amendments to IAS 1

-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

5.2 New and revised International Financial Reporting Standards

The following amendments, improvements and interpretations that are assessed by management as likely to have an impact on the financial statements, have been issued by the IASB prior to the date the financial statements were authorized for issue, but have not been applied in these financial statements as their effective dates of adoption are for future accounting periods.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

17 RISK MANAGEMENT

17.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

17.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

DESIGN HUB SOURCING FZCO

Premises 2E M034 , Mezzanine Floor, 2East, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the Year Ended March 31, 2026

17.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

18 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from April 01, 2025, to March 31, 2026. The previous fiscal year covers the period of 12 months from April 01, 2024, to March 31, 2025. Previous year figures might be reclassified & regrouped to conform to the current year presentation.

NexStyle Apparel Manufacturing Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of NexStyle Apparel Manufacturing Limited (the "Company") for the period from 13 May 2025 (date of incorporation) to 31 March 2026.

Principal activity

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

Results and dividend

The results for the period are shown on page 7.

The directors do not recommend the payment of a dividend for the period under review.

Statement of directors' responsibilities in respect of financial statements

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Going concern

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

Auditors

Lancasters Chartered Accountants have been appointed as auditors and a resolution concerning their re-appointment will be proposed at the next annual meeting of the shareholder.

By order of the Board

S Ernandhully

Director

Date: 14 May 2026

Rogers Capital

NexStyle Apparel Manufacturing Limited

Secretary's certificate
For the period from 13 May 2025 (date of incorporation) to 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act

In accordance with section 166 (d) of the Mauritius Companies Act, we certify to the best of our knowledge and belief, that the Company has filed with the Registrar of Companies, all such returns as required of the Company for the financial period from 13 May 2025 (date of incorporation) to 31 March 2026.

For and on behalf of **Rogers Capital Corporate Services Limited**
Company secretary

Date: 14 May 2026

Auditor's report to member of NexStyle Apparel Manufacturing Limited

Opinion

We have audited the financial statements of **NexStyle Apparel Manufacturing Limited** (the "Company") set out on pages 7 to 28 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the period then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the period then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's report to member of NexStyle Apparel Manufacturing Limited (continued)

Responsibilities of the Directors for the Financial Statements (continued)

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

NexStyle Apparel Manufacturing Limited

Notes to and forming part of the financial statements
for the period from 13 May 2025 (date of incorporation) to 31 March 2026

1. General information

The Company was incorporated as a private limited company on 13 May 2025 and was granted a Global Business Licence on 13 May 2025. The Company's registered office is C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

The Company is a holder of a Global Business Licence under the Mauritius Companies Act 2001 and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies, the Company has chosen to use the United States Dollar (USD) as its reporting currency.

2. Reporting period

The Company was incorporated on 13 May 2025 and has prepared its first financial statements as from its date of incorporation 13 May 2025 to 31 March 2026. As such, no comparatives are available.

3. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) – 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

These financial statements have been prepared under the going concern basis using the historical cost convention, except for financial instruments which are carried at amortised cost.

(c) Functional and presentation currency

These financial statements are presented in USD which is the Company's functional and presentation currency.

(d) Use of estimates and judgement

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised prospectively.

3. Basis of preparation (continued)

(d) Use of estimates and judgement (continued)

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

- Recognition of deferred tax assets: availability of future taxable profit against which carry forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the USD.

Going Concern

Management has made an assessment in respect of the entity's going concern and is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

4. Application of new and revised International Financial Reporting Standards (IFRSs)

4.1 New standards, interpretations and amendments adopted during the period

There have been amendments and interpretations that have become effective for the current year. The Company has adopted the following new interpretation during the period:

Classification of liabilities as current or non-current and on-current liabilities with covenants *(Amendments to IAS 1)*

Under existing IAS 1 requirements, companies classify liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional was removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. The amendments confirm that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

The amendments also clarify how an entity classifies a liability that can be settled in its own shares. When a liability includes a counterparty conversion option that involves a transfer of the company's own equity instruments, the conversion option is recognised as either equity or a liability separately from the host liability under IAS 32 Financial Instruments: Presentation. The amendments now clarified that when a company classifies the host liability as current or non-current, it can ignore only those conversion options that are recognised as equity.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with early application permitted. It also specifies the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments.

The directors have assessed that the amendments did not have any impact on the separate financial statements.

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2025 or later periods, but which the Company has not early adopted.

At the reporting date of these financial statements, the following were in issue but not yet effective:

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

5. Critical accounting estimates and judgements

The Company makes estimates and judgements that affect the reported amounts of assets and liabilities within the next year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Determination of functional currency

The determination of the functional currency of the Company is critical since recordings of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the United States Dollar (USD).

Estimates and assumptions

Impairment of investment in subsidiaries

The carrying values of investment in subsidiaries are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the subsidiary, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

6. Material accounting policies

The accounting policies set out below have been applied in the preparation of these financial statements.

(a) Foreign currency transactions

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

(b) Revenue recognition

Revenue is recognised as follows:

- Trading income from sales of vanilla and cloves and other spices.
- Dividend income: when the Company's right to receive payment is established.

(c) Stated capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

(d) Expenses

All expenses are recognised in profit or loss on an accrual basis.

(e) Taxation

Taxation comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises of the expected tax payable or receivable on the taxable income or loss for the period. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6. **Material accounting policies (continued)**

(e) Taxation (continued

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

(f) Investments in subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Investment in subsidiary is shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(g) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

6. **Material accounting policies (continued)**

(h) Financial instruments

(i) Recognition and initial measurement

All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVTOCI) – debt investment; FVTOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets (continued)

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered as sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest (continued)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses:

Financial assets at amortised cost

These assets are subsequently measured at Amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gain or losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss. A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through profit or loss are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial liabilities – Classification, subsequent measurement and gains and losses (continued)

Derecognition

The Company derecognises a financial liability when its contractual obligation is discharged or cancelled, or expires. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iii) Impairment of assets

Impairment

The Company recognises loss allowance for Expected Credit Loss ("ECL") on:

- Financial assets measured at amortised cost;

The Company measured loss allowance at an amount equal to lifetime ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e., the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(iii) Impairment of assets (continued)

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the entity of accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

7. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. Trade and other receivables exclude prepayments amounting to **USD 912.**

	Carrying amount		
31 March 2026	**Financial assets USD**	**Other financial liabilities USD**	**Total USD**

Other payables	**-**	**23,288**	**23,288**
	-	**23,288**	**23,288**

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management

Introduction and preview

Financial instruments carried in the statement of financial position include other receivables, cash and cash equivalents, loan from shareholder and other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risks are market risk, liquidity risk and credit risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly review their risk management policies and systems to reflect changes in markets and emerging best practice.

Overview

The Company has exposure to the following risk arising from financial instruments:

- Market risk
- Liquidity risk
- Credit risk

- *Market risk*

Market risk represents the potential loss that can be caused by a change in the market value of the financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility.

The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limits its exposure to market declines.

(i) Interest rate risk

The majority of the Company's financial assets and financial liabilities are non-interest bearing. As such, the Company is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity under both normal and stressed condition to meet its liabilities when they become due without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the Company's contractual maturities of financial liabilities:

Period ended 31 March 2026

	Due on demand USD	Due for less than 1 year USD	Due for more than 1 year USD	Total USD
Financial liabilities				
Other payables	**-**	**23,288**	**-**	**23,288**
Total financial liabilities	**-**	**23,288**	**-**	**23,288**

- *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet contractual obligations, and arises from cash and cash equivalents.

The Company also limits its exposure to credit risk by dealing only with counterparties that has a good credit rating and management does not expect counter party to fail to meet its obligations.

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	Carrying amount Period ended 31 March 2026 USD
Other receivables	**258,994**
Cash and cash equivalents	**21,861**
	280,855

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Credit risk (continued)*

Cash and cash equivalents

The Company held cash and cash equivalents of **USD 21,861** at 31 March 2026. The cash and cash equivalents are held with banks with good repute and having strong track record in the banking industry. Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties. The expected credit loss on cash and cash equivalents was deemed by management to be not material and therefore no impairment allowances were accounted for.

Other receivables

The Company applies the simplified approach to measuring expected credit losses, as permitted by IFRS 9, which uses a 12-month expected loss allowance for all other receivables. The expected credit loss on other receivables was deemed by management to be not material and therefore no impairment allowances were accounted for.

8. **Income tax expense**

Income tax

The Company was issued with a Global Business Licence ("GBL") on 13 May 2026 and is subject to income tax in Mauritius on its net income at 15%.

Recognised in the statement of profit or loss and other comprehensive income

Current tax expense

	Period from 13 May 2025 (date of incorporation) to 31 March 2026 USD

PDS Manufacturing Limited	Related Party	Loan receivable	**255,000**
PDS Manufacturing Limited	Related Party	Interest receivable	**3,694**
Balance outstanding at 30 June:			
PDS Manufacturing Limited	Related Party	Amount receivable	**258,694**

14. Capital management

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern. As the Company is part of a larger group, the Company's sources of additional capital and policies for distribution of excess capital may also be affected by the group's capital management objectives.

The Company defines "capital" as including all components of equity. Trading balances that arise as a result of trading transactions with other group Companies are not regarded by the Company as capital.

The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the group to which the Company belongs. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company or the group. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

15. Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

16. Holding and ultimate holding company

The Company is a wholly owned subsidiary of NexStyle Apparel Manufacturing Limited (India), a Company incorporated in India. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

17. Events after the reporting date

There have been no significant adjusting events after the reporting date which needs disclosures in or amendments to the financial statements for the year ended 31 March 2026.

PDS Manufacturing Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of PDS Manufacturing Limited (the "Company") for the year ended 31 March 2026.

Principal activity

The Company is mainly involved in Investment Holdings activities in the manufacturing and textile industry.

Results and dividend

The results for the year are shown on page 7.

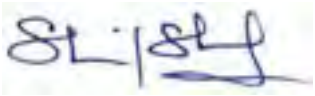
The directors do not recommend the payment of a dividend for the year under review (2025: Nil).

Statement of directors' responsibilities in respect of financial statements

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.



Going concern

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

Auditors

Lancasters Chartered Accountants have been appointed as auditors and a resolution concerning their re-appointment will be proposed at the next annual meeting of the shareholder.

By order of the Board

Director Date: 14 May 2026

PDS Manufacturing Limited

Secretary's certificate
for the year ended 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act

In accordance with section 166 (d) of the Mauritius Companies Act, we certify to the best of our knowledge and belief, that the Company has filed with the Registrar of Companies, all such returns as required of the Company for the year ended 31 March 2026.

For and on behalf of **Rogers Capital Corporate Services Limited**

Auditor's report to member of PDS Manufacturing Limited

Opinion

We have audited the financial statements of **PDS Manufacturing Limited** (the "Company") set out on pages 7 to 29 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the period then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Auditor's report to member of PDS Manufacturing Limited (continued)

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Auditor's report to member of PDS Manufacturing Limited (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

  We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

The notes on pages 11 to 29 form part of these financial statements.

1. General information

The Company was incorporated as a private limited company on 22 March 2021 and was granted a Global Business Licence on 22 March 2021. The Company's registered office is at C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The Company is mainly involved in Investment Holdings activities in the manufacturing and textile industry.

The Company is a holder of a Global Business Licence under the Mauritius Companies Act 2001 and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies, the Company has chosen to use USD as its reporting currency.

2. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) – 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

These financial statements have been prepared under the going concern basis using the historical cost convention, except for financial instruments which are carried at amortised cost.

(c) Functional and presentation currency

The financial statements are presented in United States Dollar (USD) which is the Company's functional currency and presentation currency.

(d) Use of estimates and judgement

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised prospectively.

2. Basis of preparation (continued)

(d) Use of estimates and judgement (continued)

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

- Recognition of deferred tax assets: availability of future taxable profit against which carry forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Going Concern

Management has made an assessment in respect of the entity's going concern and is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

3. Application of new and revised International Financial Reporting Standards (IFRSs)

3.1 New standards, interpretations and amendments adopted during the year

There have been amendments and interpretations that have become effective for the current year. The Company has adopted the following new interpretation during the year:

Classification of liabilities as current or non-current and on-current liabilities with covenants *(Amendments to IAS 1)*

Under existing IAS 1 requirements, companies classify liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional was removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. The amendments confirm that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

The amendments also clarify how an entity classifies a liability that can be settled in its own shares. When a liability includes a counterparty conversion option that involves a transfer of the company's own equity instruments, the conversion option is recognised as either equity or a liability separately from the host liability under IAS 32 Financial Instruments: Presentation. The amendments now clarified that when a company classifies the host liability as current or non-current, it can ignore only those conversion options that are recognised as equity.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with early application permitted. It also specifies the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments.

The directors have assessed that the amendments did not have any impact on the separate financial statements.

3. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

3.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2026 or later periods, but which the Company has not early adopted.

At the reporting date of these financial statements, the following were in issue but not yet effective:

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

3. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

3.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

4. Critical accounting estimates and judgements

The Company makes estimates and judgements that affect the reported amounts of assets and liabilities within the next year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the USD.

Impairment of investment in subsidiaries

The carrying values of investment in subsidiaries are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the subsidiary, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

5. Material accounting policies

The accounting policies set out below have been applied in the preparation of these financial statements.

(a) Foreign currency transactions

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognized in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

(b) Revenue recognition

Revenues of the company will be in terms of dividends and interest received from its subsidiaries.

(c) Finance income and finance costs

The Company's net finance income includes interest income and foreign exchange differences.

(d) Stated capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

5. **Material accounting policies (continued)**

(e) Investments in subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Investment in subsidiary is shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(f) Expenses

All expenses are recognised in profit or loss on an accrual basis.

(g) *Taxation*

Taxation comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises of the expected tax payable or receivable on the taxable income or loss for the period. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

5. **Material accounting policies (continued)**

(g) Taxation (continued)

(ii) Deferred tax (continued)

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

(h) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(I) Financial instruments

Recognition and initial measurement

All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVTOCI) – debt investment; FVTOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

5. **Material accounting policies (continued)**

(I) Financial instruments (continued)

Classification and subsequent measurement (continued)

Financial assets (continued)

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered as sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

5. **Material accounting policies (continued)**

(l) Financial instruments (continued)

Classification and subsequent measurement (continued)

Financial assets (continued)

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses:

Financial assets at amortised cost

These assets are subsequently measured at Amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gain or losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

5. **Material accounting policies (continued)**

(I) Financial instruments (continued)

Classification and subsequent measurement (continued)

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss. A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through profit or loss are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition

The Company derecognises a financial liability when its contractual obligation is discharged or cancelled, or expires. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Impairment of assets

Impairment

The Company recognises loss allowance for Expected Credit Loss ("ECL") on:

- Financial assets measured at amortised cost;

The Company measured loss allowance at an amount equal to lifetime ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e., the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

5. **Material accounting policies (continued)**

(I) Financial instruments (continued)

Impairment of assets (continued)

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the entity of accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

6. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. Trade and other receivables exclude prepayments amounting to **USD 862** (2025: USD 727).

	-	269,076	269,076

6. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management

Introduction and preview

Financial instruments carried in the statement of financial position include, other receivables, cash and cash equivalents, and other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risks are market risk, liquidity risk and credit risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly review their risk management policies and systems to reflect changes in markets and emerging best practice.

Overview

The Company has exposure to the following risk arising from financial instruments:

- Market risk
- Liquidity risk
- Credit risk

- *Market risk*

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Company's performance or financial position. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

(i) Foreign exchange risk

Foreign exchange risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is not subject to currency risk as its financial assets and liabilities are denominated in its functional currency, the USD.

(ii) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Company is not subject to interest rate risk as its financial assets and liabilities are non-interest earning/ bearing.

(iii) Price risk

Price risk is the risk of unfavourable changes in fair values of equities as the result of changes in the value of individual shares. The Company has no exposure to price risk at reporting date.

6. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity under both normal and stressed condition to meet its liabilities when they become due without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the Company's contractual maturities of financial liabilities:

31 March 2026

	Due on demand USD	**Due for less than 1 year USD**	**Due for more than 1 year USD**	**Total USD**
Financial liabilities				
Advances from related parties	**673,067**	**-**	**-**	**673,067**
Loan payable to subsidiary	**-**	**255,000**	**-**	**255,000**
Interest payable to subsidiary	**-**	**3,694**	**-**	**3,694**
Other payables	**-**	**29,247**	**-**	**29,247**
Total financial liabilities	**673,067**	**287,941**	**-**	**961,008**

31 March 2025

	Due on demand USD	Due for less than 1 year USD	Due for more than 1 year USD	Total USD
Financial liabilities				
Advances from holding company	253,921	-	-	253,921
Other payables	-	15,155	-	15,155
Total financial liabilities	253,921	15,155	-	269,076

- *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet contractual obligations and arises from cash and cash equivalents.

The Company also limits its exposure to credit risk by dealing only with counterparties that has a good credit rating and management does not expect counter party to fail to meet its obligations. The Company has no exposure to credit risk at reporting date.

7. Income tax expense

Income tax

The Company was issued with a Global Business Licence ("GBL") on 11 June 2019 and is subject to income tax in Mauritius on its net income at 15%.

The Company may apply a partial exemption on its foreign dividend income, interest income and profits from foreign permanent establishments: the partial exemption is computed at 80% of the relevant foreign sourced income. The partial exemption is not mandatory: The Company may apply the credit system if it so wishes.

Capital gains are exempt from tax in Mauritius.

The Company is a Global Business Licence company for the purpose of the Financial Services Act 2007. Gains or profits derived from the sale of units or of securities by a company holding a Global Business Licence are exempt in Mauritius.

Deferred tax

A deferred tax asset amounting to **USD Nil** (2025: USD Nil) has not been recognised in respect of the tax losses carried forward as the directors consider that it is not probable that future taxable profit will be available against which the unused tax losses can be utilised. Tax losses can be carried forward up to a maximum of five years. No Company's tax losses available for set-off against future taxable income in 2025.

PDS Sourcing Limited	Related Party	Amount payable	**5,115**	-

13. **Impact of geographical conflicts in the Middle East**

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

14. **Holding and ultimate holding company**

The Company is a wholly owned subsidiary of Multinational Textile Group Limited and NexStyle Apparel Manufacturing Limited; both Companies are incorporated in the Republic of Mauritius. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

15. **Events after the reporting date**

There have been no significant adjusting events after the reporting date which needs disclosures in or amendments to the financial statements for the year ended 31 March 2026.

PDS Sourcing Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of PDS Sourcing Limited (the "Company") for the year ended 31 March 2026.

Principal activity

The principal activity of the Company is investment holding.

Results and dividend

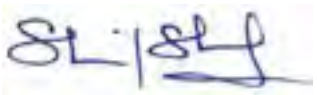
The results for the year are shown on page 7.

The directors paid a dividend of USD 5,500,000 of a dividend for the year under review. (2025: USD 3,500,000).

Statement of directors' responsibilities in respect of financial statements

Mauritius Companies Act requires the directors to prepare financial statements for each financial year giving a true and fair view of the statement of financial position, the statement of profit or loss and other comprehensive income, statement of changes in equity, statement of cash flows and the notes to the accounts of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.



The directors have confirmed that they have complied with the above requirements in preparing the financial statements.

The directors' responsibilities include: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors

Our auditors, Lancasters Chartered Accountants have expressed their willingness to continue in office for the next financial year end.

By order of the Board of Directors

Director Date: 14 May 2026

Rogers Capital

PDS Sourcing Limited

Secretary's certificate
for the year ended 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act 2001

In accordance with section 166 (d) of the Mauritius Companies Act 2001, we certify that to the best of our knowledge and belief, the Company has filed with the Registrar of Companies, all such returns as are required of the Company under the Mauritius Companies Act 2001.

For and on behalf of **ROGERS CAPITAL CORPORATE SERVICES LIMITED**

Auditor's report to member of PDS Sourcing Limited

Opinion

We have audited the financial statements of **PDS Sourcing Limited** (the "Company") set out on pages 7 to 38 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

GGi
INDEPENDENT MEMBER

Auditor's report to member of PDS Sourcing Limited (continued)

Responsibilities of the Directors for the Financial Statements (continued)

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

  We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Auditor's report to member of PDS Sourcing Limited (continued)

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

PDS Sourcing Limited

Notes to and forming part of the financial statements
for the year ended 31 March 2026

1. General information

PDS Sourcing Ltd (The "Company") is a private limited company, incorporated and domiciled in Mauritius. The Company's registered office is at C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius. The main activity of the Company is that of investment holding.

The Company is a holder of a Global Business Licence under the Mauritius Companies Act 2001 and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies the Company has chosen to retain the United States Dollar (USD) as its reporting currency.

2. Basis of preparation

(a) Basis of accounting

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) - 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

These financial statements have been prepared under the going concern basis using the historical cost convention, except for financial instruments which are carried at amortised cost.

(c) Functional currency and presentation currency

The financial statements are presented in United States Dollar (USD) which is the Company's functional currency and presentation currency.

(d) Use of estimates and judgement

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

2. **Basis of preparation (continued)**

(d) Use of estimates and judgement (continued)

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

- Recognition of deferred tax assets: availability of future taxable profit against which carry forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

(e) Measurement of fair values

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement

(f) **Application of new and revised International Financial Reporting Standards (IFRSs)**

New standards, interpretations and amendments adopted during the period

The Company has considered all amendments that became effective for the current reporting period. Management has assessed the potential impact of these newly effective standards and amendments on the Company's separate financial statements.

Based on this assessment, none of the newly effective standards or amendments have had a material impact on the amounts reported in the separate financial statements or on the Company's accounting policies.

Accordingly, no changes have been made to the Company's accounting policies in the current year.

2. **Basis of preparation (continued)**

Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

Standards, Amendments to published Standards and Interpretations issued but not yet effective

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

2. **Basis of preparation (continued)**

Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 19 Subsidiaries without Public Accountability: Disclosures

Subsidiaries without Public Accountability: Disclosures: IFRS 19 is a non-mandatory standard. It specifies the disclosure requirements that eligible subsidiaries are permitted to apply instead of the disclosure requirements in other IFRS Accounting Standards. It allows eligible entities to benefit from reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS Accounting Standards. Subsidiaries are eligible to apply IFRS 19 if they do not have public accountability and their parent, intermediate parent or ultimate parent company produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.

The effective date of this amendment has been deferred indefinitely until further notice

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

3. Material accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements:

(a) Foreign currency translations

Transactions in foreign currencies are translated into the respective functional currencies of the company at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of transaction.

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the statement of profit or loss within "finance income/ costs".

(b) Revenue recognition

Revenue is recognised as follows:

- Marketing and consultancy income are accounted for as it accrues
- Dividend income is recognised when the right to receive income is established.
- Service fee income

(c) Finance income and finance costs

The Company's net finance income includes interest income and foreign exchange differences.

3. **Material accounting policies (continued)**

(d) Taxation

Taxation comprises current withholding and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income ("OCI").

Current tax
Current tax is the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if the Company has the legal right and the intention to settle on a net basis.

Deferred tax
Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.
Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;

- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

3. **Material accounting policies (continued)**

(e) Investment in subsidiaries

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Investment in subsidiaries are shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(f) Financial instruments

Recognition and initial measurement

Financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost or FVTPL or FVTOCI. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

3. **Material accounting policies (continued)**

(f) Financial instruments (continued)

Financial assets(continued)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- Financial assets measured at amortised cost include loans to related parties, other receivables (excluding prepayments), short-term deposit and cash and cash equivalents.

Financial assets - Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintain a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;

- how the performance of the portfolio is evaluated and reported to the Company's management;

- the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed;

- how managers of the business are compensated – e.g whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and

- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Financial assets -Assessment whether contractual cash flows are solely payments of principal and interest.
For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

3. **Material accounting policies (continued)**

(f) Financial instruments (continued)

Financial assets -Assessment whether contractual cash flows are solely payments of principal and interest

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

Financial assets - Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities measured at amortised cost

Financial liabilities

This category includes all financial liabilities, other than those measured at fair value through profit or loss. The Company includes in this category: loan from holding company, loan from financial institution and other payables.

Non-derivative financial liabilities – Measurement

Other non-derivative financial liabilities are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortised cost using the effective interest method. Non-derivative liabilities comprise of loan from holding company, loan from financial institution and other payables.

3. **Material accounting policies (continued)**

(f) Financial instruments (continued)

Non-derivative financial assets -Impairment

The Company recognises loss allowances for ECLs on:

- financial assets measured at amortised cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

- Loss allowances are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security; or
- the financial asset is more than 90 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

3. **Material accounting policies (continued)**

(f) Financial instruments (continued)

Non-derivative financial assets -Impairment (continued)

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

- Loss allowances are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security; or

- the financial asset is more than 90 days past due.
  Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

(f) Financial instruments (continued)

Non-derivative financial assets –Impairment (continued)

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer
- it is probable that the borrower will enter bankruptcy or other financial reorganisation
- the underlying project is put on hold
- breach of contract such as a default or being more than 90 days past due.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

Derecognition

Financial assets

The Company derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire; or
- it transfers the rights to receive the contractual cash flows in a transaction in which either:
- substantially all of the risks and rewards of ownership of the financial asset are transferred;or
- the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

3. **Material accounting policies (continued)**

(f) Financial instruments (continued)

Derecognition (continued)

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

There is no offsetting of financial instruments applied as at reporting date in the statement of financial position.

(g) Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

3. Material accounting policies (continued)

(h) Expenses

All expenses are recognised in the statement of profit and loss and comprehensive income on an accrual basis.

(i) Provisions

A provision is recognised if, as a result of a past event, the Company have a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

4. Critical accounting estimates and judgements

Determination of functional currency

The determination of functional currency of the Company is critical since recording of transactions and exchange differences arising there are dependent on the functional currency selected. As described in Note 2 (c), the directors have considered those factors therein and have determined that the functional currency of the Company is the United States Dollar (USD).

Impairment assessment of investments

Management carries out regular review of the status of the assets of the Company to determine whether there is any indication that these assets suffered any impairment.

If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment, which is then recognised in profit or loss. Management checks whether there is objective evidence that the assets are impaired and that the fair values have declined. Management estimates of the impairment are based on critical evaluation of the economic circumstances involved, historical experience and other factors considered to be relevant.

Estimation of recoverable amounts of loans to related parties

In preparing the financial statements, the directors have made estimates of the recoverable amounts of loans to related parties and impaired those receivables where the carrying amounts exceed its recoverable amounts. The estimation of recoverable amounts involves an assessment of the financial condition of the debtors concerned and an estimate of the timing and the extent of cash flows likely to be received by the Company.

5. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair value

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

31 March 2026	**Carrying amounts**

5. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management

Introduction and preview

Financial instruments carried on the statement of financial position include other receivables, cash and cash equivalents, other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risk are market risk, credit risk and liquidity risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly reviews their risk management policies and systems to reflect changes in markets and emerging best practice.

Risk management is carried out by the Board of directors through board meetings. The Company provide principles for overall risk management.

Overview

The Company has exposure to the following risks from its use of financial instruments:

- Market risk
- Credit risk
- Liquidity risk

Market risk

Market risk represents the potential loss that can be caused by a change in the market value of financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility. The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limiting its exposure to market declines.

(i) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Company has no significant exposure to interest rate risk.

5. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

(ii) Currency risk

The Company has certain financial instruments denominated in GBP. Consequently, the Company is exposed to the risk that the exchange rate of the USD relative to GBP may change in a manner, which has a material effect on the reported values of the Company's assets and liabilities, which are denominated in USD.

Currency profile

	Financial assets 2026 USD	**Financial liabilities 2026 USD**	Financial assets 2025 USD	Financial liabilities 2025 USD
USD	**18,798,319**	**20,792,413**	13,607,279	12,324,981
GBP	**2,431,469**	**139,124**	2,279,843	129,552
	21,229,788	**20,931,537**	15,887,122	12,454,533

Sensitivity Analysis:

A 10 % strengthening of USD against the GBP at 31st March 2026 would have increased net profit before tax by **USD 229,234** (2025: USD 215,029). This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis as in 2023.

Currency	**2026 USD**	2025 USD
GBP	**229,237**	215,029

Similarly, a 10% weakening of the USD against the GBP at 31 March 2026 would have had the exact reverse effect.

6. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

Credit risk

Credit risk represents the potential loss that the Company would incur if counter parties fail to perform pursuant to the terms of their obligations to the Company. The Company limits its credit risk by carrying out transactions through companies within the group. At the reporting date, there was no significant concentration of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	2026	2025
	USD	USD
Other receivables	**21,154,830**	15,870,265
Cash and cash equivalents	**74,958**	17,585
	21,229,788	15,887,850

Expected credit loss assessment

(i) *Other receivables*

The Company applies the simplified approach to measuring expected credit losses, as permitted by IFRS 9, which uses a 12-month expected loss allowance for all other receivables.

The expected credit loss on other receivables was deemed by management to be not material and therefore no impairment allowances were accounted for.

(ii) Cash and cash equivalents

The Company held cash and cash equivalents of **USD 74,958** at 31 March 2026 (2025: USD 17,585). The cash and cash equivalents are held with banks with international repute and having strong track record in the banking industry.

Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

The expected credit loss on cash and cash equivalents was deemed by management to be not material and therefore no impairment allowances were accounted for.

6. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to manage liquidity is to ensure, as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to the Company's reputation.

9. Taxation

The Company, being resident in Mauritius, is liable to income tax in Mauritius on its chargeable income at the rate of 15% (2024: 15%).

Pursuant to the Finance Act 2019, the Company's foreign sourced income is eligible for a foreign tax credit which is computed as the higher of the Mauritian tax and the foreign tax on the respective foreign sourced income. The foreign tax for a GBL1 company is based on either the actual foreign tax charged by the foreign jurisdiction or a deemed foreign tax. The deemed amount of foreign tax is based on 80% of the Mauritian tax on the relevant foreign sourced income. In computing its total actual foreign tax credit, the Company is allowed to pool all its foreign sourced income. Under the new regime, the Company will be able to claim an 80% partial exemption on specific types of income (including foreign dividends and interest), subject to meeting pre-defined substance conditions. Other types of income not falling within the categories of income benefitting from the partial exemption will be taxed at 15%. As an alternative to the partial exemption, the Company can claim a tax credit against its Mauritius tax liability based on the foreign tax charged on the income in the foreign jurisdiction.

A reconciliation of the actual income tax based on accounting profit and the actual income tax expense is as follows:

16. **Capital management**

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern. As the Company is part of a larger group, the Company's sources of additional capital and policies for distribution of excess capital may also be affected by the group's capital management objectives.

The Company defines "capital" as including all components of equity. Trading balances that arise as a result of trading transactions with other group Companies are not regarded by the Company as capital.

The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the group to which the Company belongs. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company or the group. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

17. **Holding and ultimate holding company**

The Company is a sub subsidiary of PDS Limited, a Company incorporated in Maharashtra, India. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

18. **Capital Management**

Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

19. **Events after the reporting date**

There have been no material events after the reporting date which require disclosure or adjustments to the financial statements for the year ended 31 March 2026.

PDS Ventures Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of PDS Ventures Limited (the "Company") for the year ended 31 March 2026.

Principal activity

The principal activity of the Company is the holding of investments.

Results and dividend

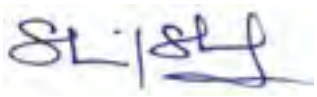
The results for the year are shown on page 7.

The directors do not recommend the payment of a dividend for the year under review (2025: Nil).

Statement of directors' responsibilities in respect of financial statements

Mauritius Companies Act requires the directors to prepare financial statements for each financial year giving a true and fair view of the statement of financial position, the statement of profit or loss and other comprehensive income, statement of changes in equity, statement of cash flows and the notes to the accounts of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether IFRS standards as issued by International Accounting Standards Board
- ("IFRS Standards") have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.



The directors have confirmed that they have complied with the above requirements in preparing the financial statements.

The directors' responsibilities include: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors

The auditors, Lancasters Chartered Accountants, have expressed their willingness to continue in office until the next Annual Meeting.

By order of the Board of Directors

Director Date: 14 May 2026

PDS Ventures Limited

Secretary's certificate
for the year ended 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act 2001

In accordance with section 166 (d) of the Mauritius Companies Act 2001, we certify that to the best of our knowledge and belief, the Company has filed with the Registrar of Companies, all such returns as are required of the Company under the Mauritius Companies Act 2001.

For and on behalf of **ROGERS CAPITAL CORPORATE SERVICES LIMITED**
Company secretary

Date: 14 May 2026

Auditor's report to member of PDS Ventures Limited

Opinion

We have audited the financial statements of **PDS Ventures Limited** (the "Company") set out on pages 7 to 34 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Auditor's report to member of PDS Ventures Limited (continued)

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Auditor's report to member of PDS Ventures Limited (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

  We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

The notes on pages 11 to 34 form part of these financial statements

PDS Ventures Limited

Notes to and forming part of the financial statements
for the year ended 31 March 2026

1. General information

PDS Ventures Ltd (the "Company") was incorporated as a private company in the Republic of Mauritius on 25 November 2015 and was granted a Global Business Licence on 26 November 2015. The Company's registered office is at C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The principal activity of the Company is that of investment holding.

2. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) - 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

The financial statements have been prepared on a historical cost basis except where stated otherwise.

(c) Functional currency and presentation currency

The financial statements are presented in United States Dollar (USD) which is the Company's functional currency and presentation currency.

(d) Use of the estimates and judgement

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

<u>Assumption and estimation uncertainties</u>
Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ended 31 March 2026 is included in the relevant notes as follows:

- Impairment test: key assumptions underlying recoverable amounts, including the recoverability of loan;
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

2. **Basis of preparation (continued)**

(d) Use of estimates and judgement (continued)

Determination of functional currency

The determination of functional currency of the Company is critical since recording of transactions and exchange differences arising are dependent on the functional currency selected.

Since the Company operates in an international environment and conducts most of its transaction in foreign currency, the Company has chosen to retain United States Dollar (USD) as its reporting currency. The Company determines its functional currency based on the primary economic environment in which the Company operates.

(e) Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

(f) **Application of new and revised International Financial Reporting Standards (IFRSs)**

New standards, interpretations and amendments adopted during the period

The Company has considered all amendments that became effective for the current reporting period. Management has assessed the potential impact of these newly effective standards and amendments on the Company's separate financial statements.

Based on this assessment, none of the newly effective standards or amendments have had a material impact on the amounts reported in the separate financial statements or on the Company's accounting policies.

Accordingly, no changes have been made to the Company's accounting policies in the current year.

2. **Basis of preparation (continued)**

Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

Standards, Amendments to published Standards and Interpretations issued but not yet effective

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

2. **Basis of preparation (continued)**

Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 19 Subsidiaries without Public Accountability: Disclosures

Subsidiaries without Public Accountability: Disclosures: IFRS 19 is a non-mandatory standard. It specifies the disclosure requirements that eligible subsidiaries are permitted to apply instead of the disclosure requirements in other IFRS Accounting Standards. It allows eligible entities to benefit from reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS Accounting Standards. Subsidiaries are eligible to apply IFRS 19 if they do not have public accountability and their parent, intermediate parent or ultimate parent company produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.

The effective date of this amendment has been deferred indefinitely until further notice

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

3. Material accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements unless otherwise stated.

(a) Foreign currency translation

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the statement of profit or loss within “Finance income/ costs”.

(b) Finance income and finance costs

The Company’s finance income/ costs include interest on bank balances, losses on cash and cash equivalents and foreign exchange gain or losses. Interest income is recognised using the effective interest method.

(c) Revenue

Interest income: as it accrues (taking into account the effective yield on the assets)

(d) Expenses

All expenses are recognised in statement of profit or loss and other comprehensive income on an accrual basis.

3. **Material accounting policies (continued)**

(e) Taxation

Taxation comprises current withholding and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income ("OCI").

(i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and
- Temporary differences related to investment in subsidiary to the extent the Company is able to control the timing of the reversal of the temporary differences and it is probable that it will not reverse in the foreseeable future; and

Taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

3. **Material accounting policies (continued)**

(e) Taxation (continued)

(ii) Deferred tax (continued)

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

(e) Investments in jointly controlled entities

The Company's has interests in joint ventures.

A joint venture is an arrangement in which the Company has joint control, whereby the Company has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

The Company has equity accounted its investment in jointly controlled entities.

(g) Impairment of non-financial assets

The carrying amounts of non-financial assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit ("CGU") exceeds its estimated recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU.

Impairment losses are recognised in the statement of profit or loss. Impairment losses recognised in prior periods are assessed at each balance sheet date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3. **Material accounting policies (continued)**

(h) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(i) Financial instruments

Recognition and initial measurement

Financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at Fair Value Through Profit or Loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issue.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at amortised cost include cash and cash equivalents and other receivables (excluding prepayments).

3. **Material accounting policies (continued)**

(i) Financial instruments (continued)

Classification and subsequent measurement (continued)

Financial assets - Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintain a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed;
- how managers of the business are compensated – e.g whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The Company had no financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets - Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money (example: periodic reset of interest rates).

3. **Material accounting policies (continued)**

(i) Financial instruments (continued)

Classification and subsequent measurement (continued)

Financial assets - Assessment whether contractual cash flows are solely payments of principal and interest (continued)

The Company has determined that it has the following business model:

- Held-to-collect business model: this includes cash and cash equivalents and other receivables (excluding prepayments). These financial assets are held to collect contractual cash flows.

Financial assets - Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities

Financial liabilities measured at amortised cost

This category includes all financial liabilities, other than those measured at fair value through profit or loss. The Company includes in this category other payables and redeemable ordinary shares.

Amortised cost measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant year. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability at initial recognition. When calculating the effective interest rate, the Company estimates the future cash flows considering all contractual terms of the financial instruments but not the future credit losses.

3. **Material accounting policies (continued)**

(i) Financial instruments (continued)

Impairment

The Company recognises loss allowances for Expected Credit Losses ("ECLs") on financial assets measured at amortised cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

Credit risk on a financial asset is assumed to have been increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default:

- when the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising assets (if any is held); or
- the financial asset is more than 90 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

3. **Material accounting policies (continued)**

(i) Financial instruments (continued)

Impairment (continued)

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer
- it is probable that the borrower will enter bankruptcy or other financial reorganisation
- the underlying project is put on hold
- breach of contract such as a default or being more than 90 days past due.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

Derecognition

Financial assets

The Company derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire; or
- it transfers the rights to receive the contractual cash flows in a transaction in which either:
- substantially all of the risks and rewards of ownership of the financial asset are transferred; or
- the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

3. **Material accounting policies (continued)**

(i) Financial instruments (continued)

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

There is no offsetting of financial instruments applied as at reporting date in the statement of financial position.

(j) Specific instruments

Cash and cash equivalents

Cash comprises cash at bank. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

(k) Stated capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

(l) Share premium

When shares are sold or reissued subsequently, the amount received is recognised as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium.

3. **Material accounting policies (continued)**

(m) Redeemable ordinary shares

Redeemable ordinary shares are classified as a liability if it is redeemable on a specific date at the option of the shareholders, or if dividend payments are not discretionary. Dividends thereon are recognised as interest expense in the statement of profit or loss and other comprehensive income as accrued.

(n) Translation and other reserves

The translation reserve comprises of foreign currency differences arising from the translation of the financial statements of foreign operations, as well as the effective portion of any foreign currency differences.

4. **Critical accounting estimates and judgements**

Critical accounting judgements in applying the Company's accounting policies

The Company makes estimates and judgments that affect the reported amounts of assets and liabilities within the next year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical judgement areas

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising there on are dependent of the functional currency selected. As described in Note 2(c), the directors have considered those factors therein and have determined that the functional currency of the Company is USD.

Estimates and assumptions

Impairment of investment in joint venture

The carrying values of investment in joint venture are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the joint venture, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

5. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair value

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in
the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

	Carrying amount		
31 March 2026	**Financial assets USD**	**Other financial liabilities USD**	**Total USD**

Other payables	-	4,811	4,811
	-	54,811	54,811

5. **Financial instruments – Fair values and risk management (continued)**

b) Financial risk management

Introduction and preview

Financial instruments carried on the statement of financial position include other receivables, cash and cash equivalents, other payables and advance from holding company. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risk are market risk, credit risk and liquidity risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly reviews their risk management policies and systems to reflect changes in markets and emerging best practice.

Risk management is carried out by the Board of directors through board meetings. The Company provide principles for overall risk management.

Overview

The Company has exposure to the following risks from its use of financial instruments:

- Market risk
- Credit risk
- Liquidity risk

Market risk

Market risk represents the potential loss that can be caused by a change in the market value of financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility. The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limiting its exposure to market declines.

(i) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Company has no significant exposure to interest rate risk.

5. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

(ii) Currency risk

Currency risk is the risk that the Company might be exposed to exchange rates fluctuations arising from currencies other than the functional currency which might have a material impact on the Company's financial assets and liabilities which are denominated in these currencies. All of the Company's financial assets and liabilities are denominated in USD. Consequently, the Company is not exposed to the risk of foreign currency exchange rates.

Credit risk

Credit risk represents the potential loss that the Company would incur if counter parties fail to perform pursuant to the terms of their obligations to the Company. The Company limits its credit risk by carrying out transactions through companies within the group. At the reporting date, there was no significant concentration of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	2026	2025
	USD	USD
Other receivables	**625,668**	414,502
Cash and cash equivalents	**50,377**	21,781
	676,045	436,283

Expected credit loss assessment

Cash and cash equivalents

The Company's policy is to maintain its cash balance with a reputed banking institution and to monitor the placement of cash balances on an ongoing basis. Due to the low credit risk of the counterparty, the expected credit loss (ECL) was considered to be immaterial. The carrying amount of financial assets represents the maximum credit exposure.

(b) Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to manage liquidity is to ensure, as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to the Company's reputation.

7. Taxation

The Company holds a Global Business Licence for the purpose of the Financial Services Act 2007 of Mauritius. The Company is liable to tax at the rate of 15% on all its income. Pursuant to the enactment of the Finance Act 2018, with effect since 01 January 2019, the deemed foreign tax credit has phased out since 01 July 2021. Any income derived prior 30 June 2021, will still be entitled to deemed foreign tax credit of 80% or actual foreign tax credit, whichever is the higher. Any income derived after 30 June 2021 will be subject to tax at the rate of 15% and would be entitled to either:

(a) a foreign tax credit equivalent to the actual foreign tax suffered on its foreign income against the Company's tax liability arising in Mauritius on such income, or

(b) a partial exemption of 80% applicable to specified income, including but not limited to foreign-source dividends or interest income, subject to the Company meeting the necessary substance requirements.

Further, the Company is exempted from income tax in Mauritius on profits or gains arising from the sale of securities. In addition, there is no withholding tax payable in Mauritius in respect of payments of dividends to shareholders or in respect of redemptions or exchanges of shares.

A reconciliation of the actual income tax based on accounting profit and the actual income tax expense is as follows:

17. **Holding and ultimate holding company**

The Company is a sub subsidiary of PDS Limited, a Company incorporated in Maharashtra, India. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

18. **Capital Management**

Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

19. **Events after the reporting date**

There has been no significant event after the reporting date which in the opinion of the board of directors requires disclosure in the financial statements.

Multinational Textile Group Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of Multinational Textile Group Limited (the "Company") for the year ended 31 March 2026.

Principal activity

The principal activity of the Company is the holding of investments and provision of consultancy services.

Results and dividend

The results for the year are shown on page 7.

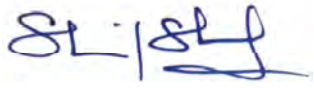
The Company has paid a dividend of USD 3,500,000 for the year under review (2025: USD 7,500,000).

Statement of directors' responsibilities in respect of the financial statements

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the state of affairs of the Company and of the profit or loss of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.



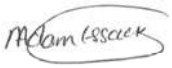
Going concern

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

Auditors

The auditors, Lancasters Chartered Accountants, have expressed their willingness to continue in the office for the next financial year end.

By order of the Board of Directors



Director Date: 14 May 2026

Multinational Textile Group Limited

Secretary's certificate
for the year ended 31 March 2026

Statement from secretary under Section 166 (d) of the Mauritius Companies Act 2001

In accordance with section 166 (d) of the Mauritius Companies Act 2001, we certify that to the best of our knowledge and belief, the Company has filed with the Registrar of Companies, all such returns as are required of the company under the Mauritius Companies Act 2001.

For and on behalf of **ROGERS CAPITAL CORPORATE SERVICES LIMITED**
Company secretary

Date: 14 May 2026

Auditor's report to member of Multinational Textile Group Limited

Opinion

We have audited the financial statements of Multinational Textile Group Limited (the "Company") set out on pages 7 to 43 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's report to member of Multinational Textile Group Limited (continued)

Responsibilities of the Directors for the Financial Statements (continued)

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

  We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Auditor's report to member of Multinational Textile Group Limited (continued)

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

The notes on pages 12 to 43 form part of these financial statements.

1. General information

The Company was incorporated as a private limited company on 28 March 2006 and was granted a Global Business Licence on 29 March 2006. The principal activity of the Company is the holding of investments and provision of consultancy services. The Company's registered office is C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The Company is a holder of a Global Business License under the Mauritius Companies Act and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies the Company has chosen to retain the United States Dollar (USD) as its reporting currency.

2. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) - 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

The financial statements have been prepared under the historical cost basis, except where stated otherwise.

(c) Functional and presentation currency

The financial statements are presented in United States Dollar (USD) which is the Company's functional and presentational currency.

(d) Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

2. Basis of preparation (continued)

(d) Use of judgements and estimates (continued)

Assumption and estimation uncertainties (continued)

- Impairment test: key assumptions underlying recoverable amounts, including the recoverability of loan; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

3. Application of new and revised International Financial Reporting Standards (IFRSs)

(a) New standards, interpretations and amendments adopted during the year

There have been amendments and interpretations that have become effective for the current year. The Company has adopted the following new interpretation during the year:

Classification of liabilities as current or non-current and on-current liabilities with covenants *(Amendments to IAS 1)*

Under existing IAS 1 requirements, companies classify liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional was removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. The amendments confirm that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

The amendments also clarify how an entity classifies a liability that can be settled in its own shares. When a liability includes a counterparty conversion option that involves a transfer of the company's own equity instruments, the conversion option is recognised as either equity or a liability separately from the host liability under IAS 32 Financial Instruments: Presentation. The amendments now clarified that when a company classifies the host liability as current or non-current, it can ignore only those conversion options that are recognised as equity.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with early application permitted. It also specifies the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments.

The directors have assessed that the amendments did not have any impact on the separate financial statements.

3. **Application of new and revised International Financial Reporting Standards (IFRSs) (continued)**

(b) Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2026 or later periods, but which the Company has not early adopted.

At the reporting date of these financial statements, the following were in issue but not yet effective:

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

3. **Application of new and revised International Financial Reporting Standards (IFRSs) (continued)**

(b) Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

4. **Critical accounting estimates and judgements**

The Company makes estimates and judgements that affect the reported amounts of assets and liabilities within the next year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Determination of functional currency

The determination of the functional currency of the Company is critical since recordings of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the United States Dollar (USD).

Estimates and assumptions

Impairment of investment in subsidiaries

The carrying values of investment in subsidiaries are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the subsidiary, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

5. Material accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements unless otherwise stated:

(a) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency of the Company at the spot exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on retranslation are recognised in the statement of comprehensive income as "net foreign exchange gains/losses", except for those arising on financial instruments at fair value through profit or loss which are recognised as a component of net gains/losses from financial instruments at fair value through profit or loss.

(b) Revenue recognition

Revenue is recognised as follows:

- Dividend income: when the Company's right to receive dividend is established.
- Interest income: as it accrues (taking into account the effective yield on the assets).
- Other income is recognised in the statement of profit or loss and other comprehensive income on an accrual basis consisting of Management fees, professional fees income, corporate service fees income, Sap fees income, commission income and consultancy fees income.

(c) Finance income and costs

Finance income comprises of interest income and gains on foreign exchange. Interest income is recognised as it accrues in statement of profit or loss and other comprehensive income, using the effective interest method.

Finance costs comprise losses on foreign exchange and interest expenses.

Foreign currency gains and losses are reported on a net basis.

5. Material accounting policies (continued)

(d) Income tax

Income tax expense comprises of current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items directly in equity or in other comprehensive income (OCI).

Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

5. **Material accounting policies (continued)**

(e) Investments in subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Investment in subsidiary is shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(f) Financial instruments

(i) Recognition and initial measurement

Financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income ("FVOCI") – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

5. **Material accounting policies (continued)**

(f) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets (continued)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets – Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and

5. **Material accounting policies (continued)**

(f) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets - Business model assessment (continued)

– the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

– contingent events that would change the amount or timing of cash flows;

– terms that may adjust the contractual coupon rate, including variable-rate features;

– prepayment and extension features; and

– terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

– features that modify consideration of the time value of money (example: periodic reset of interest rates).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

5. **Material accounting policies (continued)**

(f) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets – Subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

(iii) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

5. **Material accounting policies (continued)**

(f) Financial instruments (continued)

(iii) Derecognition (continued)

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(g) Share capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

(h) Impairment

(i) Non-derivative financial assets

Financial instruments and contract assets

The Company recognises loss allowances for expected credit losses ("ECLs") on:

– financial assets measured at amortised cost;

– debt investments measured at FVOCI; and

– contract assets.

The Company also recognises loss allowances for ECLs on trade and other receivables and cash and cash equivalents.

5. **Material accounting policies (continued)**

(h) Impairment (continued)

(i) Non-derivative financial assets (continued)

Financial instruments and contract assets (continued)

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

– debt securities that are determined to have low credit risk at the reporting date; and

– other debt securities and bank balances for which credit risk (i.e., the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade and other receivables and cash and cash equivalents are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment, that includes forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

– the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or

– the financial asset is more than 90 days past due.

5. **Material accounting policies (continued)**

(h) Impairment (continued)

(i) Non-derivative financial assets (continued)

Financial instruments and contract assets (continued)

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Company considers this to be Baa3 or higher.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the
12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

– significant financial difficulty of the debtor;

– a breach of contract such as a default or being more than 90 days past due;

– the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;

– it is probable that the debtor will enter bankruptcy or other financial reorganisation; or

– the disappearance of an active market for a security because of financial difficulties.

5. **Material accounting policies (continued)**

(h) Impairment (continued)

(i) Non-derivative financial assets (continued)

Financial instruments and contract assets (continued)

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Company has a policy of writing off the gross carrying amount when the financial asset is 180 days past due based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

(ii) Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

5. **Material accounting policies (continued)**

(h) Impairment (continued)

(ii) Non-financial assets (continued)

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(i) Expenses

All expenses are recognised in the statement of profit or loss and other comprehensive income on an accrual basis.

(j) Provisions

A provision is recognised if, as a result of a past event, the Company have a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(k) Related parties

Related parties may be individuals or other entities where the individual or other entities has the ability, directly or indirectly, to control the Company or exercise significant influence over the Company in governing the financial and operating policies, or vice versa, or where the Company is subject to common control of common significant influence.

(l) Intangible assets

Intangible assets, including patents and trademarks, that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses. Intangible assets that have indefinite life are reviewed at each reporting period to assess whether there are indication of impairment and to determine whether events and circumstances continue to support the indefinite useful life of that asset.

6. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair value

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

31 March 2026	Amortised cost USD	Financial assets at fair value USD	Total USD	Level 1 USD	Level 2 USD	Level 3 USD	Total USD
Financial assets measured at fair value							
Financial assets at fair value through other comprehensive income	**-**	**192,518**	**192,518**	**-**	**-**	**192,518**	**192,518**
Financial assets not measured at fair value

6. Financial instruments – Fair values and risk management (continued)

(b) Measurement of fair values

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring Level 2 and Level 3 fair values for financial instruments measured at fair value in the statement of financial position, as well as the significant unobservable inputs used.

Company	Valuation technique	Significant unobservable inputs
Exchange Juhu Limited	Discounted Cash Flow Method	Present and prospective competition; Changes in yield curve; Market sentiment
Flying Jamon Limited	Net Asset Method	Present and prospective competition; Changes in yield curve; Market sentiment

(c) Financial risk management objective and policies

Introduction and preview

Financial instruments carried on the statement of financial position include financial assets at fair value through other comprehensive income, other receivables, cash and cash equivalents and other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risk are market risk, credit risk and liquidity risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly reviews their risk management policies and systems to reflect changes in markets and emerging best practice.

Overview

The Company has exposure to the following risks from its use of financial instruments:

- Market risk
- Credit risk
- Liquidity risk

(i) Market risk

Market risk represents the potential loss that can be caused by a change in the market value of financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility. The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limiting its exposure to market declines.

6. **Financial instruments – Fair values and risk management (continued)**

(c) Financial risk management objective and policies (continued)

(i) Market risk (continued)

- *Interest rate risk*

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Company has no significant exposure to interest rate risk other than relating to its bank balances as the loans are either interest-free or bear a fixed rate of interest.

- *Price risk*

The Company is not exposed to commodity price risk.

- *Currency risk*

The Company invests in stocks denominated in Great Britain Pound (GBP). Consequently, the Company is exposed to the risk that the exchange rate of the US Dollar relative to the Great Britain Pound may change in a manner which has a material effect on the reported values of the Company's assets and liabilities, which are denominated in USD.

Currency profile

	Financial assets 2026 USD	**Financial liabilities 2026 USD**	Financial assets 2025 USD	Financial liabilities 2025 USD
USD	**32,696,801**	**76,039,960**	23,447,856	68,928,429
GBP	**343,536**	**2,896,580**	259,332	3,370,588
	33,040,337	**78,936,540**	23,707,188	72,299,017

A 10 % strengthening of USD against the GBP at 31st March 2026 would have decreased net profit before tax by USD 255,304 (2025: decrease net profit before tax by USD 311,256). This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis in 2025.

6. **Financial instruments – Fair values and risk management (continued)**

(c) Financial risk management objective and policies (continued)

(i) Market risk (continued)

- *Currency risk (continued)*

Sensitivity Analysis:

	2026	2025
Currency	**USD**	USD
GBP	**255,304**	311,256
	========	========

Similarly, a 10% weakening of the USD against the GBP at 31st March 2025 would have had the exact reverse effect.

(ii) Credit risk

Credit risk represents the potential loss that the Company would incur if counter parties fail to perform pursuant to the terms of their obligations to the Company. The Company limits its credit risk by carrying out transactions through companies within the group. At the reporting date, there was no significant concentration of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	2026	2025
	USD	USD
Other receivables	**32,788,419**	22,734,611
Cash and cash equivalents	**251,918**	677,312
	----------	----------
	33,040,337	23,411,923
	========	========

6. **Financial instruments – Fair values and risk management (continued)**

(c) Financial risk management objective and policies (continued)

(ii) Credit risk (continued)

Expected credit loss assessment

(a) Other receivables

The Company applies the simplified approach to measuring expected credit losses, as permitted by IFRS 9, which uses a 12-month expected loss allowance for deposit on shares and other receivables.

The expected credit loss on other receivables was deemed by management to be not material and therefore no impairment allowances were accounted for.

(b) Cash and cash equivalents

The Company held cash and cash equivalents of USD 251,918 at 31 March 2026 (2025: USD 677,312). The cash and cash equivalents are held with banks with international repute and having strong track record in the banking industry.

Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

The expected credit loss on cash and cash equivalents was deemed by management to be not material and therefore no impairment allowances were accounted for.

(iii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to manage liquidity is to ensure, as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damages to the Company's reputation.

	Due on Demand	Within one year	One to five years	Total
31 March 2026	**USD**	**USD**	**USD**	**USD**
Financial liabilities				
Other payables	**18,508,325**	**-**	**60,428,215**	**78,936,540**

	(869)	(3,292)
Net finance income / (costs)	**2,205**	(547)

9. Income tax expense

The Company holds a Global Business Licence for the purpose of the Financial Services Act 2007 of Mauritius. The Company is liable to tax at the rate of 15% on all its income. Pursuant to the enactment of the Finance Act 2018, with effect since 01 January 2019, the deemed foreign tax credit has phased out since 01 July 2021. Any income derived prior 30 June 2021, will still be entitled to deemed foreign tax credit of 80% or actual foreign tax credit, whichever is the higher. Any income derived after 30 June 2021 will be subject to tax at the rate of 15% and would be entitled to either:

(a) a foreign tax credit equivalent to the actual foreign tax suffered on its foreign income against the Company's tax liability arising in Mauritius on such income, or

9. **Income tax expense (continued)**

(b) a partial exemption of 80% applicable to specified income, including but not limited to foreign-source dividends or interest income, subject to the Company meeting the necessary substance requirements.

Further, the Company is exempted from income tax in Mauritius on profits or gains arising from the sale of securities. In addition, there is no withholding tax payable in Mauritius in respect of payments of dividends to shareholders or in respect of redemptions or exchanges of shares.

A reconciliation of the actual income tax based on accounting profit and the actual income tax expense is as follows:

A reconciliation of the actual income tax expense based on accounting loss and actual income tax expense is as follows:

17. **Capital management**

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern. As the Company is part of a larger group, the Company's sources of additional capital and policies for distribution of excess capital may also be affected by the group's capital management objectives.

The Company defines "capital" as including all components of equity. Trading balances that arise as a result of trading transactions with other group Companies are not regarded by the Company as capital.

The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the group to which the Company belongs. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company or the group. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

18. Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

19. Holding company

The Company is a wholly owned subsidiary of PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

20. Events after the reporting date

There have been no significant adjusting events after the reporting date which needs disclosures in or amendments to the financial statements for the year ended 31 March 2026.

PANGRAM BRANDS GLOBAL PRIVATE LIMITED

(Notes annexed to and forming part of the Financial Statement for the year ended March 31, 2026)

1. Corporate Profile

Pangram Brands Global Private Limited was incorporated and domiciled in India on September 12, 2023 having its registered office at A-161, 3rd Floor New Friends Colony, New Delhi, 110025. The company is engaged in designing and manufacturing of cloth apparel including source intermediary services to clients in India as well as outside the country.

2. Significant Accounting Policies followed by the Company

2.1. Basis of Preparation of Financial Statements

a) Statement of Compliance with Ind AS

The standalone financial statements have been prepared in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.

The accounting policies are applied consistently to all the periods presented in the standalone financial statements.

b) Historical cost convention

The standalone financial statements have been prepared on the historical cost convention on an accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the relevant accounting policies mentioned. Further, the financial statements are presented in ₹, and all values are rounded to the nearest thousand except otherwise stated.

c) Going concern

The Board of Directors of the Company has considered the financial position of the Company as on March 31, 2026 and the financial performance of the Company for at least twelve months from the date of standalone financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The Board of Directors has taken actions to ensure that appropriate long term cash resources are in place at the date of signing the accounts to fund the Company's operations.

2.2. Use of estimates and judgements

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Differences between the actual results and estimates are recognized when the results are known/materialized.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with

information about the basis of calculation for each affected line item in the financial statements.

a) Judgements:

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the standalone financial statements:

(i). Useful lives of property, plant, and equipment

The useful lives and residual values of Company's assets are determined by the management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

b) Estimates and Assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Company based its assumptions and estimates on parameters available when the standalone financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Estimates and underlying assumptions are reviewed at each balance sheet date. Such changes are reflected in the assumptions when they occur.

(i). Income taxes

As a company operating in India, the Company is subject to applicable income tax laws. Given the complexity of tax calculations and uncertainties in determining the ultimate tax liability for many transactions, significant judgment is required when calculating the provision for income taxes. The Company records estimated liabilities for anticipated tax issues and adjusts them as necessary based on changes in the final tax outcome. Any differences between the initially recorded amounts and the final tax liability will impact the income tax and deferred tax provisions in the period in which the final determination is made.

(ii). Allowance for doubtful debts

Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts. Under Ind AS, impairment allowance has been determined based on Expected Credit Loss (ECL) model. Estimated irrecoverable amounts are based on the ageing of the receivable balance and historical experience. Individual trade receivables are written off if the same are not collectible.

(iii). Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal and other claims. By virtue of their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

(iv). Recoverability of deferred taxes

In the process of evaluating the recoverability of deferred tax assets, the management of the Company assesses the probability of available taxable profit against which losses can be utilized. The realization of deferred tax assets ultimately depends on future taxable income generated during the periods in which temporary differences become deductible. To make this determination, management considers projected future taxable income and tax planning strategies.

(v). Defined benefit plans

The Company has assumes the present value of the liability towards the gratuity, bonus and compensated absences for such employees based on the actuarial valuation. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, retirement age, and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is an assumption for the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post employment benefit obligation. The mortality rate is based on publicly available mortality tables for specific countries. Those mortality tables tend to change only at the interval in response to demographic changes.

2.3. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

i) Expected to be realized or intended to be sold or consumed in the normal operating cycle
ii) Held primarily for the purpose of trading
iii) Expected to be realized within twelve months after the reporting period, or
iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current. "

Liabilities:

A liability is current when:

i) It is expected to be settled in the normal operating cycle
ii) It is held primarily for the purpose of trading
iii) It is due to be settled within twelve months after the reporting period, or
iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.
Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.4. Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.5. Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

a) **Financial assets**

Initial recognition and measurement

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially recognized at fair value. In the case of financial assets recognized at fair value through profit or loss (FVTPL), its transaction cost are recognized in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

Classification and subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- Financial asset carried at amortized cost
- Financial asset at fair value through other comprehensive income (FVTOCI)
- Financial asset at fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

- **Financial assets carried at amortized cost**

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through other comprehensive income**

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through profit or loss**

A financial asset which is not classified in any of the above categories is subsequently fair value through profit or loss."

- **Equity investment**

Investments representing equity interest in associates/subsidiaries are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:
(i) The contractual rights to receive cash flows from the asset has expired, or
(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.
All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The Company's financial liabilities include trade and other payables, security deposits received etc."

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:
- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit or loss

Loans and borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective Interest rate (EIR) method. Income and Expense are recognized in the statement of profit or loss when the liabilities are derecognized as well as through the EIR amortization process.
Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

De-recognition

A financial liability is derecognized when the obligation under the liability is discharged or canceled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

c) **Offsetting of financial instruments**

Financial assets and financial liabilities are offset, and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.6. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

a) In the principal market for the asset or liability, or
b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses appropriate valuation techniques in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

2.7. Revenue recognition

The Company recognizes revenue from contracts with customers when the control of the goods or services is transferred to the customer. The amount of revenue recognized reflects the consideration expected to be received by the Company in exchange for those goods or services. The revenue recognized by the Company does not include statutory levy viz Goods & Services Tax, and is net of the trade discounts.

When a contract includes a variable amount of consideration, the Company estimates the amount of consideration it is likely to receive in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until the

end of the contract so that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

a) Sale of Goods

Revenue generated from the Sale of goods is recognized at the point in time when control of the promised goods is transferred to the customer, which satisfies the performance obligation. The recognition of the said revenue is based on the probable flow of the economic benefits to the Company and the reliable measurement of income with no uncertainty for the ultimate revenue collection.

b) Other Income

(i) Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(ii) Any income or expense on account of exchange difference either on settlement or on translation is recognized as revenue or loss in the statement of Profit & Loss.

(iii) Any other income is recognized on an accrual basis.

2.8. Earnings per share (EPS)

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra-ordinary items.

(i) Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

(ii) For calculating Diluted Earning per share the amounts utilized in computing basic earnings per share shall include the post-income tax effect of interest and other financing expenses related to dilutive potential equity shares, along with the weighted average number of additional equity shares that would be outstanding in the event of conversion of all dilutive potential equity shares.

2.9. Provision for Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. The uncertain tax positions are measured at the amount expected to be paid to taxation authorities when the Company determines that the probable outflow of economic resources will occur. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax asset is realized, or the deferred income tax liability is settled.

Deferred tax assets are recognized for all temporary deductible differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in the Statement of Profit and Loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

2.10. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

2.11. Exceptional items

When items of income and expense within the statement of profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such material items are disclosed separately as exceptional item.

12. As per Ind-AS 19 "Employee benefits", the disclosures as defined are given below:

There are no employees in Pangram Brands Private Limited, due to which no employee benefits or any other contribution plans as on 31st March 2026 have been provided or recognized by the Company thus, no disclosures need to be made in this financial statement.

13. As per Ind-AS 33 "Earning Per Share", the disclosures as defined are given below:

Particulars	2025-26	2024-25
Face Value per equity share	100	100
Basic and Diluted Earnings per Share (₹)	(0.96)	(2.46)
Net Profit/(Loss) as per Statement of Profit and Loss attributable to Owners of the Company (₹)	(48,148)	(1,23,176)
Weighted average number of equity shares outstanding during the year	50,000	50,000

Reconciliation of weighted average number of shares outstanding

Weighted Average number of Equity Shares used as denominator for calculating Basic EPS	50,000	50,000
Weighted Average number of Equity Shares used as denominator for calculating Diluted EPS	50,000	50,000

14. Commitments and Contingent Liabilities as per Ind-AS 37:

There are no contingent liabilities or capital commitments outstanding as on 31st March 2026 upon the entity thus no provisions, contingencies has been disclosed in the books of accounts.

15. Financial Risk Management

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values, or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk-sensitive financial instruments, including investments and deposits, foreign currency receivables, payables, and loans and borrowings.

The Company manages market risk through careful evaluation of the factor and exercises independent control over the entire market risk management process.

Market Risk - Interest Rate Risk

There are no exposure of the company towards the borrowings having a floating interest rate and, therefore any interest rate changes at the end of the reporting period.

Market Risk - Foreign Currency Risk

Foreign Currency Risk is the risk that the Fair Value or Future Cash Flows of exposure will fluctuate because of changes in foreign currency rates.

The company has no foreign currency exposures on financial instruments at the end of the reporting period.

Credit risk

Credit risk is the risk that a customer or counterparty to a financial instrument fails to perform or pay the amounts due, causing financial loss to the Company. Credit risk arises from Company activities in investments, dealing in derivatives and receivables from customers. The Company ensures that sales of goods are made to customers with appropriate creditworthiness. Investment and other market exposures are managed against counterparty exposure limits. Credit information is regularly shared between businesses and finance functions, with a framework in place to quickly identify and respond to cases of credit deterioration.

The Company has a prudent and conservative process for managing its credit risk arising in the course of its business activities. Credit risk across the Company is actively managed through Letters of Credit, Bank Guarantees, advance payments, and factoring & forfeiting without recourse to the Company. The Company restricts its fixed-income investments to liquid securities carrying high credit ratings.

Ageing of Account receivables

(Figures in '000')

Particulars	2025-26	2024-25
Less than 6 months	-	-
6 months- 1 year	-	-
1-2 years	-	-
2-3 years	-	-
More than 3 years	-	-
Total	-	-

Financial Assets are considered to be of good quality, and there is no significant increase in credit risk.

Liquidity Risk

Liquidity risk arises from the Company's inability to meet its cash flow commitments on the due date. The Company maintains sufficient stock of cash, marketable securities, and committed credit facilities. The Company accesses global and local financial markets to meet its liquidity requirements. It uses a range of products to ensure efficient funding from across well-diversified markets. Treasury monitors rolling forecasts of Company's cash flow position and ensures that Company is able to meet its financial obligation at all times, including contingencies.

The Company's liquidity is managed centrally, with operating units forecasting their cash and liquidity requirements. Treasury pools the cash surpluses and arranges to either fund the net deficit or invest the net surplus in a range of short-dated, secure, and liquid instruments, including short-term bank deposits and similar instruments. These investments' portfolios are diversified to avoid concentration risk in any instrument or counterparty.

INDEPENDENT AUDITOR'S REPORT

To

The Members of PANGRAM BRANDS GLOBAL PRIVATE LIMITED

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Pangram Brands Global Private Limited** ("the Company") which comprise the Balance Sheet as at March 31, 2026, the Statement of Profit and Loss, (including the statement of Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended and notes to the standalone financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as the "Standalone Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone Financial Statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind-AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2026, its losses including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs), as specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone financial statements" section of our report. We are independent of the Company in accordance with the "Code of Ethics" issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, but does not include the standalone Ind-AS financial statements and our auditor's report thereon.

Our opinion on the standalone Ind-AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone Ind-AS financial statements, our responsibility is to read the other information and in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Standalone Ind-AS Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind-AS) specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind-AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Ind-AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind-AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind-AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that

are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern, If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report, However, future events or conditions may cause the Company to cease to continue as a going concern,
- Evaluate the overall presentation, structure and content of the standalone Ind-AS financial statements, including the disclosures and whether the standalone Ind-AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind-AS financial statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of subsection (11) of Section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
   c) The Balance Sheet, the Statement of Profit and Loss (including the Statement of Other Comprehensive Income), the Statement of Cash Flow, and the Statement of Changes in Equity dealt

with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

e) On the basis of the written representations received from the directors as on March 31, 2026 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2026 from being appointed as a director in terms of Section 164 (2) of the Act;

f) With respect to the adequacy of the internal financial controls with reference to the financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls refer to our separate report in Annexure 2, wherein we have expressed an unmodified opinion; and

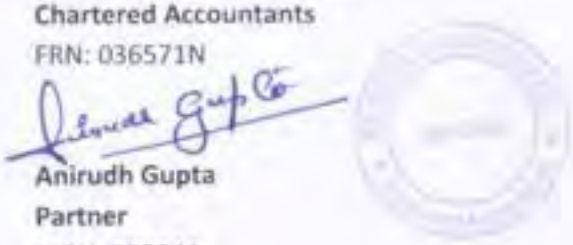
g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigation which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii. There were no amounts that were required to be transferred to the Investor Education and Protection Fund by the Company;

iv. (a) The Management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;



(b) The Management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

(c) Based on such audit procedures that were considered reasonable and appropriate in the circumstances, nothing has come to the notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. The company has not declared or paid any dividend during the year and has not proposed a final dividend for the year.

vi. Based on our examination carried out in accordance with the Implementation Guidance on Reporting on Audit Trail under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (Revised 2024 Edition) issued by the Institute of Chartered Accountants of India, the company has used accounting software for maintaining its books of account, which has a feature of recording audit trail (edit log) facility, however the same was not enabled from 1 April 2024 to 10 May 2024 for all transactions recorded in the respective software. Further, for the periods where audit trail (edit log) facility was enabled for the respective accounting software, we did not come across any instance of the audit trail feature being tampered with. Furthermore, the audit trail (edit log) has been preserved by the company as per the statutory requirements for record retention where the audit trail feature was enabled.

Annexure '1'

(The Annexure referred to in paragraph 1 under the 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Companies (Auditor's Report) Order, 2020, issued in terms of Section 143(11) of the Companies Act, 2013 ("the Act") of Pangram Brands Global Private Limited ("the Company"):

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of the audit, we state that:

i) In respect of the Company's property, plant and equipment, right-of-use assets, and intangible assets:
   a) There are no Property, Plant, and Equipment held by the Company during the current financial year, and accordingly, the requirement to report on clause 3(i)(a) of the Order is not applicable to the Company;
   b) There is no immovable property (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee), held by the company, and accordingly, the requirement to report on clause 3(i)(b) of the Order is not applicable on the company;
   c) The Company has neither revalued any of its Property, Plant, and Equipment (including Right-of-use Assets) nor its Intangible Assets during the year. Accordingly, reporting under clause 3(i)(c) of the Order is not applicable.
   d) There are no proceedings that have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibitions) Act, 1988 and Rules made thereunder. Accordingly, the requirement to report on 3(i)(d) of the Order is not applicable to the Company.

ii)
   a) The Company does not have any inventory and hence reporting under clause 3(ii)(a) of the Order is not applicable.
   b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crores, in the aggregate, at any point during the year, from banks on the basis of security of current assets. Accordingly, the requirement to report on 3(ii)(b) of the order is not applicable to the Company.

iii) During the year, the company has not made an investment in, provided any guarantee or security, or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships, or any other parties. Accordingly, the requirement to report on 3(iii)(a) to (f) of the Order is not applicable to the Company.

iv) There are no Loans, investments, guarantees, and security in respect of which provisions of sections 185 and 186 of the Companies Act 2013 are applicable and accordingly the requirement to report on Clause 3(iv) of the Order is not applicable to the Company.

v) As informed to us, the Company has neither accepted any deposits from the public nor accepted any amount which are deemed to be deposit within the meaning of directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under. Accordingly, the requirement to report on 3(v) of the order is not applicable to the Company.

vi) Reporting under clause 3(vi) of the Order is not applicable as the Company's business activities are not covered by the Companies (Cost Records and Audit) Rules, 2014 (as amended from time to time).

vii) In respect of statutory dues:

a) According to the information and explanations given to us, the Company is regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value added tax, cess and other statutory dues to the appropriate authorities applicable to it. According to the information and explanation given to us based on audit procedure performed by us, no undisputed amount payable in respect of these statutory dues were outstanding at the year-end for a period of six months from the date they become payable.

b) According to the information and explanations given to us, there is no dues of goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value added tax, cess and other statutory dues that have not been deposited on account of any dispute.

viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transactions, previously unrecorded income in the books of accounts, in the tax assessments under the Income Tax Act, 1961. Accordingly, the requirement to report on 3(viii) of the order is not applicable to the Company.

ix)

a) The Company has not taken any loans or other borrowings from any lender. Hence reporting under clause 3(ix)(a) of the Order is not applicable

b) The Company is not declared a wilful defaulter by any bank, financial institution, or other lender.

c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year and hence, reporting under clause 3(ix)(c) of the Order is not applicable.

d) On an overall examination of the Financial Statements of the Company, no funds raised on a short-term basis have not been utilized for long-term purposes.

e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries.

f) The company has not raised any loans accordingly, the requirement to report on 3(ix)(f) of the order is not applicable to the Company.

x)

a) The Company has not raised money during the year through an initial public offer or further public offer (including debt instruments) or term loans. Accordingly, the requirement to report on clause 3 (x)(a) of the Order is not applicable.

b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially, or optionally convertible) during the year. Accordingly, reporting under clause 3(x) (b) of the Order is not applicable.

xi)

a) No fraud by the Company and no fraud on the Company has been noticed or reported during the year.

b) During the year no report under section 143(12) of the Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

c) As represented to us by the management, the Company has not received any whistle-blower complaints by the company during the year.

xii) The Company is not a Nidhi Company as per the provision of the Companies Act,2013. Therefore, the requirement to report on clause 3(xii) of the Order is not applicable to the company.

xiii) Transaction with the related parties in compliance with Sections 177 and 188 of the Companies Act 2013, where applicable, and the details have been disclosed in the notes to the financial statements as required by the applicable accounting standards.

xiv) According to the information and explanation given to us, the Company is not required to and consequently, does not have an internal system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

xv) During the year the Company has not entered into any non-cash transactions with its Directors or persons connected with its Directors. Accordingly, provisions of Section 192 of the Act are not applicable to the company.

xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, reporting under clause (xvi)(a), (b) and (c) of the Order is not applicable.

xvii) The Company has incurred cash losses in the current financial year and in the immediately preceding financial year amounting to Rs. 63.25 and 165.96 respectively.

xviii) There has been no resignation of the statutory auditors of the Company during the year. Accordingly, the requirement to report on 3(xviii) of the order is not applicable to the Company.

xix) On the basis of financial ratio disclosed in the financial statements, the ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements ,our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx) The provision of section 135 of the Companies Act, 2013, in relation to corporate social responsibility is not applicable to the company. Accordingly, the requirement to report on 3(xx) of the order is not applicable to the Company.

Annexure '2'

The Annexure referred to in paragraph under the heading 'Report on Other Legal and Regulatory Requirements' section of our report of even date

Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act") We have audited the internal financial controls with reference to standalone financial statements of the Company as of March 31, 2026, in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal financial controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (the "ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

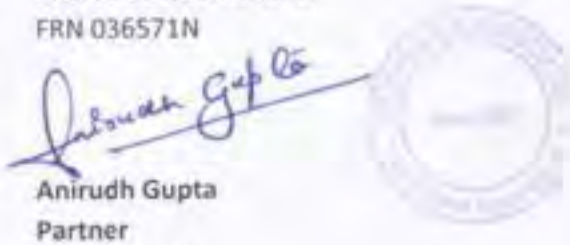
Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements:

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions

are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.



Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to these financial statements and such internal financial controls with reference to these financial statements were operating effectively as at March 31, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

Pangram Celebrity Brands Pvt. Ltd.

Pangram Celebrity Brands Private Limited

(Notes annexed to and forming part of the Financial Statement for the year ended March 31, 2026)

1. Corporate Profile

Pangram Celebrity Brands Private Limited was incorporated and domiciled in India on December 24, 2024 having its registered office at A-161, 3rd Floor New Friends Colony, New Delhi, 110025. The company is engaged in designing and manufacturing of cloth apparel including launch of brands associated with clothing apparel to clients in India as well as outside the country.The company has not commenced any operations during the year but is in process.

2. Significant Accounting Policies followed by the Company

2.1. Basis of Preparation of Financial Statements

a) Statement of Compliance with Ind AS

The standalone financial statements have been prepared in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.

The accounting policies are applied consistently to all the periods presented in the standalone financial statements.

b) Historical cost convention

The standalone financial statements have been prepared on the historical cost convention on an accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the relevant accounting policies mentioned. Further, the financial statements are presented in ₹, and all values are rounded to the nearest thousand except otherwise stated.

c) Going concern

The Board of Directors of the Company has considered the financial position of the Company as on March 31, 2026 and the financial performance of the Company for at least twelve months from the date of standalone financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The Board of Directors has taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund the Company's operations.

2.2. Use of estimates and judgements

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Differences between the actual results and estimates are recognized when the results are known/materialized.

KRISHNAR & ASSOCIATES * Chartered Accountants * A New Delhi

Pangram Celebrity Brands PVT. LTD.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

a) Judgements:

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the standalone financial statements:

(i). Useful lives of property, plant, and equipment

The useful lives and residual values of Company's assets are determined by the management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

b) Estimates and Assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Company based its assumptions and estimates on parameters available when the standalone financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Estimates and underlying assumptions are reviewed at each balance sheet date. Such changes are reflected in the assumptions when they occur.

(i). Income taxes

As a company operating in India, the Company is subject to applicable income tax laws. Given the complexity of tax calculations and uncertainties in determining the ultimate tax liability for many transactions, significant judgment is required when calculating the provision for income taxes. The Company records estimated liabilities for anticipated tax issues and adjusts them as necessary based on changes in the final tax outcome. Any differences between the initially recorded amounts and the final tax liability will impact the income tax and deferred tax provisions in the period in which the final determination is made.

(ii). Allowance for doubtful debts

Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts. Under Ind AS, impairment allowance has been determined based on Expected Credit Loss (ECL) model. Estimated irrecoverable amounts are based on the ageing of the receivable balance and historical experience. Individual trade receivables are written off if the same are not collectible.

(iii). Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal and other claims. By virtue of their nature, contingencies will be

KRISHNA R & ASSOCIATES
New Delhi
Chartered Accountants

resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

(iv). Recoverability of deferred taxes

In the process of evaluating the recoverability of deferred tax assets, the management of the Company assesses the probability of available taxable profit against which losses can be utilized. The realization of deferred tax assets ultimately depends on future taxable income generated during the periods in which temporary differences become deductible. To make this determination, management considers projected future taxable income and tax planning strategies.

(v). Defined benefit plans

The Company has assumes the present value of the liability towards the gratuity, bonus and compensated absences for such employees based on the actuarial valuation. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, retirement age, and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is an assumption for the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality tables for specific countries. Those mortality tables tend to change only at the interval in response to demographic changes.

2.3. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

i) Expected to be realized or intended to be sold or consumed in the normal operating cycle.
ii) Held primarily for the purpose of trading
iii) Expected to be realized within twelve months after the reporting period, or
iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current. "

Liabilities:

A liability is current when:

i) It is expected to be settled in the normal operating cycle
ii) It is held primarily for the purpose of trading
iii) It is due to be settled within twelve months after the reporting period, or

KRISHNAR & ASSOCIATES
New Delhi
Chartered Accountants

Celebrity Brands Pvt. Ltd.

iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.
Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.4. Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.5. Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments

a) Financial assets

Initial recognition and measurement

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially recognized at fair value. In the case of financial assets recognized at fair value through profit or loss (FVTPL), its transaction cost are recognized in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

Classification and subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:
- Financial asset carried at amortized cost
- Financial asset at fair value through other comprehensive income (FVTOCI)
- Financial asset at fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

- **Financial assets carried at amortized cost**

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through other comprehensive income**

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting

KRISHNAR & ASSOCIATES * Chartered Accountants * New Delhi
Pangram Celebrity Brands Pvt. Ltd.

finance costs in the statement of profit and loss. This category generally applies to borrowings.

De-recognition

A financial liability is derecognized when the obligation under the liability is discharged or canceled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.6. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

a) In the principal market for the asset or liability, or
b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses appropriate valuation techniques in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

2.7. Revenue recognition

The Company recognizes revenue from contracts with customers when the control of the goods or services is transferred to the customer. The amount of revenue recognized reflects the consideration expected to be received by the Company in exchange for those goods or services. The revenue

KRISHNA R & ASSOCIATES
New Delhi
Chartered Accountants
Pangram Celebrity Brands Pvt. Ltd.

contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through profit or loss**

A financial asset which is not classified in any of the above categories is subsequently fair value through profit or loss."

- **Equity investment**

Investments representing equity interest in associates/subsidiaries are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:
(i) The contractual rights to receive cash flows from the asset has expired, or
(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.
All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The Company's financial liabilities include trade and other payables, security deposits received etc."

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:
- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit or loss

Loans and borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective Interest rate (EIR) method. Income and Expense are recognized in the statement of profit or loss when the liabilities are derecognized as well as through the EIR amortization process.
Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as

KRISHNAR & ASSOCIATES A New Delhi Chartered Accountants

Pangram Celebrity Brands Pvt. Ltd.

recognized by the Company does not include statutory levy viz Goods & Services Tax, and is net of the trade discounts.

When a contract includes a variable amount of consideration, the Company estimates the amount of consideration it is likely to receive in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until the end of the contract so that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

a) Sale of Goods

Revenue generated from the Sale of goods is recognized at the point in time when control of the promised goods is transferred to the customer, which satisfies the performance obligation. The recognition of the said revenue is based on the probable flow of the economic benefits to the Company and the reliable measurement of income with no uncertainty for the ultimate revenue collection.

b) Other income

(i) Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(ii) Any income or expense on account of exchange difference either on settlement or on translation is recognized as revenue or loss in the statement of Profit & Loss.

(iii) Any other income is recognized on an accrual basis.

2.8. Earnings per share (EPS)

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra-ordinary items.

(i) Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

(ii) For calculating Diluted Earning per share the amounts utilized in computing basic earnings per share shall include the post-income tax effect of interest and other financing expenses related to dilutive potential equity shares, along with the weighted average number of additional equity shares that would be outstanding in the event of conversion of all dilutive potential equity shares.

2.9. Provision for Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax issues based on estimates of whether

additional taxes will be due. The uncertain tax positions are measured at the amount expected to be paid to taxation authorities when the Company determines that the probable outflow of economic resources will occur. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax asset is realized, or the deferred income tax liability is settled.

Deferred tax assets are recognized for all temporary deductible differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in the Statement of Profit and Loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

2.10. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

2.11. Exceptional items

When items of income and expense within the statement of profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such material items are disclosed separately as exceptional item.

INDEPENDENT AUDITOR'S REPORT

To

The Members of PANGRAM CELEBRITY BRANDS PRIVATE LIMITED

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Pangram Celebrity Brands Private Limited** ("the Company") which comprise the Balance Sheet as at March 31, 2026, the Statement of Profit and Loss, (including the statement of Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended and notes to the standalone financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as the "Standalone Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone Financial Statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind-AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2026, its losses including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs), as specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone financial statements" section of our report. We are independent of the Company in accordance with the "Code of Ethics" issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, but does not include the standalone Ind-AS financial statements and our auditor's report thereon.

Our opinion on the standalone Ind-AS financial statements does not cover the other information and we do

KRISHNA R & ASSOCIATES
A
New Delhi
Chartered Accountants

not express any form of assurance conclusion thereon.

In connection with our audit of the standalone Ind-AS financial statements, our responsibility is to read the other information and in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Standalone Ind-AS Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind-AS) specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind-AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Ind-AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind-AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind-AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

KRISHNA R & ASSOCIATES
A
New Delhi
Chartered Accountants

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management,
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern, If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report, However, future events or conditions may cause the Company to cease to continue as a going concern,
- Evaluate the overall presentation, structure and content of the standalone Ind-AS financial statements, including the disclosures and whether the standalone Ind-AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind-AS financial statements for the financial year ended March 31, 2026 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of subsection (11) of Section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.

2. As required by Section 143(3) of the Act, we report that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The Balance Sheet, the Statement of Profit and Loss (including the Statement of Other

KRISHNA R & ASSOCIATES * Chartered Accountants * New Delhi

Comprehensive Income), the Statement of Cash Flow, and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

e) On the basis of the written representations received from the directors as on March 31, 2026 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2026 from being appointed as a director in terms of Section 164 (2) of the Act;

f) With respect to the adequacy of the internal financial controls with reference to the financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls refer to our separate report in Annexure 2, wherein we have expressed an unmodified opinion; and

g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigation which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii. There were no amounts that were required to be transferred to the Investor Education and Protection Fund by the Company:

iv. (a) The Management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

(b) The Management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

(c) Based on such audit procedures that were considered reasonable and appropriate in the circumstances, nothing has come to the notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. The company has not declared or paid any dividend during the year and has not proposed a final dividend for the year.

vi. Based on our examination carried out in accordance with the Implementation Guidance on Reporting on Audit Trail under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (Revised 2024 Edition) issued by the Institute of Chartered Accountants of India, the company has used accounting software for maintaining its books of account, which has a feature of recording audit trail (edit log) facility. However, as the Company was incorporated during the year and did not undertake any business operations or transactions, no audit trail entries were generated or maintained during the period under review.

Annexure '1'

(The Annexure referred to in paragraph 1 under the 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Companies (Auditor's Report) Order, 2020, issued in terms of Section 143(11) of the Companies Act, 2013 ("the Act") of Pangram Celebrity Brands Private Limited ("the Company"):
To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of the audit, we state that:

i) In respect of the Company's property, plant and equipment, right-of-use assets, and intangible assets:
   a) There are no Property, Plant, and Equipment held by the Company during the current financial year, and accordingly, the requirement to report on clause 3(i)(a) of the Order is not applicable to the Company;
   b) There is no immovable property (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee), held by the company, and accordingly, the requirement to report on clause 3(i)(b) of the Order is not applicable on the company;
   c) The Company has neither revalued any of its Property, Plant, and Equipment (including Right-of-use Assets) nor its Intangible Assets during the year. Accordingly, reporting under clause 3(i)(c) of the Order is not applicable.
   d) There are no proceedings that have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibitions) Act, 1988 and Rules made thereunder. Accordingly, the requirement to report on 3(i)(d) of the Order is not applicable to the Company.

ii)
   a) The Company does not have any inventory and hence reporting under clause 3(ii)(a) of the Order is not applicable.
   b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crores, in the aggregate, at any point during the year, from banks on the basis of security of current assets. Accordingly, the requirement to report on 3(ii)(b) of the order is not applicable to the Company.

iii) During the year, the company has not made an investment in, provided any guarantee or security, or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships, or any other parties. Accordingly, the requirement to report on 3(iii)(a) to (f) of the Order is not applicable to the Company.

iv) There are no Loans, investments, guarantees, and security in respect of which provisions of sections 185 and 186 of the Companies Act 2013 are applicable and accordingly the requirement to report on Clause 3(iv) of the Order is not applicable to the Company.

v) As informed to us, the Company has neither accepted any deposits from the public nor accepted any amount which are deemed to be deposit within the meaning of directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under. Accordingly, the requirement to report on 3(v) of the order is not applicable to the Company.

vi) Reporting under clause 3(vi) of the Order is not applicable as the Company's business activities are not covered by the Companies (Cost Records and Audit) Rules, 2014 (as amended from time to time).

vii) In respect of statutory dues:
   a) According to the information and explanations given to us, the Company is regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value

KRISHNA R & ASSOCIATES
A
New Delhi
Chartered Accountants

added tax, cess and other statutory dues to the appropriate authorities applicable to it. According to the information and explanation given to us based on audit procedure performed by us, no undisputed amount payable in respect of these statutory dues were outstanding at the year-end for a period of six months from the date they become payable.

b) According to the information and explanations given to us, there is no dues of goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value added tax, cess and other statutory dues that have not been deposited on account of any dispute.

viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transactions, previously unrecorded income in the books of accounts, in the tax assessments under the Income Tax Act, 1961. Accordingly, the requirement to report on 3(viii) of the order is not applicable to the Company.

ix)

a) The Company has not taken any loans or other borrowings from any lender. Hence reporting under clause 3(ix)(a) of the Order is not applicable

b) The Company is not declared a wilful defaulter by any bank, financial institution, or other lender.

c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year and hence, reporting under clause 3(ix)(c) of the Order is not applicable.

d) On an overall examination of the Financial Statements of the Company, no funds raised on a short-term basis have not been utilized for long-term purposes.

e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries.

f) The company has not raised any loans accordingly, the requirement to report on 3(ix)(f) of the order is not applicable to the Company.

x)

a) The Company has not raised money during the year through an initial public offer or further public offer (including debt instruments) or term loans. Accordingly, the requirement to report on clause 3 (x)(a) of the Order is not applicable.

b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially, or optionally convertible) during the year. Accordingly, reporting under clause 3(x) (b) of the Order is not applicable.

xi)

a) No fraud by the Company and no fraud on the Company has been noticed or reported during the year.

b) During the year no report under section 143(12) of the Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

c) As represented to us by the management, the Company has not received any whistle-blower complaints by the company during the year.

xii) The Company is not a Nidhi Company as per the provision of the Companies Act,2013. Therefore, the requirement to report on clause 3(xii) of the Order is not applicable to the company.

xiii) Transaction with the related parties in compliance with Sections 177 and 188 of the Companies Act 2013, where applicable, and the details have been disclosed in the notes to the financial statements as required by the applicable accounting standards.

xiv) The Company is exempted from getting an audit opinion on an internal system commensurate with the size and nature of its business hence reporting under clause 3(xiv) of the Order is not applicable.

KRISHNA R & ASSOCIATES
A
New Delhi
Chartered Accountants

xv) During the year the Company has not entered into any non-cash transactions with its Directors or persons connected with its Directors. Accordingly, provisions of Section 192 of the Act are not applicable to the company.

xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, reporting under clause (xvi)(a), (b) and (c) of the Order is not applicable.

xvii) The Company has not incurred any cash losses in the current financial year and in the immediately preceding financial year.

xviii) There has been no resignation of the statutory auditors of the Company during the year. Accordingly, the requirement to report on 3(xviii) of the order is not applicable to the Company.

xix) On the basis of financial ratio disclosed in the financial statements, the ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements ,our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx) The provision of section 135 of the Companies Act, 2013, in relation to corporate social responsibility is not applicable to the company. Accordingly, the requirement to report on 3(xx) of the order is not applicable to the Company.

Annexure '2'

The Annexure referred to in paragraph under the heading 'Report on Other Legal and Regulatory Requirements' section of our report of even date

Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act") We have audited the internal financial controls with reference to standalone financial statements of the Company as of March 31, 2026, in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal financial controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (the "ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements:

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with

generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to these financial statements and such internal financial controls with reference to these financial statements were operating effectively as at March 31, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

SURI OVERSEAS PRIVATE LIMITED

(Notes annexed to and forming part of the Financial Statement for the year ended March 31, 2026)

1. Corporate Profile

Suri Overseas Private Limited was incorporated and domiciled in India on September 14, 1981 having its registered office at A-161, 3rd Floor New Friends Colony, New Delhi, 110025. The company is engaged in designing and manufacturing of cloth apparel including source intermediary services to clients in India as well as outside the country. Company gets its products manufactured through source manufacturing from various manufacturers and sell its products to client on bill to ship to model

2. Significant Accounting Policies followed by the Company

2.1. Basis of Preparation of Financial Statements

a) Statement of Compliance with Ind AS

The standalone financial statements have been prepared in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.

The accounting policies are applied consistently to all the periods presented in the standalone financial statements.

b) Historical cost convention

The standalone financial statements have been prepared on the historical cost convention on an accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the relevant accounting policies mentioned. Further, the financial statements are presented in ₹, and all values are rounded to the nearest thousand except otherwise stated.

c) Going concern

The Board of Directors of the Company has considered the financial position of the Company as on March 31, 2026 and the financial performance of the Company for at least twelve months from the date of standalone financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The Board of Directors has taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund the Company's operations.

2.2. Use of estimates and judgements

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Differences between the actual results and estimates are recognized when the results are known/materialized.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with

information about the basis of calculation for each affected line item in the financial statements.

a) Judgements:

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the standalone financial statements:

(i). Useful lives of property, plant, and equipment

The useful lives and residual values of Company's assets are determined by the management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

b) Estimates and Assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Company based its assumptions and estimates on parameters available when the standalone financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Estimates and underlying assumptions are reviewed at each balance sheet date. Such changes are reflected in the assumptions when they occur.

(i). Income taxes

As a company operating in India, the Company is subject to applicable income tax laws. Given the complexity of tax calculations and uncertainties in determining the ultimate tax liability for many transactions, significant judgment is required when calculating the provision for income taxes. The Company records estimated liabilities for anticipated tax issues and adjusts them as necessary based on changes in the final tax outcome. Any differences between the initially recorded amounts and the final tax liability will impact the income tax and deferred tax provisions in the period in which the final determination is made.

(ii). Allowance for doubtful debts

Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts. Under Ind AS, impairment allowance has been determined based on Expected Credit Loss (ECL) model. Estimated irrecoverable amounts are based on the ageing of the receivable balance and historical experience. Individual trade receivables are written off if the same are not collectible.

(iii). Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal and other claims. By virtue of their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

A

SURI OVERSEAS P\T. LTD. B-107, SEC-2, NOIDA (UP)

(iv). Recoverability of deferred taxes

In the process of evaluating the recoverability of deferred tax assets, the management of the Company assesses the probability of available taxable profit against which losses can be utilized. The realization of deferred tax assets ultimately depends on future taxable income generated during the periods in which temporary differences become deductible. To make this determination, management considers projected future taxable income and tax planning strategies.

(v). Defined benefit plans

The Company has assumes the present value of the liability towards the gratuity, bonus and compensated absences for such employees based on the actuarial valuation. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, retirement age, and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is an assumption for the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality tables for specific countries. Those mortality tables tend to change only at the interval in response to demographic changes.

2.3. Property, Plant, and Equipment & Intangibles (including Capital Work-in-Progress)

a) Property, Plant, and Equipment

Property, plant and equipment (PPE) and capital work in progress are reported at cost less accumulated depreciation, recoverable taxes and accumulated impairment losses, if any. Costs of Assets include expenditures directly attributable to the acquisition of the asset.

An item of PPE and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising from the de-recognition, which is determined as the difference between the net disposal proceeds and the carrying amount of the asset, shall be recognized in the statement of profit and loss as other income or expense, as applicable, in accordance with relevant legal and accounting standards.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing tangible assets, including day-to-day repair and maintenance expenditure and the cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Depreciation on PPE, is provided on straight-line method over the useful lives of assets as per Schedule II to the Companies Act, 2013. Depreciation for assets purchased/sold during a period is proportionately charged to the Statement of Profit and Loss.

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

The company earlier had policy of providing depreciation on Written Down Value. Due to structural change in the company and to in-line with the policies of Holding company, the company has adopted a policy change in this year. However since company does not own any PPE, there is no financial impact of such policy changes.

The estimated useful lives of items of PPE are as follows:

Asset	Useful life
Computers	3 years
Furniture and fixtures	10 years
Office equipment	5 years
Plant and Machinery	15 years

b) Intangible assets

Intangible assets (Intellectual property) are stated at cost, net of accumulated amortization, and accumulated impairment losses (if any). The cost comprises the purchase price, borrowing cost (if capitalization criteria are met), and costs directly attributable to bringing the asset to its working condition for the intended use. Any trade discounts and rebates received on the purchase of intangible assets are deducted in arriving at the purchase price.

As of 31st March, 2026, the Company did not own any Intangible assets.

Amortization on Intangibles Assets (other than goodwill) is provided on a straight-line method over the useful lives of assets as per Schedule II to the Companies Act, 2013. Depreciation for assets purchased/sold during a period is proportionately charged to the Statement of Profit and Loss.

The estimated useful lives of items of PPE are as follows:

Asset	Useful life
Intangible Assets	10 years

2.4. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

i) Expected to be realized or intended to be sold or consumed in the normal operating cycle.
ii) Held primarily for the purpose of trading
iii) Expected to be realized within twelve months after the reporting period, or
iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current. "

Liabilities:

A liability is current when:

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA (U.P.)

i) It is expected to be settled in the normal operating cycle
ii) It is held primarily for the purpose of trading
iii) It is due to be settled within twelve months after the reporting period, or
iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.
Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.5. Borrowing costs

Borrowing costs consist of interest, ancillary costs, and other costs in connection with borrowing funds.

Interest and other borrowing costs attributable to qualifying assets are capitalized up to the date such assets are ready for their intended use. Other interest and borrowing costs are charged to the Statement of Profit and Loss.

2.6. Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.7. Foreign currency transaction

a) Functional and presentation currency

The financial statements of the Company are presented in Indian rupee (INR), which is the functional and presentation currency of the Company.

b) Transactions and balances

Transactions in foreign currencies are recognized at the prevailing exchange rates on the transaction dates. Realized gains and losses on settlement of foreign currency transactions are recognized in the Statement of Profit and Loss.

c) Conversion

At the year-end, monetary items denominated in foreign currency are revalued at year-end exchange rates. In the case of monetary items covered by forward exchange contracts, the difference between the year-end and rate on the contract date is recognized as the exchange difference and the premium or discount on Forward contracts is amortized over the life of the contract.

Non-monetary foreign currency items, which are measured in terms of historical cost, are reported using the exchange rate prevailing at the transaction date.

2.8. Financial instruments

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments

a) **Financial assets**

Initial recognition and measurement

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially recognized at fair value. In the case of financial assets recognized at fair value through profit or loss (FVTPL), its transaction cost are recognized in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

Classification and subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- Financial asset carried at amortized cost
- Financial asset at fair value through other comprehensive income (FVTOCI)
- Financial asset at fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

- **Financial assets carried at amortized cost**

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through other comprehensive income**

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through profit or loss**

A financial asset which is not classified in any of the above categories is subsequently fair value through profit or loss."

- **Equity investment**

Investments representing equity interest in associates/subsidiaries are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

De-recognition

SURI OVERSEAS PVT. LTD. B-107, SEC-2 NOIDA UP

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:
(i) The contractual rights to receive cash flows from the asset has expired, or
(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.
All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The Company's financial liabilities include trade and other payables, security deposits received etc."

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:
- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit or loss

Loans and borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective Interest rate (EIR) method. Income and Expense are recognized in the statement of profit or loss when the liabilities are derecognized as well as through the EIR amortization process.
Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

De-recognition

A financial liability is derecognized when the obligation under the liability is discharged or canceled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

A

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.9. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

a) In the principal market for the asset or liability, or
b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses appropriate valuation techniques in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

2.10. Revenue recognition

The Company recognizes revenue from contracts with customers when the control of the goods or services is transferred to the customer. The amount of revenue recognized reflects the consideration expected to be received by the Company in exchange for those goods or services. The revenue recognized by the Company does not include statutory levy viz Goods & Services Tax, and is net of the trade discounts.

When a contract includes a variable amount of consideration, the Company estimates the amount of consideration it is likely to receive in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until the end of the contract so that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money

The Company derives revenues primarily from Sale of traded goods.

a) Sale of Goods

Revenue generated from the Sale of goods is recognized at the point in time when control of the promised goods is transferred to the customer, which satisfies the performance obligation. The recognition of the said revenue is based on the probable flow of the economic benefits to the Company and the reliable measurement of income with no uncertainty for the ultimate revenue collection.

b) Other income

(i) Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(ii) Any income or expense on account of exchange difference either on settlement or on translation is recognized as revenue or loss in the statement of Profit & Loss.

(iii) Any other income is recognized on an accrual basis.

2.11. Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: *(i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.*

a) Company as a lessee

At the lease commencement date, the Company recognizes right-of-use assets and lease liabilities on the balance sheet. The right-to-use asset is measured at cost, which is made up of the initial measurement of the lease liabilities, any initial direct costs incurred by the Company, and any lease payments made in advance of the lease commencement date.

The Company depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use assets or the end of the lease term. The Company also assesses the right-of-use asset for impairment when such indicators exist.

At the commencement date of lease, the Company measures the lease liabilities at the present value of the lease payments to be made over the lease term, discounted using the interest rate

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA (U.P.)

implicit in the lease if that rate is readily available or the Company's incremental borrowing rate.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance, fixed), and payments arising from options reasonably certain to be exercised. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest expenses. It is remeasured to reflect any reassessment or modification.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset or Statement of profit and loss, as the case may be.

The Company has elected to account for short-term leases and leases of low-value assets using the exemption given under Ind AS 116, Leases. Instead of recognizing a right-of-use asset and lease liability, the payments in relation to these are recognized as an expense in profit or loss on a straight-line basis over the lease term or on another systematic basis if that basis is more representative of the pattern of the Company's benefit.

b) Company as a lessor

Leases for which the Company is a lessor classified as a finance or operating lease.

Lease income from operating leases where the Company is a lessor is recognized in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

2.12. Employee benefits

a) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related services are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected

b) Other long-term employee benefit obligations

The liabilities for earned leave that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the discount rates for Government Securities (G-Sec) at the end of the reporting period that have terms approximating the related obligation's terms. Remeasurement as a result of experience adjustments and changes in actuarial assumptions are recognized in the Statement of Profit and Loss.

c) Post-employment obligations

The Company operates the following post-employment schemes:

(i) defined benefit plans such as gratuity; and
(ii) defined contribution plans such as provident fund etc.

A

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount based on the respective employee's salary and the tenure of employment. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation report using the projected unit credit method as at the year end.

To account for the liability for gratuity benefits payable in the future, the Company uses an independent actuarial valuation report based on the projected unit credit method as at the year-end. The obligations are measured at the present value of estimated future cash flows. The discount rate used is generally based on the market yields available on Government bonds at the reporting date, with a term that matches that of the liabilities.

Any re-measurements, including actuarial gains and losses, and the effect of changes to the asset ceiling, if applicable, are immediately reflected in Other Comprehensive Income in the Statement of Profit and Loss. All other expenses related to defined benefit plans are recognized in the Statement of Profit and Loss as employee benefit expenses. In case of curtailment or settlement of any defined benefit plan, gains or losses are recognized when the curtailment or settlement occurs.

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a statutory authority and will have no legal or constructive obligation to pay further amounts. Provident Fund and Employee State Insurance Schemes are defined contribution plans and contributions paid / payable are recognized as an expense in the Statement of Profit and Loss during the year in which the employee renders the related service.

2.13. Earnings per share (EPS)

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra-ordinary items.

(i) Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

(ii) For calculating Diluted Earning per share the amounts utilized in computing basic earnings per share shall include the post-income tax effect of interest and other financing expenses related to dilutive potential equity shares, along with the weighted average number of additional equity shares that would be outstanding in the event of conversion of all dilutive potential equity shares.

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

2.14. Provision for Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. The uncertain tax positions are measured at the amount expected to be paid to taxation authorities when the Company determines that the probable outflow of economic resources will occur. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax asset is realized, or the deferred income tax liability is settled.

Deferred tax assets are recognized for all temporary deductible differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in the Statement of Profit and Loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

2.15. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

2.16. Exceptional items

When items of income and expense within the statement of profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such material items are disclosed separately as exceptional items

18. As per Ind-AS 19 "Employee benefits", the disclosures as defined are given below:

There are no employees in Suri Overseas Private Limited, so no employee benefits or other contribution plans have been provided or recognised by the Company as of 31 March 2026. Thus, no disclosures need to be made in this financial statement.

19. As per Ind-AS 33 "Earning Per Share", the disclosures as defined are given below:

Particulars	2025-26	2024-25
Face Value per equity share	100	100
Basic and Diluted Earnings per Share (₹)	(276.4)	(86.4)
Net Profit/(Loss) as per Statement of Profit and Loss attributable to Owners of the Company (₹)	(5,78,311)	(1,80,670)
Weighted average number of equity shares outstanding during the year	2,092	2,092

Reconciliation of weighted average number of shares outstanding

Weighted Average number of Equity Shares used as denominator for calculating Basic EPS	2,092	2,092
Weighted Average number of Equity Shares used as denominator for calculating Diluted EPS	2,092	2,092

20. Commitments and Contingent Liabilities as per Ind-AS 37:

There are no contingent liabilities or capital commitments outstanding as on 31st March 2026 upon the entity thus no provisions, contingencies has been disclosed in the books of accounts.

21. Capital Management

The Company aims to manage its capital efficiently to safeguard its ability to continue as a going concern and optimize returns to its shareholders.

The Company adheres to a disciplined Capital Management framework, the pillars of which are as follows:

a) Maintain diversity of sources of financing and spreading the maturity across tenure buckets in order to minimize liquidity risk.

b) Manage financial market risks arising from foreign exchange, interest rates, and commodity prices, and minimize the impact of market volatility on earnings.

c) Leverage optimally in order to maximize shareholder returns while maintaining strength and flexibility of the Balance Sheet. This framework is adjusted based on underlying macroeconomic factors affecting the business environment, financial market conditions and interest rates environment.

The Net gearing ratio at the end of the reporting year was as follows: (Figures In '000)

Particulars	2025-26	2024-45
Gross Debt	3100.00	3100.00
Cash and Marketable Securities**	390.97	499.09

Total Equity (As per Balance Sheet) (B)	409.86	988.17
Net Gearing (A/B)	6.609	2.632

**Cash and Marketable Securities include Cash and Cash Equivalents and fixed deposit receipts having maturity in less than 3 months as on the year end;

22. Financial Instrument

Valuation Methodology

All financial instruments are initially recognized and subsequently re-measured at fair value as described below:

a) The fair value of an investment in quoted and unquoted Government Securities, Mutual Funds, and Bonds is measured at quoted price or NAV.

b) The fair value of Forward Foreign Exchange contracts is determined using forward exchange rates at the balance sheet date.

c) Commodity derivative contracts are valued using readily available information in markets and quotations from exchanges & brokers.

d) The fair value of the remaining financial instruments is determined using discounted cash flow analysis.

e) All foreign currency denominated assets and liabilities are translated using exchange rate at reporting date.

(Figures In '000')

The financial instruments are categorized into three levels based on the inputs used to arrive at fair value measurements as described below:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

KRISHNAR & ASSOCIATES Chartered Accountants New Delhi

SURI OVERSEAS PVT. LTD. B-107, SEC-2, NOIDA UP

Level 2: Inputs other than the quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly and

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs);

The sensitivity of level 3 instrument is not expected to be material.

23. Financial Risk Management

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values, or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk-sensitive financial instruments, including investments and deposits, foreign currency receivables, payables, and loans and borrowings.

The Company manages market risk through careful evaluation of the factor and exercises independent control over the entire market risk management process.

Market Risk - Interest Rate Risk

There are no exposure of the company towards the borrowings having a floating interest rate and, therefore any interest rate changes at the end of the reporting period.

Market Risk - Foreign Currency Risk

Foreign Currency Risk is the risk that the Fair Value or Future Cash Flows of exposure will fluctuate because of changes in foreign currency rates.

The company has no foreign currency exposures on financial instruments at the end of the reporting period.

Credit risk

Credit risk is the risk that a customer or counterparty to a financial instrument fails to perform or pay the amounts due, causing financial loss to the Company. Credit risk arises from Company activities in investments, dealing in derivatives and receivables from customers. The Company ensures that sales of goods are made to customers with appropriate creditworthiness. Investment and other market exposures are managed against counterparty exposure limits. Credit information is regularly shared between businesses and finance functions, with a framework in place to quickly identify and respond to cases of credit deterioration.

The Company has a prudent and conservative process for managing its credit risk arising in the course of its business activities. Credit risk across the Company is actively managed through Letters of Credit, Bank Guarantees, advance payments, and factoring & forfeiting without recourse to the Company. The Company restricts its fixed-income investments to liquid securities carrying high credit ratings.

2-3 years	-	-
More than 3 years	-	-
Total	-	-

Financial Assets are considered to be of good quality, and there is no significant increase in credit risk.

Liquidity Risk

Liquidity risk arises from the Company's inability to meet its cash flow commitments on the due date. The Company maintains sufficient stock of cash, marketable securities, and committed credit facilities. The Company accesses global and local financial markets to meet its liquidity requirements. It uses a range of products to ensure efficient funding from across well-diversified markets. Treasury monitors rolling forecasts of Company's cash flow position and ensures that Company is able to meet its financial obligation at all times, including contingencies.

The Company's liquidity is managed centrally, with operating units forecasting their cash and liquidity requirements. Treasury pools the cash surpluses and arranges to either fund the net deficit or invest the net surplus in a range of short-dated, secure, and liquid instruments, including short-term bank deposits and similar instruments. These investments' portfolios are diversified to avoid concentration risk in any instrument or counterparty.

INDEPENDENT AUDITOR'S REPORT

To

The Members of SURI OVERSEAS PRIVATE LIMITED

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of Suri Overseas Private Limited ("the Company") which comprise the Balance Sheet as at March 31, 2026, the Statement of Profit and Loss, (including the statement of Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended and notes to the standalone financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind-AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2026, its losses including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs), as specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone Financial Statements" section of our report. We are independent of the Company in accordance with the "Code of Ethics" issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, but does not include the standalone Ind-AS financial statements and our auditor's report thereon.

Our opinion on the standalone Ind-AS financial statements does not cover the other information, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone Ind-AS financial statements, our responsibility is to read the other information and in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone Ind-AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind-AS) specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind-AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone Ind-AS financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind-AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind-AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for

expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management,
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern, If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report, However, future events or conditions may cause the Company to cease to continue as a going concern,
- Evaluate the overall presentation, structure and content of the standalone Ind-AS financial statements, including the disclosures and whether the standalone Ind-AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind-AS financial statements for the financial year ended March 31, 2026 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of subsection (11) of Section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
   c) The Balance Sheet, the Statement of Profit and Loss (including the Statement of Other Comprehensive Income), the Statement of Cash Flow, and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

e) On the basis of the written representations received from the directors as on March 31, 2026 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2026 from being appointed as a director in terms of Section 164 (2) of the Act;

f) With respect to the adequacy of the internal financial controls with reference to the financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls refer to our separate report in Annexure 2, wherein we have expressed an unmodified opinion; and

g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigation which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii. There were no amounts that were required to be transferred to the Investor Education and Protection Fund by the Company:

iv. (a) The Management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
(b) The Management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
(c) Based on such audit procedures that were considered reasonable and appropriate in the circumstances, nothing has come to the notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. The company has not declared or paid any dividend during the year and has not proposed a final dividend for the year.

vi. Based on our examination carried out in accordance with the Implementation Guidance on Reporting on Audit Trail under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (Revised 2024 Edition) issued by the Institute of Chartered Accountants of India, the company has used accounting software for maintaining its books of account, which has a feature of recording audit trail (edit log) facility, however the same was not enabled from 1 April 2024 to 10 May 2024 for all transactions recorded in the respective software. Further, for the periods where audit trail (edit log) facility was enabled for the respective accounting software, we did not come across any instance of the audit trail feature being tampered with. Furthermore, the audit trail (edit log) has been preserved by the company as per the statutory requirements for record retention where the audit trail feature was enabled.

Annexure '1'

(The Annexure referred to in paragraph 1 under the 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Companies (Auditor's Report) Order, 2020, issued in terms of Section 143(11) of the Companies Act, 2013 ("the Act") of Suri Overseas Private Limited ("the Company"):

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of the audit, we state that:

i) In respect of the Company's property, plant and equipment, right-of-use assets, and intangible assets:
   a) There are no Property, Plant, and Equipment held by the Company during the current financial year, and accordingly, the requirement to report on clause 3(i)(a) of the Order is not applicable to the Company;
   b) There is no immovable property (other than properties where the Company is the lessee and the lease agreements are duly executed in favor of the lessee), held by the company, and accordingly, the requirement to report on clause 3(i)(b) of the Order is not applicable on the company;
   c) The Company has neither revalued any of its Property, Plant, and Equipment (including Right-of-use Assets) nor its Intangible Assets during the year. Accordingly, reporting under clause 3(i)(c) of the Order is not applicable.
   d) There are no proceedings that have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibitions) Act, 1988 and Rules made thereunder. Accordingly, the requirement to report on 3(i)(d) of the Order is not applicable to the Company.

ii)
   a) The Company does not have any inventory and hence reporting under clause 3(ii)(a) of the Order is not applicable.
   b) The Company has not been sanctioned working capital limits in excess of ₹ 5 crores, in the aggregate, at any point during the year, from banks on the basis of security of current assets. Accordingly, the requirement to report on 3(ii)(b) of the order is not applicable to the Company.

iii) During the year, the company has not made an investment in, provided any guarantee or security, or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships, or any other parties. Accordingly, the requirement to report on 3(iii)(a) to (f) of the Order is not applicable to the Company.

iv) There are no Loans, investments, guarantees, and security in respect of which provisions of sections 185 and 186 of the Companies Act 2013 are applicable and accordingly the requirement to report on Clause 3(iv) of the Order is not applicable to the Company.

v) As informed to us, the Company has neither accepted any deposits from the public nor accepted any amount which are deemed to be deposit within the meaning of directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under. Accordingly, the requirement to report on 3(v) of the order is not applicable to the Company.

vi) Reporting under clause 3(vi) of the Order is not applicable as the Company's business activities are not covered by the Companies (Cost Records and Audit) Rules, 2014 (as amended from time to time).

vii) In respect of statutory dues:
   a) According to the information and explanations given to us, the Company is regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value

added tax, cess and other statutory dues to the appropriate authorities applicable to it. According to the information and explanation given to us based on the audit procedure performed by us, no undisputed amount payable in respect of these statutory dues were outstanding at the year-end for a period of six months from the date they become payable.

b) According to the information and explanations given to us, there is no dues of goods and services tax, provident Fund, employees' state insurance, sales tax, income tax, service tax, duty of customs, duty of excise, value added tax, cess and other statutory dues that have not been deposited on account of any dispute.

viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transactions, previously unrecorded income in the books of accounts, in the tax assessments under the Income Tax Act, 1961. Accordingly, the requirement to report on 3(viii) of the order is not applicable to the Company.

ix)

a) The Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

b) The Company is not declared a wilful defaulter by any bank, financial institution, or other lender.

c) The Company has not taken any term loan during the year and there are no outstanding term loans at the beginning of the year and hence, reporting under clause 3(ix)(c) of the Order is not applicable.

d) On an overall examination of the Financial Statements of the Company, no funds raised on a short-term basis have been utilized for long-term purposes.

e) On an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries.

f) The company has not raised any loans accordingly, the requirement to report on 3(ix)(f) of the order is not applicable to the Company.

x)

a) The Company has not raised money during the year through an initial public offer or further public offer (including debt instruments) or term loans. Accordingly, the requirement to report on clause 3 (x)(a) of the Order is not applicable.

b) The Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially, or optionally convertible) during the year. Accordingly, reporting under clause 3(x) (b) of the Order is not applicable.

xi)

a) No fraud by the Company and no fraud on the Company has been noticed or reported during the year.

b) During the year no report under section 143(12) of the Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

c) As represented to us by the management, the Company has not received any whistle-blower complaints by the company during the year.

xii) The Company is not a Nidhi Company as per the provision of the Companies Act,2013. Therefore, the requirement to report on clause 3(xii) of the Order is not applicable to the company.

xiii) Transaction with the related parties in compliance with Sections 177 and 188 of the Companies Act 2013, where applicable, and the details have been disclosed in the notes to the financial statements as required by the applicable accounting standards.

xiv) According to the information and explanation given to us, the Company is not required to and consequently, does not have an internal system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

xv) During the year the Company has not entered into any non-cash transactions with its Directors or persons connected with its Directors. Accordingly, provisions of Section 192 of the Act are not applicable to the company.

xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, reporting under clause (xvi)(a), (b) and (c) of the Order is not applicable.

xvii) The Company has incurred cash losses in the current financial year and in the immediately preceding financial year amounting to Rs. 760.62 and 241.43 respectively.

xviii) There has been no resignation of the statutory auditors of the Company during the year. Accordingly, the requirement to report on 3(xviii) of the order is not applicable to the Company.

xix) On the basis of the financial ratio disclosed in the financial statements, the ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx) The provision of section 135 of the Companies Act, 2013, in relation to corporate social responsibility is not applicable to the company. Accordingly, the requirement to report on 3(xx) of the order is not applicable to the Company.

Annexure '2'

The Annexure referred to in paragraph under the heading 'Report on Other Legal and Regulatory Requirements' section of our report of even date

Report on the Internal Financial Controls under clause (i) of sub-section 3 of section 143 of the Companies Act, 2013 ("the Act") We have audited the internal financial controls with reference to standalone financial statements of the Company as of March 31, 2026, in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal financial controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (the "ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements:

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with

generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to these financial statements and such internal financial controls with reference to these financial statements were operating effectively as at March 31, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

PG GROUP LIMITED

REPORT OF THE DIRECTORS

The directors present their report and the audited financial statements of PG Group Limited (the "Company") for the year ended 31 March 2026.

Principal activities

The principal activities of the Company during the year were the trading of home and garment products, and investment holding. The principal activities of the Company's subsidiaries are set out in note 1 to the financial statements. There were no significant changes in the nature of the Group's principal activities during the year.

Results and dividends

The Group's profit for the year ended 31 March 2026 and its financial position at that date are set out in the financial statements on pages 6 to 44.

An interim dividend of US$1.07 per ordinary share, totally US$1,074,043 was paid on 15 August 2025 and 18 August 2025. The directors of the Company do not recommend of a final dividend in respect of the year.

Directors

The directors of the Company during the year were:

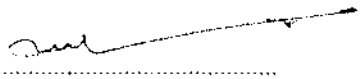
Sebastian Felipe Berstein Jauregui
Abhishekh Kanoi
Suresh Mahadev Punjabi
Mohandas Thekkeyil
Luis Hernan Gabler

The persons who were directors of the subsidiaries of the Company during the year (not including those directors listed above) were:

Mahesh Kumar Seth	
Vicente Vial Cerda	
Vivek Chand Sharma	(appointed on 3 September 2025)
Raamann Ahuja	(resigned on 3 September 2025)

In accordance with the Company's articles of association, the remaining directors will retire by rotation and, being eligible, will offer themselves for re-election at the forthcoming annual general meeting.

Directors' interests



At no time during the year was the Company or any of its subsidiaries, holding companies or fellow subsidiaries a party to any arrangement to enable the Company's directors to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

Directors' interests in transactions, arrangements or contracts

No director had a material interest, either directly or indirectly, in any transactions, arrangements or contracts of significance to the business of the Group to which the Company or any of its subsidiaries, holding companies or fellow subsidiaries was a party during the year.

Auditors
Ernst & Young retire and a resolution for their reappointment as auditors of the Company will be proposed at the forthcoming annual general meeting.

Independent auditor's report
To the members of PG Group Limited
(Incorporated in Hong Kong with limited liability)

Opinion
We have audited the consolidated financial statements of PG Group Limited (the "Company") and its subsidiaries (the "Group") set out on pages 6 to 44, which comprise the consolidated statement of financial position as at 31 March 2026, and the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 March 2026, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with HKFRS Accounting Standards as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for opinion
We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") as issued by the HKICPA. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Group in accordance with the HKICPA's *Code of Ethics for Professional Accountants* (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the consolidated financial statements and auditor's report thereon
The directors are responsible for the other information. The other information comprises the information included in the report of the directors.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated financial statements
The directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Responsibilities of the directors for the consolidated financial statements (continued)
In preparing the financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements
Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Auditor's responsibilities for the audit of the consolidated financial statements (continued)

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is Kong, Choi Yi (practising certificate number: P07873).

1. CORPORATE AND GROUP INFORMATION

PG Group Limited is a limited liability company incorporated in Hong Kong. The registered office of the Company is located at 9/F, Surson Commercial Building, 140-142 Austin Road, Tsim Sha Tsui, Kowloon, Hong Kong.

During the year, the Group was primarily engaged in the trading of home and garment products, and investment holding.

The Company is a subsidiary of PDS Sourcing Limited, a company incorporated in Mauritius. In the opinion of the directors, the Company's ultimate holding company is PDS Limited, a company incorporated in India with shares listed on the Bombay Stock Exchange Limited and the National Stock Exchange of India Limited.

Information about subsidiaries

Particulars of the Company's subsidiaries as at the end of the reporting period are as follows:

Name	Place of incorporation/ registration and business	Issued ordinary /registered share capital	Percentage of equity attributable to the Company		Principal activities
			Direct	Indirect	
PG Home Group Limited	Hong Kong	US$250,000	90	-	Trading of home and garment products, and investment holding
PG Home Group S.P.A.	Chile	Chilean Pesos 3,000,000		90	Provision of sales and marketing services
PG Shanghai Manufacturer Co. Ltd.[#]	Shanghai	US$200,025	100	-	Provision of sourcing Services
PG Group S.P.A.	Chile	Chilean Pesos 3,000,000	100	-	Provision of sales and marketing services

[#] PG Shanghai Manufacturer Co. Ltd is registered as a wholly-foreign-owned enterprise under PRC law.

2. ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with HKFRS Accounting Standards (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) as issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the Hong Kong Companies Ordinance. The financial statements have been prepared under the historical cost convention. These financial statements are presented in United States dollars ("US$").

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the "Group") for the year ended 31 March 2026. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

(a) the contractual arrangement with the other vote holders of the investee;
(b) rights arising from other contractual arrangements; and
(c) the Group's voting rights and potential voting rights.

The financial statements of its subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of its subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets (including goodwill) and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received, (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

2.2 CHANGES IN ACCOUNTING POLICLIES AND DISCLOSURES

The Group has adopted amendments to HKAS 21 Lack of Exchangeability for the first time for the current year's financial statements. The Group has not early adopted any other standard or amendment that has been issues but is not yet effective.

Amendments to HKAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. As the currencies that the Group had transacted in and the functional currencies of overseas subsidiaries and associate for translation into the Group's presentation currency were exchangeable, the amendments did not have any impact on the Group's financial statements.

2.3 ISSUED BUT NOT YET EFFECTIVE HKFRS ACCOUNTING STANDARDS

The Group has not applied the following new and amended HKFRS Accounting Standards, that have been issued but are not yet effective, in these financial statements. The Group intends to apply these new and amended HKFRS Accounting Standards, if applicable, when they become effective.

HKFRS 18	*Presentation and Disclosure in Financial Statements*[2]
HKFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to HKFRS 9 and HKFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to HKFRS 9 and HKFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to HKFRS 10 and HKAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Amendments to HKAS 21	*Translation to a Hyperinflationary Presentation Currency*[2]
Annual Improvements to HKFRS Accounting Standards – Volume 11	Amendments to HKFRS 1, HKFRS 7, HKFRS 9, HKFRS 10 and HKAS 7[1]

[1] Effective for annual periods beginning on or after 1 January 2026
[2] Effective for annual/reporting periods beginning on or after 1 January 2027
[3] No mandatory effective date yet determined but available for adoption

The Group is in the process of making assessment on the impact of the new and amended HKFRS Accounting Standards upon initial application but is not yet in a position to state whether these new and amended HKFRS Accounting Standards would have a significant impact on the Group’s financial statements in the period of initial application.

3. MATERIAL ACCOUNTING POLICIES

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required, the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs. In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the statement of profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to the statement of profit or loss in the period in which it arises.

Related parties

A party is considered to be related to the Group if:

(a) the party is a person or a close member of that person's family and that person
    (i) has control or joint control over the Group;
    (ii) has significant influence over the Group; or
    (iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

3. MATERIAL ACCOUNTING POLICIES (continued)

Related parties (continued)

(b) the party is an entity where any of the following conditions applies:
  (i) the entity and the Group are members of the same group;
  (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
  (iii) the entity and the Group are joint ventures of the same third party;
  (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  (v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;
  (vi) the entity is controlled or jointly controlled by a person identified in (a);
  (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
  (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Property, plant and equipment and depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the year in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Leasehold improvements	Over the lease terms
Furniture and fixtures	10% - 33⅓%
Office equipment	10% - 33⅓%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

3. MATERIAL ACCOUNTING POLICIES (continued)

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

3. MATERIAL ACCOUNTING POLICIES (continued)

Leases (continued)
Group as a lessee (continued)
(c) Short-term leases and leases of low-value assets
The Group applies the short-term lease recognition exemption to its short-term leases of property (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment and laptop computers that are considered to be of low value.

Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Investments and other financial assets
Initial recognition and measurement
Financial assets are classified, at initial recognition, as subsequently measured at amortised cost.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under HKFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

Purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell asset.

Subsequent measurement of financial assets at amortised cost (debt instruments)
Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in the statement of profit or loss when the asset is derecognised, modified or impaired.

3. MATERIAL ACCOUNTING POLICIES (continued)

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

3. MATERIAL ACCOUNTING POLICIES (continued)

Impairment of financial assets (continued)
General approach (continued)
The Group considers a financial asset in default when contractual payments are 180 days past due. The Group has rebutted the 90 days past due presumption of default based on reasonable and supportable information, including the Group's credit risk control practices and the historical recovery rate of financial assets over 90 days past due. However, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables which apply the simplified approach as detailed below.

Stage 1 – Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
Stage 2 – Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
Stage 3 – Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Simplified approach
For trade receivables that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Financial liabilities
Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as loans and borrowings or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and other payables, net of directly attributable transaction costs.

Subsequent measurement of financial liabilities at amortised cost (trade and other payables, and borrowings)
After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

3. MATERIAL ACCOUNTING POLICIES (continued)

Financial liabilities (continued)
Subsequent measurement of financial liabilities at amortised cost (trade and other payables, and borrowings) (continued)
Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in statement of profit or loss.

Derecognition of financial instruments
A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Cash and cash equivalents
Cash and cash equivalents in the consolidated statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments

For the purpose of the consolidated statement of financial position, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

Provisions
A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in profit or loss.

3. MATERIAL ACCOUNTING POLICIES (continued)

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided using the liability method, on temporary differences at the end of the reporting period arising between the tax bases of assets and liabilities and their carrying amounts for the financial reporting purposes, except that deferred tax is not recognised for the Pillar Two income taxes. Tax rates enacted or substantially enacted by the end of the reporting period are used to determine the deferred tax.

Deferred tax liabilities are recognised for all taxable temporary differences while deferred tax assets are recognised for all deductible temporary differences, the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Revenue from the sales of home and garment products is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the home and garment products.

3. MATERIAL ACCOUNTING POLICIES (continued)

Revenue recognition (continued)
Other income
Interest income
Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, which appropriate, to the net carrying amount of the financial asset.

Contract liabilities
A contract liability is the obligation to transfer goods or services to a customer for which the Group has received a consideration (or an amount of consideration that is due) from the customer. If a customer pays the consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

Other employee benefits
Pension scheme
The Group operates a mandatory provident fund retirement benefit scheme (the "MPF Scheme") under the Mandatory Provident Fund Schemes Ordinance for its employees. Contributions are made based on a percentage of the employees' basic salaries and are charged to the statement of profit or loss as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Group in an independently administered fund. The Group's employer contributions vest fully with the employees when contributed into the MPF Scheme.

The employees of the Group's subsidiaries which operate in Chile and Mainland China are required to participate in central pension schemes operated by the respective local municipal governments. These subsidiaries are required to contribute certain percentages of their payroll costs to the central pension scheme. The contributions are charged to the statement of profit or loss as they become payable in accordance with the rules of the respective central pension schemes.

Foreign currencies
These financial statements are presented in US$, which is the Group's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in foreign currencies are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in foreign currencies are translated using the exchange rates at the dates when their fair values were measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

3. MATERIAL ACCOUNTING POLICIES (continued)

Foreign currencies (continued)
The functional currencies of overseas subsidiaries are currencies other than US$. As at the end of the reporting period, the assets and liabilities of these entities are translated into US$ at the exchange rates prevailing at the end of the reporting period and their statements of profit or loss are translated into HK$ at the weighted average exchange rates for the year.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in the statement of profit or loss.

For the purpose of the consolidated statement of cash flows, the cash flows of the overseas subsidiary are translated into US$ at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of the overseas subsidiary which arise throughout the year are translated into US$ at the weighted average exchange rates for the year.

Dividends
Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. Proposed final dividends are disclosed in the notes to the financial statements. Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Estimation uncertainty
The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Provision for expected credit losses on trade receivables
The Group uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geographical region and customer type).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward looking estimates are analysed.

4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (continued)

Estimation uncertainty (continued)
Provision for expected credit losses on trade receivables (continued)
The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on the Group's trade receivables is disclosed in note 13 to the financial statements, respectively.

5. REVENUE, OTHER INCOME AND GAINS

An analysis of revenue is as follows:

	2026 US$	2025 US$
Revenue from contracts with customers		
Sale of goods	25,614,629	27,827,749

(i) Disaggregated revenue information
The Group's entire revenue of goods transferred is recognised at a point in time.

The following table shows the amounts of revenue recognised in the current reporting period that were included in the contract liabilities at the beginning of the reporting period:

	2026 US$	2025 US$
Revenue recognised that was included in contract liabilities at the beginning of the reporting period:		
Sale of goods	455,999	315,131

(ii) Performance obligations
Information about the Group's performance obligations is summarised below:

Sale of home and garment products
The performance obligation is satisfied upon delivery of the home and garment products is generally due with 30 to 90 days from delivery, except for new customers, where payment in advance is normally required.

As a practical expedient, the amounts of transaction prices allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) are not disclosed in the notes to the financial statements because all the remaining performance obligations in relation to the sale of goods have an original expected duration of one year or less.

5. REVENUE, OTHER INCOME AND GAINS (continued)

An analysis of other income and gains are as follows:

	2026 US$	2025 US$
Bank interest income	27	666
Compensation from suppliers	499,648	268,539
Reversal of impairment of trade receivables	15,335	-
Foreign exchange differences, net	22,383	11,566
Others	68,704	4,553
Total other income and gains	606,097	285,324

6. PROFIT BEFORE TAX

The Group's profit before tax is arrived at after charging/(crediting):

	Notes	2026 US$	2025 US$
Cost of inventories sold		21,325,042	23,040,643
Depreciation of property, plant and equipment	11	4,608	2,152
Depreciation of a right-of-use asset	12	79,691	78,401
Lease payments not included in the measurement of lease liabilities		19,104	21,244
Auditor's remuneration		28,460	31,863
Employee benefit expense (excluding directors' remuneration (note 7)):			
Salaries and allowances		1,049,852	1,001,988
Pension scheme contributions (defined contribution scheme)		237,654	153,374
Total		1,287,506	1,155,362
Foreign exchange differences, net*		(22,383)	(11,566)
(Reversal of impairment)/impairment of trade receivables*	13	(15,335)	6,060

* These balances are included in "other income and gains" for gains or reversal and "administrative expenses" for losses.

7. DIRECTORS' REMUNERATION

Directors' remuneration disclosed pursuant to section 383(1)(a) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation, is as follows:

	2026 US$	2025 US$
Fees	-	-
Other emoluments:		
Salaries, allowances and other benefits	144,834	119,112
Retirement benefit scheme	2,018	-
Total	146,852	119,112

8. FINANCE COSTS

	2026 US$	2025 US$
Interest on interest-bearing bank borrowings	210,923	280,702
Interest on a lease liability	12,792	17,906
Total	223,715	298,608

9. INCOME TAX

A provision for Hong Kong profits tax has been made as the Group generated assessable profits arising in Hong Kong during the year (2025: Nil). Taxes on profits assessable elsewhere have been calculated at the rates of tax prevailing in the jurisdictions in which the Group operates.

A subsidiary of the Group established in the Republic of Chile is subject to the Chile corporate income tax regulations at a standard rate of 27% during the year.

No provision for PRC corporate income tax had been made for current year as the Group did not generate any assessable profits arising in the PRC.

	2026 US$	2025 US$
Current tax:		
Under provision in prior year	-	92
Pillar Two income taxes – current tax	124,012	-
Tax charge for the year	124,012	92

9. INCOME TAX (continued)

A reconciliation of the tax charge applicable to profit before tax at the Hong Kong statutory tax rate to the tax charge at the effective tax rate is as follows:

	2026 US$	2025 US$
Profit before tax	1,080,774	1,418,406
Tax charge at the Hong Kong statutory tax rate of 16.5% (2025: 16.5%)	178,327	234,037
Difference in tax rates applied for specific provinces or local authority	3,232	(24)
Adjustments in respect of current tax of previous periods	-	92
Income not subject to tax	(685,154)	(650,199)
Expenses not deductible for tax	495,722	397,490
Tax losses not recognised	7,873	18,696
Pillar Two top-up taxes	124,012	-
Tax at the effective tax rate	124,012	92

As at the end of the reporting period, a subsidiary of the Group had unused tax losses arising in Chile of US$816,852 (2025: US$787,692), that are available indefinitely for offsetting against future taxable profits of that subsidiary.

As at the end of the reporting period, a subsidiary of the Group had unused tax losses arising in Mainland China of US$136,045 (2025: US$145,205), that will expire in one to five years for offsetting against future taxable profits of that subsidiary.

At the end of the reporting period, the above deferred tax assets have not been recognised in respect of these unused tax losses items as it is not considered probable that taxable profits will be available against which these unused tax losses can be utilised.

Pillar Two income taxes

The Group falls within the scope of the Global Anti Base Erosion Model Rules ("Pillar Two Model Rules") issued by the Organisation for Economic Cooperation and Development, with subsidiaries operating in some jurisdictions that have legislated domestic Pillar Two income tax requirements in alignment with this framework.

The Group's earnings are subject to domestic minimum top up taxes in Hong Kong (effective from 1 January 2025).From 1 January 2025, the Group is also liable to Pillar Two income taxes under the Hong Kong Inland Revenue (Amendment) (Minimum Tax for Multinational Enterprise Groups) Ordinance 2025 in respect of its earnings from operations in Chile and China, even though these jurisdictions have not yet enacted Pillar Two legislation.

9. INCOME TAX (continued)

Pillar Two income taxes (continued)
The Group has assessed its potential Pillar Two income tax exposure in these jurisdictions based on the information available regarding the financial performance of the Group for the year ended 31 March 2026. Based on the assessment, all of the jurisdictions the Group operates, except for Hong Kong , qualify for the Transitional Country-by-Country Reporting ("CbCR") Safe Harbor, and as a result, the Pillar Two income tax exposure for these jurisdictions is deemed to be zero. The Group notes that Hong Kong do not qualify for the Transitional CbCR Safe Harbor and the effective tax rates are below 15%. As a result, the Group recognised a current tax charge of US$124,012 in respect of the top-up tax for the year ended 31 March 2026 (2025: Nil).

The Group applies the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes, as provided in the amendments to HKAS 12 issued in May 2023.

The Group will continue to monitor developments in Pillar Two legislation across relevant jurisdictions and assess the potential future impact on its financial statements.

10. DIVIDEND

	2026 US$	2025 US$
Interim – US$1.07 (2025:Nil) per ordinary share	1,074,043	-

11. PROPERTY, PLANT AND EQUIPMENT

	Leasehold improvements US$	Furniture and fixtures US$	Office equipment US$	Total US$
31 March 2026				
At 1 April 2025:				
Cost	40,720	63,638	29,338	133,696
Accumulated depreciation	(40,720)	(63,290)	(20,841)	(124,851)
Net carrying amount	-	348	8,497	8,845
At 1 April 2025, net of accumulated depreciation	-	348	8,497	8,845
Additions	17,616	-	2,299	19,915
Depreciation provided during the year	(1,936)	(174)	(2,498)	(4,608)
Exchange realignment	(59)	8	258	207
At 31 March 2026, net of accumulated depreciation	15,621	182	8,556	24,359
At 31 March 2026:				
Cost	58,336	63,638	30,959	152,933
Accumulated depreciation	(42,715)	(63,456)	(22,403)	(128,574)
Net carrying amount	15,621	182	8,556	24,359

11. PROPERTY, PLANT AND EQUIPMENT (continued)

	Leasehold improvements US$	Furniture and fixtures US$	Office equipment US$	Total US$
31 March 2025				
At 1 April 2024:				
Cost	40,720	63,589	27,020	131,329
Accumulated depreciation	(40,720)	(63,072)	(18,727)	(122,519)
Net carrying amount	-	517	8,293	8,810
At 1 April 2024, net of accumulated depreciation	-	517	8,293	8,810
Additions	-	-	2,039	2,039
Depreciation provided during the year	-	(172)	(1,980)	(2,152)
Exchange realignment	-	3	145	148
At 31 March 2025, net of accumulated depreciation	-	348	8,497	8,845
At 31 March 2025:				
Cost	40,720	63,638	29,338	133,696
Accumulated depreciation	(40,720)	(63,290)	(20,841)	(124,851)
Net carrying amount	-	348	8,497	8,845

12. LEASES

The Group as a lessee
The Group has a lease contract for office premises which has a lease term of 5 years. The Group is restricted from assigning and subleasing the leased asset outside the Group.

(a) Right-of-use asset

The carrying amount of the Group's right-of-use asset and the movements during the year are as follows:

	Office premises US$
As at 1 April 2024	287,409
Depreciation charge	(78,401)
Exchange realignment	(977)
As at 31 March 2025 and 1 April 2025	208,031
Depreciation charge	(79,691)
Exchange realignment	8,515
As at 31 March 2026	136,855

(b) Lease liability

The carrying amount of lease liability and the movements during the year are as follows:

	2026 US$	2025 US$
Carrying amount at the beginning of the year	217,001	292,545
Accretion of interest recognised during the year	12,792	17,906
Payments	(93,949)	(92,429)
Exchange realignment	8,942	(1,021)
Carrying amount at the end of the year	144,786	217,001
Analysed into:		
Current portion	81,891	72,616
Non-current portion	62,895	144,385

The maturity analysis of lease liabilities is disclosed in note 23 to the financial statements.

12. LEASES (continued)

The Group as a lessee (continued)

(c) The amounts recognised in profit or loss in relation to leases are as follows:

	2026 US$	2025 US$
Interest on a lease liability	12,792	17,906
Depreciation charge of a right-of-use asset	79,691	78,401
Expense relating to short-term leases	19,104	21,244
Total amount recognised in profit or loss	111,587	117,551

13. TRADE RECEIVABLES

	2026 US$	2025 US$
Trade receivables	5,656,507	4,033,873
Amount due from a related party	864,740	886,387
	6,521,247	4,920,260
Less: Impairment	(22,720)	(38,055)
Total	6,498,527	4,882,205

The Group's trading terms with its customers are mainly on credit, except for new customers, where payment in advance is normally required. The Group maintains a defined credit policy and credit periods are usually granted ranging from one to four months from the month-end of date of invoice to customers. The Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade receivables related to a number of customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are non-interest-bearing.

As at the end of the reporting period, an amount due from Grupo Extremo SUR S.A. ("Grupo"), a related company is unsecured, interest-fee and repayable on credit terms similar to those offered to the major customers of the Group.

13. TRADE RECEIVABLES (continued)

The movements in the loss allowance for impairment of trade receivables are as follows:

	2026 US$	2025 US$
At beginning of year	38,055	31,995
(Reversal of impairment)/impairment losses, net (note 6)	(15,335)	6,060
At end of year	22,720	38,055

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written off if past due for more than one year and are not subject to enforcement activity.

Set out below is the information about the credit risk exposure on the Group's trade receivables using a provision matrix:

As at 31 March 2026

		Past due			
	Current	Less than 1 month	1 to 3 months	Over 3 months	Total
Expected credit loss rate	0.33%	1.59%	-	-	0.35%
Gross carrying amount (US$)	6,432,766	88,481	-	-	6,521,247
Expected credit losses (US$)	21,312	1,408	-	-	22,720

As at 31 March 2025

		Past due			
	Current	Less than 1 month	1 to 3 months	Over 3 months	Total
Expected credit loss rate	0.77%	0.77%	-	0.77%	0.77%
Gross carrying amount (US$)	4,604,369	304,082	-	11,809	4,920,260
Expected credit losses (US$)	35,612	2,352	-	91	38,055

14. PREPAYMENTS, DEPOSITS AND OTHER RECEIVABLES

	2026 US$	2025 US$
Prepayments	42,354	22,624
Deposits	24,333	28,868
	66,687	51,492
Less: Portion classified as non-current	(24,333)	(23,123)
Total	42,354	28,369

The financial assets included in the above balances relate to receivables for which there was no recent history of default and past due amounts. As at 31 March 2026 and 2025, the loss allowance was assessed to be minimal.

15. OTHER PAYABLES AND ACCRUALS

	Notes	2026 US$	2025 US$
Accruals		87,274	83,437
Accrued employee benefits		75,768	75,835
Other payables	(a)	299,849	222,261
Contract liabilities	(b)	716,954	455,999
Total		1,179,845	837,532

Notes:

(a) Other payables are non-interest-bearing and have an average term of three months.

(b) Details of contract liabilities are as follows:

	31 March 2026 US$	31 March 2025 US$	1 April 2024 US$
Advances received from customers			
Sale of garment products	716,954	455,999	315,131

Contract liabilities include advances received to deliver garment products. The increase in contract liabilities in both years were mainly due to the increase in sales orders received from customers in relation to sales of garment products near year end.

16. INTEREST-BEARING BANK BORROWINGS

	2026 US$	2025 US$
Import loans	2,907,900	3,911,864

The import loans are denominated in US$, interest-bearing at risk-free rate ("RFR") +2.15% per annum and were repayable within one to two months.

The interest-bearing bank borrowings are guaranteed by the immediate holding company of the Company and a director of the Company.

17. SHARE CAPITAL

	2026 US$	2025 US$
Issued and fully paid:		
1,000,000 (2025: 1,000,000) ordinary shares	1,000,000	1,000,000

18. RESERVES

The amounts of the Group's reserves and the movements therein for the current year and the prior year are presented in the consolidated statement of changes in equity on page 10 of the financial statements.

19. RELATED PARTY TRANSACTIONS

(a) In addition to the transactions and balances detailed elsewhere in these financial statements, the Group had the following material transactions with related parties based on mutually agreed terms during the year:

	2026 US$	2025 US$
A fellow subsidiary:		
Management fees paid	47,017	18,551
Information technology expenses	46,081	39,764
A related company, Grupo (note 19(c)):		
Sales of goods	2,396,954	3,133,428
Commission paid	878,719	1,075,036

(b) Outstanding balance with a related party

The balance with a fellow subsidiary is unsecured, interest-free and repayable on demand.

19. RELATED PARTY TRANSACTIONS (continued)

(c) Particulars of amount due from a related company, disclosed pursuant to section 383(1)(d) of the Hong Kong Companies Ordinance, are as follows:

Name	31 March 2026 US$	Maximum amount outstanding during the year US$	31 March 2025 US$	Maximum amount outstanding during the year US$
Trade receivables from Grupo (note 13)	864,740	886,387	886,387	886,387

The controlling shareholders of the Grupo are also acting as directors of the Company.

Am amount due to Grupo is unsecured, interest free and is repayable on demand.

(d) Compensation of key management personnel of the Group represented directors' remuneration as disclosed in note 7 to the financial statements.

20. NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS

(a) Changes in liabilities arising from financing activities

	Lease liability US$	Interest-bearing bank borrowings US$
At 1 April 2024	292,545	3,070,229
Interest expense	17,906	-
Changes from financing cash flows, net	(92,429)	841,635
Exchange realignment	(1,021)	-
At 31 March 2025 and 1 April 2025	217,001	3,911,864
Interest expense	12,792	-
Changes from financing cash flows, net	(93,949)	(1,003,964)
Exchange realignment	8,942	-
At 31 March 2026	144,786	2,907,900

20. NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS (continued)

(b) Total cash outflow of leases

The total cash outflow for leases included in the statement of cash flows is as follows:

	2026 US$	2025 US$
Within operating activities	19,104	21,244
Within financing activities	93,949	92,429
Total cash outflow of leases	113,053	113,673

21. FINANCIAL INSTRUMENTS BY CATEGORY

The financial assets of the Group comprise trade receivables, deposits and other receivables, an amount due from a fellow subsidiary, and cash and cash equivalents, which are categorised as financial assets at amortised cost. The carrying amounts of these financial assets are the amounts shown on the consolidated statement of financial position or in the corresponding notes to the financial statements.

The financial liabilities of the Group comprise trade payables, financial liabilities included in other payables and accruals, interest-bearing bank borrowings, amounts due to a fellow subsidiary and a related company and a lease liability, which are categorised as financial liabilities at amortised cost. The carrying amounts of these financial liabilities are the amounts shown on the consolidated statement of financial position or in the corresponding notes to the financial statements.

22. FAIR VALUE OF FINANCIAL INSTRUMENTS

Management has assessed that the fair values of cash and cash equivalents, trade receivables, trade payables, current portion of deposits and other receivables, financial liabilities included in other payables and accruals, balances with fellow subsidiaries and a related company approximate to their carrying amounts largely due to the short term maturities of these instruments.

The Group did not have any financial assets and financial liabilities measured at fair value as at the end of each reporting period.

23. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's exposure to credit risk and liquidity risk arises in the normal course of its business. These risks are managed by the Group's financial management policies and practices described below:

Credit risk

The Group's cash and cash equivalents are held in major financial institutions, which management believes are of high credit quality. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

23. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at the end of reporting period. The amounts presented are gross carrying amounts of the financial assets.

As at 31 March 2026

	12-month ECLs	Lifetime ECLs			
	Stage 1 US$	Stage 2 US$	Stage 3 US$	Simplified approach US$	Total US$
Trade receivables*	-	-	-	6,521,247	6,521,247
Due from a fellow subsidiary					
- Normal**	6,222,031	-	-	-	6,222,031
Deposits and other receivables					
- Normal**	24,333	-	-	-	24,333
Cash and cash equivalents					
- Not yet past due	870,420	-	-	-	870,420
Total	7,116,784	-	-	6,521,247	13,638,031

As at 31 March 2025

	12-month ECLs	Lifetime ECLs			
	Stage 1 US$	Stage 2 US$	Stage 3 US$	Simplified approach US$	Total US$
Trade receivables*	-	-	-	4,920,260	4,920,260
Due from a fellow subsidiary					
- Normal**	8,111,888	-	-	-	8,111,888
Deposits and other receivables					
- Normal**	28,868	-	-	-	28,868
Cash and cash equivalents					
- Not yet past due	919,281	-	-	-	919,281
Total	9,060,037	-	-	4,920,260	13,980,297

* For trade receivables to which the Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in note 13 to the financial statements.

23. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Maximum exposure and year-end staging (continued)

** The credit quality of the trade receivables, deposits and other receivables and an amount due from a fellow subsidiary are considered to be "normal" when they are not past due and there is no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, the credit quality of the financial assets is considered to be "doubtful".

Liquidity risk

In the management of liquidity risk, the Group monitors and maintains a level of working capital deemed adequate, and maintains a balance between continuity and flexibility of funding from group companies.

The maturity profile of the Group's financial liabilities as at the end of the reporting period, based on the contractual undiscounted payments, is as follows:

	2026		
	On demand/ less than 1 year US$	1 to 5 years US$	Total US$
Lease liability	96,806	64,537	161,343
Trade payables	3,695,843	-	3,695,843
Financial liabilities included in other payables and accruals	87,274	-	87,274
Interest bearing bank borrowing	2,918,432	-	2,918,432
Due to a related company	594,868	-	594,868
Due to a fellow subsidiary	1,489	-	1,489
Total	7,394,712	64,537	7,459,249

	2025		
	On demand/ less than 1 year US$	1 to 5 years US$	Total US$
Lease liability	91,970	153,283	245,253
Trade payables	2,960,423	-	2,960,423
Financial liabilities included in other payables and accruals	301,081	-	301,081
Interest bearing bank borrowing	3,969,088	-	3,969,088
Due to a related company	683,183	-	683,183
Due to a fellow subsidiary	209,905	-	209,905
Total	8,215,650	153,283	8,368,933

23. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Capital management

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders' value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust dividend payments to the shareholders, return capital to the shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended 31 March 2026 and 31 March 2025.

24. STATEMENT OF FINANCIAL POSITION OF THE COMPANY

DESIGN ARC ASIA LIMITED

REPORT OF THE DIRECTORS

The directors present their report and the audited financial statements of Design Arc Asia Limited (the "Company") for the year ended 31 March 2026.

Principal activities

The principal activities of the Company have not been changed and consisted of the trading of garments and investment holding.

Results and dividends

The Company's loss for the year ended 31 March 2026 and its financial position at that date are set out in the financial statements on pages 5 to 43.

The directors do not recommend the payment of any dividend in respect of the year.

Directors

The directors of the Company during the year were:

Suresh Mahadev Punjabi	
Abhishekh Kanoi	(appointed on 31 December 2025)
Anuj Banaik	(appointed on 31 December 2025)
Rakesh Chadha	(resigned on 31 December 2025)

In accordance with Company's articles of association, all directors will retire by rotation and, being eligible, will offer themselves for re-election at the forthcoming annual general meeting.

Directors' interests

At no time during the year was the Company, its subsidiary, or any of its holding companies or fellow subsidiaries a party to any arrangement to enable the Company's directors to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

Directors' interests in transactions, arrangements or contracts

The director had no material interest, either directly or indirectly, in any transactions, arrangements or contracts of significance to the business of the Company to which the Company, its subsidiary, any of its holding companies or fellow subsidiaries was a party during the year.

Auditors

Ernst & Young retire and a resolution for their reappointment as auditors of the Company will be proposed at the forthcoming annual general meeting.

ON BEHALF OF THE BOARD

.....

Abhishekh Kanoi

Independent auditor's report
To the member of Design Arc Asia Limited
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the financial statements of Design Arc Asia Limited (the "Company") set out on pages 5 to 42, which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with HKFRS Accounting Standards as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") as issued by the HKICPA. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company in accordance with the HKICPA's *Code of Ethics for Professional Accountants* (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditor's report thereon

The directors are responsible for the other information. The other information comprises the information included in the report of the directors.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

A member firm of Ernst & Young Global Limited

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

Responsibilities of the directors for the financial statements (continued)
In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

Auditor's responsibilities for the audit of the financial statements (continued)
We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is Kong, Choi Yi (practising certificate number: P07873).

DESIGN ARC ASIA LIMITED

NOTES TO FINANCIAL STATEMENTS

31 March 2026

1. CORPORATE INFORMATION

Design Arc Asia Limited is a limited liability company incorporated in Hong Kong. The registered office of the Company is located at 9/F., Surson Commercial Building, 140-142 Austin Road, Tsimshatsui, Kowloon, Hong Kong. On 19 January 2026, the Company changed its registered office address to Unit 29-30, 11/F, Beverley Commercial Centre, 87-105 Chatham Road South, Tsim Sha Tsui, Hong Kong.

During the year, the Company was involved in the trading of garments and investment holding.

The Company is a partially-owned subsidiary of Norwest Industries Limited, a company incorporated in Hong Kong. In the opinion of the directors, the Company's ultimate holding company is PDS Limited, a company incorporated in India with shares listed on the Bombay Stock Exchange Limited and the National Stock Exchange of India Limited.

2. ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with HKFRS Accounting Standards (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the Hong Kong Companies Ordinance. The financial statements have been prepared under the historical cost convention, except for the defined benefit plan which has been measured using the projected unit credit actuarial valuation method as further explained in note 2.4 to the financial statements, and are presented in Hong Kong dollars ("HK$").

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The Company has adopted amendments to HKAS 21 Lack of Exchangeability for the first time for the current year's financial statements. The Company has not early adopted any other standard or amendment that has been issued but is not yet effective. The adoption of the above revised amendments to standards has had no significant financial effect on these financial statements.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.3 ISSUED BUT NOT YET EFFECTIVE HKFRS ACCOUNTING STANDARDS

The Company has not early applied any of the new and amended HKFRS Accounting Standards that have been issued but are not yet effective for the accounting year ended 31 March 2026 in these financial statements.

HKFRS 18	*Presentation and Disclosure in Financial Statements*[2]
HKFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to HKFRS 9 and HKFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to HKFRS 9 and HKFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to HKFRS 10 and HKAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Amendments to HKAS 21	*Translation to a Hyperinflationary Presentation Currency*[2]
Annual Improvements to HKFRS Accounting Standards – Volume 11	Amendments to HKFRS 1, HKFRS 7, HKFRS 9, HKFRS 10 and HKAS 7[1]

[1] Effective for annual periods beginning on or after 1 January 2026
[2] Effective for annual/reporting periods beginning on or after 1 January 2027
[3] No mandatory effective date yet determined but available for adoption

The Company is in the process of making an assessment of the impact of these new and amended HKFRS Accounting Standards upon initial application but is not yet in a position to state whether these new and amended HKFRS Accounting Standards would have a significant impact on the Company's results of operations and financial position.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES

Subsidiary

A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Company the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

(a) the contractual arrangement with the other vote holders of the investee;
(b) rights arising from other contractual arrangements; and
(c) the Company's voting rights and potential voting rights.

The results of a subsidiary are included in the Company's profit or loss to the extent of dividends received and receivable. The Company's investment in a subsidiary is stated at cost less any impairment loss.

Related parties

A party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and that person
    (i) has control or joint control over the Company;
    (ii) has significant influence over the Company; or
    (iii) is a member of the key management personnel of the Company or of a parent of the Company;

or

(b) the party is an entity where any of the following conditions applies:
    (i) the entity and the Company are members of the same group;
    (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
    (iii) the entity and the Company are joint ventures of the same third party;
    (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
    (v) the entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company;
    (vi) the entity is controlled or jointly controlled by a person identified in (a);
    (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
    (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment and depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rate used for office equipment and furniture and fixtures is 33⅓%.

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than financial assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs. In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Impairment of non-financial assets (continued)
An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

Leases
The Company assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee
The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(a) Right-of-use assets
Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease terms and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Leases (continued)
Company as a lessee (continued)

(b) Lease liabilities
Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for termination of a lease, if the lease term reflects the Company exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

Financial assets
Initial recognition and measurement
Financial assets are classified, at initial recognition, as subsequently measured at amortised cost.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient of not adjusting the effect of a significant financing component, the Company initially measures a financial asset at its fair value, plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under HKFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial assets (continued)
Initial recognition and measurement (continued)
The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Company commits to purchase or sell the asset.

Subsequent measurement of financial assets at amortised cost (debt instruments)
Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Derecognition of financial assets
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Company's statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Impairment of financial assets

The Company recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Company assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Company considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Company considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables which apply the simplified approach as detailed below.

Stage 1 – Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs

Stage 2 – Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs

Stage 3 – Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Impairment of financial assets (continued)

Simplified approach

For trade receivables that do not contain a significant financing component or when the Company applies the practical expedient of not adjusting the effect of a significant financing component, the Company applies the simplified approach in calculating ECLs. Under the simplified approach, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Financial liabilities

Initial recognition and measurement

Financial liabilities of the Company are classified, at initial recognition, as loans and borrowings or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement at amortised cost (trade and other payables, and borrowings)

After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Company's cash management.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in profit or loss.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Company operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Income tax (continued)
Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Company has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity which intend either to settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Dividends
Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

Revenue recognition
Revenue from contracts with customers
Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

Revenue from the sale of garments is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the garments.

Other income
Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Commission income is recognised at a point in time when the sourcing services are rendered.

Share-based payments
The Company operates a share option scheme for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Company's operations. Employees (including directors) of the Company receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments ("equity-settled transactions").

The cost of equity-settled transactions with employees for grants after 7 November 2002 is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer using the Black-Scholes option-pricing model, further details of which are given in note 19 to the financial statements.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Share-based payments (continued)
Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the Company or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

Other employee benefits
Pension scheme
The Company operates a defined contribution Mandatory Provident Fund retirement benefit scheme (the "MPF Scheme") under the Mandatory Provident Fund Schemes Ordinance for its employees. Contributions are made based on a percentage of the employees' basic salaries and are charged to profit or loss as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Company in an independently administered fund. The Company's employer contributions vest fully with the employees when contributed into the MPF Scheme.

Defined benefit plan
The Company's liability for termination benefit and earned leave for its employees in the Bangladesh branch is pursuant to Bangladesh Labour Act and is based on the most recent salary of the employees, number of completed years of service and number of working days.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Other employee benefits (continued)
Defined benefit plan (continued)
The cost of providing termination benefit and earned leave is determined based on the valuations performed by an independent actuary. Remeasurements arising from a defined benefit pension plan, comprising actuarial gains and losses, the effect of the asset ceiling (excluding amounts included in net interest on the net defined benefit liability) and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligations under "administrative expenses" in profit or loss by function:

- service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- net interest expense or income

Foreign currency transactions
These financial statements are presented in HK$, which is the Company's functional currency. Foreign currency transactions are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

3. SIGNIFICANT ACCOUNTING ESTIMATES

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Estimation uncertainty
The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

3. SIGNIFICANT ACCOUNTING ESTIMATES

Estimation uncertainty (continued)
Defined benefit plan (continued)
The determination of the Company's obligation and cost for defined benefits is performed by independent actuary engaged by the Company and dependent on the selection of certain assumptions used by them in calculating such amounts. Those assumptions include among others, discount rates and future annual salary increases. In accordance with the Company's accounting policy for pension obligations, actual results that differ from the Company's assumptions are recognised immediately in other comprehensive income as and they occur. While the Company believes that the actuary's assumptions are reasonable and appropriate, significant differences in the Company's actual experience or significant changes in the Company's assumptions may materially affects its pension and other retirement obligations.

4. REVENUE, OTHER INCOME AND GAINS

Revenue represents the net invoiced value of goods sold.

	2026 HK$	2025 HK$
Revenue from contracts with customers		
Sale of goods	466,811,602	404,543,967

(i) Disaggregated revenue information
The Company's entire revenue from the sale of garments is recognised at a point in time.

(ii) Performance obligations
Information about the Company's performance obligations is summarised below:

Sale of garment products
The performance obligation is satisfied upon delivery of the garment products is generally due with 30 to 90 days from delivery, except for new customers, where payment in advance is normally required.

As a practical expedient, the amounts of transaction prices allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) are not disclosed in the notes to the financial statements because all the remaining performance obligations in relation to the sale of goods have an original expected duration of one year or less.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

4. REVENUE, OTHER INCOME AND GAINS (continued)

An analysis of the Company's revenue, other income and gains are as follows:

	2026 HK$	2025 HK$
Other income and gains		
Penalty on suppliers	4,225,164	6,095,682
Bank interest income	3,199	5,194
Gain on rent concession from lessors	-	31,565
Gain on termination of a lease	-	8,395
Commission income	7,331,705	2,716,865
Foreign exchange difference, net	-	881,748
Others	52,766	158,851
Total other income and gains	11,612,834	9,898,300

5. (LOSS)/PROFIT BEFORE TAX

The Company's (loss)/profit before tax is arrived at after charging/(crediting):

	Notes	2026 HK$	2025 HK$
Cost of inventories sold		398,290,012	343,985,025
Auditor's remuneration		198,893	70,571
Depreciation for property, plant and equipment	11	196,183	258,128
Depreciation of right-of-use assets	12(a)	455,357	526,976
Gain on termination of a lease		-	(8,395)
Gain on rent concession from lessors		-	(31,565)
Impairment/(reversal of impairment) of trade receivables	13	117,888	(227,165)
Employee benefit expense:			
Salaries and allowances		9,479,832	8,018,600
Pension scheme contributions (defined contribution scheme)		35,942	-
Pension scheme contributions (defined benefit scheme)	16	679,225	516,389
Equity-settled share-based expense		53,651	69,406
Total		10,248,650	8,604,395
Foreign exchange difference, net#		953,400	(881,748)

These gains are included in "Other income and gains" and the losses are included in "Other operating expenses", as appropriate, in statement of profit or loss and other comprehensive income.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

6. FINANCE COSTS

	2026 HK$	2025 HK$
Interest on bank loans	7,077,928	1,060,517
Interest on lease liabilities	23,790	33,296
Total	7,101,718	1,093,813

7. DIRECTORS' REMUNERATION

None of the Company's directors received any fees or emoluments in respect of their services rendered to the Company during the year (2025: Nil).

8. INCOME TAX

No provision for Hong Kong profits tax has been made as the Company did not generate any assessable profits arising in Hong Kong during the year (2025: Nil).

A reconciliation of the tax expense/(credit) applicable to profit/(loss) before tax using the Hong Kong statutory rate of 16.5% (2025: 16.5%) to the tax amount at the effective tax rate is as follows:

	2026 HK$	2025 HK$
Profit/(loss) before tax	(3,515,781)	8,302,114
Tax expense/(credit) at the statutory tax rate	(580,104)	1,369,849
Income not subject to tax	(13,291,792)	(11,650,579)
Expenses not deductible for tax	13,871,896	10,280,730
Tax amount at the effective tax rate	-	-

There was no unprovided deferred tax in respect of the year and as at the end of the reporting period (2025: Nil).

9. DIVIDENDS

	2026 HK$	2025 HK$
Interim - Nil (2025: US$19) per ordinary share	-	17,390,588

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

10. INVESTMENT IN A SUBSIDIARY

	2026 HK$	2025 HK$
Unlisted investment, at cost	-	101,140
Impairment	-	(101,140)
	-	-

Note: On 17 March 2026, the Company's subsidiary, NOR France SAS, was dissolved.

Particulars of the subsidiary as at the end of the reporting period are as follows:

Name	Place of incorporation/ operations	Issued ordinary share capital	Percentage of equity directly attributable to the Company 2026	2025	Principal activities
NOR France SAS	France	Euro 10,000	0%	100%	Inactive

11. PROPERTY, PLANT AND EQUIPMENT

	Office equipment HK$	Furniture and fixtures HK$	Total HK$
31 March 2026			
At 1 April 2025:			
Cost	988,684	228,362	1,217,046
Accumulated depreciation	(783,310)	(199,512)	(982,822)
Net carrying amount	205,374	28,850	234,224
At 1 April 2025, net of accumulated depreciation	205,374	28,850	234,224
Additions	69,422	23,849	93,271
Depreciation provided during the year	(177,171)	(19,012)	(196,183)
At 31 March 2026, net of accumulated depreciation	97,625	33,687	131,312
At 31 March 2026:			
Cost	1,029,869	252,211	1,282,080
Accumulated depreciation	(932,244)	(218,524)	(1,150,768)
Net carrying amount	97,625	33,687	131,312

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

12. LEASES

The Company as a lessee
The Company has lease contracts for office premises which have lease terms within two years.

(a) Right-of-use assets

The carrying amounts of the Company's right-of-use assets and the movements during the year are as follows:

	Office premises HK$
As 1 April 2024	234,424
Additions	1,604,782
Depreciation charge	(526,976)
Termination of lease	(706,876)
As at 31 March 2025 and 1 April 2025	605,354
Additions	132,955
Depreciation charge	(455,357)
As at 31 March 2026	282,952

(b) Lease liabilities

The carrying amounts of lease liabilities and the movements during the year are as follows:

	2026 HK$	2025 HK$
Carrying amount at the beginning of the year	608,652	267,672
New leases	132,955	1,604,782
Accretion of interest recognised during the year	23,790	33,296
Payments	(476,613)	(550,262)
Rent concession from lessors	-	(31,565)
Termination of a lease	-	(715,271)
Carrying amount at the end of the year	288,784	608,652
Analysed into:		
Current portion	208,461	426,077
Non-current portion	80,323	182,575

The maturity analysis of lease liabilities is disclosed in note 24 to the financial statements.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

12. LEASES (continued)

(c) The amounts recognised in profit or loss in relation to leases are as follows:

	2026 HK$	2025 HK$
Interest on lease liabilities	23,790	33,296
Depreciation charge of right-of-use assets	455,357	526,976
Gain on termination of a lease	-	(8,395)
Total amount recognised in profit or loss	479,147	551,877

13. TRADE RECEIVABLES

	2026 HK$	2025 HK$
Trade receivables	2,754,229	78,187,637
Less: Impairment	(850,712)	(732,824)
Net carrying amount	1,903,517	77,454,813

The Company's trading terms with its customers are mainly on credit, except for new customers, where payment in advance is normally required. Trade receivables are non-interest bearing and are on credit terms up to 90 days. The Company seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Company's trade receivables related to a limited number of customers, the Company had a concentration of credit risk as 99% (2025: 94%) of the Company's trade receivables were due from its top five customers. The Company does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are non-interest-bearing.

The movements in the loss allowance for impairment of trade receivables are as follows:

	2026 HK$	2025 HK$
At beginning of year	732,824	959,989
Impairment/(reversal of impairment), net (note 5)	117,888	(227,165)
At end of year	850,712	732,824

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

13. TRADE RECEIVABLES (continued)

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by geographical region). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written off if past due for more than one year and are not subject to enforcement activity.

Set out below is the information about the credit risk exposure on the Company's trade receivables using a provision matrix:

As at 31 March 2026

		Past due			
	Current	Less than 1 month	1 to 3 months	Over 3 months	Total
Expected credit loss rate	30.89%	-	-	-	30.89%
Gross carrying amount (HK$)	2,754,229	-	-	-	2,754,229
Expected credit losses (HK$)	850,712	-	-	-	850,712

As at 31 March 2025

		Past due			
	Current	Less than 1 month	1 to 3 months	Over 3 months	Total
Expected credit loss rate	0.94%	-	-	-	0.94%
Gross carrying amount (HK$)	78,187,637	-	-	-	78,187,637
Expected credit losses (HK$)	732,824	-	-	-	732,824

14. PREPAYMENTS, DEPOSITS AND OTHER RECEIVABLES

	2026 HK$	2025 HK$
Prepayments	7,600,816	5,651,107
Deposits	110,135	111,166
Other receivables	13,265	462,740
	7,724,216	6,225,013
Less: Portion classified as non-current assets	(8,027)	-
Current portion	7,716,189	6,225,013

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

14. PREPAYMENTS, DEPOSITS AND OTHER RECEIVABLES (continued)

The financial assets included in the above balances relate to receivables for which there was no recent history of default and past due amounts. As at 31 March 2026 and 2025, the loss allowance was assessed to be minimal.

15. TRADE PAYABLES, OTHER PAYABLES AND ACCRUALS

	Notes	2026 HK$	2025 HK$
Trade payables	(i)	90,776,566	69,132,478
Accrued employee benefits		960,489	-
Accruals		227,075	802,605
Other payables	(ii)	537,315	6,781,782
Contract liabilities	(iii)	-	187,674
Defined benefit obligations	16	4,413,769	3,182,211
		6,138,648	10,954,272
Less: Portion classified as non-current liabilities		(4,413,769)	(3,182,211)
Current portion		1,724,879	7,772,061

Note:

(i) The trade payables are non-interest-bearing and are normally settled on 30-day terms.

(ii) Other payables are non-interest bearing and have an average term of three months.

(iii) Details of contract liabilities are as follows:

	31 March 2026 HK$	31 March 2025 HK$	1 April 2024 HK$
Short-term advances received from customers			
Sales of goods	-	187,674	927,073

Contract liabilities include short-term advances received to deliver garment products. The decrease in contract liabilities in 2026 was mainly due to the decrease in sales order received from customers in relation to sales of garment near year end. The decrease in contract liabilities in 2025 was mainly due to the decrease in sales order received from customers in relation to sales of garment near year end.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

16. DEFINED BENEFIT OBLIGATIONS

The Company made provisions for estimated liabilities for employee benefits in respect of termination benefit and earned leave pursuant to Bangladesh Labour Act. According to the law, employees are entitled to termination benefit and earned leave upon dismissal or retirement. Employees who have completed at least five years but less than ten years of continuous service are entitled to termination benefit equal fourteen days' salary for each completed year of service. Employees who have completed ten or more years of continuous service are entitled to termination benefit equal thirty days' salary for each completed year of service. Employees who have completed one year of continuous service are entitled to one day of earned leave for every fifteen days of work to up to sixty days.

The liability for termination of employment is measured using the projected unit credit method. The actuarial assumptions include expected salary increases and rates of employee turnover based on the estimated timing of payment. The amounts are presented based on discounted expected future cash flows using a discount rate determined by reference to market yields at the reporting date on government bonds with a term that is consistent with the estimated term of the severance pay obligation.

The most recent actuarial valuations of the plan assets and the present value of the defined benefit obligations were carried out on 31 March 2026 by KP Actuaries and Consultants LLP, a member of the Actuarial Society of India, using the projected unit credit actuarial valuation method.

The principal actuarial assumptions used as at the end of the reporting period are as follows:

	2026	2025
Discount rate (%)	10.0	11.9
Expected rate of salary increases (%)	7.8	7.8

A quantitative sensitivity analysis for significant assumptions as at the end of the reporting period is shown below:

	Increase in rate %	Increase/ (decrease) in defined benefit obligations HK$	Decrease in rate %	Increase/ (decrease) in defined benefit obligations HK$
2026				
Discount rate	0.5	(87,682)	0.5	91,031
Future salary increase	0.5	92,532	0.5	(89,887)
2025				
Discount rate	0.5	(63,721)	0.5	66,173
Future salary increase	0.5	68,310	0.5	(66,166)

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

16. DEFINED BENEFIT OBLIGATIONS (continued)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligations as a result of reasonable changes in key assumptions occurring at the end of the reporting period. The sensitivity analysis is based on a change in a significant assumption, keeping all other assumptions constant. The sensitivity analysis may not be representative of an actual change in assumptions would occur in isolation of one another.

The total expenses recognised in profit or loss in respect of the plan are as follows:

	2026 HK$	2025 HK$
Current service cost	318,500	260,361
Past service cost	18,381	-
Interest cost	342,344	256,028
Net benefit expenses recognised in administrative expenses	679,225	516,389

The movements in the present value of the defined benefit obligations are as follows:

	2026 HK$	2025 HK$
At beginning of year	3,182,211	2,125,231
Current service cost	318,500	260,361
Past service cost	18,381	-
Net interest cost	342,344	256,028
Actuarial loss arising from experience adjustments	925,565	914,827
Benefit paid	(118,054)	(504,096)
Exchange realignment	(255,178)	129,860
At 31 March	4,413,769	3,182,211

17. INTEREST-BEARING BANK BORROWINGS

	2026 HK$	2025 HK$
Trust receipt loans, unsecured	40,334,284	14,366,999

The trust receipt loans as at 31 March 2026 were denominated in United States dollars (2025: United States dollars), interest-bearing at cost of funding Secured Overnight Financing Rate ("SOFR") plus 2.15% (2025: Secured Overnight Financing Rate ("SOFR") plus 2.15%) per annum and will be matured in 2026 (2025: matured in 2025).

The Company's interest-bearing bank borrowings are guaranteed by the intermediate holding company and directors of the immediate holding company.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

18. SHARE CAPITAL

	2026 HK$	2025 HK$
Issued and fully paid: 117,646 (2025: 117,646) ordinary shares	1,234,667	1,234,667

A summary of the movements in the Company's share capital is as follows:

	Number of shares in issue	Share capital HK$
At 1 April 2024	102,040	1,113,252
New issue (a)	15,606	121,415
At 31 March 2025, 1 April 2025 and 31 March 2026	117,646	1,234,667

(a) On 31 December 2024, 15,606 ordinary shares were issued by cash to the new shareholders of the Company, which resulted in cash proceeds of HK$121,415.

19. SHARE OPTION SCHEME

The employees of the Company are covered under the share-based schemes of Employee Stock Option Plan 2021 – Plan A and Phantom Stock Units Plan 2021 (the ultimate holding company).

Employee Stock Option Plan (ESOP):
The employee stock option plan is offered to all eligible employees fixed numbers of share options. Under the plan, the option price per share is 100 percent of the fair market value on the grant date with a discount of 20 percent. The options have a four-year term plan and would be exercisable in four equal instalments.

Total share-based expense recognised in the profit and loss as part of employee benefits expense is as follows:

	2026 HK$	2025 HK$
Equity-settled share-based expense	53,651	69,406

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

19. SHARE OPTION SCHEME (continued)

Summarised information about movement in the share based schemes:

The Options outstanding under the employee stock purchase plan as of 31 March 2026 had an exercise price equal to 80 percent of the fair market value of holding company's stock on the date of exercise.

The following Options were outstanding under the Scheme during the year:

	2026		2025	
	Weighted average exercise price HK$ per share	Number of Options	Weighted average exercise price HK$ per share	Number of Options
At 1 April and 31 March	28.15	35,000	28.15	35,000

20. NOTES TO THE STATEMENT OF CASH FLOWS

(a) Major non-cash transactions

During the year ended 31 March 2026, the Company had non-cash additions to right-of-use assets and lease liabilities of HK$132,955 (2025: HK$1,604,782) and HK$132,955 (2025: HK$1,604,782), respectively, in respect of lease arrangements for office premises.

(b) Changes in liabilities arising from financing activities

	Lease Liabilities HK$	Interest-bearing bank borrowings HK$
At 1 April 2024	267,672	27,838,621
New leases	1,604,782	-
Changes from financing cash flows	(567,052)	(13,471,622)
Interest expense	33,296	-
Rent concessions from lessor	(31,565)	-
Termination of a lease	(698,481)	-
At 31 March 2025 and 1 April 2025	608,652	14,366,999
New leases	132,955	-
Changes from financing cash flows	(476,613)	25,967,285
Interest expense	23,790	-
At 31 March 2026	288,784	40,334,284

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

21. RELATED PARTY TRANSACTIONS

(a) In addition to the transactions and balances detailed elsewhere in these financial statements, the Company had the following transactions with related parties based on mutually agreed terms during the year:

	2026 HK$	2025 HK$
Ultimate holding company:		
Marketing fees paid	-	4,798,159
Intermediate holding company:		
Management fees paid	4,634,198	4,511,031
Consultancy fees paid	976,507	902,231
Sampling fees paid	-	437,625
Support services fee paid	1,444,219	1,184,770
Fellow subsidiaries:		
Marketing fees paid	19,060,012	18,654,915
Collaboration fees received	1,017,421	1,695,857
Sampling fees paid	266,963	969,808
Commission expenses paid	2,590,261	-
Commission income received	2,807,694	-
Sales of goods	2,744,864	4,011,665

(b) The balances with the ultimate holding company, an intermediate holding company, the immediate holding company and fellow subsidiaries are unsecured, interest-free and repayable on demand.

(c) The key management personnel of the Company did not receive any compensation in respect of their services rendered to the Company during the year (2025: Nil).

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

22. FINANCIAL INSTRUMENTS BY CATEGORY

The financial assets of the Company comprise trade receivables, financial assets included in prepayments, deposits and other receivables, amounts due from the ultimate holding company, the immediate holding company and fellow subsidiaries, and cash and cash equivalents which are categorised as financial assets at amortised cost. The carrying amounts of these financial assets are the amounts shown on the statement of financial position or in the corresponding notes to the financial statements.

The financial liabilities of the Company comprise trade payables, financial liabilities included in other payables and accruals, interest-bearing bank borrowings, lease liabilities and amounts due to the ultimate holding company, an intermediate holding company, the immediate holding company and fellow subsidiaries, which are categorised as financial liabilities at amortised cost. The carrying amount of financial liabilities included in other payables and accruals amounted to HK$764,390 (2025: HK$7,584,387). The carrying amounts of these financial liabilities other than financial liabilities included in other payables and accruals are the amounts shown on the statement of financial position or in the corresponding notes to the financial statements.

23. FAIR VALUE OF FINANCIAL INSTRUMENTS

Management has assessed that the fair values of trade receivables, financial assets included in prepayments, deposits and other receivables, cash and cash equivalents, trade payables, financial liabilities included in current portion of other payables and accruals, interest-bearing bank borrowings, balances with the ultimate holding company, an intermediate holding company, the immediate holding company and fellow subsidiaries approximated to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of the non-current portion of deposits have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities.

The Company did not have any financial assets and financial liabilities measured at fair value as at the end of each reporting period.

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

24. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's exposure to credit risk and liquidity risk arises in the normal course of its business. These risks are managed by the Company's financial management policies and practices described below:

Credit risk

The Company's cash and cash equivalents are held in major financial institutions, which management believes are of high credit quality. In addition, receivable balances are monitored on an ongoing basis and the Company's exposure to bad debts is not significant.

Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Company's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at 31 March. The amounts presented are gross carrying amounts of the financial assets.

As at 31 March 2026

	12-month ECLs	Lifetime ECLs

Total	131,488,621	185,492	131,674,113

Docusign Envelope ID: 5CEDC08D-D731-8926-83DF-7B3D2B03D0CB

24. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Capital management

The primary objectives of the Company's capital management are to safeguard the Company's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise the shareholders' value.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust dividend payments to its shareholders, return capital to the shareholders or issue new shares. The Company is not subject to any external imposed capital requirement. No changes were made in the objectives, policies or processes for managing capital during the years ended 31 March 2026 and 2025.

25. APPROVAL OF THE FINANCIAL STATEMENTS

The financial statements were approved and authorised for issue by the board of directors on 17 August 2026.

Independent Auditor's Report
&
Audited Financial Statement
For the Year ended 31 March, 2026

Mak & Co.
Chartered Accountants

INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF KLEIDER SOURCING LIMITED

Opinion

We have audited the financial statements of Kleider Sourcing Limited, which comprise the Statement of Financial Position as at 31 March, 2026, Statement of profit or loss and other comprehensive income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of Kleider Sourcing Limited give a true and fair view of the financial position as at 31 March, 2026, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) and comply with other applicable laws and regulations.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements and Internal Controls

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material

misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Mak & Co.
Chartered Accountants

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other Legal and Regulatory Requirements

In accordance with the Companies Act 1994, we also report the following:

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;

b) In our opinion, proper books of accounts as required by law have been kept by the Company so far as it appeared from our examination of these books;

c) The statement of financial position and statement of profit or loss and other comprehensive income dealt with by the report are in agreement with the books of account.

Managing Director

Director

Kleider Sourcing Limited
Notes to the Financial Statements
As at and for the year ended on 31 March, 2026

1.00 Background of the Company

Kleider Sourcing Limited is incorporated as private limited companies in Bangladesh having its registered office in Dhaka, Bangladesh. The company is a subsidiary of Norwest Industries Limited, Hong Kong. The principal activities of the company are to act as trader, supplier of goods and services including garments related activities.

2.00 Basis of preparation of financial statements

2.01 Statement of Compliance

The financial statements have been prepared incompliance with the requirements of the Companies Act 1994, and other relevant local laws as applicable and in accordance with the accounting policies mentioned in the following paragraphs.

2.02 Regulatory Compliances

In addition to the provision of Companies Act 1994, the management complies with the applicable provisions of following act & laws:

- The Income Tax Act 2023;
- The Income Tax Rules 1984;
- Value Added Tax and Supplementary Duty Act, 2012;
- Value Added Tax and Supplementary Duty Rules, 2016;

2.03 Components of the Financial Statements

According to the International Accounting Standards (IAS)-1 "Presentation of Financial Statements" the complete set of financial statements includes the following components.

- Statement of financial position as at 31 March, 2026;
- Statement of profit or loss and other comprehensive income for the Year ended on 31 March, 2026;
- Statement of changes in equity for the Year ended on 31 March, 2026;
- Statement of cash flows for the Year ended on 31 March, 2026; and
- Accounting policies and other explanatory notes for the Year ended 31 March, 2026.

2.04 Measurement Bases used in preparing the Financial Statements

The financial statements have been prepared on the historical cost basis, and therefore, do not take into consideration the effect of inflation. The accounting policies, unless otherwise stated, have been consistently applied by the company and are consistent with those of the previous Year.

2.05 Reporting Currency and Level of Precision

The financial statements are presented in Bangladeshi currency (Taka), which is the Company's functional currency. All financial information presented in Taka has been rounded off to the nearest Taka.

2.06 Preparation and Presentation of Financial Statements of the Company

The Board of Directors of the company is responsible for the preparation and presentation of financial statements of Kleider Sourcing Limited.

2.07 Use of Estimates and Judgments

The preparation of these financial statements, required management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual amounts may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on going basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

2.08 Reporting Period

This financial statement of the company covers period from 1 April, 2025 to 31 March, 2026.

2.09 Cash Flow Statement

Statement of cash flows is prepared in accordance with "IAS 7: Cash Flow Statement" and the cash flows from operating activities have been presented under direct Method.

2.10 Recognition of PPE:

Property, Plant and Equipment (PPE) under construction/acquisition is measured at cost & no depreciation was charged as per provision of 'IAS-16: Property, Plant and Equipment'.

2.11 Depreciation:

Depreciation has been charged on straight-line method on all property, plant and equipment that have already been put on operation except land. Full month's depreciation is charged for the month of acquisition irrespective of the date of acquisition and no depreciation is charged for the month of disposal. The rates of depreciation and category of property, plant and equipment are as follows:

Asset Type	Rate
Freehold Building	10%
Furniture and Fixtures	10%
Office Equipment	15%
IT Equipment	15%
Motor Vehicle	20%

2.12 Revenue Recognition

The company recognized revenue when control over goods and services has been transferred to the buyer, which satisfied all the condition for the revenue recognition as provided in IFRS 15 "Revenue from Contracts with Customer".

2.13 Provisions

As per "IAS 37: Provisions, Contingent Liabilities and Contingent Assets' a provision recognized on the date of statement of financial position if, as a result of past even Company has a present obligation that can be estimated reliably, and it is probable the outflow of economic benefits will be required to settle the obligation.

A provision is recognized if, as a result of a past event, the company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefit will be required to settle the obligation.

2.14 Contingencies

Contingencies arising from claim, litigation assessment, fines, penalties etc are recorded it is probable that a liability has been incurred and the amount can be measured reliably accordance with "IAS 37: Provisions, Contingent Liabilities and Contingent Assets".

2.15 Taxation

Income tax expenses comprises current and deferred tax. Current tax and deferred tax is recognized in profit or loss except to the extent that its relates to items recognized directly in equity in which case it is recognized in equity.

Current tax

Income from Operation is recognized in line with the provisions of the Income Tax Act, 2023. As per the Income Tax Act 2023, provision for tax has been made of existing rate of 27.5% or 0.6% of turnover or tax deducted at source.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purpose and the amounts used for taxation purposes. Deferred tax is not recognized for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that effects neither accounting nor taxable profit or loss;

- temporary differences related to investment in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future; and

- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if there is legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

2.16 Going Concern

The company has adequate resources to continue its operations for foreseeable future. For this reason the directors continue to adopt the going concern basis in preparing the accounts. The resources of the company are sufficient to meet the present obligation of its existing businesses and operations.

3.00 General

Figures are rounded off to the nearest Taka.

TO THE SHAREHOLDERS OF NOR LANKA MANUFACTURING COLOMBO LIMITED
REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of Nor Lanka Manufacturing Colombo Limited, which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2026 and of its financial performance and its cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

Basis for opinion

We conducted our audit in accordance with Sri Lanka Auditing Standards (SLAuSs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

EY

Shape the future with confidence

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and, as far as appears from our examination, proper accounting records have been kept by the Company.

ERNST & YOUNG Chartered Accountants COLOMBO

1. CORPORATE INFORMATION

1.1 General

Nor Lanka Manufacturing Colombo Limited ("the Company") is a limited liability company incorporated and domiciled in Sri Lanka. The registered office is situated at Rotunda Towers, No. 109, Galle Road, Colombo 03.

1.2 Principal Activities and Nature of Operations

Principal activity of the Company is carrying on the business of export of locally procured, manufactured garments.

1.3 Parent Enterprise and Ultimate Parent Enterprise

The Company's immediate parent is Nor Lanka Manufacturing Limited which is incorporated in Hong Kong and the ultimate parent undertaking is PDS Limited which is incorporated in India.

1.4 Date of Authorization for Issue

The financial statements of Nor Lanka Manufacturing Colombo Limited for the year ended 31 March 2026 were authorized for issue in accordance with a resolution of the Board of Directors on 30 April 2026.

2. GENERAL ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION

The Financial Statements of the Company have been prepared on a historical cost basis, unless stated otherwise.

The Financial Statements are presented in United States Dollars (USD).

2.1.1 Statement of Compliance

The Financial Statements of the Company which comprise the Statement of Financial Position, the Statement of Profit or Loss and Other Comprehensive Income, Changes in Equity and Cash Flows together with Accounting Policies and Notes.

The Financial Statements have been prepared in accordance with Sri Lanka Accounting Standards (SLFRS) as issued by the Institute of Chartered Accountants of Sri Lanka. The preparation and presentation of these financial statements is in compliance with the Companies Act No. 07 of 2007.

2.1.2 Comparative Information

The Financial Statements provide comparative information in respect of the previous year. The accounting policies have been consistently applied by the Company and, are consistent with those used in the previous year.

The previous year's figures and phrases have been re-arranged whenever necessary to conform to the current year presentation.

2.1.3 Going Concern

The Directors have made an assessment of the Company's ability to continue as a going concern in the foreseeable future and they do not intend either to liquidate or to cease trading.

2.2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.2.1 Foreign Currency Translation

The Financial Statements are presented in United States Dollars, which is the Company's functional and presentation currency. Transactions in foreign currencies are initially recorded at the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the end of the reporting period. All differences are taken to profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

2.2.2 Taxation

a) Current Taxes

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the income statement. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

b) Deferred Taxation

Deferred tax is provided using the balance sheet liability method, providing for tax effect of temporary difference between the carrying amount of assets and liabilities for financial reporting purpose and the amounts used for taxation purpose.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

The principal temporary differences arise from depreciation on property, plant and equipment and defined benefit obligations.

2.2.3 Inventories

Inventories are valued at the lower of cost and net realisable value, after making due allowances for obsolete and slow moving items. Net realisable value is the price at which inventories can be sold in the ordinary course of business less the estimated cost of completion and the estimated cost necessary to make the sale. The cost incurred in bringing inventories to its present location and conditions are accounted using the following cost formulae.

Raw Materials	At actual cost on weighted average basis
Finished Goods	At actual cost on weighted average basis
Stationeries	At actual cost on weighted average basis

2.2.4 Cash and Cash Equivalents

Cash and cash equivalents are defined as cash in hand, demand deposits and short term highly liquid investments, readily convertible to known amounts of cash and subject to insignificant risk of changes in value.

For the purpose of Statement of Cash Flows, cash and cash equivalents consist of cash in hand net of outstanding bank overdrafts.

2.2.5 Property, Plant and Equipment

All items of property, plant and equipment are initially recorded at cost. Subsequent to recognition, property, plant and equipment are stated at cost or valuation less accumulated depreciation and accumulated impairment losses.

When an asset is revalued, any increase in the carrying amount is credited directly to the asset revaluation reserve. When an asset's carrying amount is decreased as a result of a revaluation, the decrease is deducted against the asset revaluation reserve to the extent of any balance existing in the reserve in respect of that asset.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. The whole of the revaluation surplus included in the asset revaluation reserve in respect of an asset is transferred directly to retained earnings on retirement or disposal of the asset.

Depreciation of an asset begins when it is available for use and is computed on the straight-line basis over the estimated useful lives (or lease term, if shorter) of the assets as follows:

Freehold Building	- 10 years
Furniture and Fittings	- 3 years
Plant and Machinery	- 7 years
Office Equipment	- 3 years
Other Equipment	- 3 years
Motor Vehicles	- 5 years
Computer Equipment	- 3 years

Fully depreciated property plant and equipment are retained in the financial statements until they are no longer in use.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual value, useful life and depreciation method are reviewed at each financial year-end to ensure that the amount, method and period of depreciation are consistent with previous estimates and the expected pattern of consumption of the future economic benefits embodied in the items of property, plant and equipment.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on derecognition of the asset is included in the profit or loss in the year the asset is derecognised.

2.2.6 Intangible Assets

Computer Software and Licenses

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Company are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software product so that it will be available for use;
- management intends to complete the software product and use or sell it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their reliable estimated useful life of 3 to 5 years.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

2.2.7 Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

ii) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Company's lease liabilities are included in Interest-bearing loans and borrowings.

iii) Short-term leases and leases of low-value assets

The Company apply the 'short-term lease' and 'lease of low-value assets' recognition exemptions during the year for lease contracts.

2.2.8 Financial instruments

Financial Assets

Initial Recognition

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the business model for managing them.

ERNST & YOUNG Chartered Accountants COLOMBO

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Debt instruments at fair value through Other Comprehensive Income (FVTOCI)
- Equity instruments at fair value through Other Comprehensive Income (FVTOCI)
- Financial assets at fair value through profit or loss (unless measured at amortised cost or FVTOCI)

The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Derecognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- The rights to receive cash flows from the asset have expired,
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of it, the asset is recognized to the extent of the Company's continuing involvement in it.

In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables.

2.2.9 Impairment of Non-Financial Assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

2.2.10 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit or loss net of any reimbursement. Liability on warranty replacements on computer hardware sales does not arise on the Company as the related liability is born by the manufacturer.

2.2.11 Retirement Benefit Obligations

a) Defined Benefit Plan - Gratuity

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The defined benefit is calculated using Projected Unit Credit (PUC) method as recommended by LKAS 19 – "Employee benefits". The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability.

The present value of the defined benefit obligations depends on a number of factors that are determined using a number of assumptions. Key assumptions used in determining the defined retirement benefit obligations are as follows.

	2026	2025
Discount Rate	9.5%	10 %
Future Salary Increment Rate	8 %	8%
Retirement age		
Male	60 years	60 years
Female	60 years	60 years

Any changes in these assumptions will impact the carrying amount of defined benefit obligations.

The gratuity liability is not externally funded. This item is grouped under Non-Current Liabilities in the balance sheet.

b) Defined Contribution Plans – Employees' Provident Fund and Employees Trust Fund

Employees are eligible for Employees' Provident Fund Contributions and Employees' Trust Fund Contributions in line with the respective statutes and regulations. The Company contributes 12% and 3% of gross emoluments of employees to Employees' Provident Fund and Employees' Trust Fund respectively.

2.2.12 Revenue from Contract with Customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

a) Sale of Goods

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., warranties, customer loyalty points). In determining the transaction price for the sale of goods, the Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any).

b) Interest

Interest income and expense are recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial assets or liability (or, where appropriate a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial instruments, but not future credit losses.

The calculation of effective interest rate includes all transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental cost that are directly attributable to the acquisition or issue of a financial asset or liability. Interest income is presented in finance income in the Statement Profit or Loss.

c) Others

Other income is recognised on an accrual basis.

2.2.13 Expenditure Recognition

a) Expenses are recognised in the statement of profit or loss on the basis of a direct association between the cost incurred and the earning of specific items of income. All expenditure incurred in the running of the business and in maintaining the property, plant and equipment in a state of efficiency has been charged to income in arriving at the profit for the year.

b) For the purpose of presentation of statement of profit or loss the Directors are of the opinion that function of expenses method presents fairly the elements of the Company's performance, and hence such presentation method is adopted.

2.3 NEW ACCOUNTING STANDARDS ISSUED BUT NOT EFFECTIVE AS AT THE REPORTING DATE

The new and amended standards and interpretations that are issued up to the date of issuance of the Company's financial statements but are not effective for the current annual reporting period, are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

- **SLFRS 17 Insurance Contracts**

SLFRS 17 is a comprehensive new accounting standard for insurance contracts, covering recognition, measurement, presentation, and disclosure. It replaces SLFRS 4 and applies to all types of insurance contracts—including life, non-life, direct insurance, reinsurance—as well as certain guarantees and financial instruments with discretionary participation features:

The standard is built around the General Measurement Model, supported by two supplementary approaches:

- Variable Fee Approach (VFA): for contracts with direct participation features
- Premium Allocation Approach (PAA): a simplified model mainly for short-duration contracts

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2026, with comparative figures required. Early adoption is allowed if the entity also applies SLFRS 9 Financial Instruments and SLFRS 15 Revenue from Contracts with Customers by the date SLFRS 17 is first applied.

SLFRS 17 does not have a material impact on the financial statements.

- **SLFRS 18 Presentation and Disclosure in Financial Statements**

SLFRS 18, which replaces LKAS 1, introduces significant enhancements to the way financial information is organized and communicated. The standard establishes new categories and subtotals in the statement of profit or loss to improve consistency and comparability across entities. It also requires entities to disclose management-defined performance measures (as specified in the standard), together with clear explanations and reconciliations. In addition, SLFRS 18 introduces strengthened requirements regarding the location, aggregation, and disaggregation of financial information. These changes are designed to ensure that financial statements present information more transparently and in a way that enhances users' understanding of an entity's financial performance and position.

SLFRS 18, and consequential amendments to the other accounting standards, are effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted.

The potential impact of SLFRS 18 on the financial statements and the related notes is currently being identified and evaluated.

- **SLFRS 19 Subsidiaries without public accountability: Disclosures**

SLFRS 19 introduces reduced disclosure requirements for subsidiaries that do not have public accountability but continue to apply the full SLFRS recognition and measurement principles.

The purpose of SLFRS 19 is to lessen the financial reporting burden on qualifying subsidiaries by simplifying disclosure requirements, while still ensuring that financial statements remain high-quality, consistent, and comparable for users.

SLFRS 19 applies to Specified Business Enterprises, as defined in the Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995. Subsidiaries that fall within this category and do not have public accountability are eligible to apply SLFRS 19.

The Standard becomes effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted

The potential impact of SLFRS 19 is currently being identified and evaluated.

- **Classification and Measurement of Financial Instruments - Amendments to SLFRS 9 and SLFRS 7**

The amendments introduce enhancements to the classification, measurement, derecognition, and disclosure requirements for financial instruments. Their objective is to strengthen transparency, promote greater consistency in financial reporting, and respond to emerging market developments - particularly features such as sustainability-linked terms and nature-dependent electricity contracts.

These amendments are effective for annual reporting periods beginning on or after 1 January 2026. Early application is permitted.

The amendments are not expected to have a material impact on the financial statements

- **Annual improvements to Sri Lanka Accounting Standards**

Narrow scope amendments as part of its periodic maintenance of Sri Lanka Accounting Standards will be adopted will be adopted, if applicable, when they become effective.

3. PROPERTY, PLANT & EQUIPMENT

3.1 Gross Carrying Amounts

	Balance As at 01.04.2025 USD	Additions USD	Disposals /Transfers USD	Balance As at 31.03.2026 USD
At Cost/Valuation				
Buildings on Leasehold Land	375,163	19,479	-	394,642

	2026 USD	2025 USD
(iii) Receivables from Parent Company:		
Nor Lanka Manufacturing Limited	2,961,075	4,089,251
(iv) Payable to Parent Company:		
Nor Lanka Manufacturing Limited	265,714	245,047

25. EVENTS AFTER THE REPORTING PERIOD

There have been no events occurred after reporting period.

26. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's principal financial liabilities comprise trade and other payables. The main purpose of these financial liabilities is to finance the company's operations. The Company has trade and other receivables, and cash and short-term deposits that arrive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk.

The Company's senior management oversees the management of these risks. The Company's senior management determine on financial risks and the appropriate financial risk governance framework for the Company. The financial risk-taking activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with company policies and risk appetite.

The Board of Directors reviews and agrees policies for managing each of these risks which are summarized below

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Company's exposure to Market risk comprise of currency risk. Financial instruments affected by market risk include trade and other receivable, trade and other payables and due to related parties.

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities.

Cashflow Hedge

Forward currency contracts are designated as hedging instruments in respect of forecast future sales and forecast purchases in foreign currencies to which the Company has firm commitments. The forward currency contract balances vary with the levels of expected foreign currency sales and purchases and changes in foreign exchange forward rates.

As at 31 March 2025, the Company had five forward foreign currency contracts designated as cash flow hedges relating to committed forecast sales to its parent entity in Hong Kong. During the current accounting period, these derivative contracts were realized and no cash flow hedges remained outstanding at the reporting date.

	2026 USD	2025 USD
[illegible] included in the hedging reserves	(4,965)	4,965

26. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Contd...)

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily for trade receivables) and from deposits with banks and are disclosed in Note 7 respectively.

Trade receivables

Company's main customer is the parent company. The outstanding balance from the main customer amounting to 80% of the total trade receivable. Impairment is analyzed at each reporting date on an individual basis.

Liquidity risk

The table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

	Total	On demand USD	Less than 3 months USD	3 to 12 months USD	Over 12 months USD
Trade Payables	277,263	192,836	62,306	22,121	-
Amount due to related parties	265,714	265,714	-	-	-
Other Payables and accrued expenses	2,402,378	1,675,367	705,965	21,046	-
Borrowings	1,946,452	125,000	973,333	598,119	250,000
	4,891,808	2,258,917	1,741,605	641,286	250,000

27. FAIR VALUE MEASUREMENT

Financial instruments of the Company reflected at amortized cost in these financial statements included cash and cash equivalents, trade and other receivables, amount due from related parties, other financial asset, amount due from related parties and borrowings.

The management assess that the fair value all financial instruments approximate their carrying amount largely due to the short term maturities and market based interest rates of these instruments

UPCYCLE LABS LIMITED

DIRECTORS' REPORT

FOR THE YEAR ENDED 31 MARCH 2026

The directors present their annual report and financial statements for the year ended 31 March 2026.

Principal activities
The principal activity of the company was that of upcycling services for fashion brands & retailers to convert their unwanted inventory into new high-quality décor products and shop fittings. During the year, the company has not undertaken any significant activities.

Results and dividends
The results for the year are set out on page 7.

No ordinary dividends were paid. The directors do not recommend payment of a final dividend.

Directors
The directors who held office during the year and up to the date of signature of the financial statements were as follows:

Mr J R Ostrowski
Mr S Ballari
Mr A Agarwal

Auditor
The auditor, UHY Hacker Young, is deemed to be reappointed under section 487(2) of the Companies Act 2006.

Statement of directors' responsibilities
The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

United Kingdom company law requires the directors to prepare financial statements for each financial year. Under that law, the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company’s transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of disclosure to auditor

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information of which the company's auditor is unaware. Additionally, the directors individually have taken all the necessary steps that they ought to have taken as directors in order to make themselves aware of all relevant audit information and to establish that the company's auditor is aware of that information.

Small company exemption

This report has been prepared in accordance with the provisions of part 15 of the Companies Act 2006 related to small companies.

On behalf of the board

Ankur Agarwal

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF UPCYCLE LABS LIMITED

Opinion

We have audited the financial statements of Upcycle Labs Limited (the 'company') for the year ended 31 March 2026 which comprise the income statement, the statement of financial position, the statement of changes in equity and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 Reduced Disclosure Framework (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2026 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

UHY Hacker Young

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of our audit:

- the information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- the directors were not entitled to take advantage of the small companies exemption from the requirement to prepare a strategic report.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

Based on our understanding of the Company and the industry in which it operates, we identified that the principal risks of non-compliance with laws and regulations related to the acts by the Company, which were contrary to applicable laws and regulations including fraud, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls).

Audit procedures performed included: review of the financial statement disclosures to underlying supporting documentation, enquiries of management and testing of journals and evaluating whether there was evidence of bias by the Directors that represented a risk of material misstatement due to fraud.

There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities is available on the Financial Reporting Council's website at: https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company’s members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

1 Accounting policies

Company information

Upcycle Labs Limited is a private company limited by shares incorporated in England and Wales. The registered office is Unit 2, Teal Industrial Park, Cyan Close, Netherfield, Nottingham, NG14 5JX. The company's principal activities and nature of its operations are disclosed in the directors' report.

1.1 Basis of preparation

The financial statements have been prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101) and in accordance with applicable accounting standards.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

As permitted by FRS 101, the company has taken advantage of the following disclosure exemptions from the requirements of IFRS.

- inclusion of an explicit and unreserved statement of compliance with IFRS;
- presentation of a statement of cash flows and related notes;
- disclosure of the objectives, policies and processes for managing capital;
- disclosure of key management personnel compensation;
- disclosure of the categories of financial instrument and the nature and extent of risks arising on these financial instruments;
- the effect of financial instruments on the statement of comprehensive income;
- comparative period reconciliations for the number of shares outstanding and the carrying amounts of property, plant and equipment and intangible assets;
- disclosure of the future impact of new International Financial Reporting Standards in issue but not yet effective at the reporting date;
- comparative narrative information; and
- related party disclosures for transactions with the parent or wholly owned members of the group.

Where required, equivalent disclosures are given in the group accounts of PDS Limited. The group accounts of PDS Limited are available to the public and can be obtained as set out in note 22.

1.2 Going concern

The directors have at the time of approving the financial statements, a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The parent company, the company's main creditor, has provided an undertaking that it will not seek repayment of amounts owed to them until such time as the company is able to make the repayments. Thus, notwithstanding that as at the Balance Sheet date, the company had net liabilities of £1,436,830 (2025: £1,049,545), the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

1 Accounting policies **(Continued)**

1.3 Revenue

Revenue is measured based on the consideration receivable for goods and services provided to a customer. The company recognises revenue when it transfers control of a product or service to a customer.

1.4 Intangible assets other than goodwill

Intangible assets acquired separately from a business are recognised at cost and are subsequently measured at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets acquired on business combinations are recognised separately from goodwill at the acquisition date where it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity and the fair value of the asset can be measured reliably; the intangible asset arises from contractual or other legal rights; and the intangible asset is separable from the entity.

Amortisation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives which is deemed to be 10 years.

1.5 Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Leasehold land and buildings	5-10 Years on straight line basis
Leasehold improvements	1-5 Years on straight line basis
Fixtures and fittings	3 Years on straight line basis
Plant and equipment	5-10 Years on straight line basis
Computers	3 Years on straight line basis

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in the income statement.

1.6 Impairment of tangible and intangible assets

At each reporting end date, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, and whenever there is an indication that the asset may be impaired.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

1 Accounting policies (Continued)

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

1.7 Inventories

Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition.

Inventories held for distribution at no or nominal consideration are measured at the lower of cost and replacement cost, adjusted where applicable for any loss of service potential.

Net realisable value is the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

1.8 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

1.9 Financial assets

Financial assets are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument. Financial assets are classified into specified categories, depending on the nature and purpose of the financial assets.

At initial recognition, financial assets classified as fair value through profit and loss are measured at fair value and any transaction costs are recognised in profit or loss. Financial assets not classified as fair value through profit and loss are initially measured at fair value plus transaction costs.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

1 Accounting policies (Continued)

Financial assets at fair value through profit or loss
When any of the above-mentioned conditions for classification of financial assets is not met, a financial asset is classified as measured at fair value through profit or loss. Financial assets measured at fair value through profit or loss are recognized initially at fair value and any transaction costs are recognised in profit or loss when incurred. A gain or loss on a financial asset measured at fair value through profit or loss is recognised in profit or loss, and is included within finance income or finance costs in the statement of income for the reporting period in which it arises.

Financial assets held at amortised cost
Financial instruments are classified as financial assets measured at amortised cost where the objective is to hold these assets in order to collect contractual cash flows, and the contractual cash flows are solely payments of principal and interest. They arise principally from the provision of goods and services to customers (eg trade receivables). They are initially recognised at fair value plus transaction costs directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment where necessary.

Financial assets at fair value through other comprehensive income
Debt instruments are classified as financial assets measured at fair value through other comprehensive income where the financial assets are held within the company's business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument measured at fair value through other comprehensive income is recognised initially at fair value plus transaction costs directly attributable to the asset. After initial recognition, each asset is measured at fair value, with changes in fair value included in other comprehensive income. Accumulated gains or losses recognised through other comprehensive income are directly transferred to profit or loss when the debt instrument is derecognised.

The company has made an irrevocable election to recognize changes in fair value of investments in equity instruments through other comprehensive income, not through profit or loss. A gain or loss from fair value changes will be shown in other comprehensive income and will not be reclassified subsequently to profit or loss. Equity instruments measured at fair value through other comprehensive income are recognized initially at fair value plus transaction cost directly attributable to the asset. After initial recognition, each asset is measured at fair value, with changes in fair value included in other comprehensive income. Accumulated gains or losses recognized through other comprehensive income are directly transferred to retained earnings when the equity instrument is derecognized or its fair value substantially decreased. Dividends are recognized as finance income in profit or loss.

Impairment of financial assets
Financial assets carried at amortised cost and FVOCI are assessed for indicators of impairment at each reporting end date.

The expected credit losses associated with these assets are estimated on a forward-looking basis. A broad range of information is considered when assessing credit risk and measuring expected credit losses, including past events, current conditions, and reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

1 Accounting policies (Continued)

Derecognition of financial assets
Financial assets are derecognised only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership to another entity.

1.10 Financial liabilities
The company recognises financial debt when the company becomes a party to the contractual provisions of the instruments. Financial liabilities are classified as either 'financial liabilities at fair value through profit or loss' or 'other financial liabilities'.

Other financial liabilities
Other financial liabilities, including borrowings, trade payables and other short-term monetary liabilities, are initially measured at fair value net of transaction costs directly attributable to the issuance of the financial liability. They are subsequently measured at amortised cost using the effective interest method. For the purposes of each financial liability, interest expense includes initial transaction costs and any premium payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

Derecognition of financial liabilities
Financial liabilities are derecognised when, and only when, the company's obligations are discharged, cancelled, or they expire.

1.11 Equity instruments
Equity instruments issued by the company are recorded at the proceeds received, net of direct issue costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

1.12 Employee benefits
The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of inventories or non-current assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

1.13 Leases
As lessee
At inception, the company assesses whether a contract is, or contains, a lease within the scope of IFRS 16. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Where a tangible asset is acquired through a lease, the company recognises a right-of-use asset and a lease liability at the lease commencement date. Right-of-use assets are included within property, plant and equipment, apart from those that meet the definition of investment property.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

1 Accounting policies (Continued)

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for lease payments made at or before the commencement date plus any initial direct costs and an estimate of the cost of obligations to dismantle, remove, refurbish or restore the underlying asset and the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently adjusted for remeasurements of the lease liability and applies the relevant cost model, fair value model or revaluation model as set out within the accounting policies for the applicable asset class. Where the cost model is applied, the asset is depreciated from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term, and is periodically reduced by impairment losses, if any.

The lease liability is initially measured at the present value of the lease payments that are unpaid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee, and the cost of any options that the company is reasonably certain to exercise, such as the exercise price under a purchase option, lease payments in an optional renewal period, or penalties for early termination of a lease.

The lease liability is measured at amortised cost using the effective interest method. It is reassessed at each financial period end to reflect lease modifications and any changes to the factors considered at initial measurement, as set out above. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less, or for leases of low-value assets including IT equipment. The payments associated with these leases are recognised in profit or loss on a straight-line basis over the lease term.

RSign Envelope ID: ENV43786022-3233-FBBC-0261-BACD 13/05/2026 16:22 PM UTC

2 Critical accounting estimates and judgements

In the application of the company's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements

Valuations of lease liability & right-of-use asset

The application of IFRS 16 requires the company to make judgements that affect the valuation of the lease liabilities and the right-of-use assets. These include determining the interest rate used for discounting of future cash flows. the present value of the lease payment is determined using the discount rate representing the company's incremental borrowing rate.

Development Costs

The directors would assess and apply judgement on whether costs incurred in the development of the intangible assets meet the conditions required for capitalisation.

DIRECTORS' REPORT

FOR THE YEAR ENDED 31 MARCH 2026

The directors present their annual report and financial statements for the year ended 31 March 2026.

Principal activities
The principal activity of the company is that of wholesale and retail of clothing, footwear and accessories.

Directors
The directors who held office during the year and up to the date of signature of the financial statements were as follows:

I Hassan	(Resigned 1 August 2025)
E Hassan	(Resigned 1 August 2025)
R Ahuja	(Resigned 8 July 2025)
P Seth	
A Kanoi	(Appointed 8 July 2025)

Auditor
The auditor, UHY Hacker Young, is deemed to be reappointed under section 487(2) of the Companies Act 2006.

Statement of directors' responsibilities
The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of disclosure to auditor
So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information of which the company's auditor is unaware. Additionally, the directors individually have taken all the necessary steps that they ought to have taken as directors in order to make themselves aware of all relevant audit information and to establish that the company's auditor is aware of that information.

Small companies exemption
This report has been prepared in accordance with the provisions applicable to companies entitled to the small companies exemption.

On behalf of the board

A Kaur
Director

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF LILLYANDSID LIMITED

Opinion

We have audited the financial statements of Lillyandsid Limited (the 'company') for the year ended 31 March 2026 which comprise the profit and loss account, the balance sheet and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland* (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2026 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty relating to going concern

We draw attention to note 1.2 to the financial statements which indicate that there is a material uncertainty concerning the company's ability to continue as a going concern. The company owed its fellow group companies £1.7m (2025: £1.2m) at the year end. As mentioned in note 1.2, the company will require support from these group companies to meet its liabilities as and when they fall due in the next 12 months from the date of approval of the financial statements. These conditions indicate the existence of a material uncertainty which may cast significant doubt about the company's ability to continue as a going concern. These financial statements do not include any adjustments that would result if the company was unable to continue as a going concern.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF LILLYANDSID LIMITED (CONTINUED)

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of our audit:

- the information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report. We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- the directors were not entitled to prepare the financial statements in accordance with the small companies regime and take advantage of the small companies' exemption in preparing the directors' report and from the requirement to prepare a strategic report.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

UHY Hacker Young

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and the industry in which it operates, we identified that the principal risks of non-compliance with laws and regulations related to the acts by the company, which were contrary to applicable laws and regulations including fraud, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls) and determined that the principal risks were related to revenue.

Audit procedures performed included: review of the financial statement disclosures to underlying supporting documentation, testing of journals and evaluating whether there was evidence of bias by the Director that represented a risk of material misstatement due to fraud.

There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities is available on the Financial Reporting Council's website at: https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

These financial statements have been prepared in accordance with the provisions applicable to companies subject to the small companies regime.

The financial statements were approved by the board of directors and authorised for issue on 15 May 2026 and are signed on its behalf by:

A Hanoi
Director

Company registration number 06855192 (England and Wales)

1 Accounting policies

Company information

Lillyandsid Limited is a private company limited by shares incorporated in England and Wales. The registered office is Design Arc C/O Lilly And Sid Woodshots Meadow, Millfield House, Croxley Green Business Park, 6, Watford, England, WD18 8YX.

1.1 Basis of preparation

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

1.2 Going concern

The financial statements have been prepared on a going concern basis notwithstanding that at the balance sheet date, the company had net liabilities of £962,927 (2025: £567,172).

In view of this uncertainty, the directors have obtained confirmation of financial support from fellow group companies who gave an undertaking that they will not seek repayment of amounts owed until such time as the company it able to repay its debts. By taking this and future plans into consideration, the directors consider the going concern basis to be appropriate because the company will continue to have sufficient funding to enable it to pay its debts as they fall due in the next 12 months.

1.3 Revenue

Turnover is recognised at the fair value of the consideration received or receivable for goods and services provided in the normal course of business, and is shown net of VAT and other sales related taxes. The fair value of consideration takes into account trade discounts, settlement discounts and volume rebates.

The nature, timing of satisfaction of performance obligations and significant payment terms of the company's major sources of revenue are as follows:

Sale of goods

Revenue represents amount receivable from the distribution of garments net of discounts and value added tax. Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

1.4 Intangible fixed assets - goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2010, is being amortised evenly over its estimated useful life of five years.

1 Accounting policies (Continued)

1.5 **Tangible fixed assets**

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Plant and equipment	20% on reducing balance
Fixtures and fittings	20% on reducing balance

1.6 **Stocks**

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

1.7 **Cash and cash equivalents**

Cash and cash equivalents include cash in hand and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

1.8 **Financial instruments**

The company has elected to apply the provisions of Section 11 'Basic Financial Instruments' and Section 12 'Other Financial Instruments Issues' of FRS 102 to all of its financial instruments.

Financial instruments are recognised in the company's balance sheet when the company becomes party to the contractual provisions of the instrument.

Financial assets and liabilities are offset, with the net amounts presented in the financial statements, when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

Basic financial assets

Basic financial assets, which include debtors and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Financial assets classified as receivable within one year are not amortised.

Classification of financial liabilities

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

1 Accounting policies (Continued)

Basic financial liabilities

Basic financial liabilities, including creditors, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade creditors are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

1.9 Equity instruments

Equity instruments issued by the company are recorded at the proceeds received, net of transaction costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

1.10 Employee benefits

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of stock or fixed assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

1.11 Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due.

1.12 Leases

As lessee

Rentals payable under operating leases, including any lease incentives received, are charged to profit or loss on a straight line basis over the term of the relevant lease except where another more systematic basis is more representative of the time pattern in which economic benefits from the leases asset are consumed.

1.13 Foreign exchange

Transactions in currencies other than pounds sterling are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation in the period are included in profit or loss.

TECHNO TRADING (Shanghai) CO., LTD

FINANCIAL STATEMENTS AND REPORT OF THE AUDITORS
FOR THE YEAR ENDED 31 DECEMBER 2025

(English translation is for reference only. Any inconsistency between the Chinese and English versions, the Chinese version shall prevail.)

English translation is for reference only. The Chinese version shall prevail.

TECHNO TRADING (Shanghai) CO., LTD

Report of the Auditors

Date: March 14, 2026
YBCPAR No. (2026) – 095

To the Board of Directors of
TECHNO Trading (Shanghai) Co., Ltd.

1. **Opinion**

We have audited the accompanying financial statements of TECHNO Trading (Shanghai) Co., Ltd. (the "Company"), which comprise the Balance sheet as at 31 December 2025, the Income statement, the cash flow statement, the statement of changes in owner's equity for the year then ended, and notes to the financial statements.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2025, and the financial performance and cash flows for the year then ended in accordance with Accounting Standards for Business Enterprises.

2. **Basis of Opinion**

We conducted our audit in accordance with China Standards on Auditing for Certified Public Accountants ("CSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of The Company in accordance with the China Code of Ethics for Certified Public Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3. **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Accounting Standards for Business Enterprises, and for the design, implementation and maintenance of such internal control necessary to enable that the financial statements are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing The Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless

management either intends to liquidate The Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing The Company's financial reporting process.

4. Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of The Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on The Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause The Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

ADDITIONAL INFORMATION SUPPLIED BY THE MANAGEMENT OF
TECHNO (SHNAGHAI) TRADING CO., LTD.
(All amounts are stated in RMB Yuan unless otherwise stated)

1 GENERAL INFORMATION AND BUSINESS ACTIVITIES

TECHNO (Shanghai) Trading Co., Ltd. (hereinafter referred to as "the Company") is funded by Techno Design HK Limited and registered by Shanghai Market Supervision Administration, established on June 2,2023 (wholly owned by legal person) in 2023, with unified social credit code: 91310000MACLNM9A2J; registered capital of RMB 3.5 million, no fixed operating period.

The approved business scope of the Company is: general items: clothing wholesale; sales of household goods; import and export of goods; import and export of technology; sales of furniture parts; sales of daily necessities; procurement agency services.(Except for projects that are subject to approval according to law, carry out business activities according to business license according to law)

2 BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The company's financial statements are based on the continuing concern assumption, according to the actual transactions and matters, in accordance with the Ministry of Finance issued accounting standards —— basic standards (Treasury order no. 33, Treasury order no. 76), on February 15,2006 and revised 42 specific accounting standards, accounting standards application guidelines, accounting standards interpretation and other relevant provisions (hereinafter referred to as the "accounting standards for business enterprises"). According to the relevant provisions of the Accounting Standards for Business Enterprises, the company's accounting is based on the accrual basis. Except for certain financial instruments, the present financial statements are measured based on the historical costs. If the assets are impaired, the corresponding impairment provision shall be drawn in accordance with the relevant provisions.

3 STATEMENT OF ACCOUNTING STANDARD FOR THE ENTERPRISES

The company based on the above basis for establishment of the financial statements present fairly, in all material respects, the financial position of Kajima Corporation (China) Co., Ltd. as of 31 December 2025,and its financial performance and its cash flows for the year then ended in accordance with the Accounting Standards for Business Enterprises.

4 PRINCIPAL ACCOUNTING POLICIES

(a) Accounting period

The accounting period is from 1st January to 31st December of each calendar year.

(b) Reporting currency

The Company's reporting currency is Renminbi (RMB).

(c) Accounting basis and method

The Company's financial statements are prepared on an accrual basis, in order to continue as a going concern as a premise for accounting recognition, measurement, reporting, installment settlement accounts and prepare financial statements.

The accounting records are maintained on a historical cost basis. but in accordance with the Accounting Standards and the fair value can be obtained in a reliable way, fair value measurement model can be used in financial instruments, not under common control of enterprise merger, debt restructuring and exchange of non-monetary assets.

(d) Foreign currency translation

For the foreign currency transactions, the Company shall be converted into the standard currency according to the benchmark exchange rate ("benchmark exchange rate") published by the People's Bank of China on the day of the transaction. At the end of the term, various foreign currency monetary items shall be adjusted according to the spot exchange rate on the balance sheet date, and the balance resulting from the conversion shall belong to the exchange profit and loss generated by the foreign currency special loan related to the purchase and construction of fixed assets, which shall be handled in accordance with the principle of capitalization of borrowing expenses, and other parts shall be recorded into the current profit and loss. Foreign currency non-monetary items measured in the fair value mode shall be converted at the spot exchange rate on the date of determining the fair value, and the conversion difference shall be treated as the profit and loss of the change in fair value, and foreign currency non-monetary items measured at historical cost shall still be converted at the spot exchange rate on the date of transaction, without any exchange difference.

(e) Criteria of cash equivalents recognition

In preparation of the cash flow statement, cash refers to all cash in hand and call deposits.
Cash equivalents are defined as short-term, highly-liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(f) Receivables and method for bad debts

Receivables comprise accounts receivable and other receivables. The provision method is used to account for potential bad debts identified by management. Receivables are presented at actual amounts net of provision for bad debts.

Receivables include accounts receivable and other receivables. The Company adopts the allowance method for the possible bad debt losses, and the receivables are listed in the net amount after the actual amount incurred less the bad debt provisions. If there is conclusive evidence that the receivables cannot be recovered, such as: the debt unit has been cancelled, bankrupt, insolvent, the death of the debtor and other reasons, the approval of the management of the company is confirmed as bad debts, and the corresponding bad debt provision has been written off.

(g) Fixed assets and depreciation

(1) Fixed assets refer to buildings, machinery equipment, transportation facilities and other facilities and tools with useful lives over one year, which are held for the purpose of production, service provision, and lease or operating management.

(2) Fixed assets purchased or constructed by the Company were initially recorded at cost. The cost of purchased fixed assets include the purchase price, relevant taxes, and for the fixed asset to the expected conditions for use of other expenses attributable to the asset, such as transportation, handling charges, installation, professional service, etc. Such expenditures will be included in the related fixed assets if it is in conformity with the recognition criteria of fixed assets, if not the expenditures will be recorded into the profits and losses.

(3) Depreciation is provided under the straight-line method over the useful lives of the assets. The yearly depreciation rate is defined based on the category of fixed asset and estimated useful life.
The depreciation by category is as follows:

	Estimated Useful Lives	Estimated Residual Value	Annual Depreciation Rate
Electronic equipments	3 yrs	5%	31.67%
Office equipments	3 yrs	5%	31.67%
Office furniture	5 yrs	5%	19.00%

(4) Fixed assets that cannot generate income for the Company or are temporarily unused (except seasonal suspension) as idle fixed assets. Idle fixed assets shall be re-estimated in the estimated service life and depreciation rate, and the depreciation shall be directly recorded in the current profit and loss.

(5) If all risks and rewards related to a leased fixed asset have been substantially transferred, the Company recognizes it as a finance lease. Financing leased fixed assets according to the fair value of the lease assets and the lowest lease payment present value of the lower, plus can be directly attributable to the leasing project initial direct cost, as the entry value of leased assets, the minimum lease payments as long-term payment entry value, the difference as an unidentified financing costs. Unrecognized financing expenses shall be apportioned during the lease term using the effective interest rate method. The depreciation rate of the leased fixed assets shall be determined according to the lease term and the estimated net residual value.

(6) The fixed assets that meet the requirements for sale shall be listed in the amount of book value and fair value minus disposal cost. The fair value minus the disposal cost below the original book value shall be recognized as an asset impairment loss.

(7) The recognition of a fixed asset is terminated when the fixed asset is disposed of or is not expected to yield economic benefits through use or disposal. The amount of the sale, transfer, scrapping or destruction of fixed assets after deducting their book value and related taxes shall be included in the current profit and loss.

(h) Lease

Lease is a contract in which the lessor assigns the use of the assets to the lessee for a certain period to obtain consideration.

On the commencement date of the contract, the Company evaluates whether the contract is a lease or includes a lease. If a party transfers a right to control the use of one or more identified assets in exchange for consideration, the contract is a lease or includes a lease.

If the contract also contains multiple separate leases, the lessee and the lessor shall split the contract and separate the separate lease for accounting treatment. If the contract contains both the lease and non-leased parts, the lessee and the lessor shall split the lease and non-leased parts.

(1) Lessee

Right to use assets

On the beginning date of the lease term, the Company recognizes the right to lease assets except short-term lease and low-value asset lease. The tenure assets are initially measured at the cost, including: the initial measured amount of the lease liabilities; the amount of lease payment paid on or before the lease amount (excluding the lease incentives); the initial direct expenses incurred; the costs expected to occur for the removal and removal of the leased assets, restoring the site where the leased assets are located or restoring the leased assets to the state agreed in the lease terms.

The company uses the straight line method to depreciate the use assets. If the ownership of the leased assets is reasonably determined at the expiration of the lease term, the Company shall draw depreciation within the remaining service life of the leased assets. If it is impossible to reasonably determine that the ownership of the lease asset can be acquired at the expiration of the lease term, the lease asset shall be depreciated within the duration of the lease term and the remaining service life of the leased asset.

Lease obligation

On the beginning date of the lease term, the Company recognizes lease liabilities for leases except short-term leasing and low-value asset leasing. The lease liabilities are initially measured at the present value of the outstanding lease payments. The amount of lease payment includes: fixed payment amount and substantial fixed payment amount, excluding the lease incentive; the variable lease payment amount depending on the index or ratio at the time of the beginning of the lease term; the exercise price of the purchase option, provided that the Company reasonably determines to exercise the option; the termination option reflects the lease term; the amount expected to be payable from the residual value of the guarantee provided by the Company. The Company uses the lease included interest rate as the discount rate. If the interest rate included in the lease cannot be determined, the incremental borrowing rate of the company shall be used as the discount rate.

The Company shall calculate the interest expense of the lease liabilities during each period of the lease term at a fixed periodic interest rate and include them into the current profit and loss or related asset costs. Variable lease payments not included in the measurement of lease liabilities are recorded into current profits and losses or related asset costs upon actual occurrence.

After the commencement of the lease term, if the following circumstances occur, the Company shall remeasure the lease liabilities at the present value of the lease payment: the change of the assessment of the purchase option or the termination of the lease, or the actual exercise of the lease option is inconsistent with the original assessment; the expected amount payable according to the warranty balance; and the index or ratio of the lease payment. When remeasuring the lease liabilities, the Company shall adjust the book value of the use assets accordingly. If the book value of the use right assets has been reduced to zero, but the lease liabilities still need to be further reduced, the Company shall include the remaining amount into the current profit and loss.

Short-term lease and low-value asset leasing

The Company chooses not to recognize the use assets and lease liabilities for short-term lease and low-value asset lease, and includes the relevant lease payment into the current profit and loss or related asset cost according to the straight line method during each period of the lease term. Short-term lease is a lease at the beginning of the lease term not more than 12 months and without the purchase option. Low-value asset leasing refers to the lease with low value when a single leased asset is a new asset. If the company sublets or expects to subleases the leased assets, the original lease is not a low-value asset lease.

Lease change

If the lease is changed and meets the following conditions, the Company shall treat the lease change as a separate lease: the lease change expands the lease scope through increasing by using one or more leased assets; the increased consideration is equivalent to the separate price of the extended part of the lease scope adjusted according to the contract.

If the lease change is not treated as a separate lease, on the effective date of the lease change, the Company shall reshare the consideration of the contract after the change, redetermine the lease term, and the lease liabilities shall be remeasured according to the present value calculated by the change lease payment amount and the revised discount rate.

(2) Lessor

On the beginning date of the lease, the Company divides the lease into financial lease and operating lease. Finance lease refers to a lease that essentially transfers almost all of the risks and remuneration related to the ownership of the leased asset, regardless of whether the ownership is ultimately transferred or not. Operating lease refers to a lease other than a financial lease.

When the company is the sublease lessor, the transfer lease is classified based on the use right assets generated by the original lease. If the original lease is a short-term lease and the Company chooses not to confirm the assets of the use right and the lease liabilities of the original lease, the Company classifies the transfer lease as an operating lease.

Accounting treatment of operating lease

The lease collection amount of the operating lease shall be recognized as rental income by the straight line method during each period of the lease term. The Company will capitalize the initial direct expenses incurred related to the operating lease and share them into the current profit and loss on the same basis as the rental income recognition. Variable lease payments not included in the lease receipts shall be recorded in the current profit and loss upon actual occurrence.

Accounting treatment of financial leasing

On the commencement date of the lease, the Company confirms the finance lease amount receivable for the finance lease and terminates the recognition of the finance lease assets. When the Company makes the initial measurement of the finance lease receivable, the net lease investment shall be taken as the entry value of the finance lease receivable. The net lease investment shall be the sum of the present value of the unsecured surplus value and the outstanding lease receipts discounted at the included interest rate of the lease term.

The Company calculates and recognizes interest income for each period of the lease term at fixed periodic interest rates. The termination recognition and impairment of the financial lease amount receivable shall be treated in accordance with this Note V (VI) "Financial Instruments". Variable lease payments not included in the net lease investment measurement shall be recorded into the current profit and loss upon actual occurrence.

(i) The determination method and withdrawal basis of asset impairment provisions

The impairment of non-current assets except inventory, financial assets and deferred income tax is generally determined in the following manner:

Balance sheet date, if there is evidence that the assets are idle, terminate the plan or the market price fell sharply, the external environment significant changes, need to asset impairment test, according to the difference of the recoverable amount of the asset below the book value, confirm the asset impairment loss, included in the current profit and loss, the corresponding asset impairment provision. For the intangible assets with uncertain goodwill and uncertain service life formed by the business merger, the impairment test is conducted annually, regardless of whether there are signs of impairment. The recoverable amount is determined based on the higher value between the fair value of the asset minus the disposal expense and the present value of the estimated future cash flow of the asset. The Company estimates the recoverable amount on the basis of a single asset, and if it is difficult to estimate the recoverable amount of the single asset, based on the asset group to which the asset belongs.

After the impairment loss of the asset is recognized, the depreciation or amortization expense of the impaired asset shall be adjusted accordingly in the future period. Once the asset impairment loss is recognized, it shall not be reversed during the later accounting period. The asset impairment criteria stipulates that if there is any indication that an asset may be impaired, the enterprise shall estimate its recoverable amount on the basis of a single asset. Where it is difficult for an enterprise to estimate the recoverable amount of a single asset, the recoverable amount of the asset group shall be determined based on the asset group to which the asset belongs.

(j) Principles in revenue recognition

(1) Sales of goods income

The company shall recognize the realization of sales revenue when the following conditions:

The Company has transferred the main risks and remuneration in the ownership of the goods to the purchaser;

The amount of income can be measured reliably;

The amount of income can be measured reliably;

Related economic benefits are likely to flow into the company;

(2) Provide labor income

For the services started and completed in the same fiscal year, the revenue is; if the commencement and completion of the services belong to different fiscal years, if the results of the services transactions on the balance sheet date can be reliably estimated, the percentage of completion. The reliable estimation of the results of the labor service transaction means that the following conditions: the amount of income can be measured reliably, the relevant economic benefits are likely to flow into the enterprise, the completion progress of the transaction can be determined reliably, and the costs incurred and to be incurred in the transaction can be reliably measured. The completion schedule of labor service transaction adopts: the proportion of the cost incurred to the estimated total cost.

If the result of the labor transaction cannot be reliably estimated, if the labor cost is expected to be compensated, the service income shall be confirmed according to the amount of labor cost, and the labor cost shall be carried forward according to the same amount; if the labor cost cannot be compensated, the labor income shall not be confirmed, and the labor cost shall be included in the current profit and loss.

(3) Income from transferring the right to use the assets

The Company recognizes the realization of the income from the transfer of the assets when the following conditions are met:

Related economic benefits are likely to flow into the company;

The amount of income can be measured reliably.

(k) Accounting treatment for income taxes

(1) Accounting treatment of income taxes shall adopt balance sheet liability method.
Income taxes shall cover current income tax and deferred income tax. Except for income tax related to goodwill arising from business combination or to transactions and components directly included in owners' equity, which shall be included in owners' equity, income taxes shall be included in current gain and loss.

(2) Recognition of deferred income tax assets

A deferred tax asset is recognized for all deductible temporary differences to the extent that it is probable that taxable income will be available against which the deductible temporary difference can be utilized, except for the deductible temporary differences are from the following transactions:

The deferred tax asset arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss);

Deductible temporary differences related with investments in subsidiaries, associated companies and joint ventures fail to meet the following conditions simultaneously: 1) Temporary differences are likely to be utilized in foreseeable future; 2) Taxable income for deducting deductible temporary differences is probably available in future.

(3) Recognition of deferred income tax liabilities

The Company shall recognize all taxable temporary differences as deferred income tax liabilities, except for the taxable temporary differences are from the following transactions:

Initial recognition of goodwill or initial recognition of assets or liabilities arising from the transactions with the following characteristics: transaction is not attributed to business combination; neither accounting profit nor taxable income is undermined when transaction takes place;

Taxable temporary differences related with investments in subsidiaries, associated companies and joint ventures; the realizing time of such temporary differences can be controlled and such temporary differences are unlikely to be realized in the foreseeable future.

At the balance sheet date, the Company shall measure deferred income tax assets and deferred income tax liabilities at applicable tax rate during the period for expected recovery of such assets or fulfill of such liabilities according to tax law, and properly disclose the effects of deferred income tax assets and liabilities on balance sheet date.

(4) Impairment of deferred income tax assets

The Company shall review book value of deferred income tax assets on balance sheet date. Where it is unlikely to get sufficient taxable income to offset the benefits from deferred income tax assets, the Company shall write down book value of deferred income tax assets. Where it is likely to get sufficient taxable income, the written-down amount shall be reversed.

5 TAXATION

Major applicable taxes and tax rate for the Company:

Types of tax	Tax rate (%)	Tax basis
VAT (general taxpayer)	6%	service revenue
City construction tax	7%	service revenue
Enterprise income tax	25%	Taxable income

According to the Announcement No.12 of 2023 of the State Administration of Taxation of the Ministry of Finance, the taxable income of small enterprises with small profit is reduced by 25%, and the enterprise income tax policy paid at the rate of 20% will be extended until December 31,2027.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Infinity Fashion FZCO
Dubai, United Arab Emirates

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Infinity Fashion FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021. concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

INFINITY FASHION FZCO is incorporated on **December 26, 2022 under License No.05474 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed and controlled by following persons:

1.Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

18 RISK MANAGEMENT

18.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

18.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

INFINITY FASHION FZCO

Premises No. 2 E M020, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

a. **Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. **Currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

18.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

19 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026. The Previous fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025. Previous year figures might be reclassified & regrouped to conform to the current year presentation.

NexStyle Apparel Manufacturing Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of NexStyle Apparel Manufacturing Limited (the "Company") for the period from 13 May 2025 (date of incorporation) to 31 March 2026.

Principal activity

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

Results and dividend

The results for the period are shown on page 7.

The directors do not recommend the payment of a dividend for the period under review.

Statement of directors' responsibilities in respect of financial statements

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Going concern

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

Auditors

Lancasters Chartered Accountants have been appointed as auditors and a resolution concerning their re-appointment will be proposed at the next annual meeting of the shareholder.

By order of the Board

S Ernandhully

Director

Date: 14 May 2026

Rogers Capital

NexStyle Apparel Manufacturing Limited

Secretary's certificate
For the period from 13 May 2025 (date of incorporation) to 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act

In accordance with section 166 (d) of the Mauritius Companies Act, we certify to the best of our knowledge and belief, that the Company has filed with the Registrar of Companies, all such returns as required of the Company for the financial period from 13 May 2025 (date of incorporation) to 31 March 2026.

For and on behalf of **Rogers Capital Corporate Services Limited**
Company secretary

Date: 14 May 2026

Auditor's report to member of NexStyle Apparel Manufacturing Limited

Opinion

We have audited the financial statements of **NexStyle Apparel Manufacturing Limited** (the "Company") set out on pages 7 to 28 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the period then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the period then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's report to member of NexStyle Apparel Manufacturing Limited (continued)

Responsibilities of the Directors for the Financial Statements (continued)

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

Lancasters,
Chartered Accountants

NexStyle Apparel Manufacturing Limited

Notes to and forming part of the financial statements
for the period from 13 May 2025 (date of incorporation) to 31 March 2026

1. General information

The Company was incorporated as a private limited company on 13 May 2025 and was granted a Global Business Licence on 13 May 2025. The Company's registered office is C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

The Company is a holder of a Global Business Licence under the Mauritius Companies Act 2001 and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies, the Company has chosen to use the United States Dollar (USD) as its reporting currency.

2. Reporting period

The Company was incorporated on 13 May 2025 and has prepared its first financial statements as from its date of incorporation 13 May 2025 to 31 March 2026. As such, no comparatives are available.

3. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) – 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

These financial statements have been prepared under the going concern basis using the historical cost convention, except for financial instruments which are carried at amortised cost.

(c) Functional and presentation currency

These financial statements are presented in USD which is the Company's functional and presentation currency.

(d) Use of estimates and judgement

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised prospectively.

3. Basis of preparation (continued)

(d) Use of estimates and judgement (continued)

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

- Recognition of deferred tax assets: availability of future taxable profit against which carry forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the USD.

Going Concern

Management has made an assessment in respect of the entity's going concern and is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

4. Application of new and revised International Financial Reporting Standards (IFRSs)

4.1 New standards, interpretations and amendments adopted during the period

There have been amendments and interpretations that have become effective for the current year. The Company has adopted the following new interpretation during the period:

Classification of liabilities as current or non-current and on-current liabilities with covenants *(Amendments to IAS 1)*

Under existing IAS 1 requirements, companies classify liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional was removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. The amendments confirm that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

The amendments also clarify how an entity classifies a liability that can be settled in its own shares. When a liability includes a counterparty conversion option that involves a transfer of the company's own equity instruments, the conversion option is recognised as either equity or a liability separately from the host liability under IAS 32 Financial Instruments: Presentation. The amendments now clarified that when a company classifies the host liability as current or non-current, it can ignore only those conversion options that are recognised as equity.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with early application permitted. It also specifies the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments.

The directors have assessed that the amendments did not have any impact on the separate financial statements.

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2025 or later periods, but which the Company has not early adopted.

At the reporting date of these financial statements, the following were in issue but not yet effective:

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

5. Critical accounting estimates and judgements

The Company makes estimates and judgements that affect the reported amounts of assets and liabilities within the next year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Determination of functional currency

The determination of the functional currency of the Company is critical since recordings of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the United States Dollar (USD).

Estimates and assumptions

Impairment of investment in subsidiaries

The carrying values of investment in subsidiaries are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the subsidiary, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

6. Material accounting policies

The accounting policies set out below have been applied in the preparation of these financial statements.

(a) Foreign currency transactions

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

(b) Revenue recognition

Revenue is recognised as follows:

- Trading income from sales of vanilla and cloves and other spices.
- Dividend income: when the Company's right to receive payment is established.

(c) Stated capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

(d) Expenses

All expenses are recognised in profit or loss on an accrual basis.

(e) Taxation

Taxation comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises of the expected tax payable or receivable on the taxable income or loss for the period. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6. **Material accounting policies (continued)**

(e) Taxation (continued

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

(f) Investments in subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Investment in subsidiary is shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(g) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

6. **Material accounting policies (continued)**

(h) Financial instruments

(i) Recognition and initial measurement

All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVTOCI) – debt investment; FVTOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets (continued)

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered as sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest (continued)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses:

Financial assets at amortised cost

These assets are subsequently measured at Amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gain or losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss. A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through profit or loss are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial liabilities – Classification, subsequent measurement and gains and losses (continued)

Derecognition

The Company derecognises a financial liability when its contractual obligation is discharged or cancelled, or expires. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iii) Impairment of assets

Impairment

The Company recognises loss allowance for Expected Credit Loss ("ECL") on:

- Financial assets measured at amortised cost;

The Company measured loss allowance at an amount equal to lifetime ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e., the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(iii) Impairment of assets (continued)

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the entity of accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

7. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. Trade and other receivables exclude prepayments amounting to **USD 912.**

	-	**23,288**	**23,288**

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management

Introduction and preview

Financial instruments carried in the statement of financial position include other receivables, cash and cash equivalents, loan from shareholder and other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risks are market risk, liquidity risk and credit risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly review their risk management policies and systems to reflect changes in markets and emerging best practice.

Overview

The Company has exposure to the following risk arising from financial instruments:

- Market risk
- Liquidity risk
- Credit risk

- *Market risk*

Market risk represents the potential loss that can be caused by a change in the market value of the financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility.

The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limits its exposure to market declines.

(i) Interest rate risk

The majority of the Company's financial assets and financial liabilities are non-interest bearing. As such, the Company is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity under both normal and stressed condition to meet its liabilities when they become due without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the Company's contractual maturities of financial liabilities:

Period ended 31 March 2026

	Due on demand USD	Due for less than 1 year USD	Due for more than 1 year USD	Total USD
Financial liabilities				
Other payables	**-**	**23,288**	**-**	**23,288**
Total financial liabilities	**-**	**23,288**	**-**	**23,288**

- *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet contractual obligations, and arises from cash and cash equivalents.

The Company also limits its exposure to credit risk by dealing only with counterparties that has a good credit rating and management does not expect counter party to fail to meet its obligations.

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	Carrying amount Period ended 31 March 2026 USD
Other receivables	**258,994**
Cash and cash equivalents	**21,861**
	280,855

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Credit risk (continued)*

Cash and cash equivalents

The Company held cash and cash equivalents of **USD 21,861** at 31 March 2026. The cash and cash equivalents are held with banks with good repute and having strong track record in the banking industry. Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties. The expected credit loss on cash and cash equivalents was deemed by management to be not material and therefore no impairment allowances were accounted for.

Other receivables

The Company applies the simplified approach to measuring expected credit losses, as permitted by IFRS 9, which uses a 12-month expected loss allowance for all other receivables. The expected credit loss on other receivables was deemed by management to be not material and therefore no impairment allowances were accounted for.

8. **Income tax expense**

Income tax

The Company was issued with a Global Business Licence ("GBL") on 13 May 2026 and is subject to income tax in Mauritius on its net income at 15%.

Recognised in the statement of profit or loss and other comprehensive income

During the period under review, the Company entered into the following related party transactions.

			2026 USD
Transaction during the period:	*Nature of relationship*	*Nature of transaction*	
PDS Manufacturing Limited	Related Party	Loan receivable	**255,000**
PDS Manufacturing Limited	Related Party	Interest receivable	**3,694**
Balance outstanding at 30 June:			
PDS Manufacturing Limited	Related Party	Amount receivable	**258,694**

14. Capital management

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern. As the Company is part of a larger group, the Company's sources of additional capital and policies for distribution of excess capital may also be affected by the group's capital management objectives.

The Company defines "capital" as including all components of equity. Trading balances that arise as a result of trading transactions with other group Companies are not regarded by the Company as capital.

The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the group to which the Company belongs. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company or the group. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

15. Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

16. Holding and ultimate holding company

The Company is a wholly owned subsidiary of NexStyle Apparel Manufacturing Limited (India), a Company incorporated in India. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

17. Events after the reporting date

There have been no significant adjusting events after the reporting date which needs disclosures in or amendments to the financial statements for the year ended 31 March 2026.

NexStyle Apparel Manufacturing Limited

Directors' report

The directors are pleased to present their report together with the audited financial statements of NexStyle Apparel Manufacturing Limited (the "Company") for the period from 13 May 2025 (date of incorporation) to 31 March 2026.

Principal activity

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

Results and dividend

The results for the period are shown on page 7.

The directors do not recommend the payment of a dividend for the period under review.

Statement of directors' responsibilities in respect of financial statements

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Going concern

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

Auditors

Lancasters Chartered Accountants have been appointed as auditors and a resolution concerning their re-appointment will be proposed at the next annual meeting of the shareholder.

By order of the Board

S Ernandhully

Director

Date: 14 May 2026

Rogers Capital

NexStyle Apparel Manufacturing Limited

Secretary's certificate
For the period from 13 May 2025 (date of incorporation) to 31 March 2026

Secretary's certificate under Section 166 (d) of the Mauritius Companies Act

In accordance with section 166 (d) of the Mauritius Companies Act, we certify to the best of our knowledge and belief, that the Company has filed with the Registrar of Companies, all such returns as required of the Company for the financial period from 13 May 2025 (date of incorporation) to 31 March 2026.

For and on behalf of **Rogers Capital Corporate Services Limited**
Company secretary

Date: 14 May 2026

Auditor's report to member of NexStyle Apparel Manufacturing Limited

Opinion

We have audited the financial statements of **NexStyle Apparel Manufacturing Limited** (the "Company") set out on pages 7 to 28 which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the period then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the period then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Company Secretary's Certificate as required by the Companies Act 2001, but does not include the financial statements nor our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's report to member of NexStyle Apparel Manufacturing Limited (continued)

Responsibilities of the Directors for the Financial Statements (continued)

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matter

This report is made solely for the Company's member, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's member those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's member, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Mauritius Companies Act 2001

We have no relationship with or interests in the Company other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

NexStyle Apparel Manufacturing Limited

Notes to and forming part of the financial statements
for the period from 13 May 2025 (date of incorporation) to 31 March 2026

1. General information

The Company was incorporated as a private limited company on 13 May 2025 and was granted a Global Business Licence on 13 May 2025. The Company's registered office is C/o Rogers Capital Corporate Services Limited, Level 3, Rogers Capital House, 5 President John Kennedy Street, Port Louis, Republic of Mauritius.

The Company will act as an investment holding company with investments in companies in the textile and apparel sector mostly in Hong Kong, Bangladesh, United Kingdom and Germany.

The Company is a holder of a Global Business Licence under the Mauritius Companies Act 2001 and the Financial Services Act 2007. Since the Company operates in an international environment and conducts most of its transactions in foreign currencies, the Company has chosen to use the United States Dollar (USD) as its reporting currency.

2. Reporting period

The Company was incorporated on 13 May 2025 and has prepared its first financial statements as from its date of incorporation 13 May 2025 to 31 March 2026. As such, no comparatives are available.

3. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the Mauritius Companies Act. The Company is a sub subsidiary of PDS Limited and has taken advantage of paragraph 4 of International Financial Reporting Standards (IFRS 10) – 'Consolidated Financial Statements', which dispenses it from the need to present consolidated financial statements as its ultimate holding company is preparing consolidated financial statements as per IFRS as issued by the IASB. The registered address of PDS Limited where the consolidated financial statements are available is Unit No. 971, Solitaire Corporate Park Andheri Ghatkopar Link Road, Andheri East, Mumbai 400093, Maharashtra, India.

(b) Basis of measurement

These financial statements have been prepared under the going concern basis using the historical cost convention, except for financial instruments which are carried at amortised cost.

(c) Functional and presentation currency

These financial statements are presented in USD which is the Company's functional and presentation currency.

(d) Use of estimates and judgement

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised prospectively.

3. Basis of preparation (continued)

(d) Use of estimates and judgement (continued)

Assumption and estimation uncertainties

Information about assumptions, estimation uncertainties and critical judgements in applying accounting policies that have the most significant risk of resulting in a material adjustment in these financial statements are included in the relevant notes as follows:

- Recognition of deferred tax assets: availability of future taxable profit against which carry forward tax losses can be used;
- Impairment test: key assumptions underlying recoverable amounts; and
- Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the USD.

Going Concern

Management has made an assessment in respect of the entity's going concern and is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

4. Application of new and revised International Financial Reporting Standards (IFRSs)

4.1 New standards, interpretations and amendments adopted during the period

There have been amendments and interpretations that have become effective for the current year. The Company has adopted the following new interpretation during the period:

Classification of liabilities as current or non-current and on-current liabilities with covenants *(Amendments to IAS 1)*

Under existing IAS 1 requirements, companies classify liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional was removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. The amendments confirm that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

The amendments also clarify how an entity classifies a liability that can be settled in its own shares. When a liability includes a counterparty conversion option that involves a transfer of the company's own equity instruments, the conversion option is recognised as either equity or a liability separately from the host liability under IAS 32 Financial Instruments: Presentation. The amendments now clarified that when a company classifies the host liability as current or non-current, it can ignore only those conversion options that are recognised as equity.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with early application permitted. It also specifies the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments.

The directors have assessed that the amendments did not have any impact on the separate financial statements.

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2025 or later periods, but which the Company has not early adopted.

At the reporting date of these financial statements, the following were in issue but not yet effective:

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2026

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Disclosures

Classification and Measurement of Financial Instruments: The amendments clarify that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice to derecognise financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with ESG linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments. Also, additional disclosures have been introduced for financial instruments with contingent features and equity instruments designated at fair value through other comprehensive income.

IFRS 9 Financial Instruments & IFRS 7 Financial Instruments: Contracts Referencing Nature-dependent Electricity

Contracts Referencing Nature-dependent Electricity:These amendments clarify the accounting treatment of contracts where the volume of electricity delivered is influenced by uncontrollable natural conditions, such as wind or solar variability.

Annual Improvements to IFRS Accounting Standards

Volume 11- These improvements affect IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7. The amendments include clarifications to wording, corrections of unintended consequences, and simplifications that do not alter the fundamental principles of the standards.

Effective date January 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

Presentation and disclosure in financial statements: IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals presented within the statement of profit or loss within one of the following five categories – operating, investing, financing, income taxes, and discontinued operations. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, it brings about consequential amendments to other accounting standards. This standard replaces IAS 1 - Presentation of Financial Statements.

4. Application of new and revised International Financial Reporting Standards (IFRSs) (continued)

4.2 Standards, Amendments to published Standards and Interpretations issued but not yet effective (continued)

Effective date January 1, 2027 (continued)

IFRS 10 Consolidated Financial Statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS Accounting Standards 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

Where relevant, the Company are still evaluating the effect of these Standards, Amendments to published Standards and Interpretations issued, but not yet effective, on the presentation of its financial statements.

5. Critical accounting estimates and judgements

The Company makes estimates and judgements that affect the reported amounts of assets and liabilities within the next year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Determination of functional currency

The determination of the functional currency of the Company is critical since recordings of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the United States Dollar (USD).

Estimates and assumptions

Impairment of investment in subsidiaries

The carrying values of investment in subsidiaries are tested for impairment whenever there is any objective evidence or indication that the investments may be impaired. This determination requires significant judgement. In estimating the recoverable amount of the investment, the Company evaluates, amongst other factors, the future profitability of the subsidiary, its financial health and near-term business outlook, including factors such as industry and sector performance, changes in technology, and operational and financing cash flows.

6. Material accounting policies

The accounting policies set out below have been applied in the preparation of these financial statements.

(a) Foreign currency transactions

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

(b) Revenue recognition

Revenue is recognised as follows:

- Trading income from sales of vanilla and cloves and other spices.
- Dividend income: when the Company's right to receive payment is established.

(c) Stated capital

Ordinary shares

Ordinary shares are classified in equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

(d) Expenses

All expenses are recognised in profit or loss on an accrual basis.

(e) Taxation

Taxation comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises of the expected tax payable or receivable on the taxable income or loss for the period. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6. **Material accounting policies (continued)**

(e) Taxation (continued

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

(f) Investments in subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Investment in subsidiary is shown at cost and provision for impairment is only made where, in opinion of the directors, there is a diminution in value which is other than temporary. Where there has been such a diminution in value of an investment, it is recognised as an expense in the year in which the diminution is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss and other comprehensive income.

(g) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

6. **Material accounting policies (continued)**

(h) Financial instruments

(i) Recognition and initial measurement

All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVTOCI) – debt investment; FVTOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets (continued)

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered as sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest (continued)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses:

Financial assets at amortised cost

These assets are subsequently measured at Amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gain or losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss. A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through profit or loss are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Financial liabilities – Classification, subsequent measurement and gains and losses (continued)

Derecognition

The Company derecognises a financial liability when its contractual obligation is discharged or cancelled, or expires. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iii) Impairment of assets

Impairment

The Company recognises loss allowance for Expected Credit Loss ("ECL") on:

- Financial assets measured at amortised cost;

The Company measured loss allowance at an amount equal to lifetime ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e., the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

6. **Material accounting policies (continued)**

(h) Financial instruments (continued)

(iii) Impairment of assets (continued)

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the entity of accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

7. Financial instruments – Fair values and risk management

(a) Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. Trade and other receivables exclude prepayments amounting to **USD 912.**

	Carrying amount		
31 March 2026	**Financial assets USD**	**Other financial liabilities USD**	**Total USD**
Financial assets not measured at fair value			
Other receivables	**258,994**	**-**	**258,994**
Cash and cash equivalents	**21,861**	**-**	**21,861**
	280,855	**-**	**280,855**
Financial liabilities not measured at fair value			
Other payables	**-**	**23,288**	**23,288**
	-	**23,288**	**23,288**

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management

Introduction and preview

Financial instruments carried in the statement of financial position include other receivables, cash and cash equivalents, loan from shareholder and other payables. The recognition method adopted is disclosed in the individual policy statement associated with each item. The most important types of risks are market risk, liquidity risk and credit risk.

The Company's activities expose them to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The Company's aims are therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly review their risk management policies and systems to reflect changes in markets and emerging best practice.

Overview

The Company has exposure to the following risk arising from financial instruments:

- Market risk
- Liquidity risk
- Credit risk

- *Market risk*

Market risk represents the potential loss that can be caused by a change in the market value of the financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility.

The Company conducts its investment operations in a manner that seeks to exploit the potential gains in the market, while limits its exposure to market declines.

(i) Interest rate risk

The majority of the Company's financial assets and financial liabilities are non-interest bearing. As such, the Company is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity under both normal and stressed condition to meet its liabilities when they become due without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the Company's contractual maturities of financial liabilities:

Period ended 31 March 2026

	Due on demand USD	Due for less than 1 year USD	Due for more than 1 year USD	Total USD
Financial liabilities				
Other payables	**-**	**23,288**	**-**	**23,288**
Total financial liabilities	**-**	**23,288**	**-**	**23,288**

- *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet contractual obligations, and arises from cash and cash equivalents.

The Company also limits its exposure to credit risk by dealing only with counterparties that has a good credit rating and management does not expect counter party to fail to meet its obligations.

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk at the reporting date was:

	Carrying amount Period ended 31 March 2026 USD
Other receivables	**258,994**
Cash and cash equivalents	**21,861**
	280,855

7. **Financial instruments – Fair values and risk management (continued)**

(b) Financial risk management (continued)

- *Credit risk (continued)*

Cash and cash equivalents

The Company held cash and cash equivalents of **USD 21,861** at 31 March 2026. The cash and cash equivalents are held with banks with good repute and having strong track record in the banking industry. Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties. The expected credit loss on cash and cash equivalents was deemed by management to be not material and therefore no impairment allowances were accounted for.

Other receivables

The Company applies the simplified approach to measuring expected credit losses, as permitted by IFRS 9, which uses a 12-month expected loss allowance for all other receivables. The expected credit loss on other receivables was deemed by management to be not material and therefore no impairment allowances were accounted for.

8. **Income tax expense**

Income tax

The Company was issued with a Global Business Licence ("GBL") on 13 May 2026 and is subject to income tax in Mauritius on its net income at 15%.

Recognised in the statement of profit or loss and other comprehensive income

Current tax expense

	Period from 13 May 2025 (date of incorporation) to 31 March 2026 USD

13. Related party disclosures

During the period under review, the Company entered into the following related party transactions.

			2026 USD
Transaction during the period:	*Nature of relationship*	*Nature of transaction*	
PDS Manufacturing Limited	Related Party	Loan receivable	**255,000**
PDS Manufacturing Limited	Related Party	Interest receivable	**3,694**
Balance outstanding at 30 June:			
PDS Manufacturing Limited	Related Party	Amount receivable	**258,694**

14. Capital management

The Company's primary objectives when managing capital are to safeguard the Company's ability to continue as a going concern. As the Company is part of a larger group, the Company's sources of additional capital and policies for distribution of excess capital may also be affected by the group's capital management objectives.

The Company defines "capital" as including all components of equity. Trading balances that arise as a result of trading transactions with other group Companies are not regarded by the Company as capital.

The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the group to which the Company belongs. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company or the group. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

15. Impact of geographical conflicts in the Middle East

As at the date of the approval of these separate financial statements, the directors are aware of the recent geopolitical tensions and armed conflicts in the Middle East and do not underestimate the seriousness of these events and the impact this will have on the global economy. Currently there is no direct impact on the Company as it does not have any transactions with countries in the affected regions. Accordingly, the directors have determined that the matter does not have a material impact on the separate financial statements.

Nevertheless, due to the uncertainty surrounding the duration and extent of the conflict and the potential for broader economic impacts, Management will continue to monitor the situation closely.

16. Holding and ultimate holding company

The Company is a wholly owned subsidiary of NexStyle Apparel Manufacturing Limited (India), a Company incorporated in India. The ultimate holding Company is PDS Limited, a company incorporated in India with its shares listed on The National Stock Exchange of India Limited and Bombay Stock Exchange.

17. Events after the reporting date

There have been no significant adjusting events after the reporting date which needs disclosures in or amendments to the financial statements for the year ended 31 March 2026.

The Directors do not recommend the payment of any dividend.

Share capital

Details of the share capital are summarised in the notes to consolidated financial statements.

Directors

The Directors of the Company during the year and up to the date of this report were:

Mohandas THEKKEYIL
Suresh Mahadev PUNJABI
Abhishekh KANOI

The appointment of Directors is governed by the Company's Articles of Association.

The name of Directors who have served on the board of the Company's subsidiaries during the financial year and up to the date of this report were:

Abhishekh Kanoi
Sagarkumar Satyanarayan Ballani
Andrew Michael Reaney
Shah Bhavesh Dinesh
Manish Kumar Arora

Business review

The Group is a wholly-owned subsidiary of another body corporate. Accordingly, the Group is exempted from preparing a business review.

ONLINE ENTERPRISE HK LIMITED

DIRECTORS' REPORT

Directors' material interests in transactions, arrangements and contracts that are significant in relation to the Company's business

No transactions, arrangements and contracts of significance in relation to the Company's business of which the Company or any of its group companies was a party subsisted at the end of the year or at any time during the year in which any Directors of the Company had a material interest.

Directors' interests in shares and debentures of the Company or specified undertaking of the Company or any other associated corporation

At no time during the year was the Company or any of its group companies, a party to any arrangement to enable any of the Director of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

Management contracts

No contract concerning the management and administration of the whole or any substantial part of the business of the Company was entered into or existed during the year.

Equity-linked agreements

The Group had not entered into any equity-linked agreements during the year.

Permitted indemnity provisions

The Company's Articles of Association provides that a director or former director of the Company may be indemnified out of the Company's assets against any liability incurred by the director to a person other than the Company or an associated company of the Company in connection with any negligence, default, breach of duty or breach of trust in relation to the Company or associated company (as the case may be). This Article only applies if the indemnity does not cover the liability set out in the Company's Articles. This permitted indemnity provision is in force during the year and at the time of approval of this report.

Auditor

A resolution to re-appoint the retiring auditor, Chow Tsz Kit, Certified Public Accountant (Practising), will be put at the forthcoming annual general meeting.

On behalf of the Board

Mohandas THEKKEYIL
Director

HONG KONG,

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF ONLINE ENTERPRISE HK LIMITED
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the annexed consolidated financial statements of Online Enterprise HK Limited ("the Company") and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31 March 2026, and consolidated the statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 March 2026, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Consolidated Financial Statements and our Auditor's Report Thereon

The Directors are responsible for the other information. The other information comprises the information included in the Directors' report but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

/... to be continued

(Continuation)

Responsibilities of Directors for the Consolidated Financial Statements

The Directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

/ to be continued

(Continuation)

Auditor's Responsibilities for the Audit of the Financial Statements - Continued

- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is Chow Tsz Kit (Practising Certificate Number: P08162).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2026

1 General information

The Company is a private company incorporated and domiciled in Hong Kong with limited liabilities, its registered office and principal place of business at 7/F., Park Fook Industrial Building, 615-617 Tai Nan West Street, Cheung Sha Wan, Kowloon, Hong Kong.

The Directors consider that the immediate holding company is PDS Sourcing Limited, a private company incorporated in Mauritius.

The Directors consider that the intermediate holding company is Multinational Textile Group Limited, a private company incorporated in Mauritius.

PDS Limited, a company incorporated in India and the shares are listed on the Bombay Stock Exchange (Stock code: 538730) and National Stock Exchange of India (Stock code: PDSL), is the Company's ultimate holding company.

The principal activities of the Group is trading of garments. The activities of its principal subsidiaries are set out in the note to the consolidated financial statement.

2 Statement of compliance

These consolidated financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual HKFRSs, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and accounting principles generally accepted in Hong Kong and the requirements of the Hong Kong Companies Ordinance.

Going concern

As at 31 March 2026, there was a deficit on Shareholder's funds of HK$15,247,890.

The immediate holding company has confirmed its present intention to provide financial support to the Group to enable it to meet its liabilities as and when they fall due and to enable the Group to continue business for the foreseeable future. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

3 Basis of preparation

These consolidated financial statements are prepared under the historical cost convention.

4 Adoption of new and revised Hong Kong Financial Reporting Standards

The HKICPA has issued a number of new and revised HKFRSs that are first effective for the current accounting period of the Group. The adoption of these HKFRSs has no material impact on these consolidated financial statements.

The Group has not applied the new or revised HKFRSs that have been issued but are not yet effective. The Group is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the consolidated financial statements.

5 Significant accounting policies

a Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31 March. Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. In assessing whether the Group has power, only substantive rights are considered.

Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The gain or loss on the disposal of a subsidiary that result in a loss of control represents the difference between (i) the fair value of the consideration of the sale plus the fair value of any investment retained in that subsidiary and (ii) the Group's share of the net assets of that subsidiary plus any remaining goodwill relating to that subsidiary and any related accumulated foreign currency translation reserve.

Intragroup transactions, balances and unrealised profits are eliminated. Unrealised losses are also eliminated unless the transactions provide evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests represent the equity in subsidiaries not attributable, directly or indirectly, to the Company. Non-controlling interests are presented in the consolidated statement of financial position and consolidated statement of changes in equity within equity. Non-controlling interests are presented in the consolidated statement of profit or loss and other comprehensive income as an allocation of profit or loss and total comprehensive income for the year between the non-controlling shareholders and owners of the Company.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling shareholders even if this results in the non-controlling interests having a deficit balance.

5 Significant accounting policies - Continued

a Basis of consolidation - Continued

In the Company's statement of financial position, investments in subsidiaries are stated at cost less allowance for impairment losses. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

b Business combination and goodwill

The acquisition method is used to account for the acquisition of a subsidiary in a business combination. The cost of acquisition is measured at the acquisition-date fair value of the assets given, equity instruments issued, liabilities incurred and contingent consideration. Acquisition-related costs are recognised as expenses in the periods in which the costs are incurred and the services are received. Identifiable assets and liabilities of the subsidiary in the acquisition are measured at their acquisition-date fair values.

The excess of the cost of acquisition over the Company's share of the net fair value of the subsidiary's identifiable assets and liabilities is recorded as goodwill. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognised in consolidated profit or loss as a gain on bargain purchase which is attributed to the Company.

In a business combination achieved in stages, the previously held equity interest in the subsidiary is remeasured at its acquisition-date fair value and the resulting gain or loss is recognised in consolidated profit or loss. The fair value is added to the cost of acquisition to calculate the goodwill.

If the changes in the value of the previously held equity interest in the subsidiary were recognised in other comprehensive income (for example, available-for-sale investment), the amount that was recognised in other comprehensive income is recognised on the same basis as would be required if the previously held equity interest were disposed of.

Goodwill is tested annually for impairment or more frequently if events or changes in circumstances indicate that it might be impaired. Goodwill is measured at cost less accumulated impairment losses. The method of measuring impairment losses of goodwill is the same as that of other assets as stated in the respective accounting policy. Impairment losses of goodwill are recognised in consolidated profit or loss and are not subsequently reversed. Goodwill is allocated to cash-generating units that are expected to benefit from the synergies of the acquisition for the purpose of impairment testing.

c Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated amortisation and depreciation and any accumulated impairment losses. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Assets are depreciated over their estimated useful lives and after taking into account their estimated residual values, using the straight-line method at the following annual rates:

5 Significant accounting policies - Continued

c Property, plant and equipment - Continued

Leasehold improvements	Over the shorter of lease terms or 33.33%
Furniture and fixtures	33.33%
Office equipment	33.33%

The gain or loss arising from derecognition of an item of property, plant and equipment is the difference between the net sales proceeds and the carrying amount of the relevant asset and is recognised in consolidated profit or loss.

d Financial assets

The Group classifies its financial assets in the categories of financial assets at amortised costs and financial assets at FVOCI. The classification depends on the purposes for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Financial assets at amortised costs

Financial assets at amortised costs are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than twelve months after the end of the reporting period. These are classified as non-current assets.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the Group measures a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the profit or loss.

5 Significant accounting policies - Continued

e Revenue recognition

Major categories of revenue are recognised in the consolidated financial statements on the following bases:

Sales of goods are recognised when goods are delivered and title together with risks and rewards of ownership of goods have been passed to the customers.

Interest income is recognised on a time proportion basis on the principal outstanding and at the effective interest rate applicable.

f Receivables

A receivable is recognised when the Group's right to consideration is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. Receivables are stated at amortised cost using the effective interest method less allowance for credit losses.

g Financial assets and allowance for expected credit losses

Loss allowances for lifetime expected credit losses on accounts receivable are recognised using a provision matrix as for all outstanding balances over 365 days as at year end.

h Payables

Payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

i Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank balances and deposits and other short-term highly liquid investments with original maturities of three months or less.

5 Significant accounting policies - Continued

j Impairment of non-financial assets

At the end of each reporting period, assets, other than financial assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. When an indication of impairment exists, the Group estimates the asset's recoverable amount, being the higher of the asset's fair value less costs to sell and its value in use. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount in profit or loss. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss recognised in prior year for an asset is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss.

k Income tax

Income tax represents the sum of the current tax and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit recognised in consolidated profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses or unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

5 Significant accounting policies - Continued

k Income tax - Continued

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax is recognised in consolidated profit or loss, except when it relates to items recognised in other comprehensive income or directly in equity, in which case the deferred tax is also recognised in other comprehensive income or directly in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

l Employee benefits

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees.

m Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars, which is the Company's functional and the Group's presentation currency.

(ii) Transactions and balances in each entity's financial statements

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars, which is the Company's functional and the Group's presentation currency.

5 Significant accounting policies - Continued

m Foreign currency translation - Continued

(iii) Translation on consolidation

The financial performance and financial position of all the Group's entities that have a functional currency different from the Company's presentation currency are translated into the Company's presentation currency as follows:

Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;

Income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the exchange rates on the transaction dates); and

All resulting exchange differences are recognised in the foreign currency translation reserve.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities and of borrowings are recognised in the foreign currency translation reserve. When a foreign operation is sold, such exchange differences are recognised in consolidated profit or loss as part of the gain or loss on disposal.

n Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a present legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditures expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow is remote.

o Related parties

i A person, or a close member of that person's family, is related to the Group if that person:

a has control or joint control over the Group;

b has significant influence over the Group; *or*

c is a member of the key management personnel of the Group or the Company's parent.

5 Significant accounting policies - Continued

o Related parties - Continued

ii An entity is related to the Group if any of the following conditions applies:

a The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

b One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

c Both entities are joint ventures of the same third party.

d One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

e The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.

f The entity is controlled or jointly controlled by a person identified in (i).

g A person identified in (i)(a) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

h The entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

6 Critical accounting estimates and judgements

The preparation of consolidated financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

6 Critical accounting estimates and judgements - Continued

a Income taxes

The Group is subject to income taxes in several jurisdictions. Significant estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

b Allowance for bad and doubtful debts

The Group makes allowance for bad and doubtful debts based on assessments of the recoverability of the accounts and other receivables, including the current creditworthiness and the past collection history of each debtor. Allowances arise where events or changes in circumstances indicate that the balances may not be collectible. The identification of bad and doubtful debts requires the use of judgement and estimates. Where the actual result is different from the original estimate, such difference will impact the carrying value of the accounts and other receivables and doubtful debt expenses in the year in which such estimate has been changed.

7 Revenue

	2026 HK$	2025 HK$
Sales of garments	105,493,921	18,244,278

8 Other revenue

	2026 HK$	2025 HK$
Bank interest income	884	626
Other interest income	27,133	4,376
Sundry income	17,290,179	19,100
	17,318,196	24,102

9 Loss before taxation

Loss before taxation is arrived at after charging / (crediting) the following items:

	2026 HK$	2025 HK$
Auditor's remuneration	28,560	12,000
Staff costs including Directors' emoluments:		
Salaries and allowances	11,585,994	7,837,855
Retirement benefits scheme contributions	160,257	586,394
Rent and rates	704,551	375,304
Net exchange loss/(gain)	236,284	66,506
Depreciation	350,547	186,487
Finance costs - Bank charges and interests	149,909	-

10 Directors' remuneration

No emolument was paid or payable during the year to any Directors. (2025: Nil)

11 Income tax

a No provision for Hong Kong profits tax has been made as in the opinion of directors there was no income chargeable to Hong Kong profits tax during the year. (2025: No provision)

Tax charge on assessable profits elsewhere have been calculated at rates of tax prevailing in the countries in which the Group operates, based on existing legislation, interpretation and practices in respect thereof.

b The reconciliation between income tax expense and accounting loss of the Group in the consolidated financial statements is as follows:

	2026 HK$	2025 HK$
Loss before taxation	(3,244,052)	(11,229,201)
Notional tax at the applicable tax rate of 16.5%	(535,269)	(1,852,818)
Tax effect of non-deductible expenses	535,269	1,852,818
	-	-

11 Income tax - Continued

c No deferred tax has been provided as in the opinion of Directors, no such liability would arise in the foreseeable future. (2025: No provision)

18 Reserves

a Group

The amounts of the Group's reserves and movements therein are presented in the consolidated statement of profit or loss and other comprehensive income and the consolidated statement of changes in equity.

b Company

	Accumulated losses HK$
At 1.4.2024	(18,189)
Loss and total comprehensive income for the year	(237,246)
At 31.3.2025 and 1.4.2025	(255,435)
Loss and total comprehensive income for the year	(5,342,685)
At 31.3.2026	(5,598,120)

19 Capital management

The Group's objectives when managing capital are to safeguard its ability to continue as a going concern. The Directors regard total equity as capital for capital management purposes.

The Group manages capital by regularly monitoring its current and expected liquidity requirements rather than using debt/equity ratio analysis.

20 Related party transactions

In addition to those related party transactions and balances disclosed elsewhere in the consolidated financial statements, the Group had the following significant transactions with its related parties.

a Transactions with related parties

	2026 HK$	2025 HK$
Fellow subsidiaries		
- Fund support income	-	16,577,700
- Recharge of administrative expenses	-	2,777,200
- Sales	1,159,527	-

20 Related party transactions - Continued

b Key management personnel compensation

The key management personnel of the Group comprises all Directors, details of their emoluments were disclosed in note 10.

21 Financial Instruments

a Categories of financial instruments

	2026 HK$	2025 HK$
Financial assets		
Financial assets at amortised costs	13,969,490	10,755,951
Financial liabilities		
Financial liabilities at amortised costs	38,463,074	27,018,884

b Financial risk management

The Group's activities exposed it to a variety of financial risks: foreign currency risk, credit risk, liquidity risk and interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

i Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group has certain exposure to foreign currency risk as some of its financial assets are denominated in currencies other than the functional currency of the Group, mainly United State dollars ("US$"). The Group has not adopted any financial instruments for hedging purposes. However, the Group will constantly assess the foreign exchange risk it encounters so as to decide the hedging policy required against the possible foreign exchange risk that may arise.

The Directors consider there are no significant foreign exchange risk with respect to the US$ as HK$ is pegged to US$.

21 Financial instruments - Continued

b Financial risk management - Continued

ii Credit risk

The carrying amounts of accounts receivable, deposits and cash and bank balances included in the consolidated statement of financial position represent the Group's maximum exposure to credit risk in relating to the Group's financial assets.

The Group has no concentrations of credit risk. The Group's credit risk is primarily attributable to the accounts and other receivables. It also sets credit limit on each individual customer and prior approval is required for any transaction exceeding that limit. The customer with sound payment history would accumulate a higher credit limit.

At the reporting date, the carrying amount of trade and other receivables is immaterial and their exposures to credit risk are not considered to be significant.

The credit risk on bank balances is limited because the counterparty is a licensed bank in Hong Kong with high credit-ratings.

iii Liquidity risk

All the Group's financial liabilities are due less than one year.

The Group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

iv Interest rate risk

The Group's exposure to cash flow interest-rate risk arises from its bank balances bearing interests at variable rates varied with the then prevailing market condition. The Directors consider the Group's exposure to cash flow interest rate risk is minimal.

c Fair values

The Directors have considered that the carrying amounts of all financial assets and liabilities approximated to their fair values at 31 March 2026 and 31 March 2025.

22 Subsidiaries

Details of principal subsidiaries as at 31 March 2026 are as follows:

Name	Place of incorporation / establishment and operations	The Group's percentage of ownership interest	Issued and paid up capital	Principal activities
OLE Fashion Limited	United Kingdom	100%	GBP 1	Garment trading
PDS Online Enterprise USA Inc	USA	100%	US$ 100	Garment trading

23 Approval of consolidated financial statements

The consolidated financial statements were approved and authorised for issue by the Board of Directors on 14 MAY 2026

Company Number: 765347

DIRECTORS' REPORT
for the financial year ended 31 March 2026

The directors present their report and the audited financial statements for the financial year ended 31 March 2026.

Results and Dividends
The loss for the financial year amounted to €(295,146) (2025 - €(229,474)).

The directors do not recommend payment of a dividend.

At the end of the financial year, the company has assets of €30,533 (2025 - €32,400) and liabilities of €555,053 (2025 - €261,774). The net liabilities of the company have increased by €295,146.

Directors and Secretary
The directors who served throughout the financial year were as follows:

Abhishekh Kanoi
Benjamin Jon Fielding

The secretary who served throughout the financial year was CBF Secretarial Limited.

The directors and company secretary had no direct or indirect beneficial interest in the shares of the company at either the beginning or the end of the financial year.

There were no changes in shareholdings between 31 March 2026 and the date of signing the financial statements.

Future Developments
The company plans to commence trading and generate revenue in the last quarter of the calendar year 2026.

Post Balance Sheet Events
There have been no significant events affecting the company since the financial year-end.

Auditors
The auditors, Clinton Higgins, (Chartered Accountants), continue in office in accordance with section 383(2) of the Companies Act 2014.

Statement on Relevant Audit Information
In accordance with section 330 of the Companies Act 2014, so far as each of the persons who are directors at the time this report is approved are aware, there is no relevant audit information of which the statutory auditors are unaware. The directors have taken all steps that they ought to have taken to make themselves aware of any relevant audit information and they have established that the statutory auditors are aware of that information.

Accounting Records
To ensure that adequate accounting records are kept in accordance with sections 281 to 285 of the Companies Act 2014, the directors have employed appropriately qualified accounting personnel and have maintained appropriate computerised accounting systems. The accounting records are located at the office of a fellow subsidiary, Poeticgem Limited, at 54 Clarendon Road, Watford, WD17 1DU, United Kingdom.

Poeticgem Europe Limited
DIRECTORS' RESPONSIBILITIES STATEMENT
for the financial year ended 31 March 2026

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable Irish law and regulations.

Irish company law requires the directors to prepare financial statements for each financial year. Under that law, the directors have elected to prepare the financial statements in accordance with the Companies Act 2014 and FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", applying Section 1A of that Standard, issued by the Financial Reporting Council. Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the company as at the financial year end date and of the profit or loss of the company for the financial year and otherwise comply with the Companies Act 2014.

In preparing these financial statements, the directors are required to:
- select suitable accounting policies for the company financial statements and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for ensuring that the company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the company, enable at any time the assets, liabilities, financial position and profit or loss of the company to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors' Report comply with the Companies Act 2014 and enable the financial statements to be readily and properly audited. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Signed on behalf of the board

INDEPENDENT AUDITOR'S REPORT
to the Shareholders of Poeticgem Europe Limited

Report on the audit of the financial statements

Opinion
We have audited the financial statements of Poeticgem Europe Limited ('the company') for the financial year ended 31 March 2026 which comprise the Profit and Loss Account, the Balance Sheet, the Statement of Changes in Equity and the related notes to the financial statements, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 “The Financial Reporting Standard applicable in the UK and Republic of Ireland”, issued in the United Kingdom by the Financial Reporting Council, applying Section 1A of that Standard.

In our opinion the financial statements:
- give a true and fair view of the assets, liabilities and financial position of the company as at 31 March 2026 and of its loss for the financial year then ended;
- have been properly prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", applying Section 1A of that Standard; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014.

Basis for opinion
We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard for Auditors (Ireland) issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and the Provisions Available for Audits of Small Entities, in the circumstances set out in note 5 to the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern
In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the director's assessment of the company's ability to continue to adopt the going concern basis of accounting included considering the inherent risks to the company's business model and analysing how those risks might affect the company's financial resources or ability to continue operations over the going concern period.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other Information
The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our Auditor's Report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT
to the Shareholders of Poeticgem Europe Limited

Opinions on other matters prescribed by the Companies Act 2014
In our opinion, based on the work undertaken in the course of the audit, we report that:
- the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Directors' Report has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception
Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the requirements of any of sections 305 to 312 of the Act, which relate to disclosures of directors' remuneration and transactions are not complied with by the company. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of directors for the financial statements
As explained more fully in the Directors' Responsibilities Statement set out on page 5, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, if applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements
Our objectives are to obtain reasonable assurance about whether the company's financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is contained in the appendix to this report, located at page 8, which is to be read as an integral part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities
Our report is made solely to the company's shareholders, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an Auditor's Report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume any responsibility to anyone other than the company and the company's shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

31 July 2026

Poeticgem Europe Limited
APPENDIX TO THE INDEPENDENT AUDITOR'S REPORT

Further information regarding the scope of our responsibilities as auditor

As part of an audit in accordance with ISAs (Ireland), we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditor's Report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditor's Report. However, future events or conditions may cause the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. General Information

Poeticgem Europe Limited is a company limited by shares incorporated and registered in Ireland. The registered number of the company is 765347. The registered office of the company is The Black Church, St. Mary's Place, Dublin 7. The financial statements have been presented in Euro (€) which is also the functional currency of the company.

2. Summary of Significant Accounting Policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements.

Statement of compliance
The financial statements of the company for the financial year ended 31 March 2026 have been prepared in accordance with the provisions of FRS 102 Section 1A (Small Entities) and the Companies Act 2014.

Basis of preparation
The financial statements have been prepared on the going concern basis and in accordance with the historical cost convention as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets. The financial reporting framework that has been applied in their preparation is the Companies Act 2014 and FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" Section 1A, issued by the Financial Reporting Council.

The company qualifies as a small company as defined by section 280A of the Companies Act 2014 in respect of the financial year, and has applied the rules of the 'Small Companies Regime' in accordance with section 280C of the Companies Act 2014 and Section 1A of FRS 102.

Trade and other debtors
Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less impairment losses for bad and doubtful debts except where the effect of discounting would be immaterial. In such cases the receivables are stated at cost less impairment losses for bad and doubtful debts.

Cash and cash equivalents
Cash and cash equivalents comprise cash at bank and in hand, demand deposits with banks and other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. In the Balance Sheet bank overdrafts are shown within Creditors.

Trade and other creditors
Trade and other creditors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest rate method, unless the effect of discounting would be immaterial, in which case they are stated at cost.

Taxation and deferred taxation
Current tax represents the amount expected to be paid or recovered in respect of taxable profits for the financial year and is calculated using the tax rates and laws that have been enacted or substantially enacted at the Balance Sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more tax in the future, or a right to pay less tax in the future. Timing differences are temporary differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured on an undiscounted basis at the tax rates that are anticipated to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date.

Foreign currencies
Monetary assets and liabilities denominated in foreign currencies are translated at the rates of exchange ruling at the Balance Sheet date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated at the rates of exchange ruling at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The resulting exchange differences are dealt with in the Profit and Loss Account.

Ordinary share capital
The ordinary share capital of the company is presented as equity.

3. Period of financial statements

The comparative figures relate to the 10 month period ended 31 March 2025.

4. Going concern

The directors have considered the company's ability to continue as a going concern. The company incurred a loss of €295,146 for the year ended 31 March 2026 (2025: loss €229,474) and at that date, its liabilities exceeded its assets by €524,520 (2025: €229,374).

Included within creditors is an amount of €536,987 due to a fellow group undertaking. That undertaking has confirmed that it will not seek repayment of this balance until the company is in a financial position to do so.

The company is in the early stages of its development and is dependent on financial support from group undertakings to enable it to meet its liabilities as they fall due. The directors have received written confirmation from the fellow group undertaking that it will provide such financial support as is necessary to enable the company to meet its liabilities as they fall due for a period of at least twelve months from the date of approval of these financial statements. The directors have considered the financial position of that undertaking and are satisfied that it has adequate resources to provide the required support.

The directors have reviewed the company's cash flow projections for a period of not less than twelve months from the date of approval of these financial statements. Based on these projections, and having regard to the confirmed availability of group financial support and the agreement not to demand repayment of the amounts due, the directors are satisfied that the company will have adequate resources to continue in operational existence for the foreseeable future.

Having made due enquiries and considering the factors described above, the directors have a reasonable expectation that the company has and will have adequate resources to continue in operational existence for the foreseeable future. For this reason, the directors continue to adopt the going concern basis in preparing the financial statements.

5. Provisions Available for Audits of Small Entities

In common with many other businesses of our size and nature, we use auditors to assist with the preparation of the financial statements.

6. Employees

The average monthly number of employees, including directors, during the financial year was 2 (2025: 2)

7. Debtors

	2026	2025
	€	€
Amounts owed by group undertakings	**100**	100
Prepayments	**29,746**	32,300
	29,846	32,400

Prepayments include a rent deposit of €20,000 paid under a licence agreement.

At the reporting date, the Company had a four-month commitment under this agreement amounting to €39,360 VAT inclusive.

Amounts due from group undertakings are unsecured, interest free and repayable on demand.

Poeticgem Europe Limited
NOTES TO THE FINANCIAL STATEMENTS
for the financial year ended 31 March 2026

8. Creditors

Amounts falling due within one year	**2026** **€**	2025 €
Amounts owed to group undertakings (Note 10)	**536,987**	252,013
Taxation	**8,461**	5,456
Other creditors	**5,300**	-
Accruals	**4,305**	4,305
	555,053	261,774

Accruals and other creditors are payable in accordance with standard commercial credit terms.

Taxation is payable in accordance with the statutory provisions.

Amounts owed to group undertakings are unsecured, interest free and payable on demand.

9. Capital commitments

The company had no other material capital commitments at the financial year-ended 31 March 2026.

10. Related party transactions

Transactions and balances with group company:

	2026 **€**	2025 €
Poeticgem Limited		
Amount (owed to) Poeticgem Limited	**(536,887)**	(251,913)

During the year, Poeticgem Limited settled operating costs amounting to €284,974 on behalf of the company. At the financial year end, €536,987 (2025: €252,013) was due to Poeticgem Limited. The amount is unsecured, interest-free and repayable on demand.

In the opinion of the director these amounts arise in the ordinary course of business and the terms of the amounts due are in accordance with the terms ordinarily offered by the company.

11. Controlling interest

Mrs Payel Seth holds 49.27% of the share capital of PDS Limited, the ultimate parent company. Together with the other promoter shareholders, she is considered to exercise ultimate control over the group.

12. Post-Balance Sheet Events

There have been no significant events affecting the company since the financial year-end.

13. Parent company

The Company's immediate parent undertaking is Poeticgem International FZCO, which holds 100% of the Company's issued share capital. Poeticgem International FZCO is incorporated in the United Arab Emirates and has its registered office at Office 301, Building 5WA, Dubai Airport Freezone, Dubai 371585, United Arab Emirates.

The Company's ultimate parent undertaking is PDS Limited, a company incorporated in the India and has its registered office at Unit No 971, Solitaire Corporate Park, Andheri Ghatkopar Link Road, Andheri East, Mumbai 40093, Maharashtra, India.

The consolidated financial statements are prepared by PDS Multinational FZCO and are available from its registered office.

Poeticgem Europe Limited
NOTES TO THE FINANCIAL STATEMENTS
for the financial year ended 31 March 2026

14. Approval of financial statements

The financial statements were approved and authorised for issue by the board of directors on 31 July 2026.

THE BRAND GROUP LIMITED

DIRECTORS' REPORT

The Directors have pleasure in submitting their first report together with the audited financial statements for the year ended 31 March 2026.

Principal activities

The Company is engaged in trading of readymade garments during the year.

Dividends

The Directors do not recommend the payment of any dividend.

Share capital

Details of the share capital are summarised in the notes to financial statements.

Directors

The Directors during the year and up to the date of this report were:

Malhotra Sandeep
Punjabi Suresh Mahadev
Hopkins Damian Andrew (Resigned on 1 October 2025)

The appointment of Directors is governed by the Company's Articles of Association.

Business review

The Company is a wholly-owned subsidiary of another body corporate. Accordingly, the Company is exempted from preparing a business review.

Directors' material interests in transactions, arrangements and contracts that are significant in relation to the company's business

No transactions, arrangements and contracts of significance in relation to the Company's business of which the Company or any of its group companies was a party subsisted at the end of the year or at any time during the year in which any Directors of the Company had a material interest.

DIRECTORS' REPORT

Directors' interests in shares and debentures of the company or specified undertaking of the company or any other associated corporation

At no time during the year was the Company or any of its group companies, a party to any arrangement to enable any of the Director of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

Management contracts

No contract concerning the management and administration of the whole or any substantial part of the business of the Company was entered into or existed during the year.

Equity-linked agreements

The Company had not entered into any equity-linked agreements during the year.

Permitted indemnity provisions

The Company's Articles of Association provides that a director or former director of the Company may be indemnified out of the Company's assets against any liability incurred by the director to a person other than the Company or an associated company of the Company in connection with any negligence, default, breach of duty or breach of trust in relation to the Company or associated company (as the case may be). This Article only applies if the indemnity does not cover the liability set out in the Company's Articles. This permitted indemnity provision is in force during the year and at the time of approval of this report.

Auditor

A resolution to re-appoint the retiring auditor, Chow Tsz Kit, Certified Public Accountant (Practising), will be put at the forthcoming annual general meeting.

On behalf of the Board

Malhotra Sandeep
Director

HONG KONG,

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF THE BRAND GROUP LIMITED
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the annexed financial statements of The Brand Group Limited ("the Company"), which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Statements and our Auditor's Report Thereon

The Directors are responsible for the other information. The other information comprises the information included in the Directors' report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

(Continuation)

Responsibilities of Directors for the Financial Statements

The Directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

/... to be continued

(Continuation)

Auditor's Responsibilities for the Audit of the Financial Statements - Continued

- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is Chow Tsz Kit, practising certificate number P06162.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

1 General information

The Company is a private company incorporated and domiciled in Hong Kong with limited liabilities. Its registered office and principal place of business at 7/F., Park Fook Industrial Building, 615-617 Tai Nan West Street, Cheung Sha Wan, Kowloon, Hong Kong.

The Directors consider that the Company is commonly owned by Simple Approach Limited, a private company incorporated in Hong Kong and PDS Radius Brands FZCO, a private company incorporated in the United Arab Emirates.

PDS Limited, a company incorporated in India and the shares are listed on the Bombay Stock Exchange (Stock code: 538730) and National Stock Exchange of India (Stock code: PDSL), is the Company's ultimate holding company.

The Company is engaged in trading of readymade garments during the year.

2 Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual HKFRSs, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and accounting principles generally accepted in Hong Kong and the requirements of the Hong Kong Companies Ordinance.

3 Basis of preparation

a These financial statements have been prepared under the historical cost convention.

b The shareholders have confirmed their present intention to provide financial support to the Company to enable it to meet its liabilities as and when they fall due and to enable the Company to continue business for the foreseeable future. Accordingly, the financial statements have been prepared on a going concern basis.

c Disclosures in accordance with Section 436 of the Hong Kong Companies Ordinance

These separate financial statements are prepared for use by the members in accordance with paragraph 4 of Hong Kong Financial Reporting Standard 10 "Consolidated Financial Statements".

3 Basis of preparation - Continued

c Disclosures in accordance with Section 436 of the Hong Kong Companies Ordinance

The Company, as a holding company, has to prepare consolidated financial statements as its statutory financial statements for the year ended 31 March 2026. Consequently, this company level financial information and the comparatives do not constitute the Company's specified financial statements for the year ended 31 March 2026. Information relating to the Company's statutory consolidated financial statements for the year ended 31 March 2026 required to be disclosed in accordance with section 436 of the Companies Ordinance is as follows:

As the Company is a private company, it is not required to deliver its financial statements to the Registrar of Companies, and will not do so.

The Company's auditor has yet to report on the statutory consolidated financial statements.

4 Adoption of new and revised Hong Kong Financial Reporting Standards

The HKICPA has issued a number of new and revised HKFRSs that are first effective for the current accounting period of the Company. The adoption of these HKFRSs has no material impact on these financial statements.

The Company has not applied the new or revised HKFRSs that have been issued but are not yet effective. The Company is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the financial statements.

5 Significant accounting policies

a Subsidiaries

A subsidiary is an entity over which the Company has control. Control is achieved when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. In assessing whether the Company has power, only substantive rights are considered.

The results of subsidiaries are accounted for on the basis of dividends received and receivable. Investments in subsidiaries are stated at cost less any accumulated impairment losses.

b Revenue

The Company has no revenue during the year.

5 Significant accounting policies - Continued

c Payables

Payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

d Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank balances and deposits and other short-term highly liquid investments with original maturities of three months or less.

e Income tax

Income tax expense represents the sum of current tax and deferred tax.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Tax rates enacted or substantively enacted at the end of the reporting period are used to determine deferred tax.
Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

f Impairment of non-financial assets

At the end of each reporting period, assets, other than financial assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. When an indication of impairment exists, the Company estimates the asset's recoverable amount, being the higher of the asset's fair value less costs to sell and its value in use. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount in profit or loss. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss recognised in prior year for an asset is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss.

5 Significant accounting policies - Continued

g Foreign currencies

The financial statements are presented in Hong Kong dollar, which is the same as the functional currency of the Company. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Exchange differences arising on the translation of non-monetary items carried at fair value are included in profit or loss except for differences arising on the translation of non-monetary items in respect of which gains and losses are recognised directly in other comprehensive income, in which cases, the exchange differences are also recognised directly in other comprehensive income.

h Related parties

i A person, or a close member of that person's family, is related to the Company if that person:

a has control or joint control over the Company;

b has significant influence over the Company, or

c is a member of the key management personnel of the Company or the Company's parent.

ii An entity is related to the Company if any of the following conditions applies:

a The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

b One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

c Both entities are joint ventures of the same third party.

d One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

e The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company.

f The entity is controlled or jointly controlled by a person identified in (i).

g A person identified in (i)(a) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

h The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

6 Critical accounting estimates and judgements

The Company makes estimates, assumptions and judgements as appropriate in the preparation of the financial statements. These estimates and judgements are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances and will, by definition, seldom equal the actual results. The estimates, assumptions and judgements that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next year.

7 Other income

	2026 HK$	26.1.2024 - 31.3.2025 HK$
Administrative service income	-	186,720
Bank interest income	570	89
Sundry income	280	-
	850	186,809

8 Directors' remuneration

No emolument was paid or payable during the year to any Directors. (2025: Nil)

9 Income tax

a No Hong Kong profits tax has been provided in the financial statements as no assessable profits was earned during the year. (2025: No provision)

NOTES TO THE FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2026

9 Income tax - Continued

b The reconciliation between income tax expense and accounting profit of the Company in the financial statements is as follows:

	2026 HK$	26.1.2024 - 31.3.2025 HK$
(Loss) / profit before taxation	(4,549,446)	113,259
Notional tax at the applicable tax rate of 16.5%	(750,659)	18,687
Tax effect of non-taxable income	-	(18,687)
Tax effect of unrecognised tax losses	750,659	-
Income tax expenses	-	-

c No deferred tax has been provided as in the opinion of Directors, no such liability would arise in the foreseeable future. (2025: No provision)

	2026 HK$	2025 HK$
Issued and fully paid:		
50,000 ordinary shares of US$50,000	389,000	389,000

14 Related party transactions

Except to those related party transactions and balances disclosed elsewhere in the financial statements, the Company does not have other significant related party transactions and balances.

15 Capital management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern. The Directors regard total equity as capital, for capital management purposes.

The Company manages capital by regularly monitoring its current and expected liquidity requirements rather than using debt/equity ratio analysis.

16 Financial instruments

a Categories of financial instruments

	2026 HK$	2025 HK$
Financial assets		
Financial assets at amortised costs	12,334,612	12,473,512
Financial liabilities		
Financial liabilities at amortised costs	23,853,559	19,443,986

b Financial risk management

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and interest rate risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

16 Financial instruments - Continued

b Financial risk management - Continued

i Credit risk

The carrying amounts of bank balances and amounts due from fellow subsidiaries included in the statement of financial position represent the Company's maximum exposure to credit risk in relating to the Company's financial assets.

The credit risk on bank balances is limited because the counterparty is a licensed bank in Hong Kong with high credit-ratings.

The credit risk on amounts due from fellow subsidiaries is closely monitored by the Directors.

ii Liquidity risk

All the Company's financial liabilities are due less than one year.

The Company's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

iii Interest rate risk

The Company has no significant interest-bearing liability during the period, even at the end of reporting period.

c Fair values

The Directors have considered that the carrying amounts of all financial assets and liabilities approximated to their fair values at 31 March 2026 and 2025.

17 Comparative figures

These financial statements covered the year ended 31 March 2026 and comparative figures covered the period from 26 January 2024 (date of incorporation) to 31 March 2025. Therefore, the figures shown in the statement of profit or loss and other comprehensive income and related notes are not comparable.

18 Approval of financial statements

The financial statements were approved and authorised for issue by the Board of Directors on

The Directors do not recommend the payment of any dividend.

Share capital

Details of the share capital are summarised in the notes to consolidated financial statements.

Directors

The Directors of the Company during the year and up to the date of this report were:

HARARI David Jonathan
MALHOTRA Sandeep
SHAH Bhavesh Dinesh
THAKKAR Ajay

The appointment of Directors is governed by the Company's Articles of Association.

The name of Director who have served on the board of the Company's subsidiaries during the financial year and up to the date of this report were:

HARARI David Jonathan
MALHOTRA Sandeep

Business review

The Group is a wholly-owned subsidiary of another body corporate. Accordingly, the Group is exempted from preparing a business review.

DIRECTORS' REPORT

Directors' material interests in transactions, arrangements and contracts that are significant in relation to the Company's business

No transactions, arrangements and contracts of significance in relation to the Company's business of which the Company or any of its group companies was a party subsisted at the end of the year or at any time during the year in which any Directors of the Company had a material interest.

Directors' interests in shares and debentures of the Company or specified undertaking of the Company or any other associated corporation

At no time during the year was the Company or any of its group companies, a party to any arrangement to enable any of the Director of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

Management contracts

No contract concerning the management and administration of the whole or any substantial part of the business of the Company was entered into or existed during the year.

Equity-linked agreements

The Group had not entered into any equity-linked agreements during the year.

Permitted indemnity provisions

The Company's Articles of Association provides that a director or former director of the Company may be indemnified out of the Company's assets against any liability incurred by the director to a person other than the Company or an associated company of the Company in connection with any negligence, default, breach of duty or breach of trust in relation to the Company or associated company (as the case may be). This Article only applies if the indemnity does not cover the liability set out in the Company's Articles. This permitted indemnity provision is in force during the year and at the time of approval of this report.

Auditor

A resolution to re-appoint the retiring auditor, Chow Tsz Kit, Certified Public Accountant (Practising), will be put at the forthcoming annual general meeting.

On behalf of the Board

MALHOTRA Sandeep
Director

HONG KONG,

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF WONDERWALL (F.E.) LIMITED
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the annexed consolidated financial statements of Wonderwall (F.E.) Limited ("the Company") and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31 March 2026, and consolidated the statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 March 2026, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Consolidated Financial Statements and our Auditor's Report Thereon

The Directors are responsible for the other information. The other information comprises the information included in the Directors' report but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

/... to be continued

(Continuation)

Responsibilities of Directors for the Consolidated Financial Statements

The Directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

/... to be continued

(Continuation)

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements - Continued

- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is Chow Tsz Kit (Practising Certificate Number: P08162).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2026

1 General information

The Company is a private company incorporated and domiciled in Hong Kong with limited liabilities, its registered office and principal place of business at 7/F., Park Fook Industrial Building, 615-617 Tai Nan West Street, Cheung Sha Wan, Kowloon, Hong Kong.

The Directors consider that the immediate holding company is Simple Approach Limited, a private company incorporated in Hong Kong.

The Directors consider that the intermediate holding company is PDS Sourcing Limited, a private company incorporated in Mauritius.

PDS Limited, a company incorporated in India and the shares are listed on the Bombay Stock Exchange (Stock code: 538730) and National Stock Exchange of India (Stock code: PDSL), is the Company's ultimate holding company.

The principal activities of the Group is trading of garments. The activities of its principal subsidiaries are set out in the note to the consolidated financial statement.

2 Statement of compliance

These consolidated financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual HKFRSs, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and accounting principles generally accepted in Hong Kong and the requirements of the Hong Kong Companies Ordinance.

Going concern

As at 31 March 2026, there was a deficit on Shareholder's funds of HK$12,846,703.

The immediate holding company has confirmed its present intention to provide financial support to the Group to enable it to meet its liabilities as and when they fall due and to enable the Group to continue business for the foreseeable future. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

3 Basis of preparation

These consolidated financial statements are prepared under the historical cost convention.

4 Adoption of new and revised Hong Kong Financial Reporting Standards

The HKICPA has issued a number of new and revised HKFRSs that are first effective for the current accounting period of the Group. The adoption of these HKFRSs has no material impact on these consolidated financial statements.

The Group has not applied the new or revised HKFRSs that have been issued but are not yet effective. The Group is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the consolidated financial statements.

5 Significant accounting policies

a Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31 March. Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. In assessing whether the Group has power, only substantive rights are considered.

Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The gain or loss on the disposal of a subsidiary that result in a loss of control represents the difference between (i) the fair value of the consideration of the sale plus the fair value of any investment retained in that subsidiary and (ii) the Group's share of the net assets of that subsidiary plus any remaining goodwill relating to that subsidiary and any related accumulated foreign currency translation reserve.

Intragroup transactions, balances and unrealised profits are eliminated. Unrealised losses are also eliminated unless the transactions provide evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests represent the equity in subsidiaries not attributable, directly or indirectly, to the Company. Non-controlling interests are presented in the consolidated statement of financial position and consolidated statement of changes in equity within equity. Non-controlling interests are presented in the consolidated statement of profit or loss and other comprehensive income as an allocation of profit or loss and total comprehensive income for the year between the non-controlling shareholders and owners of the Company.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling shareholders even if this results in the non-controlling interests having a deficit balance.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2026

5 Significant accounting policies - Continued

a Basis of consolidation - Continued

In the Company's statement of financial position, investments in subsidiaries are stated at cost less allowance for impairment losses. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

b Business combination and goodwill

The acquisition method is used to account for the acquisition of a subsidiary in a business combination. The cost of acquisition is measured at the acquisition-date fair value of the assets given, equity instruments issued, liabilities incurred and contingent consideration. Acquisition-related costs are recognised as expenses in the periods in which the costs are incurred and the services are received. Identifiable assets and liabilities of the subsidiary in the acquisition are measured at their acquisition-date fair values.

The excess of the cost of acquisition over the Company's share of the net fair value of the subsidiary's identifiable assets and liabilities is recorded as goodwill. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognised in consolidated profit or loss as a gain on bargain purchase which is attributed to the Company.

In a business combination achieved in stages, the previously held equity interest in the subsidiary is remeasured at its acquisition-date fair value and the resulting gain or loss is recognised in consolidated profit or loss. The fair value is added to the cost of acquisition to calculate the goodwill.

If the changes in the value of the previously held equity interest in the subsidiary were recognised in other comprehensive income (for example, available-for-sale investment), the amount that was recognised in other comprehensive income is recognised on the same basis as would be required if the previously held equity interest were disposed of.

Goodwill is tested annually for impairment or more frequently if events or changes in circumstances indicate that it might be impaired. Goodwill is measured at cost less accumulated impairment losses. The method of measuring impairment losses of goodwill is the same as that of other assets as stated in the respective accounting policy. Impairment losses of goodwill are recognised in consolidated profit or loss and are not subsequently reversed. Goodwill is allocated to cash-generating units that are expected to benefit from the synergies of the acquisition for the purpose of impairment testing.

c Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated amortisation and depreciation and any accumulated impairment losses. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Assets are depreciated over their estimated useful lives and after taking into account their estimated residual values, using the straight-line method at the following annual rates:

5 Significant accounting policies - Continued

c Property, plant and equipment - Continued

Furniture and fixtures	33.33%
Computers	33.33%

The gain or loss arising from derecognition of an item of property, plant and equipment is the difference between the net sales proceeds and the carrying amount of the relevant asset and is recognised in consolidated profit or loss.

d Financial assets

The Group classifies its financial assets in the categories of financial assets at amortised costs and financial assets at FVOCI. The classification depends on the purposes for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Financial assets at amortised costs

Financial assets at amortised costs are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than twelve months after the end of the reporting period. These are classified as non-current assets.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the Group measures a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2025

5 Significant accounting policies - Continued

e Revenue recognition

Major categories of revenue are recognised in the consolidated financial statements on the following bases:

Sales of goods are recognised when goods are delivered and title together with risks and rewards of ownership of goods have been passed to the customers.

Interest income is recognised on a time proportion basis on the principal outstanding and at the effective interest rate applicable.

f Receivables

A receivable is recognised when the Group's right to consideration is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. Receivables are stated at amortised cost using the effective interest method less allowance for credit losses.

g Financial assets and allowance for expected credit losses

Loss allowances for lifetime expected credit losses on accounts receivable are recognised using a provision matrix as for all outstanding balances over 365 days as at year end.

h Payables

Payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

i Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank balances and deposits and other short-term highly liquid investments with original maturities of three months or less.

6 Significant accounting policies - Continued

i Impairment of non-financial assets

At the end of each reporting period, assets, other than financial assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. When an indication of impairment exists, the Group estimates the asset's recoverable amount, being the higher of the asset's fair value less costs to sell and its value in use. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount in profit or loss. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss recognised in prior year for an asset is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss.

ii Income tax

Income tax represents the sum of the current tax and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit recognised in consolidated profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses or unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

5 Significant accounting policies - Continued

(k) Income tax - Continued

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax is recognised in consolidated profit or loss, except when it relates to items recognised in other comprehensive income or directly in equity, in which case the deferred tax is also recognised in other comprehensive income or directly in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

(l) Employee benefits

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees.

(m) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars, which is the Company's functional and the Group's presentation currency.

(ii) Transactions and balances in each entity's financial statements

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars, which is the Company's functional and the Group's presentation currency.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2026

5 Significant accounting policies - Continued

m Foreign currency translation - Continued

(iii) Translation on consolidation

The financial performance and financial position of all the Group's entities that have a functional currency different from the Company's presentation currency are translated into the Company's presentation currency as follows:

Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;

Income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the exchange rates on the transaction dates); and

All resulting exchange differences are recognised in the foreign currency translation reserve.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities and of borrowings are recognised in the foreign currency translation reserve. When a foreign operation is sold, such exchange differences are recognised in consolidated profit or loss as part of the gain or loss on disposal.

n Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a present legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditures expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow is remote.

o Related parties

i A person, or a close member of that person's family, is related to the Group if that person:

a has control or joint control over the Group;

b has significant influence over the Group; or

c is a member of the key management personnel of the Group or the Company's parent.

5 Significant accounting policies - Continued

o Related parties - Continued

ii An entity is related to the Group if any of the following conditions applies:

a The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

b One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

c Both entities are joint ventures of the same third party.

d One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

e The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.

f The entity is controlled or jointly controlled by a person identified in (i).

g A person identified in (i)(a) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

h The entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

6 Critical accounting estimates and judgements

The preparation of consolidated financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

6 Critical accounting estimates and judgements - Continued

a Income taxes

The Group is subject to income taxes in several jurisdictions. Significant estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

b Allowance for bad and doubtful debts

The Group makes allowance for bad and doubtful debts based on assessments of the recoverability of the accounts and other receivables, including the current creditworthiness and the past collection history of each debtor. Allowances arise where events or changes in circumstances indicate that the balances may not be collectible. The identification of bad and doubtful debts requires the use of judgement and estimates. Where the actual result is different from the original estimate, such difference will impact the carrying value of the accounts and other receivables, and doubtful debt expenses in the year in which such estimate has been changed.

7 Revenue

	2026 HK$	2025 HK$
Sales of garments	152,861,919	121,587,187

8 Other revenue

	2026 HK$	2025 HK$

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2026

9 Loss before taxation

Loss before taxation is arrived at after charging / (crediting) the following items:

	2026 HK$	2025 HK$
Auditor's remuneration	109,263	160,359
Staff costs including Directors' emoluments:		
Salaries and allowances	9,946,699	7,519,300
Retirement benefits scheme contributions	88,001	73,610
Net exchange loss	788,894	19,762
Depreciation - Property, plant and equipment	83,002	56,384
Depreciation - Right-of-use asset	410,579	-
Finance costs - interest on leases	112,932	-
Finance costs - interests on bank loans and overdrafts	2,195,666	19,376

10 Directors' remuneration

Remuneration of the Directors of the Company disclosed pursuant to section 383(1) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation are as follows:-

	2026 HK$	2025 HK$
Acting as Directors		
Emoluments (including benefit in kind)	1,810,695	1,981,263
Retirement benefits scheme contributions	-	-
	1,810,695	1,981,263

11 Income tax

a No provision for Hong Kong profits tax has been made as in the opinion of directors there was no income chargeable to Hong Kong profits tax during the year. (2025: No provision)

Tax charge on assessable profits elsewhere have been calculated at rates of tax prevailing in the countries in which the Group operates, based on existing legislation, interpretation and practices in respect thereof.

11 Income tax - Continued

b The reconciliation between income tax expense and accounting loss of the Group in the consolidated financial statements is as follows:

	2026 HK$	2025 HK$
Loss before taxation	(1,076,776)	(3,564,281)
Notional tax at the applicable tax rate of 16.5%	(177,668)	(588,456)
Tax effect of non-taxable income	(498)	(1,489)
Tax effect of unrecognised tax losses	135,280	67,236
	(42,886)	(520,709)

c The components of deferred tax assets recognised in the consolidated financial statements and the movements during the year are as follows:

	Tax losses HK$
At 1.4.2024	-
Credited to consolidated profit or loss	(520,709)
At 31.3.2025 and 1.4.2025	(520,709)
Credited to consolidated profit or loss	(42,866)
At 31.3.2026	(563,575)

12 Property, plant and equipment

	Furniture and fixtures HK$	Computers HK$	Total HK$

The amounts are unsecured, non-interest bearing and have no fixed terms of repayments.

16 Bank borrowings

At 31 March 2026, the Group has access to banking facilities provided by The Hongkong and Shanghai Banking Corporation Limited, which are shared with certain affiliated companies under a combined limit of US$20,000,000 as a part of a wider group facility. The Group's bank loan agreements contain repayment on demand clauses and the corresponding bank loans have been classified as current liabilities. Ignoring the effect of any repayment on demand clauses and based on the maturity terms of these loans, the interest-bearing bank borrowings of the Group are repayable within one year. As at the end of the reporting period, certain of the Group's interest-bearing bank borrowings are secured by certain of the Group's investment properties, time deposits, and unlisted investments and guaranteed by the immediate holding company, fellow subsidiaries, and directors of the fellow subsidiaries.

At 31.3.2026	(57,495)	(6,115,800)	(6,173,295)

21 Capital management

The Group's objectives when managing capital are to safeguard its ability to continue as a going concern. The Directors regard total equity as capital, for capital management purposes.

The Group manages capital by regularly monitoring its current and expected liquidity requirements rather than using debt/equity ratio analysis.

22 Related party transactions

In addition to those related party transactions and balances disclosed elsewhere in the consolidated financial statements, the Group had the following significant transactions with its related parties:

a Transactions with related parties

	2026 HK$	2025 HK$
Fellow subsidiaries		
- Recharge of administrative expenses	710,167	468,180
- Purchases	-	109,594,053
- Management fee	1,231,151	987,437

b Key management personnel compensation

The key management personnel of the Group comprises all Directors, details of their emoluments were disclosed in note 10 to the consolidated financial statements.

23 Financial instruments

a Categories of financial instruments

	2026 HK$	2025 HK$
Financial assets		
Financial assets at amortised costs	50,880,128	17,409,222
Financial liabilities		
Financial liabilities at amortised costs	64,933,402	29,934,392

b Financial risk management

The Group's activities exposed it to a variety of financial risks: foreign currency risk, credit risk, liquidity risk and interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

23 Financial instruments - Continued

b Financial risk management - Continued

i Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group has certain exposure to foreign currency risk as some of its financial assets are denominated in currencies other than the functional currency of the Group, mainly United State dollars ("US$"). The Group has not adopted any financial instruments for hedging purposes. However, the Group will constantly assess the foreign exchange risk it encounters so as to decide the hedging policy required against the possible foreign exchange risk that may arise.

The Directors consider there are no significant foreign exchange risk with respect to the US$ as HK$ is pegged to US$.

ii Credit risk

The carrying amounts of accounts receivable, deposits and cash and bank balances included in the consolidated statement of financial position represent the Group's maximum exposure to credit risk in relating to the Group's financial assets.

The Group has no concentrations of credit risk. The Group's credit risk is primarily attributable to the accounts and other receivables. It also sets credit limit on each individual customer and prior approval is required for any transaction exceeding that limit. The customer with sound payment history would accumulate a higher credit limit.

At the reporting date, the carrying amount of trade and other receivables is immaterial and their exposures to credit risk are not considered to be significant.

The credit risk on bank balances is limited because the counterparty is a licensed bank in Hong Kong with high credit-ratings.

iii Liquidity risk

All the Group's financial liabilities are due less than one year.

The Group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

iv Interest rate risk

The Group's exposure to cash flow interest-rate risk arises from its bank balances bearing interests at variable rates varied with the then prevailing market condition. The Directors consider the Group's exposure to cash flow interest rate risk is minimal.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - Continued
FOR THE YEAR ENDED 31 MARCH 2026

23 Financial instruments - Continued

c Fair values

The Directors have considered that the carrying amounts of all financial assets and liabilities approximated to their fair values at 31 March 2026 and 31 March 2025.

24 Subsidiaries

Details of principal subsidiaries as at 31 March 2026 are as follows:

Name	:	Wonderwall (F.E.) Limited
Place of incorporation	:	United Kingdom
Issued share capital	:	GBP 1
Shareholding	:	100%
Principal activities	:	Sourcing and manufacturing of garments

25 Approval of consolidated financial statements

The consolidated financial statements were approved and authorised for issue by the Board of Directors on 14 MAY 2026

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
PDS DSGN FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of PDS DSGN FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

1 LEGAL STATUS :

PDS DSGN FZCO is incorporated on **May 08, 2023 under License No.- 05683 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2 E E006, Mezzanine, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed by following person:

1.Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The Activities of the Company are as Follows:-

(a) Clothing, Including Sports Clothes and Uniforms Trading

(b) Clothing Accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, If the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the Interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

PDS DSGN FZCO

Premises No. 2 E M006, Mezzanine Floor, 2 East , Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the Financial Statements for the Year Ended March 31, 2026

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

18 RISK MANAGEMENT

18.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

18.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

18.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

19 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from April 01, 2025 to March 31, 2026. The Previous fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025. Previous year figures might be reclassified & regrouped to conform to the current year presentation.

MANAGER'S REPORT

The Manager has pleasure in presenting his report and the audited financial statements for the year ended March 31, 2026.

Principal Activities of the Entity:

The Activities of the Company are as Follows:-

(a) Clothing, Including Sports Clothes and Uniforms Trading

(b) Clothing Accessories Trading

Financial Review:

The Table Below Summarizes the Results of 2025-26 and 2024-25

(figures in AED)

Particulars	01.04.2025 to 31.03.2026	01.04.2024 to 31.03.2025
Revenue for the Year	28,564,257	54,714,280
Gross Profit/(Loss) for the Year	2,563,337	6,777,397
Net Profit/(Loss) for the Year	(1,329,184)	2,709,144

Role of the Manager:

The Manager is the Entity's principal decision-maker. The Manager have the overall responsibility for leading and supervising the Entity, for delivering sustainable shareholder value through his guidance and supervision of the Entity's business. The Manager sets the strategies and policies of the Entity. They monitors performance of the Entity's business, guides and supervises the management.

Events After Year End:

In the opinion of the Manager, no transaction or event of a material and unusual nature, favorable or unfavorable, has arisen in the interval between the end of the financial year and the date of this report that is likely to affect, substantially, the result of the operations or the financial position of the Entity.

Auditor:

M/s Alia Chartered Accountancy, Chartered Accountants, have showed their willingness to continue and are appointed to carry out independent audit for the year ending March 31, 2027.

Statement of Manager responsibilities:

The applicable requirements require the Manager to prepare the financial statements for each financial year, which presents fairly, in all material respects, the financial position of the Entity, and its financial performance for the period then ended.

The audited financial statements for the period under review have been prepared in conformity and in compliance with the relevant statutory requirements and other governing laws. The Manager confirms that sufficient care has been taken for the maintenance of proper and adequate accounting records that disclose with reasonable accuracy at any time, the financial position of the Entity and enables him to ensure that the financial statements comply with the requirements of applicable statute. The Manager confirms that appropriate accounting policies have been selected and applied consistently in order that the financial statements reflect fairly the form and substance of the transactions carried out during the year under review and reasonably present the Entity's financial conditions and results of its operations These financial statements were approved by the shareholders and signed on behalf by the authorized representative of the company.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Skope Apparels FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

SKOPE APPARELS FZCO

Premises 2W, M115 ,Mezzanine Floor, 2 WEST, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

Skope Apparels FZCO is incorporated on **December 26, 2022 under License No.- 05475 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 2W M115 ,mezzanine Floor , 2West, Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed by following person:

1.Mr.Suresh Mahadev Punjabi

2 BUSINESS ACTIVITIES :

The Activities of the Company are as Follows:-

(a) Clothing, Including Sports Clothes and Uniforms Trading

(b) Clothing Accessories Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

SKOPE APPARELS FZCO

Premises 2W, M115 ,Mezzanine Floor, 2 WEST, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

SKOPE APPARELS FZCO

Premises 2W, M115 ,Mezzanine Floor, 2 WEST, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

SKOPE APPARELS FZCO

Premises 2W, M115 ,Mezzanine Floor, 2 WEST, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipment's

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or

The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and

- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or

has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends. Current tax assets and liabilities are offset only if certain criteria are met.

Notes to the financial statements - for the year ended March 31, 2026

19 RISK MANAGEMENT

19.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

19.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

19.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

20 COMPARATIVE FIGURES

The Current fiscal year covers the period of 12 months from 01 April 2025, to March 31, 2026. The Previous fiscal year covers the period of 12 months from 01 April 2024, to March 31, 2025. The Previous year figures have been regrouped or rearranged for classification.

21 APPROVAL OF FINANCIAL STATEMENTS

These financial statements were approved and signed by the shareholder on April 24, 2026.

The attached notes form an integral part of these accounts.

Smart Notch （Shanghai）Limited

Audit Report

Shanghai Kingwood Certified Public Accountants Co., Ltd.

Shanghai China

[English Translation for Reference Only]

AUDITORS' REPORT

TO THE BOARD OF DIRECTORS OF SMART NOTCH（SHANGHAI）LIMITED:

I Opinion

We have audited the accompanying financial statements of SMART NOTCH（SHANGHAI）LIMITED (the "Company"), which comprise the balance sheet as at March 31, 2026 and the income statement, statement of changes in equity and cash flow statement for the year then ended, and notes to the financial statements.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026, and its financial performance and its cash flows for the year then ended in accordance with Accounting Standards for Business Enterprises.

II The basis of opinion

We conducted our audit in accordance with Chinese Certified Public Accountants Auditing Standards. The part of the audit report "Accountability of Certified Public Accountants for the Audit of Financial statements" further elaborates our responsibilities under these standards. In accordance with the Code of Professional Ethics of Chinese Certified Public Accountants, we are independent of the Company. And to fulfill other professional ethics responsibilities.We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

III Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Accounting Standards for Business

Enterprises, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the company's going concern, disclosing matters related to its going concern (if applicable)and applying the going-concern assumptions. Unless management plans to liquidate the company, termination or no other realistic option.

IV Auditor's Responsibility

Our objective is to obtain reasonable assurance as to whether the financial statements as a whole are free of material misstatement resulting from fraud or error and to issue an audit report containing an audit opinion. Reasonable assurance is a high level of assurance. However, there is no assurance that audits performed in accordance with audit standards will always be found when a material misstatement exists. Misstatements may result from fraud or error. If it is reasonably anticipated that misstatement alone or aggregated may affect the economic decision made by the financial statement user on the basis of the financial statement, the misstatement is generally considered to be material.

In carrying out the audit in accordance with the auditing standards, we used professional judgement and maintained professional suspicion. At the same time, we also performed the following tasks:

1、Identify and evaluate the risk of material misstatement of financial statements due to fraud or error; Design and implement audit procedures to address these risks and obtain adequate and appropriate audit evidence as a basis for issuing audit opinions. As fraud may involve collusion, forgery and deliberate omission. False statements or overrides over internal controls, failure to detect the risk of material misstatement due to fraud is higher than failure to detect the risk of material misstatement as a result of error.

2、Understand the internal control relevant to audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.

3、Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosure made by management.

4、Draw a conclusion on the appropriateness of management's use of the going-concern hypothesis. At the same time, based on the audit evidence obtained. A conclusion is drawn as to whether there are significant uncertainties in matters or circumstances that may lead to significant doubts about the continuing ability of the company. If we conclude that there are significant uncertainties. The audit standards require us to bring the relevant disclosure in the financial statements to the attention of the users in the audit report; If the disclosure is inadequate, we should make a non-unqualified opinion. Our conclusion is based on information available at the date of the audit report. However, future events or circumstances may cause the company to be unable to proceed.

5、Evaluate the overall presentation, structure and content of the financial statements (including disclosure) and whether the financial statements fairly reflect the transactions and events involved.

We communicate with the committee on planned audit coverage, timing, and major audit findings, including internal control deficiencies that we identified as worthy of concern during the audit.

Appendices:

1. A copy of the Company's Balance Sheet as of March 31,2026.
2. A copy of the Company's Income Statement for the fiscal year: From April 1,2025 to March 31,2026.

II、Basis for the preparation of the financial statements

The company's financial statements are based on the going concern assumption, according to the actual transactions and matters, in accordance with the Ministry of Finance issued the accounting standards for business enterprises —— basic standards (Treasury order no. 33, finance ministry order revised no. 76), promulgated on February 15,2006 and revised 42 specific accounting standards, accounting standards application guidelines, accounting standards interpretation and other relevant provisions (hereinafter referred to as "accounting standards for business enterprises") disclosure provisions.

According to the relevant provisions of the Accounting Standards for Business Enterprises, the company's accounting is based on the accrual basis. Except for certain financial instruments, the financial statements are measured based on historical costs. If the assets are impaired, the corresponding impairment provision shall be made in accordance with the relevant provisions.

III、Statement of following the Accounting Standards for Business Enterprises

The financial statements prepared by the Company meet the requirements of the Accounting Standards for Business Enterprises, and truly and completely reflect the financial position of the Company on March 31,2026 and the operating results and cash flow from April 1,2025 to March 31,2026.

IV、Important accounting policies and accounting estimates

1. Accounting period

The accounting period is divided into year and interim, which is the reporting period shorter than a full fiscal year. The fiscal year of the Company starts from April 1 to March 31 of the following year.

2. Business cycle

Normal business cycle is the period from the Company's purchase of assets for processing to the realization of cash or cash equivalents.The Company takes 12 months as an business cycle and takes it as the liquidity standard of assets and liabilities.

3.Accounting standard currency

CNY is the currency in the main economic environment in which the Company and its domestic subsidiaries operate, and the Company and its domestic subsidiaries use CNY as the accounting standard currency.The currency used in the preparation of this financial statement is CNY.

4. Standards for determining cash and cash equivalents

The Company's cash and cash equivalents include cash on hand, deposits that can be paid at any time and short term held by the Company (generally due within three months from the purchase date), strong liquidity, easy to convert into known amounts of cash, and little risk of change in value.

5. Accounts receivable

Receivables include accounts receivable, other receivables, etc.

(1) Confirmation standard for bad debt provision

The Company checks the book value of the receivables on the basis of the balance sheet date, and has the following objective evidence indicating the impairment of the receivables, the impairment provision is made: ① the debtor has serious financial difficulties; ② the debtor violates the contract provisions (the default or overdue); ③ the debtor is likely to go bankrupt or conduct other financial restructuring; ④ other objective basis indicating the impairment of the receivables.

(2) The withdrawal method of bad debt provision

Confirmation standard and withdrawal method for receivables bad debt provision for single significant amount and single bad debt provision The Company recognizes the receivables of more than RMB 1 million as individual receivables of significant single amount.

The Company conducts separate impairment tests on the receivables with a single significant amount, and separately tests the financial assets without impairment, including in the financial asset portfolio with similar credit risk characteristics.

Individual test receivables with recognized impairment losses are no longer included in the impairment test in a portfolio of receivables with similar credit risk characteristics.

(3) The turn-back of the bad debt provision

If there is objective evidence that the value of the receivables has been recovered and is objectively related to the events occurring after the recognition of the loss, the originally recognized impairment loss shall be turned back and recorded in the current profit and loss. However, the book value of the receivables does not exceed the amortized cost of the receivables on the reversal date, assuming no impairment provision.

6. Inventories

1. Inventory refers to the finished products and commodities held by the enterprise for sale in daily activities, and the materials and materials consumed in the process of production or in the process of providing labor services.

Inventory includes inventory goods, delivered goods, and low-value consumables.

2. Initial measurement of inventory: inventory is measured according to the actual cost at the time of acquisition.

(1) The cost of the purchased inventory, including the purchase price, relevant taxes, transportation charges, handling charges, insurance premiums, and other expenses attributable to the inventory purchase costs for bringing the inventory to the current place and state.

(2) Inventory cost of commissioned processing, including procurement cost, direct labor and other expenses allocated according to certain methods, and other expenses attributable to inventory processing cost for bringing the inventory to the current place and state.

(3) The following expenses related to inventory shall be recognized by the Company as current profit and loss upon occurrence and shall not be included in inventory cost: - -Abnormally consumed materials, direct labor, etc -Storage expenses (excluding those necessary in the production process to reach the next production stage) Should not be attributed to other expenses to bring the inventory to its current place and status.

3. Determine the method used to issue inventory costs

(1) The cost of inventory (such as raw materials, inventory goods, etc.) other than low-value consumables and packaging materials shall be issued by the weighted average method at the end of the term.

(2) Packaging materials and low-value consumables are amortized by the primary resale method.

4. Inventory inventory system: the inventory method of inventory quantity adopts the perpetual inventory system.

5. The basis for determining the net realizable value of the inventory

(1) The inventory of goods and materials for sale and other goods directly used for sale shall, in the normal process of production and operation, determine the net realizable value of the estimated selling price of the inventory minus the estimated sales expenses and relevant taxes.

(2) In the normal process of production and operation, the inventory of processed materials, and the net realizable value shall be determined by deducting the estimated selling price of the finished products and related taxes.

6. Method of provision for inventory depreciation reserves

(1) On the balance sheet date, the inventory is measured at the lower level

of the cost and the net realizable value.If the inventory cost is higher than its net realizable value, the inventory depreciation provision shall be withdrawn according to the difference and included into the current profit and loss; If the inventory cost is lower than its net realizable value, without the inventory depreciation provision, the original inventory depreciation provision shall be reversed within the original amount and the reversed amount shall be recorded into the current profit and loss.

(2) Inventory depreciation reserve is usually calculated as a single inventory item. For inventories with large quantities and low unit prices, the provision for inventory decline shall be drawn according to the inventory category. Related to the series of products produced and sold in the same area, with the same or similar end purpose or purpose, and it is difficult to measure separately from other items, the combined inventory depreciation provision. If the influencing factors of the provision for inventory depreciation have disappeared, the value of the write-down shall be restored, and the amount transferred within the original provision amount shall be recorded into the current profit and loss.

7. Contract assets

1. Confirmation methods and standards of contract assets The Company lists the contractual assets or contractual liabilities in the balance sheet based to the relationship between performance obligations and customer payment. The right of the Company to receive the consideration to transfer goods or services to the customer (and the right depends on other factors than the passage of time) is listed as contractual assets. Contract assets and contract liabilities under the same contract are shown in a net amount. The Company's unconditional (depending on the passage of time) right to receive consideration from customers is presented separately as receivables.

2. Determination method and accounting treatment method of the expected credit loss of the contract assets The determination method and accounting treatment method of the expected credit loss of the contract assets are as follows as the accounting treatment of accounts receivable under the new financial instrument standards.

8.Long-term equity investments

1. For the long-term equity investment formed by the enterprise merger, the initial investment cost shall be determined according to the following provisions:

(1) In the case of enterprise merger under the same control, if the merging party takes the payment of cash, transfer of non-cash assets or liabilities as the merger consideration, the initial investment cost of the long-term equity investment shall be taken on the merger date according to the share of the owner's equity of the incorporated party in the book value in the consolidated statement of the final controlling party. The capital reserves shall be adjusted for the difference between the initial investment cost and the cash paid, the transferred non-cash assets and the book value of the debts; if the balance of capital reserves is insufficient, the retained earnings shall be adjusted.

Where the merging party takes the issued equity securities as the merger consideration, the total par value of the issued shares shall be used as the capital stock, and the difference between the initial investment cost and the total par value of the issued shares shall adjust the capital reserve; if the capital reserve is insufficient, the retained earnings shall be adjusted.

The intermediary fees of audit, legal services, evaluation and consulting and other relevant administrative expenses incurred by the consolidated party shall be recorded into the current profit and loss at the time of occurrence.

(2) In the holding merger not under the same control, the purchaser shall take the determined cost of the enterprise merger as the initial investment cost of the long-term equity investment. Merger costs include the sum of the assets paid by the purchaser, the liabilities incurred or assumed, and the fair value of the equity securities issued. The audit, legal services, evaluation and consulting and other related management expenses incurred by the purchaser shall be recorded into the current profit and loss at the time of occurrence.

Where an enterprise realizes the enterprise merger not under the same control step by step through multiple transactions, it shall separate the individual financial statements and the consolidated financial statements for relevant accounting treatment.

① In individual financial statements, the sum of the book value of the equity investment held by the purchased party before the purchase date and the initial investment cost of the purchase date; if the equity of the purchaser held before the purchase date involves other comprehensive income, the relevant comprehensive income shall be transferred to the current investment income during the disposal of the investment.

② In the consolidated financial statements, the equity of the purchased party held before the purchase date shall be remeasured according to the fair value of the equity on the purchase date, and the difference between the fair value and its book value shall be included in the current investment income; if the equity held by the purchased party before the purchase date involves other comprehensive income, other comprehensive income shall be converted into the current investment income of the purchase date.

2. Except for the long-term equity investment formed by the enterprise merger, the initial investment cost shall be determined according to the following provisions:

(1) The long-term equity investment obtained with cash payment shall be taken as the initial investment cost according to the actual purchase price, including necessary expenses such as handling fees paid in the purchase process. However, the cash dividends or profits declared but not yet paid by the invested unit included in the paid price shall be accounted for as the receivable items.

(2) For the long-term equity investment obtained by issuing equity securities, the issuing equity securities shall take the fair value as the initial investment cost.

(3) For the long-term equity investment invested by the investor, the initial investment cost shall be based on the value agreed in the investment contract or agreement, unless the value agreed in the contract or agreement is unfair.

(4) For the long-term equity investment obtained through debt restructuring, the initial investment cost is determined according to the fair value.

3. Investment income recognition method

(1) The long-term equity investment controlled by the Company to the invested unit shall be calculated by the cost method. If the cost method is adopted, the investment income shall be confirmed when the invested unit announces cash dividends.

(2) The company's long-term equity investment with joint control or significant influence on the invested unit adopts the equity method. When using the equity method for accounting, the investment income and other comprehensive income shall be recognized respectively according to the share of the net profit and loss and other comprehensive income of the invested unit that should be enjoyed or shared, and the book value of the long-term equity

investment shall be adjusted (3) When disposing of the equity investment, the difference between the book value of the investment and the actual obtained price shall be taken as the current investment income.

4. Recognition standard and withdrawal method of impairment provision for long-term equity investment

The provision of long-term equity investment impairment provision shows the accounting policies related to asset impairment. Once the impairment loss is recognized, it shall not be reversed during the later accounting period.

5. The judgment criteria for the Company having joint control and significant influence on the invested entity:

(1) Joint control means the common control of an arrangement in accordance with the relevant agreement, and the relevant activities of the arrangement must be decided after the unanimous consent of the participants who share the control right.

(2) Significant impact refers to the right to participate in the decision-making of the financial and operational policies of an enterprise, but the inability to control or jointly control the formulation of these policies together with other parties.

(3) The Company usually determines whether it has a significant impact on the investee through one or more of the following situations:

① Have representatives on the board of directors of the invested entity or similar authorities. In this case, due to the assignment of representatives in the board of directors or similar authorities of the invested entity, and the corresponding substantial right to participate in the decision-making, the investor can participate in the formulation of the financial and operational policies of the invested entity, so as to exert significant influence on the invested entity.

② Participate in the process of financial and business policy formulation of the invested entity. In this case, suggestions and opinions can be put forward for their own interests in the process of policy formulation, so as to exert significant influence on the invested units.

③ Important transactions occur between them and the invested units.

Because of its importance to the daily operation of the invested unit, it can affect the production and operation decisions of the invested unit to some extent.

④ Send managers to the invested unit.

In this case, the managers have the right to dominate the relevant activities of the investee, so as to exert a significant influence on the investee.

⑤ Provide the key technical data to the invested units.

Because the production and operation of the invested unit needs to rely on the technical or technical data of the investor, indicating that the investor has a significant impact on the invested unit.

9.Fixed assets

1. Fixed assets refer to the tangible assets held for the production of commodities, providing labor services, leasing or operation and management, with a service life of more than one fiscal year.

Fixed assets are recognized only if the associated economic benefits are likely to flow into the Company and their costs can be reliably measured.

2. Fixed assets are initially measured according to the actual cost at the time of acquisition.

The cost of purchasing fixed assets includes the purchase price, relevant taxes, and other expenses attributable to the assets incurred before the fixed assets reach the predetermined usable state, such as transportation costs, handling costs, installation fees, professional service fees, etc.

Subsequent expenses related to fixed assets shall be included in the cost of fixed assets if they meet the recognition conditions of fixed assets; those that do not meet the recognition conditions of fixed assets shall be recorded in the current profit and loss upon occurrence.

3. Depreciation of fixed assets is calculated by the life average life method, and the depreciation rate is determined according to the original value, estimated service life and estimated net residual value of all kinds of fixed assets.

When the depreciation of the fixed assets with the impairment provision are withdrawn, the depreciation rate shall be recalculated according to the remaining useful life and the estimated residual value of the fixed assets.

The fixed assets with full impairment provisions, no longer depreciation.

Category	estimated useful life	estimated net residual value rate	annual depreciation rate
Office and other equipment	3year	0	33.33%

4. Fixed assets that cannot generate profits for the Company or are

temporarily unused (except for seasonal suspension) shall be regarded as idle fixed assets. Idle fixed assets shall be re-estimated as the estimated service life and depreciation rate, and depreciation is directly recorded in the current profit and loss.

5. The fixed assets that meet the conditions for holding for sale shall be listed as the lower amount of the book value and the fair value minus the disposal cost. The fair value minus the disposal expense lower than the original book value is recognized as an asset impairment loss.

6. Terminate the recognition of a fixed asset when it is disposed of or is expected to generate no economic benefits through use or disposal. The amount of the disposal income from the sale, transfer, scrapping or destruction of fixed assets after deducting their book value and related taxes shall be included in the current profit and loss.

10.Constructions in progress

The necessary expenses incurred before the construction of the assets are regarded as the recorded value of the fixed assets. Built of fixed assets in the project has reached the predetermined usable state, but has not yet completed final accounts, since the date of predetermined usable state, according to the project budget, cost or engineering actual cost, according to the estimated value into fixed assets, and according to the fixed assets company depreciation policy of fixed assets depreciation, to completion final accounts, then according to the actual cost to adjust the original provisional value, but does not adjust the original depreciation amount.

11.Long-term deferred charges

Long-term deferred expenses refer to the expenses incurred by the Company and with the amortization period of more than one year. Long-term amortized expenses shall be amortized within the benefit period of the expense item. For the long-term amortized expenses that cannot benefit from the future accounting period, the amortized value of the item shall be recorded into the current profit and loss when determined. Long-term deferred expenses are recorded according to the actual cost incurred at the time of formation.

12.Contract liabilities

Contract liabilities are the obligation to transfer goods to the Company which has received or receivable customer consideration. The Company lists the

contractual assets or contractual liabilities in the balance sheet according to the relationship between the performance obligations and the customer payment.

Contract assets and contract liabilities under the same contract are shown in a net amount.

13.Revenue

1. General principles of revenue recognition

The Company has fulfilled the performance obligations in the contract, that is, when the customer obtains the control of the relevant commodities, the revenue is recognized according to the transaction price apportioned to the performance obligation. Performance obligations, refers to the contract of the company to customers to clearly distinguish goods or services. To obtain the control of the relevant commodity means to be able to dominate the use of the commodity and obtain almost all the economic benefits from it.

The Company, according to the relevant provisions of the revenue standards, judges that the nature of the relevant performance obligations belongs to "performance obligations within a certain period of time" or "performance obligations at a certain period of time", and conducts revenue recognition according to the following principles.

(1) If one of the following conditions is met, it shall belong to perform the performance obligations within a certain period of time, otherwise, it shall belong to perform the performance obligations at a certain point: ① The customer shall obtain and consume the economic benefits brought by the Company during the performance of the Company.

② The customer can control the goods under construction during the performance process of the company.

③ The commodities produced by the Company during the performance of the contract have irreplaceable purposes, and the Company has the right to collect money for the accumulated performance part during the whole contract period.

For the performance obligations performed within a certain period of time, the Company shall recognize the revenue in accordance with the performance progress within that period, except that the performance progress cannot be reasonably determined. Considering the nature of the goods or service, the company adopts the output method or the input method to determine the

appropriate performance schedule. When the performance progress cannot be reasonably determined, if the cost incurred is expected to be compensated, the Company shall recognize the revenue according to the amount of cost incurred until the performance progress can be reasonably determined.

For the performance obligations performed at a certain point, the Company recognizes the revenue at the point when the customer obtains the control right of the relevant goods or services. In determining whether the customer has acquired control of the goods or services, the Company considers the following indications:

① The Company has the right to current payment for the goods or services, that is, the customer has current payment for the goods or services

② The Company has transferred the legal title of the goods to the customer, that is, the customer has the legal ownership of the goods

③ The Company has transferred the goods to the customer, that is, the customer has the physical possession of the goods.

④ The Company has transferred the main risks and remuneration in the ownership of the commodity to the customer, that is, the customer has acquired the major risks and remuneration in the ownership of the commodity.

⑤ The customer has accepted the goods or services, etc.

2. Measurement of income

The Transaction Price is the amount of consideration that the Company is expected to be entitled to receive for the transfer of goods or services to the Customer, excluding amounts collected on behalf of a third party and amounts expected to be refunded to the Customer.

The Company determines the transaction price according to the terms of the contract and its previous practices, and considers the influence of variable consideration, significant financing components in the contract, non-cash consideration, and payable to the customer consideration.

(1) Variable consideration

The Company determines the best estimate of the variable consideration at the expected value or the amount most likely to occur, but the transaction price including the variable consideration shall not exceed the amount accumulated at the elimination of the relevant uncertainty. When assessing whether the accumulated recognized income is highly likely to avoid significant reversal, the

Company should consider the possibility of revenue reversal and its proportion.

(2) Major financing components

If there is a material financing component in the Contract, the Company shall determine the transaction price in accordance with the amount payable in cash when the assumed customer obtains control of the goods or services, and amortize the difference between the transaction price and the contract consideration during the contract period.

(3) Non-cash consideration

If the customer pays the non-cash consideration, the Company shall determine the transaction price according to the fair value of the non-cash consideration. If the fair value of the non-cash consideration cannot be reasonably estimated, the Company shall indirectly determine the transaction price with reference to the separate selling price of the goods that it undertakes to transfer to the customer.

(4) Customer consideration payable

For the consideration payable to the customer, the transaction price shall be written off by the consideration payable, and the current income shall be written off at the time of recognizing the relevant income and the payment (or commitment to pay) the customer consideration, except that the customer consideration payable is for the purpose of obtaining other clearly differentiated goods from the customer.

If the enterprise pays the customer consideration is to obtain other clearly differentiated commodities from the customer, it shall confirm the commodities purchased in a way consistent with other purchases of the enterprise. If the consideration payable to the customer by the enterprise exceeds the fair value of the goods that can be clearly distinguished from the customer, the excess amount shall be written off by the transaction price. If the fair value of the goods obtained which can be clearly distinguished from the customer cannot be reasonably estimated, the enterprise shall offset the transaction price of the consideration payable to the customer in full.

3. Specific principles of revenue recognition of the Company:

Selling goods

The sales contract between the company and the customer belongs to the performance obligation at a certain point.

Income from domestic products: the Company delivers the goods to the delivery place according to the provisions of the contract and confirms the sales revenue when the customer accepts the goods and the handover receipt; income from export products: the Company has obtained the bill of lading, and recovered the payment or obtains the receipt certificate.

14. Government subsidy

Government subsidy refers to the company's free acquisition of monetary assets and non-monetary assets obtained from the government, excluding the capital invested by the government as an investor and enjoying the corresponding owner's equity. Government subsidies are divided into asset-related government subsidies and income-related government subsidies. If the government subsidies are monetary assets, they shall be measured according to the amount received or receivable. If government subsidies are non-monetary assets, they shall be measured according to fair value; if fair value cannot be reliably obtained reliably, it shall be measured in nominal amount. The government subsidies measured according to the nominal amount are directly recorded into the current profit and loss.

The government subsidy related to the assets shall be recognized as deferred income and shall be recorded into the current profit and loss in the service life of the relevant assets or write down the book value of the relevant assets. The government subsidy related to the benefits is used to compensate the related costs or losses in the subsequent period, including the current profits or losses in the related costs or losses; for the related costs or losses already incurred, it shall be directly recorded in the current profits or losses or offset the related costs.

Including government subsidies for asset related parts and income related parts, distinguishing different parts for accounting treatment, they are classified as government subsidies related to earnings.

Government subsidies related to the daily activities of the Company shall be included in other income or offset related costs according to the essence of economic business; government subsidies unrelated to daily activities shall be included in non-operating income and expenditure.

When the recognized government subsidies need to be returned, with the balance of the relevant deferred income, the book balance of the relevant

deferred income shall be deducted and the excess shall be included in the current profit or the book value of the relevant assets during the initial confirmation; in other cases, it shall be directly included in the current profit and loss.

15.Lease

Lease is a contract in which the lessor assigns the use of the assets to the lessee for a certain period to obtain consideration. On the commencement date of the contract, the Company evaluates whether the contract is a lease or includes a lease.

If a party to the contract transfers the right to control one or the use of more of the identified assets within a certain period in exchange for consideration, then the contract is a lease. In order to determine whether the contract transfers the right to control the use of the identified assets within a certain period, the Company makes the following assessments:

① Whether the contract involves the use of the identified assets. The identified asset may be expressly specified by the contract or implicitly specified when the asset is available and the asset shall be physically distinguishable, or if some capacity or other part of the asset is physically indistinguishable but substantially represents the full capacity of the asset so that the customer receives almost all the economic benefits arising from the use of the asset.If the supplier of the asset has the substantial right to replace the asset during the entire use period, the asset is not an identified asset;

② Whether the Lessee is entitled to almost all economic benefits arising from the use of the identified assets during the use period:

③ Whether the lessee has the right to dominate the use of the identified assets during the use period. If the contract contains multiple separate leases, the lessee and the lessor shall split the contract and separate the separate lease for accounting treatment. Where the contract contains both the leased and non-leased parts, the lessee and the lessor shall split the leased and non-leased parts. In the case of the lease and non-lease parts included in the split contract, the lessee allocates the contract consideration in relative proportion to the sum of the separate prices of each lease part and the separate prices of the non-leased part.

1. The Company is the lessee

（1）Right to use assets

On the beginning date of the lease term, the Company recognizes the right of use assets except for short-term lease and low-value asset lease, and the right of use assets shall be initially measured according to the cost.

This cost includes:

① The initial measurement amount of the lease liabilities; ② For the amount of lease payment paid on or before the start date of the lease, if there is a lease incentive, the relevant amount related to the lease incentive shall be deducted; ③ Initial direct expenses incurred by the Company; ④ The costs expected to occur for the Company to dismantle and remove the leased assets, restore the site where the leased assets are located, or restore the leased assets to the state agreed in the lease terms, but excluding the costs incurred for the production inventory.

After the beginning of the lease term, when the lease liabilities are re-measured, the book value of the use right assets shall be adjusted accordingly.

The company uses the straight line method to depreciate the use assets.

If the ownership of the lease assets can be reasonably determined at the expiration of the lease term, the Company shall draw depreciation within the remaining service life of the lease assets.

Otherwise, the leased asset shall be depreciated during the period of the lease term and the remaining service life of the leased asset.

The right to use the assets according to the accounting policies described in the note "VI, (18) long-term asset impairment", and make accounting treatment for the identified impairment losses.

(2) Lease liabilities

On the beginning date of the lease term, the Company recognizes the lease liabilities except for the short-term lease and the low-value asset lease, and the lease liabilities are initially measured at the present value of the outstanding lease payment.

The amount of lease payment includes: ① Fixed payment amount (including the substantial fixed payment amount), if there is a lease incentive, the relevant amount of the lease incentive shall be deducted; ② Variable lease payments depending on the index or ratio; ③ Amount expected to be paid

based on the balance of the guarantee provided by the Company; ④ The exercise price of the purchase option, provided that the Company reasonably determines that the option will be exercised; ⑤ The amount to be paid for the exercise of the termination option, provided that the lease term reflects that the Company will exercise the termination option;

The Company uses the lease included interest rate as the discount rate.

However, if the interest rate included in the lease cannot be reasonably determined, the incremental borrowing rate of the company shall be used as the discount rate.

The Company shall calculate the interest expense of the lease liabilities during each period of the lease term at a fixed periodic interest rate, and include them into the current profit or loss or related asset cost.

Variable lease payments depending on the index or ratio are determined on the basis of the index or rate on the start date of the lease term.

Variable lease payments not included in the measurement of lease liabilities are recorded into the current profit and loss upon actual occurrence.

In accordance with the "accounting Standards for Business Enterprises no. 1-Inventory" and other standards included in the relevant asset costs, from its provisions.

After the commencement of the lease term, the Company shall remeasure the lease liabilities according to the present value of the payment of the lease:

① When the substantial fixed payment amount changes, the expected payable amount of the guarantee surplus value changes; ② Changes in the index or ratio used to determine the amount of lease payments; ③ The Company changes in the evaluation results of the purchase option, renewal option or termination lease option, or the actual exercise of the renewal option or termination lease option is inconsistent with the original evaluation results.

When remeasuring the lease liabilities, the Company shall adjust the book value of the use assets accordingly.

If the book value of the use right assets has been reduced to zero, but the lease liabilities still need to be further reduced, the Company will include the remaining amount into the current profit and loss.

(3) Short-term lease and low-value asset lease

Short-term lease is a lease at the beginning of the lease term not more than

12 months and without the purchase option.

Low-value asset leasing refers to the leasing with a value of no more than 2,000 yuan when a single leased asset is a new asset.

If the company sublets or expects to sublet the leased assets, the original lease does not belong to the low-value asset lease.

The Company chooses not to recognize the use assets and lease liabilities of short-term lease and low-value asset lease, and includes the relevant lease payment into the current profit and loss or related asset cost according to the straight line method during each period of the lease term.

(4) Leasing change

If the lease changes and meets the following conditions, the Company shall treat the change as a separate lease:

① The lease change expands the scope of the lease by increasing the right to use one or more of the leased assets; ② The increased consideration is equivalent to the separate price of the extended part of the lease as adjusted for the circumstances of the contract.

If the lease change is not treated as a separate lease, on the effective date of the lease change, the Company shall reshare the consideration of the changed contract and redefine the lease term, and the lease liabilities shall be remeasured according to the present value calculated by the changed lease payment amount and the revised discount rate.

If the lease change leads to the narrowing of the lease scope or the shortening of the lease term, the Company shall reduce the book value of the right to use assets accordingly and record the relevant gains or losses of partial termination or complete termination of the lease into the current profit and loss.

If other lease changes lead to the re-measurement of lease liabilities, the Company shall adjust the book value of the right to use assets accordingly.

2. The company acts as the lessor

On the beginning date of the lease, the Company divides the lease into financial lease and operating lease. Finance lease refers to a lease that essentially transfers almost all of the risks and rewards related to the ownership of the leased assets, regardless of whether the ownership is ultimately transferred or not. Operating lease refers to other lease other than financial lease. When the company is the sublease lessor, the transfer lease is classified based

on the use right assets generated by the original lease.

(1) The lease collection amount of the operating lease shall be recognized as the rental income by the straight-line method during the lease term. The Company shall capitalize the initial direct expenses incurred related to the operating lease, share them during the lease term on the same basis as the rental income recognition, and record them into the current profit and loss in stages. Variable lease payments not included in the lease receipts are calculated as current profit and loss upon actual occurrence.

(2) the company, as the sublessor, calculates the original lease and transfer contract as two separate contracts. The Company classifies the transfer lease based on the original lease, rather than the target assets of the original lease.

(3) In case of any change in the operating lease, the Company shall treat it as a new lease from the effective date of the change, and the amount received in advance or receivable related to the lease before the change shall be regarded as the amount received by the new lease. Financial lease change and meet the following conditions, the Company will treat the change as a separate lease:

① This change expands the scope of the lease by adding the right to use one or more of the leased assets;

② The increased consideration is equivalent to the separate price of the extended part of the lease as adjusted for the circumstances of the contract.

(4) If the change of financial lease is not treated as a separate lease, the Company shall treat the changed lease in the following circumstances:

① If the change takes effect on the beginning date of the lease and the lease will be classified as an operating lease, the Company will be it as a new lease from the effective date of the lease change, and the net lease investment before the effective date of the lease change will be taken as the book value of the leased assets;

② If the change takes effect on the beginning date of the lease and the lease will be classified as a financial lease, the Company shall conduct accounting treatment in accordance with the modification or re-negotiation of the contract in the Accounting Standards for Business Enterprises No.22-Recognition and Measurement of Financial Instruments.

3. After-sales rent back

(1) The company is both the seller and the lessor

In accordance with the provisions of accounting Standards for Business Enterprises No.14-Income, the company evaluates and determines whether the transfer of assets in the after-sale and leaseback transaction belongs to sales.

If the transfer of the assets is not sold, the Company continues to recognize the transferred assets, and simultaneously recognize a financial liability equal to the transfer income, and conducts accounting treatment for the financial liability in accordance with the Accounting Standards for Business Enterprises No.22-Recognition and Measurement of Financial Instruments.

If the transfer of the assets is sold, the Company measures the use of the right formed by the sale of the sale of the assets of the assets related to the original book value of the leased back, and only recognizes the relevant gains or losses of the rights transferred to the lessor.

(2) The Company is both the buyer and the lessee

If the transfer of assets in the sale and leaseback transaction does not belong to the sale, the Company does not recognize the transferred assets, but recognizes a financial asset of the same amount as the transfer income, and conducts accounting treatment for the financial assets in accordance with the Accounting Standards for Business Enterprises No.22-Recognition and Measurement of Financial Instruments.

If the transfer of the assets belongs to the sales, the Company shall conduct accounting treatment for the asset purchase and conduct accounting treatment for the asset lease.

V. Description of accounting policies, changes in accounting estimates, and correction of accounting errors

1. Changes in accounting policies and accounting estimates

None.

2. Correction of accounting errors

None.

VI. Major tax items and income tax accounting treatment

1. Applicable tax rate:

Directors' report for the year ended 31 March 2026

The directors present their annual report and the audited financial statements of Progress Manufacturing Group Limited (the "Company") for the year ended 31 March 2026.

PRINCIPAL ACTIVITY AND BUSINESS REVIEW
The principal activity of the Company is garment trading. There were no significant changes in the nature of the Company's principal activities during the year.

No business review is presented as the Company has been able to claim an exemption under section 388(3) of the Companies Ordinance (Cap. 622) since it falls under the "reporting exemption" in accordance with section 359, as at the reporting date.

RESULTS AND APPROPRIATIONS
The results of the Company for the year ended 31 March 2026 and the financial position of the Company at that date are set out in the financial statements on pages 6 to 38.

The directors do not recommend the payment of any dividend (2025: Nil).

SHARE CAPITAL
There were no movements in the Company's share capital during the year.

DIRECTORS
The directors of the Company during the year and up to the date of this report were as follows:

Pallak SETH
Deepak Kumar SETH
Abhishekh KANOI

In accordance with Article 23 of the Company's Articles of Association, the directors retire and, being eligible, offer themselves for re-election.

DIRECTORS' INTERESTS IN TRANSACTIONS, ARRANGEMENTS OR CONTRACTS

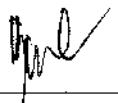
Except the related party transactions as disclosed in note 22 to the financial statements, no other transactions, arrangements or contracts of significance to which the Company's holding companies, subsidiary, or fellow subsidiaries was a party and in which a director of the Company or an entity connected with a director had a material interest, whether directly or indirectly, subsisted during or at the end of the financial year.

DIRECTORS' INTERESTS

At no time during the year was the Company, its holding companies, subsidiary or fellow subsidiaries, a party to any arrangements to enable the directors of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

MANAGEMENT CONTRACTS

The Company did not enter into any contract, other than the contracts of service with the directors or any person engaged in the full-time employment of the Company, by which a person undertakes the management and administration of the whole, or any substantial part of any business of the Company during the year.



PERMITTED INDEMNITY PROVISION

A permitted indemnity provision for the benefit of the directors was in force during the year and up to the date of this report.

AUDITOR

The Company's auditor, Grant Thornton Hong Kong Limited, retire and, being eligible, offer themselves for re-appointment.

On behalf of the Board

Abhishekh KANOI
Director

Independent auditor's report

To the member of Progress Manufacturing Group Limited
(incorporated in Hong Kong with limited liability)

Opinion

We have audited the financial statements of Progress Manufacturing Group Limited (the "Company") set out on pages 6 to 38, which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with HKFRS Accounting Standards as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") that are relevant to these financial statements and have been properly prepared in compliance with the Companies Ordinance.

Basis for opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") as issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information
The directors are responsible for the other information. The other information comprises all the information included in the directors' report of the Company, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements
The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with applicable HKFRS Accounting Standards as issued by the HKICPA that are relevant to these financial statements and the Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with section 405 of the Companies Ordinance and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Cash and cash equivalents at beginning of year	**208,652**	1,805,713
Cash and cash equivalents at end of year	**1,338,519**	208,652

The notes on pages 10 to 38 form part of these financial statements.

Notes to the financial statements for the year ended 31 March 2026

1. GENERAL INFORMATION

Progress Manufacturing Group Limited (the "Company") is a company incorporated in Hong Kong with limited liability. Its registered office and principal place of business are located at 9/F., Surson Commercial Building, 140-142 Austin Road, Tsimshatsui, Kowloon.

The Company's immediate holding company is PDS Manufacturing Limited, which is incorporated in Mauritius, and the ultimate holding company of the Company is PDS Limited, which is incorporated in India and its shares are listed on the Bombay Stock Exchange (Stock Code: 538730) and National Stock Exchange in India (Stock Code: PDSMFL).

The principal activities of the Company is trading of garments and investment holding. Details of the principal activities and other particulars of its subsidiaries are set out in note 11 to the financial statements.

The financial statements for the year ended 31 March 2026 were approved for issue by the board of directors on 18 SEP 2026.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

2.1 Basis of preparation

For the purposes of compliance with section 379 and 380 of the Companies Ordinance, these financial statements have been prepared to present a true and fair view of the financial position and financial performance of the Company only. Consequently, the annual financial statements on pages 6 to 38 have been prepared in accordance with HKFRS Accounting Standards which term collectively includes Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the requirements of the Companies Ordinance that are relevant to the preparation of company level financial statements by an intermediate parent company.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (Continued)

As the Company is a holding company that is a partially owned subsidiary of another body corporate at the end of the reporting period and has satisfied the exemption criteria set out in section 379(3)(c) of the Companies Ordinance (Cap 622), it is not required to prepare consolidated financial statements.

Given the above, these financial statements are not prepared for the purposes of compliance with HKFRS 10 "Consolidated Financial Statements", so far as the preparation of consolidated financial statements is concerned. As a consequence, the financial statements do not give all the information required by HKFRS 10 about the economic activities of the group of which the Company is the holding company. Furthermore, as these financial statements are prepared in respect of the Company only, disclosure required by HKFRS 12 "Disclosures of Interests in Other Entities" have not been made.

In preparing the financial statements, the directors of the Company have given consideration to the future liquidity of the Company in light of the Company had net current liabilities of HK$62,901,626. This condition indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business. Notwithstanding this condition, the going concern basis has been adopted because the intermediate holding company has agreed to provide adequate funds for the Company to meet its liabilities as they fall due.

The material accounting policies that have been used in the preparation of these financial statements are summarised below. These policies have been consistently applied to all the years presented unless otherwise stated. The adoption of new or amended HKFRS Accounting Standards and the impacts on the Company's financial statements, if any, are disclosed in note 3.

The financial statements have been prepared under the historical cost basis. The measurement bases are fully described in the accounting policies below.

It should be noted that accounting estimates and assumptions are used in preparation of the financial statements. Although these estimates are based on management's best knowledge and judgment of current events and actions, actual results may ultimately differ from those estimates. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.2 Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. Purchased software that is integral to the functionally of the related equipment is capitalised as part of that equipment.

Plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. Purchased software that is integral to the functionally of the related equipment is capitalised as part of that equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other costs, such as repairs and maintenance are charged to the profit or loss during the financial year in which they are incurred.

Depreciation of property, plant and equipment is provided to write off the cost less their residual values over their estimated useful lives, using the straight-line method, at the following rates per annum:

Computer equipment	33%

The assets' residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

The gain or loss arising on retirement or disposal is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.3 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all of its risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with HKFRS 15, all financial assets are initially measured at fair value, in case of a financial asset not at fair value through profit or loss ("FVTPL"), plus transaction costs that are directly attributable to the acquisition of the financial asset.

Financial assets, other than those designated and effective as hedging instruments, are classified into the amortised cost.

The classification is determined by both:

- the entity's business model for managing the financial asset; and

- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, other income or other financial items, except for expected credit losses ("ECL") of trade receivables which is presented in other operating expenses.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.3 Financial instruments (Continued)

Subsequent measurement of financial assets

Debt investments

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as fair value through profit or loss):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows; and

- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method. Interest income from these financial assets is included in profit or loss. Discounting is omitted where the effect of discounting is immaterial. The Company's trade and other receivables, cash and bank balances and amounts due from a subsidiary, fellow subsidiaries and intermediate holding company fall into this category of financial instruments.

Classification and measurement of financial liabilities

The Company's financial liabilities include trade and other payables, amounts due to fellow subsidiaries and immediate holding company and secured borrowings.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Company designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method.

Trade and other payables and amounts due to fellow subsidiaries and immediate holding company

Trade and other payables and amounts due to fellow subsidiaries and immediate holding company are recognised initially at fair values and subsequently measured at amortised costs, using the effective interest method.

Secured borrowings

Secured borrowings are recognised initially at fair values, net of transaction costs incurred. Secured borrowings are subsequently stated at amortised costs. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Secured borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liabilities for at least twelve months after the reporting date.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.4 Impairment of financial assets

HKFRS 9's impairment requirements use more forward-looking information to recognise ECL – the "ECL model". Instruments within the scope included loans and other debt-type financial assets measured at amortised cost and trade receivables.

The Company considers a broader range of information when assessing credit risk and measuring ECL, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ("Stage 1") and

- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ("Stage 2").

"Stage 3" would cover financial assets that have objective evidence of impairment at the reporting date.

"12-month ECL" are recognised for the Stage 1 category while "lifetime ECL" are recognised for the Stage 2 category.

Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Trade receivables

For trade receivables, the Company applies a simplified approach in calculating ECL and recognises a loss allowance based on lifetime ECL at each reporting date. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial assets. In calculating the ECL, the Company has established a provision matrix that is based on its historical credit loss experience and external indicators, adjusted for forward-looking factors specific to the debtors and the economic environment.

To measure the ECL, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.4 Impairment of financial assets (Continued)

Other financial assets measured at amortised cost

The Company measures the loss allowance for other receivables equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of default occurring since initial recognition.

In assessing whether the credit risk has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial assets at the reporting date with the risk of default occurring on the financial assets at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk;
- existing or forecast adverse changes in regulatory, business, financial, economic conditions, or technological environment of debtor that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations; and
- an actual or expected significant deterioration in the operating results of the debtor.

Irrespective of the outcome of the above assessment, the Company presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Company has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Company assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the end of each reporting period. A debt instrument is determined to have low credit risk if it has a low risk of default, the borrower has strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.4 Impairment of financial assets (Continued)

Other financial assets measured at amortised cost (Continued)

For internal credit risk management, the Company considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Company, in full (without taking into account any collateral held by the Company).

2.5 Inventories

Inventories are carried at the lower of cost and net realisable value. Cost, which comprises all cost of purchase and, where applicable, other costs that have been incurred in bringing the inventories to their present location and condition, and is determined using the FIFO method. Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and applicable selling expenses.

2.6 Cash and cash equivalents

Cash and cash equivalents include cash in hand, other short-term highly liquid investments with original maturities of three months or less.

2.7 Impairment of non-financial assets

Plant and equipment and interest in subsidiaries are subject to impairment test whenever there are indications that the assets' carrying amounts may not be recoverable.

An impairment loss is recognised as an expense immediately for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions, less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of time value of money and the risk specific to the asset.

For the purpose of assessing impairment, where an asset does not generate cash inflows that are largely independent of the cash flows from other assets, the recoverable amount is determined for the smallest group of assets that generate cash inflows independently (i.e. a cash generating unit). As a result, some assets are tested individually for impairment and some are tested at cash generating unit level.

Impairment loss recognised for cash generating unit is allocated to reduce the carrying amounts of the assets in the cash generating unit on pro rata basis. In allocating the impairment loss, the carrying amount of an asset will not be reduced below its fair value less costs of disposal, value in use or zero.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.7 Impairment of non-financial assets (Continued)

An impairment loss is reversed if there has been a favorable change in the estimates used to determine the asset's recoverable amount and only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, if no impairment loss had been recognised in prior years.

2.8 Foreign currency translation

The financial statements are presented in Hong Kong Dollars ("HK$"), which is also the functional currency of the Company.

Foreign currency transactions are translated into the functional currency of the Company using the exchange rates prevailing at the dates of the transactions. At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates ruling at that date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the reporting date retranslation of monetary assets and liabilities are recognised in profit or loss.

2.9 Revenue recognition

Revenue arises mainly from the sales of garments.

To determine whether to recognise revenue, the Company follows a 5-step process:

1. Identifying the contract with a customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations
5. Recognising revenue when/as performance obligation(s) are satisfied

In all cases, the total transaction price for a contract is allocated amongst the various performance obligations based on their relative stand-alone selling prices. The transaction price for a contract excludes any amounts collected on behalf of third parties.

Revenue is recognised either at a point in time or over time, when (or as) the Company satisfies performance obligations by transferring the promised goods or services to its customers.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.9 Revenue recognition (Continued)

Further details of the Company's revenue recognition policies are as follows:

Sales of garment

Revenue from the sale of garment is recognised when (or as) the Company transfers control of the assets to the customer. For stand-alone sales of garment that are neither customised by the Company nor subject to significant integration services, control transfers at the point in time the customer takes undisputed delivery of the goods.

Interest income

Interest income from bank deposit is accrued on a time proportion basis on the principal outstanding and at the rate applicable

2.10 Borrowing costs

Interest and other borrowing costs incurred in connection with the borrowing of funds are recognised as expenses in the period in which they are incurred.

2.11 Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A contingent liability is not recognised but is disclosed in the notes to the financial statements.

2.12 Employee benefits

The Company's contributions to the mandatory provident fund scheme are charged to the statement of profit or loss as incurred.

The Company's employees who have completed the required number of years of service to the Company are eligible for long service payments in the event of the termination of their employment.

A provision is recognised in respect of the probable future long service payments expected to be made. The provision is based on the best estimate of the probable future payments which have been earned by the employees from their service to the Company to the end of reporting period.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.12 Employee benefits (Continued)

Share based payment/Cash-settled share based payments

PDS Limited ("PDS"), the Company's ultimate holding company, has equity-settled share-based remuneration plan for the employees of PDS and its subsidiaries. Where the Company's employees are rewarded using share-based payments, the fair value of the employees' services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions).

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest.

For cash-settled share-based payments, the fair value of the amount payable to the Company's employees is recognised as employee benefits expense with a corresponding increase in liabilities, over the vesting period. The liability is remeasured at each reporting period up to, and including the settlement date, with changes in fair value recognised in other operating expenses.

2.13 Subsidiaries

Subsidiaries are entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has the rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Company has power, only substantive rights (held by the Company and other parties) are considered.

Investment in subsidiaries is carried at cost less any impairment losses unless the subsidiary is held for sale or included in a disposal group. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable at the reporting date. All dividends whether received out of the investee's pre or post-acquisition profits are recognised in the Company's profit or loss.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.14 Accounting for income taxes

Income tax comprises current tax and deferred tax.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, tax authorities relating to the current or prior reporting year, that are unpaid at the reporting date. They are calculated according to the tax rates and tax laws applicable to the periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognised as a component of tax expense in profit or loss.

Deferred tax is calculated using the liability method on temporary differences at the reporting date between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, tax losses available to be carried forward as well as other unused tax credits, to the extent that it is probable that taxable profit, including existing taxable temporary differences, will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are not recognised if the temporary difference arises from initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither taxable nor accounting profit or loss and does not give rise to equal taxable and deductible temporary differences.

Deferred tax liabilities are recognised for taxable temporary differences arising from investment in a subsidiary, except where the Company is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax is calculated, without discounting, at tax rates that are expected to apply in the year the liability is settled or the asset realised, provided they are enacted or substantively enacted at the reporting date.

Changes in deferred tax assets or liabilities are recognised in profit or loss, or in other comprehensive income or directly in equity if they relate to items that are charged or credited to other comprehensive income or directly in equity.

Current tax assets and current tax liabilities are presented in net if, and only if,

(a) the Company has the legally enforceable right to set off the recognised amounts; and

(b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.15 Related parties

For the purpose of these financial statements, a party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and if that party:

(i) has control or joint control over the Company;

(ii) has significant influence over the Company; or

(iii) is a member of the key management personnel of the Company or of a parent of the Company.

(b) the party is an entity and if any of the following conditions applies:

(i) the entity and the Company are members of the same group;

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) the entity and the Company are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company;

(vi) the entity is controlled or jointly controlled by a person identified in (a);

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or

(viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

3. NEW AND AMENDED HKFRS ACCOUNTING STANDARDS

3.1 Amended HKFRS Accounting Standards that are effective for annual periods beginning on 1 April 2025

In the current year, the Company has applied for the first time the Amendments to HKAS 21 "Lack of Exchangeability" which are effective for the Company's financial statements for the period beginning on 1 April 2025.

The amendments do not have a material impact on the financial statements of the Company.

3.2 Issued but not yet effective HKFRS Accounting Standards

At the date of authorisation of these financial statements, certain new and amended HKFRS Accounting Standards as set out below have been published but are not yet effective, and have not been adopted early by the Company.

HKFRS 18	Presentation and Disclosure in Financial Statements[2]
HKFRS 19	Subsidiaries without Public Accountability: Disclosures and related amendments[2]
Amendments to HKFRS 9 and HKFRS 7	Amendments to the Classification and Measurement of Financial Instruments[1]
Amendments to HKFRS 9 and HKFRS 7	Contracts Referencing Nature-dependent Electricity[1]
Amendments to HKFRS 10 and HKAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture[3]
Amendments to HKAS 21	Translation to a Hyperinflationary Presentation Currency[2]
Amendments to HKFRS Accounting Standards	Annual Improvements to HKFRS Accounting Standards – Volume 11[1]
Amendments to Hong Kong Interpretation 5	Presentation of Financial Statements – Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause[2]

[1] Effective for annual periods beginning on or after 1 April 2026
[2] Effective for annual periods beginning on or after 1 April 2027
[3] Effective date not yet determined

The directors anticipate that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement and are not expected to have a material impact on the Company's financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4.1 Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Provision for expected credit loss on trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

Depreciation on plant and equipment

Depreciation on the Company's plant and equipment is calculated using the straight-line method to allocate cost up to residual values over the estimated useful lives of the assets. Management reviews the useful lives and residual values periodically to ensure that the method and rate of depreciation are consistent with the expected pattern of realisation of economic benefits rates of depreciation are consistent with the expected pattern of realisation of economic benefits from plant and equipment. The accounting estimate of the useful lives of plant and equipment is based on historical experience, taking into account anticipated technological changes.

4.2 Critical accounting judgements

Revenue from contracts with customers

The Company assesses its revenue arrangements against specific criteria, i.e. whether it has exposure to the significant risks and rewards associated with the sale of goods and rendering of services, in order to determine if it is acting as a principal or as an agent. The Company has concluded that it is operating on a principal to principal basis in all its revenue arrangements.

The Company applies judgement to determine whether each product or service promised to a customer are capable of being distinct, and are distinct in the context of contract, if not the promised services are combined and accounted as a single performance obligation.

For performance obligation where control is transferred over time, revenues are recognised by measuring progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgement and is based on the nature of the promised service to be rendered.

5. REVENUE

Revenue represents the fair value of the consideration received and receivables for sales of goods during the year, net of rebates and discounts.

6. OTHER REVENUE

	2026 HK$	2025 HK$
Bank interest income	**831**	2,007

7. FINANCE COSTS

	2026 HK$	2025 HK$
Interest on borrowings	**788,324**	977,900
Interest to immediate holding company	**233,400**	163,700
Commission and bank finance charges	**471,506**	262,607
	1,493,230	1,404,207

8. PROFIT/(LOSS) BEFORE INCOME TAX

Profit/(Loss) before income tax is stated after charging/(crediting):

	2026 HK$	2025 HK$
Auditors' remuneration	**79,000**	85,500
Cost of inventories recognised as an expense	**182,073,349**	190,568,939
Depreciation	**286,019**	342,286
Exchange losses, net	**902**	39,574
Staff costs (including directors' remuneration)		
- Share based payment expenses	**428,681**	805,046

9. INCOME TAX EXPENSES

No Hong Kong profits tax has been provided in these financial statements as the income of the Company neither arises in nor is derived from Hong Kong (2025: Nil). In the opinion of the directors, the Company was not subject to any taxation in any other jurisdictions that the Company operates.

Reconciliation between tax expense and accounting profit/(loss) at applicable tax rate is as follow:

	2026 HK$	2025 HK$
Profit/(Loss) before income tax	**4,201,577**	(6,714,018)
Tax at the applicable tax rate of 16.5%	**693,260**	(1,107,813)
Tax effect of non-deductible expenses	**32,239,901**	33,792,502
Tax effect of non-taxable income	**(32,933,161)**	(32,684,689)
Income tax expense	-	-

No deferred tax has been recognised in the financial statements on the grounds that the deductible temporary differences of the Company for the current and previous years are negligible in comparison to the Company's overall financial position.

10. DIRECTORS' REMUNERATION

Directors' remuneration disclosed pursuant to section 383(1) of the Companies Ordinance (Cap. 622) and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation are as follows:

	2026 HK$	2025 HK$
Fees	-	-
Retirement scheme contributions	-	-
Other emoluments	-	-
	-	-

11. INTEREST IN A SUBSIDIARY

	2026 HK$	2025 HK$
Unlisted shares, at cost	**234,566,188**	234,566,188

Details of interest in a subsidiary as at reporting date is as follows:

Name of subsidiary	Place of incorporation	Percentage of ownership and voting power		Name of business
		2026	2025	
Progress Apparel (Bangladesh) Limited	Bangladesh	**100%**	100%	Garment trading

12. PLANT AND EQUIPMENT

	Computer equipment HK$
Cost	
At 1 April 2024 and 31 March 2025 and **31 March 2026**	**1,026,960**
Accumulated depreciation	
At 1 April 2024	398,552
Charge for the year	342,286
At 31 March 2025 and 1 April 2026	740,838
Charge for the year	286,019
At 31 March 2026	**1,026,857**
Net carrying amount	
At 31 March 2026	**103**
At 31 March 2025	286,122

13. INVENTORIES

	2026 HK$	2025 HK$
Raw materials	**2,392,463**	1,438,133

14. TRADE AND OTHER RECEIVABLES

	2026 HK$	2025 HK$
Trade receivables	**37,443,965**	33,515,340
Prepayment and advance to vendors	**66,659**	32,247
	37,510,624	33,547,587

Trade receivables are non-interest bearing and are generally on credit terms of 30 to 90 days.

No ECL allowance of trade receivables was recognised during the year (2025: Nil).

The aging analysis of trade receivables (net of impairment loss) that are past due at the reporting date but not individually considered to be impaired is included in the following analysis:

	2026 HK$	2025 HK$
Current	**37,443,965**	30,634,899
Past due		
Less than 30 days	**-**	2,880,441
	37,443,965	33,515,340

As at 31 March 2026, the Company has entered into trade receivables factoring arrangements and transferred trade receivables of HK$3,989,159 (2025: HK$4,141,696) to the bank without recourse. Since the Company has transferred substantially all risks and rewards relating to the trade receivables to the bank and thus the trade receivables are regarded as transferred financial assets that should be derecognised, accordingly the corresponding trade receivables are derecognised in the financial statements.

15. AMOUNTS DUE FROM/TO A SUBSIDIARY/FELLOW SUBSIDIARIES/IMMEDIATE HOLDING COMPANY/INTERMEDIATE HOLDING COMPANY

Except for an amount of HK$233,400,000 (equivalent to US$30,000,000) (2025: HK$233,400,000 (equivalent to US$30,000,000)) included in the amount due to immediate holding company which bears interest at 0.1% per annum, the remaining balances were interest free, unsecured and had no fixed repayment terms as at 31 March 2026 and 31 March 2025.

16. TRADE AND OTHER PAYABLES

	2026 HK$	2025 HK$
Trade payables	**5,174,402**	1,438,128
Other payables	**945,736**	513,570
	6,120,138	1,951,698

17. SECURED BORROWINGS

The carrying amount of the secured borrowings at the end of reporting period is analysed as follows:

	2026 HK$	2025 HK$
Term loans	**3,944,036**	5,186,669
Carrying amount repayable (note):		
- Within one year	**2,215,141**	1,728,887
- In the second year	**1,728,895**	1,728,887
- In the third to fifth year	**-**	1,728,895
Total carrying amount	**3,944,036**	5,186,669
Less:		
- Amount due within one year	**(2,215,141)**	(1,728,887)
Carrying amount shown under non-current liability	**1,728,895**	3,457,782

Notes:

(a) The amounts are based on the scheduled repayment dates set out in the loan agreements.

(b) As at 31 March 2026, the secured borrowings bears interest ranging from SOFR + 1.55% to 3.50% (2025: at SOFR + 3.50%) per annum. Details of the guarantees and securities are as set out in note 24 to the financial statements.

18. SHARE CAPITAL

	2026		2025	
	Number of shares	HK$	Number of shares	HK$
Class "A" ordinary shares with voting right issued and fully paid:				
At 1 April and at 31 March (note a)	**10,000**	**77,800**	10,000	77,800
Class "B" ordinary shares with no voting right issued and fully paid:				
At 1 April and at 31 March (note b)	**100**	**8**	100	8
0.1% cumulative redeemable preference shares issued and fully paid:				
At 1 April	**30,000,000**	**233,400,000**	20,000,000	155,600,000
Issue of share capital	**-**	**-**	10,000,000	77,800,000
At 31 March (note c)	**30,000,000**	**233,400,000**	30,000,000	233,400,000
	30,010,100	**233,477,808**	30,010,100	233,477,808

18. SHARE CAPITAL (CONTINUED)

Notes:

(a) The holders of class "A" ordinary shares with voting right have the sole right to attend and vote at the general meeting of the Company and are not entitled to distribution or dividend out of reserves and surpluses in the Company. Upon winding up of the Company the holders are entitled to participate in any excess of surplus assets or value as at the of winding up of the Company. Upon winding up of the Company, the holders are entitled the right to payment of all capital paid up on such shares.

(b) The holders of class "B" ordinary shares with no voting right have no right to attend the meetings of shareholders and are entitled to receive out of the profit accrued all dividends as declared and paid from time to time. Upon winding up of the Company, the holders are entitled to participate in any excess of surplus assets or value as at the of winding up of the Company. Upon the sale of the Company, the holders are entitled to receive profit on sale in the proportion to its shareholding in the Company after the distribution to the holder of class "A" ordinary shares with voting right of their equity value.

(c) The holder of 0.1% cumulative redeemable preference shares are entitled to receive 0.1% dividends subject to the declaration by the Board of Directors and are not entitled to attend general meetings and bear no voting rights. The Company has option for redeeming the 0.1% cumulative redeemable preference shares anytime within the period of seven years from the date of issuance of the shares. Upon winding up of the Company, the holders are entitled the right to payment of all capital paid up on such shares in priority before the holders of the ordinary shares but shall not be entitled to participate in any surplus assets of the Company.

19. CAPITAL MANAGEMENT

The Company's objectives when managing capital are:

(i) To safeguard the Company's ability to continue as a going concern, so that it continues to provide returns for shareholders and benefits for other stakeholders;

(ii) To support the Company's stability and growth; and

(iii) To provide capital for the purpose of strengthening the Company's risk management capability.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. The Company actively and regularly reviews and manages its capital structure to ensure optimal capital structure and shareholder returns, taking into consideration the future capital requirements of the Company. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. No changes in the objectives, policies or processes for managing capital were made during the years ended 31 March 2026 and 31 March 2025.

20. SHARE BASE PAYMENTS

As at 31 March 2026, PDS has the following share-based payments arrangements:

(i) **Equity-settled share option scheme**

On 3 April 2021, PDS established the PDS – Employee Stock Option Plan 2021 – Plan A ("Plan A") which entitles key managerial personnel and senior employees to purchase shares of the Company. The plan is designed to provide incentives to the employees of the PDS and its subsidiaries to deliver long-term returns. As at 31 March 2026, PDS has 41,299 (2025: 41,299) outstanding equity settled stock options under this plan to the Company's employees. Vesting of the options would be subject to continuous employment with PDS and its subsidiaries and hence the options would vest with passage of time. In addition to this, the nomination and remuneration committee of PDS may also specify certain performance parameters subject to which the options would vest. The options vest after 4 years from the date of grant and then exercisable within 4 years. Options granted under the plan are for no consideration and carry no dividend or voting rights. On exercise, each option is convertible into one equity share of PDS. The key terms and conditions related to the grants under these plans are as follows; all options are to be settled by the delivery of shares.

20. SHARE BASE PAYMENTS (CONTINUED)

(i) Equity-settled share option scheme (Continued)

Movements of share options under Plan A to employees of the Company during the year are as follows:

Date of grant - 22 October 2021	2026 Weighted average exercise price HK$	2026 Number of share options	2025 Weighted average exercise price HK$	2025 Number of share options
Outstanding at 1 April	**22.78**	**30,674**	22.78	38,550
Exercised during the year	**-**	**-**	22.78	(7,876)
Outstanding at 31 March	**22.78**	**30,674**	22.78	30,674
Exercisable at 31 March	**22.78**	**30,674**	22.78	18,487
Date of grant - 7 February 2022				
Outstanding at 1 April	**28.17**	**10,625**	28.17	21,250
Exercised during the year	**-**	**-**	28.17	(10,625)
Outstanding at 31 March	**28.17**	**10,625**	28.17	10,625
Exercisable at 31 March	**28.17**	**10,625**	28.17	5,313

During the year ended 31 March 2026, the Company has charged HK$428,681 (2025: HK$805,046) to the statement of profit or loss in respect of options granted under Plan A.

(ii) As at 31 March 2026 and 2025, share based payment reserve recognised in the statement of financial position in respect of the above plans is as follows:

	2026 HK$	2025 HK$
Share based payment reserve	**999,277**	570,596

21. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS

The Company is exposed to financial risks through its use of financial instruments in its ordinary course of operations and in its investment activities. The financial risks include credit risk, foreign currency risk, liquidity risk and interest rate risk.

Policies for managing these risks are set by the Company's board of directors. The overall objectives in managing financial risks focus on securing the Company's short to medium term cash flows by minimising its exposure to financial markets. Long term financial investments are managed to generate lasting returns with acceptable risk levels.

It is not the Company's policy to actively engage in the trading of financial instruments for speculative purposes.

21.1 Categories of financial assets and liabilities

The carrying amounts presented in the statement of financial position relate to the following categories of financial assets and financial liabilities.

	2026 HK$	2025 HK$
Financial assets		
Financial assets measured at amortised cost		
Trade and other receivables	**37,443,965**	33,515,340
Amount due from a subsidiary	**2,793,363**	-
Amounts due from fellow subsidiaries	**54,940**	847,666
Amount due from intermediate holding company	**19,510,155**	-
Cash and cash equivalents	**1,338,519**	208,652
	61,140,942	34,571,658
Financial liabilities		
Financial liabilities measured at amortised cost		
Trade and other payables	**6,120,138**	1,951,698
Amount due to a subsidiary	**-**	12,923,478
Amounts due to fellow subsidiaries	**116,353,622**	85,090,936
Amount due to immediate holding company	**1,812,789**	436,055
Secured borrowings	**3,944,036**	5,186,669
	128,230,585	105,588,836

21. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

21.2 Credit risk

Credit risk refers to the risk that the counterparty to a financial instrument would fail to discharge its obligation under the terms of the financial instrument and cause a financial loss to the Company. The Company's exposure to credit risk mainly arises from granting credit to customers in the ordinary course of its operations and from its investing activities.

The Company's maximum exposure to credit risk on recognised financial assets is limited to the carrying amount at the reporting date as summarised in note 21.1.

The Company manages its credit risk associated with exposure to the customers on outstanding trade receivables through the application of credit approvals, credit ratings and other monitoring procedures.

Trade receivables are non-interest bearing and are generally credit term of 30 to 90 days.

The Company applies the simplified model of recognising lifetime expected credit losses for all trade receivables as these items do not have a significant financing component. At each reporting dates, the Company applies a simplified approach in calculating ECL and recognises a loss allowance based on lifetime ECL. In addition, the Company assesses ECL under HKFRS 9 on trade receivables based on provision matrix, the expected loss rates are based on the historical credit losses. The historical rates are adjusted to reflect current and forward looking macroeconomic factors affecting the customer's ability to settle the amount outstanding. At each reporting date, the historical default rates are updated and changes in the forward-looking estimates are analysed. However, given the short period exposed to credit risk, the impact of these macroeconomic factors has not been considered significant within the reporting period.

In respect of other financial assets, including other receivables and amounts due from related parties, the management measures the loss allowance for other receivables equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of default occurring since initial recognition. In assessing whether the credit risk has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial assets at the reporting date with the risk of default occurring on the financial assets at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

21. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

21.3 Foreign currency risk

Foreign currency risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company operates internationally and is primarily exposed to foreign exchange risk arising from currency exposures of the United States dollars United States dollars ("USD"), Euro ("EUR"), British Pound ("GBP") and Chinese Yuan ("RMB"), with respect to the Hong Kong dollar. The Company will monitor its foreign currency exposure closely and will consider hedging significant foreign currency exposure should the need arise.

Foreign currency denominated financial assets and liabilities, translated into HKD at the closing rates, are as follows:

	EUR	US$	GBP	RMB	Total
At 31 March 2026					
Trade and other receivables	-	**37,443,965**	-	-	**37,443,965**
Amount due from a subsidiary	-	**2,793,363**	-	-	**2,793,363**
Amounts due from fellow subsidiaries	-	**54,940**	-	-	**54,940**
Amount due from intermediate holding company	-	**19,510,155**	-	-	**19,510,155**
Cash and cash equivalents	**2,717**	**1,290,900**	**39,237**	**5,399**	**1,338,253**
Amounts due to fellow subsidiaries	-	**(116,353,622)**	-	-	**(116,353,622)**
Amount due to immediate holding company	-	**(1,812,789)**	-	-	**(1,812,789)**
Secured borrowings	-	**(3,944,036)**	-	-	**(3,944,036)**
Overall net exposure	**2,717**	**(61,017,124)**	**39,237**	**5,399**	**(60,969,771)**
At 31 March 2025					
Trade and other receivables	-	33,515,340	-	-	33,515,340
Amounts due from fellow subsidiaries	-	847,666	-	-	847,666
Cash and cash equivalents	2,717	157,721	42,449	5,393	208,280
Amount due to a subsidiary	-	(12,923,478)	-	-	(12,923,478)
Amounts due to fellow subsidiaries	-	(85,090,936)	-	-	(85,090,936)
Amount due to immediate holding company	-	(436,055)	-	-	(436,055)
Secured borrowings	-	(5,186,669)	-	-	(5,186,669)
Overall net exposure	2,717	(69,116,411)	42,449	5,393	(69,065,852)

The following table indicates the approximate change in the Company's profit after tax in response to reasonably possible changes (e.g. ±10%) in the foreign exchange rates to which the Company has significant exposure at the end of reporting period.

	2026		2025	
	Increase HK$	**Decrease HK$**	Increase HK$	Decrease HK$
EUR	**272**	**(272)**	272	(272)
GBP	**3,924**	**(3,924)**	4,245	(4,245)
RMB	**540**	**(540)**	539	(539)
	4,736	**(4,736)**	5,056	(5,056)

21. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

21.3 Foreign currency risk (Continued)

The stated changes represent management's assessment of reasonably possible change in foreign exchange rates over the period until the end of next annual reporting period. In this respect, it is assumed that the pegged rate between the Hong Kong dollar and the United States dollar would be materially unaffected by any change in movement in value of the United States dollar against other currencies.

21.4 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash. Due to the dynamic nature of the underlying businesses, the Company aims to maintain flexibility in funding by keeping committed credit lines available.

The following table summarises the remaining contractual maturities at the reporting date of the Company's financial liabilities, which are based on undiscounted cash flows:

	Within one year HK$	In the second year HK$	In the third to fifth year HK$	Total undiscounted amount HK$	Carrying amount HK$
2026					
Trade and other payables	**6,120,138**	**-**	**-**	**6,120,138**	**6,120,138**
Amounts due to fellow subsidiaries	**116,353,622**	**-**	**-**	**116,353,622**	**116,353,622**
Amount due to immediate holding company	**1,812,789**	**-**	**-**	**1,812,789**	**1,812,789**
Secured borrowings	**2,249,465**	**1,734,912**	**-**	**3,984,377**	**3,944,036**
	126,536,014	**1,734,912**	**-**	**128,270,926**	**128,230,585**
2025					
Trade and other payables	1,951,698	-	-	1,951,698	1,951,698
Amount due to subsidiary	12,923,478	-	-	12,923,478	12,923,478
Amounts due to fellow subsidiaries	85,090,936	-	-	85,090,936	85,090,936
Amount due to immediate holding company	436,055	-	-	436,055	436,055
Secured borrowings	1,864,856	1,728,887	1,728,895	5,322,638	5,186,669
	102,267,023	1,728,887	1,728,895	105,724,805	105,588,836

21. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

21.5 Interest rate risk

Interest rate risk relates to the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company's interest rate risk arises primarily from borrowings bears variable rates as set out in note 17.

If the interest rates had been 100 basis points higher/lower and all other variables were held constant, the Company's post-tax profit/loss for the year ended 31 March 2026 would increase/decrease by approximately HK$39,000 (2025: HK$52,000).

financial instruments outstanding at the end of reporting period were outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

22. RELATED PARTY TRANSACTIONS

During normal course of business, the Company had the following material transactions with its related parties as set out below.

Name of company	Relationship	Nature of transactions	2026 HK$	2025 HK$
Progress Apparels (Bangladesh) Limited	Subsidiary	- Purchases	**193,310,579**	190,778,353
GoodEarth Lifestyle Limited	Fellow subsidiary	- Outsourcing fee	**1,797,343**	-
		- Product sample expenses	**2,402,659**	-
PDS Manufacturing Limited	Immediate holding company	- Interest expenses	**233,400**	163,700
PDS Sourcing Limited	Fellow subsidiary	- Consultancy income	**-**	305,423
		- Administration expenses	**-**	707
Multinational Textile Group Limited	Intermediate holding company	- Corporate charges	**3,808,621**	3,808,575
		- SAP expenses	**447,350**	466,800
		- Outsourcing income	**17,116,000**	-
		- Product sample income	**2,402,659**	-

In addition, during the year, the Company paid recharging expenses to group entities amounted to HK$1,744,797 (2025: HK$824,973).

23. RECONCILIATION OF LIABILITIES ARISING FROM FINANCING ACTIVITIES

The changes in the Company's liabilities arising from financing activities were as follows:

	Secured borrowings HK$
As at 1 April 2024	6,915,556
Cash flows	
Net repayments to bank borrowings	(1,728,887)
Payment of interests	(690,617)
Non-cash changes	
Interest charges	690,617
As at 31 March 2025 and 1 April 2025	5,186,669
Cash flows	
Net repayments to bank borrowings	(1,242,633)
Payment of interests	(562,745)
Non-cash changes	
Interest charges	562,745
As at 31 March 2026	**3,944,036**

24. BANKING AND OTHER FACILITIES

(a) Baking facilities

General banking facilities granted by bank were secured by ultimate holding and intermediate holding companies' corporate guarantee, directors' personal guarantee and fellow subsidiaries' corporate guarantee, fellow subsidiaries' life insurance policy, fellow subsidiaries' properties and fellow subsidiaries' charges over securities and deposits.

(b) Other facility

Other facility granted by a financial entity was secured by ultimate holding and intermediate holding companies' corporate guarantee, directors' personal guarantee and fellow subsidiaries' corporate guarantee, fellow subsidiaries' life insurance policy, fellow subsidiaries' properties and fellow subsidiaries' charges over securities and deposits.

25. CONTINGENT LIABILITIES

The Company had the following contingent liabilities not provided for in the consolidated financial statements at the end of reporting period:

	2026 HK$	2025 HK$
Irrevocable letters of credit	**61,235**	411,103

Company registration number 13838992 (England and Wales)

WONDERWALL (F.E) LTD

DIRECTOR'S REPORT

FOR THE YEAR ENDED 31 MARCH 2026

The director presents his annual report and financial statements for the year ended 31 March 2026.

Principal activities
The principal activity of the company was that of the sourcing of garments on behalf of the parent and other group companies.

Results and dividends
The results for the year are set out on page 7.

No ordinary dividends were paid. The director does not recommend payment of a final dividend.

Director
The director who held office during the year and up to the date of signature of the financial statements was as follows:

Mr D Harari

Auditor
The auditor, UHY Hacker Young, is deemed to be reappointed under section 487(2) of the Companies Act 2006.

Statement of director's responsibilities
The director is responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

United Kingdom company law requires the director to prepare financial statements for each financial year. Under that law, the director has elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law, the director must not approve the financial statements unless he is satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the director is required to:
- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The director is responsible for keeping adequate accounting records that are sufficient to show and explain the company’s transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. He is also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of disclosure to auditor

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information of which the company's auditor is unaware. Additionally, the directors individually have taken all the necessary steps that they ought to have taken as directors in order to make themselves aware of all relevant audit information and to establish that the company's auditor is aware of that information.

Small companies exemption

This report has been prepared in accordance with the provisions applicable to companies entitled to the small companies exemption.

On behalf of the board

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF WONDERWALL (F.E) LTD

Opinion

We have audited the financial statements of Wonderwall (F.E) Ltd (the 'company') for the year ended 31 March 2026 which comprise the income statement, the statement of financial position, the statement of changes in equity and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 Reduced Disclosure Framework (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2026 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the director with respect to going concern are described in the relevant sections of this report.

UHY Hacker Young

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The director is responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of our audit:

- the information given in the director's report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the director's report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the director's report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of director's remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- the director was not entitled to take advantage of the small companies exemption from the requirement to prepare a strategic report.

Responsibilities of director

As explained more fully in the director's responsibilities statement, the director is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the director determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the director is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the director either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and the industry in which it operates, we identified that the principal risks of non-compliance with laws and regulations related to the acts by the Company, which were contrary to applicable laws and regulations including fraud, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2006. We evaluated management’s incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined the principal risks were related to income / loss.

Audit procedures performed included: review of the financial statement disclosures to underlying supporting documentation, enquiries of management and testing of journals and evaluating whether there was evidence of bias by the Directors that represented a risk of material misstatement due to fraud.

There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities is available on the Financial Reporting Council's website at: https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company’s members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

1 Accounting policies

Company information

Wonderwall (F.E) Ltd is a private company limited by shares incorporated in England and Wales. The registered office is Suite 4B, Northspring, 70 Spring Gardens, United Kingdom, M2 2BQ. The company's principal activities and nature of its operations are disclosed in the director's report.

1.1 Basis of preparation

The financial statements have been prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101) and in accordance with applicable accounting standards.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

As permitted by FRS 101, the company has taken advantage of the following disclosure exemptions from the requirements of IFRS:

- presentation of a statement of cash flows and related notes;
- disclosure of the objectives, policies and processes for managing capital;
- disclosure of key management personnel compensation;
- disclosure of the categories of financial instrument and the nature and extent of risks arising on these financial instruments;
- the effect of financial instruments on the statement of comprehensive income;
- related party disclosures for transactions with the parent or wholly owned members of the group;
- disclosure of the future impact of new International Financial Reporting Standards in issue but not yet effective at the reporting date;

Where required, equivalent disclosures are given in the group accounts of Simple Approach Limited. The group accounts of Simple Approach Limited are available to the public and can be obtained as set out in note 15.

1.2 Going concern

The financial statements have been prepared on a going concern basis, notwithstanding that at the balance sheet date, the company's current liabilities exceeded its current assets by £741,709 (2025: £638,061) and it had net liabilities of £709,210 (2025: £631,433).

In view of this uncertainty the directors have obtained confirmation of continued financial support from the parent company who will not seek repayment of the amounts owed until such time as the company is able to repays its debts. By taking this and future plans in consideration, the directors consider the going concern basis to be appropriate because the company will continue to obtain sufficient funding from within the group to enable it to repay its debts as they fall due for the next 15 months.

RSign Envelope ID: ENV59426254-6952-FEFF-1747-FFBA 15/05/2026 08:12 AM UTC

1 Accounting policies **(Continued)**

1.3 Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Leasehold land and buildings	Over the term of lease
Fixtures and fittings	3 years straight line
Computers	3 years straight line

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in the income statement.

1.4 Impairment of tangible and intangible assets

At each reporting end date, the company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

1.5 Cash and cash equivalents

Cash and cash equivalents include cash in hand and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

RSign Envelope ID: ENV59426254-6952-FEFF-1747-FFBA 15/05/2026 08:12 AM UTC

1 Accounting policies **(Continued)**

1.6 Financial assets

Financial assets are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument. Financial assets are classified into specified categories, depending on the nature and purpose of the financial assets.

At initial recognition, financial assets classified as fair value through profit and loss are measured at fair value and any transaction costs are recognised in profit or loss. Financial assets not classified as fair value through profit and loss are initially measured at fair value plus transaction costs.

Financial assets at fair value through profit or loss

When any of the above-mentioned conditions for classification of financial assets is not met, a financial asset is classified as measured at fair value through profit or loss. Financial assets measured at fair value through profit or loss are recognized initially at fair value and any transaction costs are recognised in profit or loss when incurred. A gain or loss on a financial asset measured at fair value through profit or loss is recognised in profit or loss, and is included within finance income or finance costs in the statement of income for the reporting period in which it arises.

Financial assets held at amortised cost

Financial instruments are classified as financial assets measured at amortised cost where the objective is to hold these assets in order to collect contractual cash flows, and the contractual cash flows are solely payments of principal and interest. They arise principally from the provision of goods and services to customers (eg trade receivables). They are initially recognised at fair value plus transaction costs directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment where necessary.

Financial assets at fair value through other comprehensive income

Debt instruments are classified as financial assets measured at fair value through other comprehensive income where the financial assets are held within the company’s business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument measured at fair value through other comprehensive income is recognised initially at fair value plus transaction costs directly attributable to the asset. After initial recognition, each asset is measured at fair value, with changes in fair value included in other comprehensive income. Accumulated gains or losses recognised through other comprehensive income are directly transferred to profit or loss when the debt instrument is derecognised.

The company has made an irrevocable election to recognize changes in fair value of investments in equity instruments through other comprehensive income, not through profit or loss. A gain or loss from fair value changes will be shown in other comprehensive income and will not be reclassified subsequently to profit or loss. Equity instruments measured at fair value through other comprehensive income are recognized initially at fair value plus transaction cost directly attributable to the asset. After initial recognition, each asset is measured at fair value, with changes in fair value included in other comprehensive income. Accumulated gains or losses recognized through other comprehensive income are directly transferred to retained earnings when the equity instrument is derecognized or its fair value substantially decreased. Dividends are recognized as finance income in profit or loss.

1 Accounting policies **(Continued)**

Impairment of financial assets
Financial assets carried at amortised cost and FVOCI are assessed for indicators of impairment at each reporting end date.

The expected credit losses associated with these assets are estimated on a forward-looking basis. A broad range of information is considered when assessing credit risk and measuring expected credit losses, including past events, current conditions, and reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

Derecognition of financial assets
Financial assets are derecognised only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership to another entity.

1.7 Financial liabilities
The company recognises financial debt when the company becomes a party to the contractual provisions of the instruments. Financial liabilities are classified as either 'financial liabilities at fair value through profit or loss' or 'other financial liabilities'.

Other financial liabilities
Other financial liabilities, including borrowings, trade payables and other short-term monetary liabilities, are initially measured at fair value net of transaction costs directly attributable to the issuance of the financial liability. They are subsequently measured at amortised cost using the effective interest method. For the purposes of each financial liability, interest expense includes initial transaction costs and any premium payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

Derecognition of financial liabilities
Financial liabilities are derecognised when, and only when, the company's obligations are discharged, cancelled, or they expire.

1.8 Equity instruments
Equity instruments issued by the company are recorded at the proceeds received, net of direct issue costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

1.9 Employee benefits
The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of inventories or non-current assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

RSign Envelope ID: ENV59426254-6952-FEFF-1747-FFBA 15/05/2026 08:12 AM UTC

1 Accounting policies **(Continued)**

1.10 Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due.

1.11 Leases

As lessee

At inception, the company assesses whether a contract is, or contains, a lease within the scope of IFRS 16. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Where a tangible asset is acquired through a lease, the company recognises a right-of-use asset and a lease liability at the lease commencement date. Right-of-use assets are included within property, plant and equipment, apart from those that meet the definition of investment property.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for lease payments made at or before the commencement date plus any initial direct costs and an estimate of the cost of obligations to dismantle, remove, refurbish or restore the underlying asset and the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently adjusted for remeasurements of the lease liability and applies the relevant cost model, fair value model or revaluation model as set out within the accounting policies for the applicable asset class. Where the cost model is applied, the asset is depreciated from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term, and is periodically reduced by impairment losses, if any.

The lease liability is initially measured at the present value of the lease payments that are unpaid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee, and the cost of any options that the company is reasonably certain to exercise, such as the exercise price under a purchase option, lease payments in an optional renewal period, or penalties for early termination of a lease.

The lease liability is measured at amortised cost using the effective interest method. It is reassessed at each financial period end to reflect lease modifications and any changes to the factors considered at initial measurement, as set out above. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less, or for leases of low-value assets including IT equipment. The payments associated with these leases are recognised in profit or loss on a straight-line basis over the lease term.

RSign Envelope ID: ENV59426254-6952-FEFF-1747-FFBA 15/05/2026 08:12 AM UTC

2 Critical accounting estimates and judgements

In the application of the company's accounting policies, the director is required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The estimates and assumptions which have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are outlined below.

Critical judgements

Valuation of lease liability & right-of-use asset

The application of IFRS 16 requires the company to make judgements that affect the valuation of the lease liability and the right-of-use asset. These include determining the interest rate used for discounting of future cashflows. The present value of the lease payment is determined using the discount rate representing the company's incremental borrowing rate.

3 Operating loss

Operating loss for the year is stated after charging/(crediting):	2026 £	2025 £
Exchange (gains)/losses	(203)	12,130
Depreciation of property, plant and equipment	41,605	3,693

4 Employees

Directors' report for the year ended 31 March 2026

The directors present their report and the audited financial statements of GoodEarth Lifestyle Limited (the "Company") for the year ended 31 March 2026.

PRINCIPAL ACTIVITY AND BUSINESS REVIEW

The principal activity of the Company is garment trading. There were no significant changes in the nature of the Company's principal activities during the year.

No business review is presented as the Company has been able to claim an exemption under section 388(3) of the Companies Ordinance (Cap. 622) since it falls under the "reporting exemption" in accordance with section 359, as at the reporting date.

RESULTS AND APPROPRIATIONS

The results of the Company for the year ended 31 March 2026 and the financial position of the Company at that date are set out in the financial statements on pages 6 to 34.

SHARE CAPITAL

Details of the movements in the share capital of the Company during the year are set out in note 17 to the financial statements.

DIRECTORS

The directors of the Company during the year and up to the date of this report were as follows:

Deepak Kumar SETH
Abhishekh KANOI

In accordance with article 22 of the Company's articles of association, the directors retire and, being eligible, offer themselves for re-election.

DIRECTORS' INTERESTS IN TRANSACTIONS, ARRANGEMENTS OR CONTRACTS

Except the related party transactions as disclosed in note 21 to the financial statements, no other transactions, arrangements or contracts of significance to which the Company's holding companies, subsidiary, or fellow subsidiaries was a party and in which a director of the Company or an entity connected with a director had a material interest, whether directly or indirectly, subsisted during or at the end of the financial year.

DIRECTORS' INTERESTS

At no time during the year was the Company, its holding companies, subsidiary or fellow subsidiaries, a party to any arrangements to enable the directors of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

MANAGEMENT CONTRACTS

The Company did not enter into any contract, other than the contracts of service with the directors or any person engaged in the full-time employment of the Company, by which a person undertakes the management and administration of the whole, or any substantial part of any business of the Company during the year.

PERMITTED INDEMNITY PROVISION

A permitted indemnity provision for the benefit of the directors was in force during the year and up to the date of this report.

AUDITOR

The Company's auditor, Grant Thornton Hong Kong Limited, retire and, being eligible, offer themselves for re-appointment.

On behalf of the Board

Independent auditor's report

To the member of GoodEarth Lifestyle Limited
(incorporated in Hong Kong with limited liability)

Opinion

We have audited the financial statements of GoodEarth Lifestyle Limited (the "Company") set out on pages 6 to 34, which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with HKFRS Accounting Standards as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") that are relevant to these financial statements and have been properly prepared in compliance with the Companies Ordinance.

Basis for opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") as issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information
The directors are responsible for the other information. The other information comprises all the information included in the directors' report of the Company, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements
The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA that are relevant to these financial statements and the Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with section 405 of the Companies Ordinance and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the financial statements for the year ended 31 March 2026

1. GENERAL INFORMATION

GoodEarth Lifestyle Limited (the "Company") is a company incorporated in Hong Kong with limited liability. Its registered office and principal place of business are located at 9/F., Surson Commercial Building, 140-142 Austin Road, Tsimshatsui, Kowloon.

The Company's immediate holding company is PDS Manufacturing Limited, which is incorporated in Mauritius, and the ultimate holding company of the Company is PDS Limited, which is incorporated in India and its shares are listed on the Bombay Stock Exchange (Stock Code: 538730) and National Stock Exchange in India (Stock Code: PDSMFL).

The principal activities of the Company is trading of garments and investment holding. Details of the principal activities and other particulars of its subsidiary are set out in note 11 to the financial statements.

The financial statements for the year ended 31 March 2026 were approved for issue by the board of directors on 09 SEP 2026

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

2.1 Basis of preparation

For the purposes of compliance with section 379 and 380 of the Companies Ordinance, these financial statements have been prepared to present a true and fair view of the financial position and financial performance of the Company only. Consequently, they have been prepared in accordance with Hong Kong Financial Reporting Standards as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), which collective term includes all applicable individual HKFRS accounting standards, Hong Kong Accounting Standards and Interpretations ("HKFRS Accounting Standards") and accounting principles generally accepted in Hong Kong and the requirements of the Companies Ordinance that are relevant to the preparation of company level financial statements by an intermediate parent company.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (Continued)

As the Company is a holding company that is a partially owned subsidiary of another body corporate at the end of the reporting period and has satisfied the exemption criteria set out in section 379(3)(c) of the Companies Ordinance (Cap 622), it is not required to prepare consolidated financial statements.

Given the above, these financial statements are not prepared for the purposes of compliance with HKFRS 10 "Consolidated Financial Statements", so far as the preparation of consolidated financial statements is concerned. As a consequence, the financial statements do not give all the information required by HKFRS 10 about the economic activities of the group of which the Company is the holding company. Furthermore, as these financial statements are prepared in respect of the Company only, disclosure required by HKFRS 12 "Disclosures of Interests in Other Entities" have not been made.

The Company has incurred a loss of HK$1,757,725 for the year ended 31 March 2026 and, as of that date, the Company had a net current liabilities of HK$81,628,513. Notwithstanding these conditions, the going concern basis has been adopted because the shareholder has agreed to provide adequate funds for the Company to meet its liabilities as they fall due.

The material accounting policies that have been used in the preparation of these financial statements are summarised below. These policies have been consistently applied to all the years presented unless otherwise stated. The adoption of new or amended HKFRS Accounting Standards and the impacts on the Company's financial statements, if any, are disclosed in note 3.

The financial statements have been prepared under the historical cost basis. The measurement bases are fully described in the accounting policies below.

It should be noted that accounting estimates and assumptions are used in preparation of the financial statements. Although these estimates are based on management's best knowledge and judgment of current events and actions, actual results may ultimately differ from those estimates. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.2 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all of its risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with HKFRS 15, all financial assets are initially measured at fair value, in case of a financial asset not at fair value through profit or loss ("FVTPL"), plus transaction costs that are directly attributable to the acquisition of the financial asset.

Financial assets, other than those designated and effective as hedging instruments, are classified into the amortised cost.

The classification is determined by both:

- the entity's business model for managing the financial asset; and
- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, other income or other financial items, except for expected credit losses ("ECL") of trade receivables which is presented in other operating expenses.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.2 Financial instruments (Continued)

Subsequent measurement of financial assets

Debt investments

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as fair value through profit or loss):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows; and

- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method. Interest income from these financial assets is included in profit or loss. Discounting is omitted where the effect of discounting is immaterial. The Company's trade and other receivables, cash and bank balances and amounts due from fellow subsidiaries fall into this category of financial instruments.

Classification and measurement of financial liabilities

The Company's financial liabilities include trade and other payables and amounts due to subsidiary, fellow subsidiaries, immediate holding company and intermediate holding company and secured bank borrowings.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Company designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method.

Trade and other payables and amounts due to subsidiary, fellow subsidiaries, immediate holding company and intermediate holding company

Trade and other payables and amounts due to subsidiary, fellow subsidiaries, immediate holding company and intermediate holding company are recognised initially at fair values and subsequently measured at amortised costs, using the effective interest method.

Bank borrowings

Bank borrowings are recognised initially at fair values, net of transaction costs incurred. Bank borrowings are subsequently stated at amortised costs. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Bank borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liabilities for at least twelve months after the reporting date.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.3 Impairment of financial assets

HKFRS 9's impairment requirements use more forward-looking information to recognise ECL – the "ECL model". Instruments within the scope included loans and other debt-type financial assets measured at amortised cost and trade receivables.

The Company considers a broader range of information when assessing credit risk and measuring ECL, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ("Stage 1") and

- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ("Stage 2").

"Stage 3" would cover financial assets that have objective evidence of impairment at the reporting date.

"12-month ECL" are recognised for the Stage 1 category while "lifetime ECL" are recognised for the Stage 2 category.

Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Trade receivables

For trade receivables, the Company applies a simplified approach in calculating ECL and recognises a loss allowance based on lifetime ECL at each reporting date. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial assets. In calculating the ECL, the Company has established a provision matrix that is based on its historical credit loss experience and external indicators, adjusted for forward-looking factors specific to the debtors and the economic environment.

To measure the ECL, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

Other financial assets measured at amortised cost

The Company measures the loss allowance for other receivables equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of default occurring since initial recognition.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.3 Impairment of financial assets (Continued)

Other financial assets measured at amortised cost (Continued)

In assessing whether the credit risk has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial assets at the reporting date with the risk of default occurring on the financial assets at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk;
- existing or forecast adverse changes in regulatory, business, financial, economic conditions, or technological environment of debtor that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations; and
- an actual or expected significant deterioration in the operating results of the debtor.

Irrespective of the outcome of the above assessment, the Company presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Company has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Company assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the end of each reporting period. A debt instrument is determined to have low credit risk if it has a low risk of default, the borrower has strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For internal credit risk management, the Company considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Company, in full (without taking into account any collateral held by the Company).

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.4 Inventories

Inventories are carried at the lower of cost and net realisable value. Cost, which comprises all cost of purchase and, where applicable, other costs that have been incurred in bringing the inventories to their present location and condition, and is determined using the first in first out method. Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and applicable selling expenses.

2.5 Cash and cash equivalents

Cash and cash equivalents include cash in hand, other short-term highly liquid investments with original maturities of three months or less.

2.6 Impairment of non-financial assets

Interest in a subsidiary is subject to impairment test whenever there are indications that the assets' carrying amounts may not be recoverable.

An impairment loss is recognised as an expense immediately for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions, less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of time value of money and the risk specific to the asset.

For the purpose of assessing impairment, where an asset does not generate cash inflows that are largely independent of the cash flows from other assets, the recoverable amount is determined for the smallest group of assets that generate cash inflows independently (i.e. a cash generating unit). As a result, some assets are tested individually for impairment and some are tested at cash generating unit level.

Impairment loss recognised for cash generating unit is allocated to reduce the carrying amounts of the assets in the cash generating unit on pro rata basis. In allocating the impairment loss, the carrying amount of an asset will not be reduced below its fair value less costs of disposal, value in use or zero.

An impairment loss is reversed if there has been a favorable change in the estimates used to determine the asset's recoverable amount and only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, if no impairment loss had been recognised in prior years.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.7 Foreign currency translation

The financial statements are presented in Hong Kong Dollars ("HK$"), which is also the functional currency of the Company.

Foreign currency transactions are translated into the functional currency of the Company using the exchange rates prevailing at the dates of the transactions. At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates ruling at that date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the reporting date retranslation of monetary assets and liabilities are recognised in profit or loss.

2.8 Revenue recognition

Revenue arises mainly from the sales of garments.

To determine whether to recognise revenue, the Company follows a 5-step process:

1. Identifying the contract with a customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations
5. Recognising revenue when/as performance obligation(s) are satisfied

In all cases, the total transaction price for a contract is allocated amongst the various performance obligations based on their relative stand-alone selling prices. The transaction price for a contract excludes any amounts collected on behalf of third parties.

Revenue is recognised either at a point in time or over time, when (or as) the Company satisfies performance obligations by transferring the promised goods or services to its customers.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.8 Revenue recognition (Continued)

Further details of the Company 's revenue recognition policies are as follows:

Sales of garment

Revenue from the sale of garment is recognised when (or as) the Company transfers control of the assets to the customer. For stand-alone sales of garment that are neither customised by the Company nor subject to significant integration services, control transfers at the point in time the customer takes undisputed delivery of the goods.

Interest income

Interest income from bank deposit is accrued on a time proportion basis on the principal outstanding and at the rate applicable.

Service income

Service income is recognised when the services are rendered as the criteria of recognising revenue over time is not met.

2.9 Employee benefits

The Company's contributions to the mandatory provident fund scheme are charged to the statement of profit or loss as incurred.

The Company's employees who have completed the required number of years of service to the Company are eligible for long service payments in the event of the termination of their employment.

A provision is recognised in respect of the probable future long service payments expected to be made. The provision is based on the best estimate of the probable future payments which have been earned by the employees from their service to the Company to the end of reporting period.

Share based payment/Cash-settled share based payments

PDS Limited ("PDS"), the Company's ultimate holding company, has equity-settled share-based remuneration plan for the employees of PDS and its subsidiaries. Where the Company's employees are rewarded using share-based payments, the fair value of the employees' services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions).

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.9 Employee benefits (Continued)

Share based payment/Cash-settled share based payments (Continued)

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest.

For cash-settled share-based payments, the fair value of the amount payable to the Company's employees is recognised as employee benefits expense with a corresponding increase in liabilities, over the vesting period. The liability is remeasured at each reporting period up to, and including the settlement date, with changes in fair value recognised in other operating expenses.

2.10 Borrowing costs

Interest and other borrowing costs incurred in connection with the borrowing of funds are recognised as expenses in the period in which they are incurred.

2.11 Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A contingent liability is not recognised but is disclosed in the notes to the financial statements.

2.12 Subsidiaries

Subsidiaries are entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has the rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Company has power, only substantive rights (held by the Company and other parties) are considered.

Investment in subsidiaries is carried at cost less any impairment losses unless the subsidiary is held for sale or included in a disposal group. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable at the reporting date. All dividends whether received out of the investee's pre or post-acquisition profits are recognised in the Company's profit or loss.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.13 Accounting for income taxes

Income tax comprises current tax and deferred tax.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, tax authorities relating to the current or prior reporting year, that are unpaid at the reporting date. They are calculated according to the tax rates and tax laws applicable to the periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognised as a component of tax expense in profit or loss.

Deferred tax is calculated using the liability method on temporary differences at the reporting date between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, tax losses available to be carried forward as well as other unused tax credits, to the extent that it is probable that taxable profit, including existing taxable temporary differences, will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are not recognised if the temporary difference arises from initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither taxable nor accounting profit or loss and does not give rise to equal taxable and deductible temporary differences.

Deferred tax liabilities are recognised for taxable temporary differences arising from investment in a subsidiary, except where the Company is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax is calculated, without discounting, at tax rates that are expected to apply in the year the liability is settled or the asset realised, provided they are enacted or substantively enacted at the reporting date.

Changes in deferred tax assets or liabilities are recognised in profit or loss, or in other comprehensive income or directly in equity if they relate to items that are charged or credited to other comprehensive income or directly in equity.

Current tax assets and current tax liabilities are presented in net if, and only if,

(a) the Company has the legally enforceable right to set off the recognised amounts; and

(b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

2.14 Related parties

For the purpose of these financial statements, a party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and if that party:

(i) has control or joint control over the Company;

(ii) has significant influence over the Company; or

(iii) is a member of the key management personnel of the Company or of a parent of the Company.

(b) the party is an entity and if any of the following conditions applies:

(i) the entity and the Company are members of the same group;

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) the entity and the Company are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company;

(vi) the entity is controlled or jointly controlled by a person identified in (a);

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or

(viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

3. NEW OR AMENDED HKFRS ACCOUNTING STANDARDS

3.1 Amended HKFRS Accounting Standards that are effective for annual periods beginning from 1 April 2025

In the current year, the Company has applied for the first time the Amendments to HKAS 21 "Lack of Exchangeability" which are effective for the Company's financial statements for the period beginning on 1 April 2025.

The amendments do not have a material impact on the financial statements of the Company.

3.2 Issued but not yet effective HKFRS Accounting Standards

At the date of authorisation of these financial statements, certain new and amended HKFRS Accounting Standards as set out below have been published but are not yet effective, and have not been adopted early by the Company.

HKFRS 18	Presentation and Disclosure in Financial Statements[2]
HKFRS 19	Subsidiaries without Public Accountability: Disclosures and related amendments[2]
Amendments to HKFRS 9 and HKFRS 7	Amendments to the Classification and Measurement of Financial Instruments[1]
Amendments to HKFRS 9 and HKFRS 7	Contracts Referencing Nature-dependent Electricity[1]
Amendments to HKFRS 10 and HKAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture[3]
Amendments to HKAS 21	Translation to a Hyperinflationary Presentation Currency[2]
Amendments to HKFRS Accounting Standards	Annual Improvements to HKFRS Accounting Standards – Volume 11[1]
Amendments to Hong Kong Interpretation 5	Presentation of Financial Statements – Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause[2]

[1] Effective for annual periods beginning on or after 1 April 2026
[2] Effective for annual periods beginning on or after 1 April 2027
[3] Effective date not yet determined

The directors anticipate that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement and are not expected to have a material impact on the Company's financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4.1 Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Provision for expected credit loss on trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

4.2 Critical accounting judgements

Revenue from contracts with customers

The Company assesses its revenue arrangements against specific criteria, i.e. whether it has exposure to the significant risks and rewards associated with the sale of goods and rendering of services, in order to determine if it is acting as a principal or as an agent. The Company has concluded that it is operating on a principal to principal basis in all its revenue arrangements.

The Company applies judgement to determine whether each product or service promised to a customer are capable of being distinct, and are distinct in the context of contract, if not the promised services are combined and accounted as a single performance obligation.

For performance obligation where control is transferred over time, revenues are recognised by measuring progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgement and is based on the nature of the promised service to be rendered.

5. REVENUE

Revenue represents the fair value of the consideration received and receivables for sales of goods during the year, net of rebates and discounts.

6. OTHER REVENUE

	2026 HK$	2025 HK$
Bank interest income	**355**	2,311
Design and development income	**5,753,850**	154,200
	5,754,205	156,511

7. FINANCE COSTS

	2026 HK$	2025 HK$
Interest on bank borrowings	**46,587**	2,024
Interest to immediate holding company	**192,160**	66,323
Bank finance charges	**220,377**	184,139
	459,124	252,486

8. LOSS BEFORE INCOME TAX

Loss before income tax is stated after charging/(crediting):

	2026 HK$	2025 HK$
Auditors' remuneration	**85,000**	85,000
Cost of inventories recognised as an expense	**96,177,901**	76,935,021
Exchange losses, net	**12,711**	13,226
Staff costs (including directors' remuneration)		
- Salaries and allowance	**1,484,834**	1,317,276
- Share based payment expenses, net	**(98,779)**	10,406

9. INCOME TAX EXPENSES

No Hong Kong profits tax has been provided in these financial statements as the income of Company was neither arises in nor is derived from Hong Kong (2025: Nil). In the opinion of the directors, the Company is not subject to taxation in any jurisdictions in which the Company operates.

Reconciliation between tax expense and accounting loss at applicable tax rate is as follow:

	2026 HK$	2025 HK$
Loss before income tax	**(1,757,725)**	(3,913,537)
Tax at the applicable tax rate of 16.5%	**(290,025)**	(645,734)
Tax effect of non-deductible expenses	**17,866,534**	14,019,337
Tax effect of non-taxable income	**(17,576,509)**	(13,373,603)
Income tax expense	**-**	-

No deferred tax has been recognised in the financial statements on the grounds that the deductible temporary differences of the Company for the current and previous years are negligible in comparison to the Company's overall financial position.

10. DIRECTORS' REMUNERATION

Directors' remuneration disclosed pursuant to section 383(1) of the Companies Ordinance (Cap. 622) and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation are as follows:

	2026 HK$	2025 HK$
Fees	-	-
Other emoluments	-	-
Retirement scheme contributions	-	-
	-	-

11. INTEREST IN A SUBSIDIARY

	2026 HK$	2025 HK$
Unlisted shares, at cost	**193,701,939**	193,701,939

Details of interest in a subsidiary as at reporting date are as follows:

Name of subsidiary	**Place of incorporation**	**Percentage of ownership and voting power**		**Name of business**
		2026	2025	
Green Smart Shirts Limited ("GSSL")	Bangladesh	**100%**	100%	Garment trading

12. INVENTORIES

	2026 HK$	2025 HK$
Raw materials	**21,582**	-
Work in progress	**179,772**	-
Finished goods	**523,820**	-
	725,174	-

13. TRADE AND OTHER RECEIVABLES

	2026 HK$	2025 HK$
Trade receivables	**20,189,239**	9,124,402
Prepayment and other receivables	**2,598,914**	723,284
	22,788,153	9,847,686

Trade receivables are non-interest bearing and are generally on terms of 30 to 90 days.

No ECL allowance of trade receivables was recognised during the year (2025: Nil).

13. TRADE AND OTHER RECEIVABLES (CONTINUED)

The aging analysis of trade receivables (net of impairment loss) that are past due at the reporting date but not individually considered to be impaired is included in the following analysis:

	2026 HK$	2025 HK$
Current	**17,783,237**	8,029,604
Past due		
Less than 30 days	**2,028,910**	868,422
Over 90 days	**377,092**	226,376
	2,406,002	1,094,798
	20,189,239	9,124,402

As at 31 March 2026, the Company has entered into trade receivables factoring arrangements and transferred trade receivables of HK$6,880,109 (2025: HK$1,930,883) to the bank without recourse. Since the Company has transferred substantially all risks and rewards relating to the trade receivables to the bank and thus the trade receivables are regarded as transferred financial assets that should be derecognised, accordingly the corresponding trade receivables are derecognised in the financial statements.

14. AMOUNTS DUE FROM/TO SUBSIDIARY/ FELLOW SUBSIDIARIES/ IMMEDIATE HOLDING COMPANY/ INTERMEDIATE HOLDING COMPANY

Except for an amount of HK$172,716,000 (equivalent to US$22,200,000) (2025: HK$172,716,000 (equivalent to US$22,200,000)) included in the amount due to immediate holding company which bears interest at 0.1% per annum, the remaining balances were interest free, unsecured and had no fixed repayment terms as at 31 March 2026 and 31 March 2025.

15. TRADE AND OTHER PAYABLES

	2026 HK$	2025 HK$
Trade payables	**1,291,477**	-
Provision and other payables	**4,360,613**	-
	5,652,090	-

16. SECURED BANK BORROWINGS

The carrying amount of the secured bank borrowings at the end of reporting period is analysed as follows:

	2026 HK$	2025 HK$
Amount repayable within one year:		
Clean import loans	**740,352**	776,618

As at 31 March 2026, the secured bank borrowings bear interest at USD Risk free rate + 2.15% (2025: USD Risk free rate + 2.15%) per annum and secured by the details as set out in note 23 to the financial statements.

17. SHARE CAPITAL

	2026		2025	
	Number of shares	**HK$**	Number of shares	HK$
Class "A" ordinary shares with voting right issued and fully paid:				
At 1 January	**215,061**	**1,555,992**	200,000	1,555,992
Issue of share capital (note a)	**-**	**-**	15,061	-
At 31 March	**215,061**	**1,555,992**	215,061	1,555,992
Class "B" ordinary shares with no voting right issued and fully paid:				
At 1 January and at 31 March (note b)	**100**	**8**	100	8
0.1% cumulative redeemable preference shares issued and fully paid:				
At 1 January	**22,200,000**	**172,716,000**	7,200,000	56,016,000
Issue of share capital (note c)	**-**	**-**	15,000,000	116,700,000
At 31 March	**22,200,000**	**172,716,000**	22,200,000	172,716,000
	22,415,161	**174,272,000**	22,415,161	174,272,000

Notes:

(a) During the year ended 31 March 2025, 15,061 class "A" ordinary shares were allotted to a new shareholder at nil consideration. The holders of class "A" ordinary shares with voting right have the sole right to attend and vote at the general meeting of the Company and are not entitled to distribution or dividend out of reserves and surpluses in the Company. Upon winding up of the Company the holders are entitled to participate in any excess of surplus assets or value as at the of winding up of the Company. Upon winding up of the Company, the holders are entitled the right to payment of all capital paid up on such shares.

(b) The holders of class "B" ordinary shares with no voting right have no right to attend the meetings of shareholders and are entitled to receive out of the profit accrued all dividends as declared and paid from time to time. Upon winding up of the Company, the holders are entitled to participate in any excess of surplus assets or value as at the of winding up of the Company. Upon the sale of the Company, the holders are entitled to receive profit on sale in the proportion to its shareholding in the Company after the distribution to the holder of class "A" ordinary shares with voting right of their equity value.

(c) During the year ended 31 March 2025, the Company issued 15,000,000 0.1% cumulative redeemable preference shares to the PDS Manufacturing Limited at HK$116,700,000 (equivalent to US$15,000,000). The holder of 0.1% cumulative redeemable preference shares are entitled to receive 0.1% dividends subject to the declaration by the Board of Directors and are not entitled to attend general meetings and bear no voting rights. The Company has option for redeeming the 0.1% cumulative redeemable preference shares anytime within the period of seven years from the date of issuance of the shares. Upon winding up of the Company, the holders are entitled the right to payment of all capital paid up on such shares in priority before the holders of the ordinary shares but shall not be entitled to participate in any surplus assets of the Company.

18. SHARE BASE PAYMENTS

As at 31 March 2026, PDS has the following share-based payments arrangements:

(i) Equity-settled share option scheme

On 3 April 2021, PDS established the PDS – Employee Stock Option Plan 2021 – Plan A ("Plan A") which entitles key managerial personnel and senior employees to purchase shares of the Company. The plan is designed to provide incentives to the employees of the PDS and its subsidiaries to deliver long-term returns. As at 31 March 2026, PDS has outstanding a total of 7,500 (2025: 7,500) equity settled stock options under this plan to the Company's employees. Vesting of the options would be subject to continuous employment with PDS and its subsidiaries and hence the options would vest with passage of time. In addition to this, the nomination and remuneration committee of PDS may also specify certain performance parameters subject to which the options would vest. The options vest after 4 years from the date of grant and then exercisable within 4 years. Options granted under the plan are for no consideration and carry no dividend or voting rights. On exercise, each option is convertible into one equity share of PDS. The key terms and conditions related to the grants under these plans are as follows; all options are to be settled by the delivery of shares.

Movements of share options under Plan A to employees of the Company during the year are as follows:

	2026 Weight average exercise price after stock split HK$	**2026 Number of share options**	2025 Weight average exercise price after stock split HK$	2025 Number of share options
Outstanding at 1 April and at 31 March	**22.78**	**7,500**	22.78	7,500
Exercisable at 31 March	**22.78**	**7,500**	22.78	5,625

During the year ended 31 March 2026, the Company has reversed the net amount of HK$98,779 to the statement of profit or loss in respect of options granted under Plan A due to over-provision in the prior years. (2025: HK$10,406 charged to the statement of profit or loss).

(ii)

As at 31 March 2026 and 2025, share based payment reserve recognised in the statement of financial position in respect of the above plans is as follows:

	2026 HK$	2025 HK$
Share based payment reserve	**170,850**	269,629

19. CAPITAL MANAGEMENT

The Company's objectives when managing capital are:

(i) To safeguard the Company's ability to continue as a going concern, so that it continues to provide returns for shareholders and benefits for other stakeholders;

(ii) To support the Company's stability and growth; and

(iii) To provide capital for the purpose of strengthening the Company's risk management capability.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. The Company actively and regularly reviews and manages its capital structure to ensure optimal capital structure and shareholder returns, taking into consideration the future capital requirements of the Company. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. No changes in the objectives, policies or processes for managing capital were made during the years ended 31 March 2026 and 31 March 2025.

20. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS

The Company is exposed to financial risks through its use of financial instruments in its ordinary course of operations and in its investment activities. The financial risks include credit risk, foreign currency risk, liquidity risk and interest rate risk.

Policies for managing these risks are set by the Company's board of directors. The overall objectives in managing financial risks focus on securing the Company's short to medium term cash flows by minimising its exposure to financial markets. Long term financial investments are managed to generate lasting returns with acceptable risk levels.

It is not the Company's policy to actively engage in the trading of financial instruments for speculative purposes.

20. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

20.1 Categories of financial assets and liabilities

The carrying amounts presented in the statement of financial position relate to the following categories of financial assets and financial liabilities.

	2026 HK$	2025 HK$
Financial assets		
Financial assets measured at amortised cost		
Trade and other receivables	**20,189,239**	9,231,259
Amounts due from fellow subsidiaries	**9,603,279**	3,831,520
Cash and cash equivalents	**341,580**	522,185
	30,134,098	13,584,964
Financial liabilities		
Financial liabilities measured at amortised cost		
Trade and other payables	**5,231,446**	-
Amount due to subsidiary	**14,373,776**	2,266,875
Amounts due to fellow subsidiaries	**72,763,389**	70,788,982
Amount due to immediate holding company	**21,548,588**	19,996,247
Amount due to intermediate holding company	**8,504**	144,678
Secured bank borrowings	**740,352**	776,618
	114,666,055	93,973,400

20.2 Credit risk

Credit risk refers to the risk that the counterparty to a financial instrument would fail to discharge its obligation under the terms of the financial instrument and cause a financial loss to the Company. The Company's exposure to credit risk mainly arises from granting credit to customers in the ordinary course of its operations and from its investing activities.

The Company's maximum exposure to credit risk on recognised financial assets is limited to the carrying amount at the reporting date as summarised in note 20.1.

The Company manages its credit risk associated with exposure to the customers on outstanding trade receivables through the application of credit approvals, credit ratings and other monitoring procedures.

Trade receivables are non-interest bearing and are generally credit term of 30 to 90 days.

20. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

20.2 Credit risk (Continued)

The Company applies the simplified model of recognising lifetime expected credit losses for all trade receivables as these items do not have a significant financing component. At each reporting dates, the Company applies a simplified approach in calculating ECL and recognises a loss allowance based on lifetime ECL. In addition, the Company assesses ECL under HKFRS 9 on trade receivables based on provision matrix, the expected loss rates are based on the historical credit losses. The historical rates are adjusted to reflect current and forward looking macroeconomic factors affecting the customer's ability to settle the amount outstanding. At each reporting date, the historical default rates are updated and changes in the forward-looking estimates are analysed. However, given the short period exposed to credit risk, the impact of these macroeconomic factors has not been considered significant within the reporting period.

In respect of other financial assets, including other receivables and amounts due from related parties, the management measures the loss allowance for other receivables equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of default occurring since initial recognition. In assessing whether the credit risk has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial assets at the reporting date with the risk of default occurring on the financial assets at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

20.3 Foreign currency risk

Foreign currency risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company operates internationally and is primarily exposed to foreign exchange risk arising from currency exposures of the United States dollars ("USD") with respect to the Hong Kong dollar. The Company will monitor its foreign currency exposure closely and will consider hedging significant foreign currency exposure should the need arise.

20. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (CONTINUED)

20.4 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash. Due to the dynamic nature of the underlying businesses, the Company aims to maintain flexibility in funding by keeping committed credit lines available.

The following table summarises the remaining contractual maturities at the reporting date of the Company's financial liabilities, which are based on undiscounted cash flows:

	Within one year HK$	Total undiscounted amount HK$	Carrying amount HK$
2026			
Trade and other payables	**5,231,446**	**5,231,446**	**5,231,446**
Amount due to subsidiary	**14,373,776**	**14,373,776**	**14,373,776**
Amounts due to fellow subsidiaries	**72,763,389**	**72,763,389**	**72,763,389**
Amount due to immediate holding company	**21,548,588**	**21,548,588**	**21,548,588**
Amount due to intermediate holding company	**8,504**	**8,504**	**8,504**
Secured bank borrowings	**740,352**	**740,352**	**740,352**
	114,666,055	**114,666,055**	**114,666,055**
2025			
Amount due to subsidiary	2,266,875	2,266,875	2,266,875
Amounts due to fellow subsidiaries	70,788,982	70,788,982	70,788,982
Amount due to immediate holding company	19,996,247	19,996,247	19,996,247
Amount due to intermediate holding company	144,678	144,678	144,678
Secured bank borrowings	776,618	776,618	776,618
	93,973,400	93,973,400	93,973,400

20.5 Interest rate risk

Interest rate risk relates to the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company's interest rate risk arises primarily from borrowings bears variable rates as set out in note 16.

If the interest rates had been 100 basis points higher/lower and all other variables were held constant, the Company's loss for the year ended 31 March 2026 would increase/decrease by approximately HK$7,000 (2025: HK$8,000).

The sensitivity analysis is prepared assuming financial instruments outstanding at the end of reporting period were outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

21. RELATED PARTY TRANSACTIONS

During normal course of business, the Company had the following material transactions with its related parties as set out below.

Name of company	Relationship	Nature of transactions	2026 HK$	2025 HK$
Green Smart Shirts Limited	Subsidiary	Purchase	**78,862,727**	76,861,111
Multinational Textile Group Limited	Intermediate holding company	Corporate charges	-	2,095,551
		SAP expenses	-	447,381
PDS Sourcing Limited	Fellow subsidiary	Consultancy fee	-	487,458
PDS Manufacturing Limited	Immediate holding company	Interest expenses	**192,160**	66,323
		Corporate charges	**2,757,955**	-
		SAP expenses	**447,381**	-
		Consultancy fee	**834,909**	-
Simple Approach Limited	Fellow subsidiary	Design and development income	**1,066,532**	-
Progress Manufacturing Group Limited	Fellow subsidiary	Design and development income	**1,797,343**	-
PDS Limited	Ultimate holding company	Design and development income	**548,988**	-
		Consultancy fee	**2,551,791**	-
Krayons Sourcing Limited	Fellow subsidiary	Design and development income	-	213,861

In addition, during the year, the Company paid net recharging expenses to group entities amounted to HK$590,625 (2025: HK$1,525,120).

22. RECONCILIATION OF LIABILITIES ARISING FROM FINANCING ACTIVITIES

The changes in the Company's liabilities arising from financing activities were as follows:

	Secured bank borrowings HK$
As at 1 April 2024	-
Cash flows	
Net proceeds from bank borrowings	776,618
Payment of interests	(2,024)
Non-cash changes	
Interest charges	2,024
As at 31 March 2025 and 1 April 2025	776,618
Cash flows	
Net repayments of bank borrowings	**(36,266)**
Payment of interests	**(46,587)**
Non-cash changes	
Interest charges	**46,587**
As at 31 March 2026	**740,352**

23. BANKING FACILITIES

General banking facilities granted by various banks were secured by ultimate holding and intermediate holding companies' corporate guarantee, directors' personal guarantee and fellow subsidiaries' corporate guarantee, fellow subsidiaries' life insurance policy, fellow subsidiaries' properties and fellow subsidiaries' charges over securities and deposits.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
Simple Approach Trading FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of Simple Approach Trading FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

ALIA CHARTERED ACCOUNTANCY DUBAI - U.A.E.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

5. Capital Adequacy is maintained during the year ended March 31, 2026.

ALIA CHARTERED ACCOUNTANCY

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

1 LEGAL STATUS :

Simple Approach Trading is incorporated on **January 20, 2025 under License No.- 06660 issued by Dubai airport Free Zone Authority, Dubai, United Arab Emirates**

The registered address of the company is Premises No. 6EA G09-SD38 , Dubai airport Free Zone 6 East Building, Dubai, United Arab Emirates

The company is managed by following person:

1. Mr. Rahul Khettry

2 BUSINESS ACTIVITIES :

The Activities of the Company are as Follows:-

(a) Clothing, Including Sports Clothes and Uniforms Trading

(b) Clothing Accessories Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management yearically reviews estimated useful lives and the depreciation method to ensure that the method and year of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 Standards and Interpretations effective in the current period

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual years beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a year of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The costs incurred, or expected to be incurred, in respect of the transaction can be measured

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting year, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization year and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting year. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after Initial measurement can be classified Into two categories

a. Equity Instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and

- The Company has transferred its rights to receive cash flow from the asset and either:
has transferred substantially all the risk and rewards of the asset, or
has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service year. The expected costs of these benefits are accrued over the year of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting year, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

Simple Approach Trading FZCO

6EA G09-SD38 , Ground Floor, 6 East A, Dubai Airport Freezone, Dubai, United Arab Emirates

Notes to the financial statements - for the period ended March 31, 2026.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income statement.

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE Dirhams.

18 RISK MANAGEMENT

18.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

18.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

18.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

19 COMPARATIVE FIGURES

The Current Fiscal Period covers the period of 14 months and 12 days from January 20, 2025 to March 31, 2026. Comparative figures are not available as the financial statements are being presented for the first time since incorporation of the Company.

20 APPROVAL OF FINANCIAL STATEMENTS

MANAGER'S REPORT

The Manager has pleasure in presenting his report and the audited financial statements for the year ended March 31, 2026

Principal Activities of The Entity:

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

Financial Review:

The Table Below Summarizes The Results of 2025-26 And 2024-25

(figures in AED)

Particulars	01.04.2025 to 31.03.2026	01.04.2024 to 31.03.2025
Revenue	402,749	895,415
Gross Profit/(Loss) For The Year	8,667	49,066
Net Profit/(Loss) For The Year	(67,790)	(40,954)

Role of The Manager:

The Manager is the Entity's principal decision-maker. The Manager have the overall responsibility for leading and supervising the Entity, for delivering sustainable shareholder value through his guidance and supervision of the Entity's business. The Manager sets the strategies and policies of the Entity. They monitors performance of the Entity's business, guides and supervises the management.

Events After Year End:

In the opinion of the Manager, no transaction or event of a material and unusual nature, favorable or unfavorable, has arisen in the interval between the end of the financial year and the date of this report that is likely to affect, substantially, the result of the operations or the financial position of the Entity.

Auditor:

M/s Alia Chartered Accountancy, Chartered Accountants, have showed their willingness to continue and are appointed to carry out independent audit for the year ending March 31, 2027.

Statement of Manager Responsibilities:

The applicable requirements require the Manager to prepare the financial statements for each financial year, which presents fairly, in all material respects, the financial position of the Entity, and its financial performance for the period then ended.

The audited financial statements for the year under review have been prepared in conformity and in compliance with the relevant statutory requirements and other governing laws. The Manager confirms that sufficient care has been taken for the maintenance of proper and adequate accounting records that disclose with reasonable accuracy at any time, the financial position of the Entity and enables him to ensure that the financial statements comply with the requirements of applicable statute. The Manager confirms that appropriate accounting policies have been selected and applied consistently in order that the financial statements reflect fairly the form and substance of the transactions carried out during the year under review and reasonably present the Entity's financial conditions. These financial statements were approved by the shareholders and signed on behalf by the authorized representative of the company.

INDEPENDENT AUDITOR'S REPORT

To,
The Shareholders,
The Source Fashions Platform FZCO
Dubai, United Arab Emirates.

Report on the Audit of Financial Statements.

Opinion

We have audited the accompanying financial statements of The Source Fashions Platform FZCO, Dubai, United Arab Emirates which comprise the statement of financial position as at March 31, 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity & statement of cash flows for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2026 and its financial performance for the period then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

ALIA CHARTERED ACCOUNTANCY DUBAI - U.A.E.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with management and those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

1. We have obtained all the information and explanations which we considered necessary for our audit;

2. The financial statements comply with the applicable provisions of Dubai Integrated Economic Zones Authority Implementing Regulations 2024 pursuant to Law No. (16) of 2021, concerning the formation of legal Company at Dubai Airport Free Zone;

3. The financial statements give a true and fair view of the profit or loss of the Company for the relevant period and state of the Company's affairs at the end of the financial year;

4. The Company has undertaken only activities permitted under its license;

THE SOURCE FASHIONS PLATFORM FZCO

Premises No. 6EA G09-SD16, Ground Floor, 6 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

1 LEGAL STATUS :

The Source Fashions Platform FZCO is incorporated on **August 10, 2023 under License No.- 05815 issued by Dubai Airport Free Zone Authority, Dubai, UAE**

The registered address of the company is Premises No. 6EA G09-SD16, Ground Floor, 6 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

The company is managed by following person:

1.Mr.Rahul Khettry

2 BUSINESS ACTIVITIES :

The activity of the company are as follows:-

(a) Clothing, including sports clothes and uniforms Trading

(b) Clothing accessories Trading

(c) Footwear Trading

3 BASIS OF PREPARATION

3.1 The financial statements are prepared under the historical cost convention basis applied consistently. Accrual basis of accounting has been followed by the company for the financial statements except the cash flow.

The financial statement have been prepared on a going concern basis as the shareholder agreed to provide the company with adequate financial support to enable it to meet its financial commitments for the foreseeable future.

3.2 The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and the applicable provisions of the Dubai Integrated Economic Zones Authority (DIEZA) Implementing Regulations 2024.

4 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements require management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and accompanying disclosure at the reporting date.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

The key judgments and estimates and assumptions that have significant impact on the financial statements of the Company are as discussed below:

4.1 Satisfaction of Performance Obligation

The Company is required to assess each of its contracts with customers to determine whether performance obligations are satisfied over time or at a point of time in order to determine the appropriate method of recognizing revenue. The Company has assessed that the revenue is recognized at a point in time based on agreements entered with customers and the provisions of relevant laws and regulations.

4.2 Determination of Transaction Prices

The Company is required to determine the transaction price in respect of each of its contract with customers. In making such judgment the Company assesses the impact of any variable consideration in the contract, due to discounts, the existence of any significant financial component in the contract and any non-cash consideration in the contract.

THE SOURCE FASHIONS PLATFORM FZCO

Premises No. 6EA G09-SD16, Ground Floor, 6 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

In determining the impact of variable consideration the Company uses the "most-likely amount" method in IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in the range of possible consideration amounts.

4.3 Transfer of Control in Contract With Customers

In the cases where the Company determines that performance obligation are satisfied at a point in time, revenue is recognized when the control over the asset that is the subject of the contract is transferred to the customer.

The Company has elected to adopt cost model / fair value model for investment properties. Accordingly investment properties are carried at cost less accumulated depreciation and any accumulated impairments / fair value in accordance with IAS 40.

4.4 Useful live of Property, Plant and Equipments

The Company's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. The management periodically reviews estimated useful lives and the depreciation method to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

5 ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) & INTERPRETATIONS

The Company has adopted all International Financial Reporting Standards (IFRS), amendments and interpretations issued by the International Accounting Standards Board (IASB) that are relevant and applicable to its operations and effective for the financial year commencing on April 01, 2025.

5.1 New and revised International Financial Reporting Standards

The following standards and amendments apply for the first time to the financial reporting periods commencing on or after January 01, 2025.

-Non-current Liabilities with Covenants – Amendments to IAS 1
-Classification of Liabilities as Current or Non-current – Amendments to IAS 1
-Lease Liability in a Sale and Leaseback – Amendments to IFRS 16
-Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

5.2 New & Revised IFRS in issue but not effective or early adopted

The following standards and interpretations had been issued but not yet mandatory for annual reporting periods ending March 31, 2025. Management anticipates that these new standards, interpretations, and amendments will be adopted in the financial statements as and when they are applicable and adoption of these new standards, interpretations, and amendments, may have no material impact on the financial statements in the period of initial application.

Particulars	Effective for Annual periods beginning from
Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 01, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 01, 2026
IFRS 18 Presentation and Disclosure in Financial Statements	January 01, 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	January 01, 2027

THE SOURCE FASHIONS PLATFORM FZCO

Premises No. 6EA G09-SD16, Ground Floor, 6 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

IFRS 16- Leases

The company assess at contract inception whether a contract is, or contains, a lease, That is if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The estimated useful life of the right-of-use asset is 3 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of' lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short- term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

6 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

6.1 Revenue recognition:

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which times all the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of goods.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The cost incurred or to be incurred in respect of the transaction can be measured reliably.

6.2 Property plant and equipments

Property and equipment are stated at cost less accumulated depreciation and impairment losses. The cost less estimated residual value, where material, is depreciated using the straight-line method from the date of acquisition to the estimated useful lives of the assets.

At the end of each reporting period, management conducts an assessment of property and equipment to determine whether there are any indications that assets may be impaired. In the absence of such indications, no further action is taken. If such indications do exist, an analysis of each asset is undertaken to determine its net recoverable amount and, if this is below its carrying amount, a provision is made.

6.3 Investment properties

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are measured at cost less any accumulated depreciation and any accumulated impairments losses / fair value in accordance with IAS 40.

The Company determines at each reporting date whether there is any objective evidence that the investment properties are impaired. Whenever the carting amount of an investment property exceeds their recoverable amount, an impairment loss is recognized in income statement. The recoverable amount of the investment properties is the higher of investment property's net selling price and the value in use. The net selling price is the amount obtainable from the sale of an investment property in an arm's length transaction less related costs while value in use is the present value of estimated future cash flows expected to arise from the continuing use of investment property and from its disposal at the end of its useful life.

6.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization less any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible assets with finite useful life are reviewed at least at the end of each reporting period. The amortization expense on intangible assets with finite useful lives is recognized in the income statement.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on perspective basis.

Gains or losses arising from derecognition of an intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the income statement when the asset is derecognized.

6.5 Financial assets - classification, measurement, recognition and derecognition

Classification

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the companies' model for managing them. Financial assets can be classified into following categories:

- those to be measured at fair value through other comprehensive income or through profit or loss, and
- those to be measured at amortized cost

Measurement

Financial assets are recognized and derecognized on trade date when the purchase and sale of a financial asset is made under a contract whose terms require delivery of financial asset within the timeframe established by market concerned.

Financial assets are initially measured at cost, plus transaction cost, except for those financial assets classified at fair value through other comprehensive income or profit or loss, which are initially measured at fair value.

Subsequent measurement of financial assets after initial measurement can be classified into two categories

a. Equity Instruments

All the financial assets that are equity instruments are measured at fair value through other comprehensive income or through profit or loss. This is an irrevocable choice that the Company has made on adoption of IFRS 9 or will make on subsequent measurement of equity instrument unless equity instrument are held for trading, in which case, they must be measured at fair value through profit or loss. Dividend income for all equity instrument is recognized in profit or loss statement when the right of payment has been established.

b. Debt instrument

Debt instruments are also measured at fair value through other comprehensive income unless they are classified at amortized cost. They are classified at amortized cost only if:

- the assets held within a business model whose objective is to hold the asset to collect the contractual cash flows; and
- the contractual terms of the debt instrument give rise, on specified date, to cash flows that are solely payments of principal and interest on the principal outstanding.

Derecognition

Financial asset is derecognized when:

- The right to receive cash flow from the asset have expired; or
- The Company retains the right to receive cash flow from the asset, but has assumed an obligation to pay them in full without material delay to third party under a "pass-through" arrangement, and
- The Company has transferred its rights to receive cash flow from the asset and either:

has transferred substantially all the risk and rewards of the asset, or

has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

Impairment of Financial Assets

The company recognizes all allowance for expected credit losses for all debt instrument not held at fair value through profit or loss. ECLs are based on the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an effective interest rate.

6.6 Financial liabilities - classification, measurement, recognition and derecognition

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or other financial liabilities.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

6.7 Trade Receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within due dates and therefore are all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at fair value.

6.8 Trade and Other Payables

These amounts represents liabilities for goods and services received by the Company in ordinary course of business which are unpaid at the year end. They are generally paid within 3 months and therefore are all classified as current.

6.9 Employee End of Service Benefits

The Company provides end-of-service benefits to its employees. The entitlement to these benefits is usually based upon the employees' final salary and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

6.10 Provisions

Provisions are recognized when the Company has a legal or constructive obligation as a result of the past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount can be reliably estimated.

Provisions are measured at present value of the expenditures expected to be required to settle the obligation at the end of the reporting period, using the effective interest rate.

Provisions are reviewed at each financial statement date ad adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

6.11 Value added tax

As per the Federal Decree-Law No. (08) of 2017, effective from January 1, 2018 for companies incorporated in UAE. Value Added Tax (VAT), is charged at 5% standard rate or 0% (as the case may be) on every taxable supply and deemed supply made by the taxable person. The Company is required to file its VAT returns and compute the payable tax (which is output tax less input tax) for the allotted tax periods and deposit the same within the prescribed due dates of filing VAT return and tax payment.

Corporate tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the taxation of Corporations and Business (the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023 and accordingly, it has an Corporate tax related impact on the financial statements for the accounting periods beginning on or after June, 1, 2023.

The Cabinet of Ministry Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

Corporate tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI. The Company has determined that interest and penalties related to Corporate taxes, including uncertain tax treatments, do not meet the definition of Corporate taxes, and therefore accounted for them under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The Company has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an Corporate tax in the scope of IAS 12. The Company has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

THE SOURCE FASHIONS PLATFORM FZCO

Premises No. 6EA G09-SD16, Ground Floor, 6 East A, Dubai Airport Free Zone, Dubai, United Arab Emirates

Notes to the financial statements - for the year ended March 31, 2026

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous periods. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to Corporate taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

6.12 Foreign Currency Translation

Transaction in currencies other than the company's functional currency (Foreign Currencies) are recorded at the rates of exchange prevailing on the dates of transactions. Monetary items denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Non- monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined the resultant income or gain is shown in the income

6.13 Cash & Cash Equivalents

Cash and cash equivalents for the purpose of cash flow statement is cash and bank balances and short term deposits with maturity of less than three months, net of bank overdrafts.

6.14 Reporting Currency & Rounding Up

The functional currency and reporting currency is UAE Dirhams. The figures are rounded up to UAE

17 RISK MANAGEMENT

17.1 Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or the counterparty to the financial instrument fails to meet its contractual obligation. The Company is exposure to credit risk is concentrated on bank balance, trade receivables, loans & advances and deposits.

The company's bank accounts are with local branches of banks operating in the U.A.E. Trade receivables are stated at realizable value net of allowance and bad debts. Deposits with government departments are refundable and secured.

17.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

b. Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

17.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Fair values

At the balance sheet date, the fair values of financial assets and liabilities at year end approximate to their carrying amounts and have been very carefully scrutinized by the management for their correctness.

18 COMPARATIVE FIGURES

The Current fiscal period covers the year of 12 months from April 01, 2025 to March 31, 2026. The Previous fiscal year covers the period of 12 months from April 01, 2024 to March 31, 2025. Previous year figures might be reclassified & regrouped to conform to the current year presentation.

REPORT OF THE DIRECTORS
FOR THE YEAR ENDED 31 MARCH 2026

The directors present their annual report together with the audited financial statements for the year ended 31st March 2026.

PRINCIPAL ACTIVITY

The principal activity of the Company during the year ended 31st March 2026 was supply, distribution, and marketing of apparels, homeware, and home textile goods.

RESULTS

The Company's financial performance for the year ended 31 March 2026 and its financial position as at that date are set out in the financial statements on pages 6 to 14.

DIRECTORS

The directors of the Company during the year and up to the date of this report were:

Mohandas Thekkeyil
Sandeep Malhotra
Ashok Kumar Sanghi

In accordance with the Company's articles of association, the directors retire and being eligible, will offer themselves for re-election.

PERMITTED INDEMNITY PROVISION

At no time during the year and up to the date of this director's report was there any permitted indemnity provision in force for the benefit of one or more directors of the Company (whether made by the Company or otherwise) or an associated company (if made by the Company).

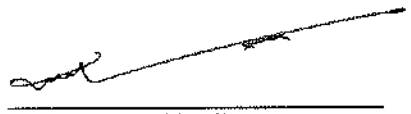
DIRECTOR'S INTERESTS

At no time during the year or at the end of the financial year was the Company, or any of its holding company or fellow subsidiaries a party to any arrangements to enable the Company's directors to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

The directors had no material interest, either directly or indirectly, in any transactions, arrangements or contracts of significance to the business of the Company to which any of its holding companies or fellow subsidiaries were a party during the period.

MANAGEMENT CONTRACTS

The Company did not enter into any contract, other than the contracts of service with the directors or any person engaged in the full-time employment of the Company, whereby any individual, firm, or body corporate undertakes the management and administration of the whole, or any substantial part of the business of the Company.



AUDITORS

The financial statements have been audited by Falcon Certified Public Accountants Limited, who retire and being eligible, offer themselves for re-appointment.

APPROVAL OF DIRECTOR'S REPORT

The report was approved by the Directors on 15th May 2026.

On behalf of the Board

Mohandas Thekkeyil
Director
Hong Kong.

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF HOME SOURCING SOLUTIONS LIMITED
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the financial statements of HOME SOURCING SOLUTIONS LIMITED ("the Company") set out on pages 6 to 14, which comprise the statement of financial position as at 31st March 2026, and the statement of profit or loss, the statement of changes in equity, and the statement of cash flows for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position as at 31st March 2026 and of its financial performance, and its cash flows for the year then ended, in accordance with the Hong Kong Financial Reporting Standard ("HKFRS") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditor's report thereon

The directors are responsible for the other information. The other information comprises the information included in the reports of the directors but does not include the financial statements and our auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

E: info@fcpahk.com W: www.fcpahk.com

Responsibilities of directors for the financial statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRS issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The directors and those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body corporate, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. This risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

E: info@fcpahk.com W: www.fcpahk.com

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors and those charged with governance, regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

HOME SOURCING SOLUTIONS LIMITED
ACCOUNTING POLICIES AND EXPLANATORY NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH 2026

1. Corporate information

HOME SOURCING SOLUTIONS LIMITED ("the Company") is a company incorporated in Hong Kong with limited liability. The company's registered office is located at 7/F, Park Fook Industrial Building, 615-617 Tai Nan West Street, Cheung Sha Wan, Kowloon, Hong Kong.

The principal activity of the Company during the period was engaged in supply, distribution, and marketing of apparels, homeware, and home textile goods.

The immediate holding company is Simple Approach Ltd a limited liability company registered in Hong Kong.

2. Statement of compliance

The financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs") which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), and the requirements of the Hong Kong Companies Ordinance.

3. Basis of preparation

The measurement basis used in the preparation of the financial statements is the historical cost basis. The financial statements are prepared in Hong Kong dollars, which is also the functional currency of the Company.

4. Changes in Accounting Policies and Disclosures

(a) HKICPA has issued several amendments to HKFRSs that are first effective for the current accounting period of the Company.

- HKSA 21 and HKFRS 1 (amendments) Lack of exchangeability

(b) New and amended Standards and Interpretations issued that are not effective.

The Company has not early applied new and revised HKFRSs that have been issued but not yet effective for the financial year beginning on 1 April 2025. These new and revised HKFRS include the following which may be relevant to the Company.

4. Changes in accounting policies and disclosures (contd.)

	Effective for accounting periods beginning on or after
HKFRS 9 AND HKFRS 7 (amendments) Classification and measurements of financial instruments	1 January 2026
HKFRS 1, HKFRS 7, HKFRS 9, HKFRS 10 and HKFRS 7 annual improvements	1 January 2026
HKFRS 9 and HKFRS 7 (amendments) Contracts Referencing Nature-dependent electricity	1 January 2026
HKFRS 18 (new standard) presentation and disclosure in financial statements	1 January 2026
HKFRS 19 (new standard) Subsidiaries without Public Accountability: Disclosures	1 January 2026
HKFRS 19 (amendments) Subsidiaries without Public Accountability: Disclosures	1 January 2027
HK Int 5 Hong Kong Interpretation 5 Presentation of Financial Statements (amendments) Classification by the Borrower of a Term Loan that contains a repayment on demand clause.	1 January 2027
HKFRS 10 and HKAS 28 (amendments) Sale or Contribution of Assets between an Investor and its Associates or Joint Venture	A date to be determined by the IASB

The Company is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial applications. So far it has been concluded that the adoption of them is unlikely to have a significant impact on the financial statements.

5. Significant Accounting Policies

a. Revenue recognition

Revenue is recognized when it is probable that the economic benefit will flow to the Company and when the revenue can be measured reliably, on the following basis:

- Sale of goods is recognised when the goods are delivered, and the risks and rewards of ownership have passed to the customer.
- Interest income is recognised on a time proportion basis taking into account the principal outstanding and the interest applicable.
- Other income is recognised on receipt basis.

b. Income Tax

Income tax expense comprises current tax and deferred tax. Current tax comprises the estimated tax payable or receivable on the taxable income or loss for the year and any adjustments to the tax payable or receivable in respect of previous years. Deferred tax assets are recognised for unused tax losses, unused tax credits, and deductible temporary differences to the extent that is probable that future profits will be available against which they can be used.

5. Significant Accounting Policies (contd.)

c. Cash and cash equivalents.

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and other short-term highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the group's cash management are also included as a component of cash and cash equivalents.

d. Translation of foreign currency

i. Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are prepared in Hong Kong dollars, which is also the functional currency of the Company.

ii. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

e. Related parties

A party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and that person
  (i) has control or joint control over the Company;
  (ii) has significant influence over the Company; or
  (iii) is a member of the key management personnel of the Company or of a parent of the Company. or
(b) the party is an entity where any of the following conditions applies:
  (i) the entity and the Company are members of the same group;
  (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the entity)
  (iii) the entity and the Company are joint ventures of the same third party.
  (iv) one entity is a joint venture of a third entity, and the other entity is an associate of the third entity.

5. Significant Accounting Policies (contd.)

(v) the entity is a post-employment benefit plan for the benefit of the employees of either the Company or an entity related to the Company.
(vi) the entity is controlled or jointly controlled by a pension identified in (a);
(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
(viii) the entity or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

6. Revenue

	2026 HK$	2025 HK$
Commission	1,783,278	3,527,128

7. Profit / (Loss) before taxation.

The Company's profit / (loss) before tax is arrived at after charging / (crediting):

	2026 HK$	2025 HK$
Charging:		
Entertainment expenses	6,276	6,759
Consulting fees	154,262	301,729
Commission expenses	547,743	-
Auditor's remuneration	10,450	9,000

8. Income tax expense

At the end of the reporting period, the Company had unused tax losses of HK$ 2,454,150 (2025: profit of HK$ 549,690), These tax losses are available for carry-forward and may be offset against the future taxable profits of the respective entity in which they originated. Deferred tax assets of approximately HK$ 404,936 (2025: NIL) have been recognised in respect of these tax losses. Management considers it probable that sufficient tax profits will be available within next one to two years against which these unused tax losses will be utilised. Under current Hong Kong tax legislation, these losses do not expire and can be carried forward indefinitely.

9. Related party balances

The amount due to related parties is unsecured, interest-free and repayable on demand.

Name of the lender	Relationship	2026 HK$	2025 HK$
PDS Fashion Ltd.	Fellow Subsidiary	1,034,432	19,176

Independent Auditor's Report

To the Members of Norlanka Manufacturing India Private Limited

Report on the Audit of the Financial Statements

Opinion

1. We have audited the accompanying financial statements of Norlanka Manufacturing India Private Limited ('the Company'), which comprise the Balance Sheet as at 31 March 2026, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2026, and its loss (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Director Report, but does not include the financial statements and our auditor's report thereon.

   Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

   In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Walker Chandiok & Co LLP is registered with limited liability with identification number AAC-2085 and its registered office at L-41 Connaught Circus, New Delhi, 110001, India

The Director's report is not made available to us at the date of this auditor's report. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

5. The accompanying financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance,but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

   - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

   - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;

   - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;

   - Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

   - Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

9. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

10. Based on our audit, we report that the Company has not paid or provided for any managerial remuneration during the year. Accordingly, reporting under section 197(16) of the Act is not applicable.

11. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act we give in the Annexure I a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

12. Further to our comments in Annexure I, as required by section 143(3) of the Act based on our audit, we report, to the extent applicable, that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying financial statements;

b) Except for the matters stated in paragraph 12(h)(vi)below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The financial statements dealt with by this report are in agreement with the books of account

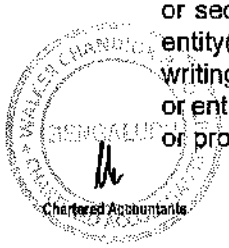
d) In our opinion, the aforesaid financial statements comply with Ind AS specified under section 133 of the Act;

e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2026 from being appointed as a director in terms of section 164(2) of the Act;

f) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in paragraph12(b), above on reporting under section 143(3)(b) of the Act and paragraph 12(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended)

g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls, refer to our separate report in Annexure II wherein we have expressed an unmodified opinion; and

h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us



i. The Company does not have any pending litigation which would impact its financial position as at 31 March 2026;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2026

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2026.;

iv.

a. The management has represented that, to the best of its knowledge and belief, as disclosed in note 39 to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any person(s) or entity(ies), including foreign entities ('the Intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;

b. The management has represented that, to the best of its knowledge and belief, as disclosed in note 39 to the financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.

v. The Company has not declared or paid any dividend during the year ended 31 March 2026.

vi. As stated in note 43 to the financial statements and based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2025, has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has been operated throughout the year for all relevant transactions recorded in the software, except that, audit trail feature was not enabled at the database level for such accounting software to log any direct data changes. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with, where such feature is enabled. Furthermore, the audit trail has been preserved by the Company as per the statutory requirements for record retention where the audit trail feature was enabled.

Annexure I referred to in paragraph 11 of the Independent Auditor's Report of even date to the members of Norlanka Manufacturing India Private Limited on the financial statements for the year ended 31 March 2026

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.

(B) The Company does not have any intangible assets and accordingly, reporting under clause 3(i)(a)(B) of the Order is not applicable to the Company.

(b) The property, plant and equipment have been physically verified by the management during the year and no material discrepancies were noticed on such verification. In our opinion, the frequency of physical verification programme adopted by the Company, is reasonable having regard to the size of the Company and the nature of its assets.

(c) The Company does not own any immovable property (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee). Accordingly, reporting under clause 3(i)(c) of the Order is not applicable to the Company.

(d) The Company has not revalued its property, plant and equipment during the year. Further, the Company does not hold any intangible assets.

(e) No proceedings have been initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 (as amended) and rules made thereunder.

(ii) (a) The Company does not hold any inventory. Accordingly, reporting under clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned working capital limits by banks or financial institutions on the basis of security of current assets at any point of time during the year. Accordingly, reporting under clause 3(ii)(b) of the Order is not applicable to the Company.

(iii) The Company has not made any investment in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured to companies, firms, Limited Liability Partnerships (LLPs) or any other parties during the year. Accordingly, reporting under clause 3(iii) of the Order is not applicable to the Company.

(iv) In our opinion, and according to the information and explanations given to us, the Company has complied with the provisions of section 186 of the Act in respect of investments made, as applicable. Further, the Company has not entered into any transaction covered under section 185 and section 186 of the Act in respect of loans granted, guarantees and security provided by it.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, reporting under clause 3(v) of the Order is not applicable to the Company.

(vi) The Central Government has not specified maintenance of cost records under sub-section (1) of section 148 of the Act, in respect of Company's products/ services / business activities. Accordingly, reporting under clause 3(vi) of the Order is not applicable.

(vii)(a) In our opinion and according to the information and explanations given to us, the Company is regular in depositing undisputed statutory dues including goods and services tax, provident fund, income-tax,

Chartered Accountants

cess and other material statutory dues; as applicable, with the appropriate authorities. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, we report that there are no statutory dues referred to in subclause (a) above that have not been deposited with the appropriate authorities on account of any dispute.

(viii) According to the information and explanations given to us, we report that no transactions were surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961) which have not been previously recorded in the books of accounts.

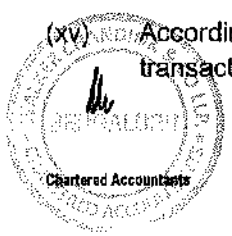
(ix) According to the information and explanations given to us, we report that the Company does not have any loans or other borrowings from any lender. Accordingly, reporting under clause 3(ix) of the Order is not applicable to the Company.

(x) (a) The Company has not raised any money by way of initial public offer or further public offer (including debt instruments), during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or (fully, partially or optionally) convertible debentures during the year. Accordingly, reporting under clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company or no fraud on the Company has been noticed or reported during the period covered by our audit.

(b) According to the information and explanations given to us including the representation made to us by the management of the Company, no report under sub-section 12 of section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014, with the Central Government for the period covered by our audit.



(c) According to the information and explanations given to us including the representation made to us by the management of the Company, there are no whistle-blower complaints received by the Company during the year.

(xii) The Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, reporting under clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, all transactions entered into by the Company, with the related parties are in compliance with section 188 of the Act. The details of such related party transactions have been disclosed in the financial statements, as required under Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified in Companies (Indian Accounting Standards) Rules 2015 as prescribed under section 133 of the Act. Further, according to the information and explanations given to us, the Company is not required to constitute an audit committee under section 177 of the Act.

(xiv) According to the information and explanations given to us, the Company is not required to and consequently, does not have an internal audit system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanation given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and accordingly, reporting under clause

3(xv) of the Order with respect to compliance with the provisions of section 192 of the Act are not applicable to the Company.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, reporting under clauses 3(xvi)(a), (b) and (c) of the Order are not applicable to the Company.

(d) Based on the information and explanations given to us and as represented by the management of the Company, the Group (as defined in Core Investment Companies (Reserve Bank) Directions, 2016) does not have any CIC

(xvii) The Company has not incurred any cash losses in the current financial year as well as the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, reporting under clause 3(xviii) of the Order is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information in the financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) According to the information and explanations given to us, the Company does not meet the criteria as specified under sub-section (1) of section 135 of the Act read with the Companies (Corporate Social Responsibility Policy) Rules, 2014 and according, reporting under clause 3(xx) of the Order is not applicable to the Company.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure II

Independent Auditor's Report on the internal financial controls with reference to the financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

1. In conjunction with our audit of the financial statements of Norlanka Manufacturing India Private Limited ('the Company') ('the Company') as at and for the year ended 31 March 2026, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management for Internal Financial Controls

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Chartered Accountants

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2026, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

Norlanka Manufacturing India Private Limited
Summary of material accounting policies information and other explanatory information

Note 1: Corporate information

Norlanka Manufacturing India Private Limited is a Private Limited Company (hereinafter referred as 'the Company') domiciled in India and has its registered office at 758 & 759, 2nd Floor, 19th Main, HSR Layout, Sector-II, Bengaluru - 560102, Karnataka. The Company is engaged in trading of ready to wear apparels, providing services to group companies engaged in the export of ready to wear apparels and sourcing & distribution of their products.

The financial statements of the Company for the year ending March 31, 2026 were approved by the Board of Directors and authorized for issue on May 18, 2026

Note 2: Statement of compliance

The financial statements have been prepared as a going concern in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.
The accounting policies are applied consistently to all the periods presented in the financial statements.

Basis of preparation and presentation
The financial statements have been prepared on the basis of realisable value and accrual basis of accounting as a non-going concern. The estimates and assumptions used in these financial statements are based upon management's evaluation of the relevant facts and circumstances as on the date of the financial statements. The financial statements are presented in ₹ and all values are rounded to the nearest Lakhs except otherwise stated.

Recent accounting pronouncement
The Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

A. Amended Accounting Standards (Ind AS) and Interpretations effective from the annual reporting periods beginning on or after April 01, 2025.
The MCA has notified below amendment which were effective from April 01,2025.

Amendment to Ind AS 21- "The Effects of Changes in Foreign Exchange Rates"
The amendment specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also requires the disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.
When applying the amendment, an entity cannot restate comparative information.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 1 - "Presentation of Financial Statements"
The Amendment elaborate on guidance set out in Ind AS 1 by:
• clarifying that the right to defer settlement of a liability for at least 12 months after the reporting period;
a) must have substance, and b) must exist at the end of the reporting period;
• stating that management's expectations around whether the settlement of a liability would be deferred or not, does not impact the classification of the liability;
• including requirements for liabilities that can be settled using an entity's own instruments; and
• stating that at the reporting date, the entity does not consider covenants that will need to be complied with in the future when considering the classification of the debt as current or non-current.
In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.
The amendments does not have a material impact on the Company's financial statements.

B. Amendments effective from annual reporting periods beginning on or after April 01, 2026:
Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants - Amendments to Ind AS 1
Paragraph 74 of Ind AS 1 currently effective for the year ended 31 March 2026 requires the entity not to classify the liability as current, if there is a breach of a material covenant of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, however, the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

MCA vide notification dated August 13, 2025, has introduced amendment under Paragraph 74 of Ind AS 1 which requires the entity to classify the liability as current under the aforementioned situation because, at the end of the reporting period, it does not have the right to defer its settlement for at least twelve months after that date. Such amendment has been made effective for annual reporting periods beginning on or after April 1, 2026 retrospectively in accordance with Ind AS 8.

This amendment is not expected to have a material impact on the Financial Statements.

Norlanka Manufacturing India Private Limited
Summary of material accounting policies information and other explanatory information

Note 3: Material accounting policies

a) Material accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Judgements:
In the process of applying the Company's accounting policies, management has made the judgement for the useful lives of property, plant and equipment, which have the most significant effect on the amounts recognised in the financial statements:

Estimates and Assumptions:
The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Estimates and underlying assumptions are reviewed at each balance sheet date. Such changes are reflected in the assumptions when they occur.

i) Income taxes
The Company is subject to income tax laws as applicable in India. Significant judgment is required in determining provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognises liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

ii) Contingencies
Contingent Liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal and other claims. By virtue of their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgements and the use of estimates regarding the outcome of future events.

iii) Defined benefit plans
The present value of the gratuity and compensated absences are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality tables for the specific countries. Those mortality tables tend to change only at interval in response to demographic changes.

b) <u>Current versus non-current classification</u>
The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.
Assets:
An asset is treated as current when it is:
i) Expected to be realised or intended to be sold or consumed in normal operating cycle.
ii) Held primarily for the purpose of trading
iii) Expected to be realised within twelve months after the reporting period, or
iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.
All other assets are classified as non-current.

Liabilities:
A liability is current when:
i) It is expected to be settled in normal operating cycle
ii) It is held primarily for the purpose of trading
iii) It is due to be settled within twelve months after the reporting period, or
iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period
All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.
Operating cycle: The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. Based on the operation, the company has identified twelve months as its operating cycle.

c) Foreign currency transaction

Functional and presentation currency

The Company's financial statements are presented in Indian Rupees (₹) which is also the Company's functional currency. Functional currency is the currency of the primary economic environment in which a Company operates and is normally the currency in which the Company primarily generates and expends cash. All the financial information presented in ₹ except where otherwise stated.

Initial recognition

Transactions in foreign currencies are translated into the functional currency of the Company at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Measurement at the reporting date

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured in terms of historical cost are not retranslated.

d) Revenue recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Company will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

The Company recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A 5-step approach is used to recognise revenue as below:

Step 1: Identify the contract(s) with a customer
Step 2: Identify the performance obligation in contract
Step 3: Determine the transaction price
Step 4: Allocate the transaction price to the performance obligations in the contract
Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Recognizing revenue from major business activities

(I) Sale of Goods

Revenue from the sale of goods is recognized at point in time when controls of promised goods are transferred to the customer (i.e. upon satisfaction of performance obligation).

Other income

i) Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

ii) Any Other Income is recognized on an accrual basis.

e) **Employee's Benefits**

Short Term Employee Benefits: All employee benefits expected to be settled wholly within twelve months of rendering the service are classified as short-term employee benefits. When an employee has rendered service to the Company during an accounting period, the Company recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service as an expense unless another Ind AS requires or permits the inclusion of the benefits in the cost of an asset. Benefits such as salaries, wages, bonus and ex-gratia etc. are recognised in Statement of profit and loss in the period in which the employee renders the related service.

Defined Contribution Plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a statutory authority and will have no legal or constructive obligation to pay further amounts. Provident Fund and Employee State Insurance Schemes are defined contribution plans and contributions paid / payable are recognised as an expense in the Statement of Profit and Loss during the year in which the employee renders the related service.

Defined Benefit Plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.
The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount based on the respective employee's salary and the tenure of employment. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation report using the projected unit credit method as at the year end.

The obligations are measured at the present value of the estimated future cash flows. The discount rate is generally based upon the market yields available on Government bonds at the reporting date with a term that matches that of the liabilities.
Re-measurements, comprising actuarial gains and losses including, the effect of the changes to the asset ceiling (if applicable), is reflected immediately in Other Comprehensive Income in the Statement of Profit and Loss. All other expenses related to defined benefit plans are recognised in Statement of Profit and Loss as employee benefit expenses. Gains or losses on the curtailment or settlement of any defined benefit plan are recognised when the curtailment or settlement occurs.

f) **Share based payment/Cash-settled share based payments**

The Holding Company has equity-settled share-based remuneration plans for its employees. Where employees are rewarded using share-based payments, the fair value of employees' services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest

Upon exercise of share options, the proceeds received, net of any directly attributable transaction costs, are allocated to share capital up to the nominal (or par) value of the shares issued with any excess being recorded as share premium.

For cash-settled share-based payments, the fair value of the amount payable to employees is recognised as employee benefits expense with a corresponding increase in liabilities, over the vesting period. The liability is remeasured at each reporting period up to, and including the settlement date, with changes in fair value recognised in employee benefits expense.

Where stock options are issued to employees of subsidiaries/ step down subsidiaries, and such subsidiary/step down subsidiary does not have an obligation to settle the transaction, the transaction is treated as a parent's equity contribution to the subsidiary/ step down subsidiary and presented as 'deemed investment' under investment in subsidiaries.

g) **Provisions, Contingent liabilities and Contingent assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.
If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability is disclosed in the case of;
i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle obligation;
ii) a present obligation arising from past events, when no reliable estimate is possible.

Contingent assets are neither recognised nor disclosed. However, when realisation of income is virtually certain, related asset is recognised.
Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date and adjusted where necessary to reflect the current best estimate of obligation or asset.

h) Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

(1) Financial assets

(I) Initial recognition and measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially recognised at fair value. In case of financial assets which are recognised at fair value through profit or loss (FVTPL), its transaction cost are recognised in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

(ii) Classification and subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- Financial Asset carried at amortised cost
- Financial Asset at fair value through other comprehensive income (FVTOCI)
- Financial Asset at fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

a.Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b.Financial asset at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c.Financial asset at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

d. Equity investment

Investments representing equity interest in associates/ subsidiary are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when:

(i) The contractual rights to receive cash flows from the asset has expired, or

(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(2) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, security deposits received etc.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at amortised cost
- Financial liabilities at fair value through profit or loss (FVTPL)

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

h) Financial instruments (cont'd)

(3) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

i) Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cashflows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115 Revenue from contracts with customers, the Company applies simplified approach permitted by Ind AS 109 Financial instruments, which requires expected life time losses to be recognised after initial recognition of receivables. For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve months ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on twelve-months ECL.

j) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

(a) In the principal market for the asset or liability, or

(b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.

Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

[This space has been left blank intentionally]

k) Taxes on income

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income (OCI) or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets are offset against current tax liabilities if, and only if, a legally enforceable right exists to set off the recognised amounts and there is an intention either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.
Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.
Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.
Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.
Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

l) Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.
For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

m) Earnings per share (EPS)

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra ordinary items.
i) Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.
ii) For the purpose of calculating Diluted Earning per share, the number of shares comprises of weighted average shares considered for deriving basic earning per share and also the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. A transaction is considered to be antidilutive if its effect is to increase the amount of EPS, either by lowering the share count or increasing the earnings.

n) Segment reporting

The Company has the policy of reporting the segments in a manner consistent with the internal reporting provided to the chief operating decision maker. The Chief Operating Decision maker is considered to make strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.

At the effective income tax rate	**(38.73)**	**(58.33)**

Note 31: Capital management

The Company aims to manage its capital efficiently so as to safeguard its ability to continue as a going concern and to optimise returns to our shareholders.
The capital structure of the Company is based on management's judgement of the appropriate balance of key elements in order to meet its strategic and day-to-day needs. We consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares. The Company policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. The Company will take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

The Company's capital and adjusted net debt position is given below:

Less: Cash and cash equivalents (refer note 8)	306.42	226.73
Less: Deposits with remaining maturity of more than 3 months but less than 12 months (refer note 9)	7.75	82.30
Adjusted net debt (A)	**135.48**	**96.10**
Equity share capital (refer note 12)	5.00	5.00
Other equity (refer note 13)	28.12	30.31
Total capital (B)	**33.12**	**35.31**
Capital and net debt (A+B)	**168.60**	**131.41**

a) For the purpose of capital management, capital includes issued equity capital and all other reserves attributable to the equity shareholders of the Company.

b) No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2026 and March 31, 2025.

[This space has been left blank intentionally]

Note 32 : Employee benefit plans

1) Defined contribution plans

The Company makes contribution towards Employees Provident Fund. Under the rules of these schemes, the Company is required to contribute a specified percentage of payroll costs. The Company during the year recognised the following amounts in the Statement of Profit and Loss under Company's contribution to defined contribution plans.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Employer's contribution to provident fund/ pension fund	5.74	4.97
Total	**5.74**	**4.97**

The contribution payable to these schemes by the Company are at the rates specified in the rules of the schemes.

2) Defined benefit plans

In accordance with Ind AS 19 "Employee benefits", an actuarial valuation on the basis of "Projected unit credit method" was carried out, through which the Company is able to determine the present value of obligations. "Projected unit credit method" recognizes each period of service as giving rise to additional unit of employees benefit entitlement and measures each unit separately to built up the final obligation.

i) Gratuity scheme

The Company has defined benefit gratuity plan. Gratuity is calculated as 15 days salary for every completed year of service or part thereof in excess of 6 months and is payable on retirement / termination/ resignation. The benefit vests on completing 5 years of service by the employee. The Company makes provision of such gratuity liability in the books of account on the basis of actuarial valuation as per projected unit credit method.

a) The following tables summarize the components of net benefit expense recognised in the Statement of Profit and Loss and amounts recognised in the Balance Sheet for the defined benefit plan (viz. gratuity). These have been provided on accrual basis, based on year end actuarial valuation.

Particulars	As at 31 March 2026	As at March 31, 2025
1) Opening defined benefit obligation	3.48	10.42
2) Add: Interest Cost	0.24	0.75
3) Add: Current service cost	2.74	2.02
4) Add: Past Service cost	1.49	-
5) Add: Actuarial gain/loss	(1.03)	(9.71)
Present value of obligation as at the end of the year	**6.92**	**3.48**

*The Government of India, on November 21, 2025, notified implementation of four new labour codes — Code on Wages (2019), Industrial Relations Code (2020), Code on Social Security (2020), and Occupational Safety, Health and Working Conditions Code (2020) (hereinafter referred to as "the New Labour Codes").

The New Labour Codes prescribe an uniform definition of the term 'wages', which is also relevant for determination of post-employment benefits including gratuity to all employees. In accordance with the definition, wages means all remuneration including basic pay, dearness allowance and retaining allowance but does not include certain specified items forming part of remuneration and in the event the quantum of those specified items exceed 50% of total remuneration, such excess is deemed to be considered as wages.

The revised definition of wages has resulted in an increase in gratuity obligation of ₹ 1.49 lakhs in respect of services rendered in prior periods, and the Company has treated such incremental impact as past service cost and recognised as expense immediately in the statement of profit and loss in the current year in accordance with Ind AS 19, Employee Benefits.

The Company will continue to monitor finalisation of rules and clarifications from government and would provide appropriate accounting effect on the basis of such developments as needed.

b) The following tables summarise the net benefit expense recognized in the Statement of Profit and Loss:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Total service cost	4.23	2.02
Interest cost	0.24	0.75
Components of defined benefit costs recognised in statement of profit and loss	**4.47**	**2.77**
Actuarial gain	(1.03)	(9.71)
Components of defined benefit costs recognised in other comprehensive income	**(1.03)**	**(9.71)**
Total	**3.44**	**(6.94)**

c) Bifurcation of actuarial loss on gratuity:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Remeasurement due to:		
Effect of change in financial assumptions	(0.77)	0.09
Effect of experience adjustment	(0.26)	(9.80)
Total amount recognised in other comprehensive income	**(1.03)**	**(9.71)**

(All amounts in ₹ in lakhs, unless otherwise stated)

Note 32 : Employee benefit plans(cont'd)

d) Principal actuarial assumptions at the Balance Sheet date are as follows:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Economic assumptions		
1) Discount rate	7.78%	6.99%
2) Future salary growth rate	5.50%	5.50%
Demographic assumptions		
1) Retirement age	58 years	58 years
2) Mortality rate	Indian Assured Lives Mortality (2012-14) (modified) ultimate	
3) Employee turnover / attrition rate		
Ages up to 30	3.00%	3.00%
Ages from 31-44	2.00%	2.00%
Above 44	1.00%	1.00%

e) Net liabilities recognized in the Balance Sheet for benefit obligation

Particulars	As at 31 March 2026	As at March 31, 2025
Present value of obligation	6.92	3.48
Net liability	**6.92**	**3.48**

f) A quantitative sensitivity analysis for significant assumption is as shown below:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
A. Discount rate		
0.5% increase in discount rate	(0.46)	(0.25)
0.5% decrease in discount rate	0.49	0.27
B. Salary escalation rate		
0.5% increase in salary escalation rate	0.49	0.27
0.5% decrease in salary escalation rate	(0.46)	(0.25)

The sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.
Sensitivities due to morality and withdrawals are not expected to be significant.

g) Description of Risk Exposures:

Salary Increases	Actual salary increases will increase the defined benefit liability. Increase in salary increase rate assumption in future valuations also increase the liability.
Discount Rate	Reduction in discount rate in subsequent valuations can increase the liability.
Morality and disability	Actual deaths & disability cases proving lower or higher than assumed in the valuation can impact the liabilities.
Withdrawals	Actual withdrawals proving higher or lower than assumed withdrawals and change of withdrawal rates at subsequent valuations can impact Plan's liability.
Investment Risk	If Plan is funded then assets liabilities mismatch & actual investment return on assets lower than the discount rate assumed at the last valuation date can impact the liability

h) Maturity profile of defined benefit obligation is as follows:

Particulars	As at 31 March 2026	As at March 31, 2025
1 year	0.07	0.02
2 to 6 years	0.40	0.22
More than 6 years	6.45	3.24
Total	**6.92**	**3.48**

i) The weighted average duration of the defined obligation as at March 31, 2026 is 17.39 years. (March 31, 2025: 19.00 Years)
j) The estimates of future salary increases considered in actuarial valuation take account of factors, such as supply and demand in the employment market.

Note 33 : Fair value disclosure

a) The carrying amounts of financial assets by categories is as follows:

	As at March 31, 2026	As at March 31, 2025
Financial assets measured at amortised cost		
Other financial assets (refer note 10)	88.09	74.59
Cash and cash equivalents (refer note 8)	306.42	226.73
Bank balance other than cash and cash equivalents (refer note 9)	7.75	82.30
Total (A)	**402.26**	**383.62**
Financial assets measured at fair value through profit and loss		
Investments (refer note 5)	102.60	102.60
Total (B)	**102.60**	**102.60**
Total (A+B)	**504.86**	**486.22**

b) Fair value of financial liabilities:

	Carrying values	
	As at March 31, 2026	As at March 31, 2025
Financial liabilities measured at amortised cost		
Trade payables (refer note 16)	7.60	8.12
Borrowings (refer note 14)	449.65	405.13
Other financial liabilities (refer note 17)	12.04	12.83
Total	**469.29**	**426.08**

The fair value of trade receivables, cash and bank balances, other financial assets, borrowings, trade payables and other financial liabilities are considered to be equal to the carrying amount of these items due to their short term nature.

Note 34 : Fair value hierarchy

All financial instruments for which fair value is recognized or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.
Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.

The fair value hierarchy of financial assets and financial liabilities is as follows

Particulars	As at March 31, 2026		
	Fair value measurement at end		
	Level 1	Level 2	Level 3
Financial assets measured at fair value through profit and loss			
Investments	-	-	102.60
Total	**-**	**-**	**102.60**

Particulars	As at March 31, 2025		
	Fair value measurement at end of the reporting period using		
	Level 1	Level 2	Level 3
Financial assets measured at fair value through profit and loss			
Investments	-	-	102.60
Total	**-**	**-**	**102.60**

Note 33 : Fair value Hierarchy (cont'd)

The movements in fair value measurements within level 3 during the year are as follows:

Particulars	As at March 31, 2026	As at March 31, 2025
At the beginning of the year	102.60	102.60
At the end of the year	**102.60**	**102.60**

There have been no transfer between level 1, level 2 and level 3 category during the year ended March 31, 2026 and March 31, 2025

i) Valuation technique used to determine fair value:

Particulars	Level	Valuation	Unobservable	Relationship of unobservable
Financial assets at fair value through statement of profit and loss	Level 3	Market approach	Enterprise-value("EV")	Increase/decrease in EV would result in increase/ decrease in fair value
	Level 3	Income approach	Discount rate	Increase/decrease in discount rate would result in decrease/ increase in fair value

Note 34 : Segment Information

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). The CODM is considered to be the Board of Directors who makes strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.

The Company is engaged in trading of ready to wear apparels, providing services to group companies engaged in the export of ready to wear apparels and sourcing & distribution of their products. The disclosures as required under Ind AS 108 on operating segment reporting has not been provided as the Company deals in one business segment.

Entity wide disclosures

a. Revenue by Geography

Location	Year ended March 31, 2026	Year ended March 31, 2025
Within India	-	24.61
Total	**-**	**24.61**

The Company is domiciled in India and all its non-current assets are located in/relates to India.

There are no customers during year ended March 31, 2026 (March 31, 2025: 2 customer) who has contributed 10% or more to the Company's revenue.

b. Revenue by nature of products / services

Location	Year ended March 31, 2026	Year ended March 31, 2025
Sale of goods	-	24.25
Other operating income	-	0.36
Total	**-**	**24.61**

(All amounts in ₹ in lakhs, unless otherwise stated)

Note 35: Financial risk management objectives and policies

The Company's principal financial liabilities comprise borrowings, trade and other payables, employees payable and dues to related party. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantees to support its operations.

The Company's principal financial assets includes investments, dues from related party, trade receivables, cash and cash equivalents, interest accrued but not due on fixed deposits and other bank balances.

The Company is exposed to credit risk, liquidity risk and market risk. The Company's senior level personnel oversees the management of these risks.

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk applicable in case of the Company primarily includes interest rate risk and currency risk.

I) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's interest bearing debt obligations.

Particulars	As at March 31, 2026	As at March 31, 2025
Fixed rate borrowings (refer note 14)	449.65	405.13
	449.65	**405.13**

II) Foreign currency risk

The Company's exposure to foreign currency risk at the end of the reporting period are as follows:

Particulars	Currency	As at March 31, 2026	As at March 31, 2025
Due from related parties	USD	75.11	61.41
Net Exposure		**75.11**	**61.41**

Sensitivity

Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in exchange rates. The following tables demonstrate the sensitivity to a reasonably possible change in foreign exchange rate, with all other variables held constant.

Particulars	Change in FC exchange rate by	Impact on profit or loss			
		Increase in FC exchange rates		Decrease in FC exchange rates	
		Year ended March 31, 2026	Year ended March 31, 2025	Year ended March 31, 2026	Year ended March 31, 2025
USD Sensitivity	5%	3.76	3.07	(3.76)	(3.07)

Particulars	Change in FC exchange rate by	Impact on equity			
		Increase in FC exchange rates		Decrease in FC exchange rates	
		Year ended March 31, 2026	Year ended March 31, 2025	Year ended March 31, 2026	Year ended March 31, 2025
USD Sensitivity	5%	2.81	2.30	(2.81)	(2.30)

B. Credit risk

Credit risk is the risk that counterparty will default on its contractual obligations resulting in finance loss to the Company. The Company continuously monitors defaults of customers and other counterparties and incorporate this information into its credit risk control. The Company also uses expected credit loss model to assess the impairment loss in trade receivables and makes an allowance of doubtful trade receivables using this model.

i) Trade receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored. The Company limits its exposure to credit risk from trade receivables by establishing a appropriate credit period for customer. Loss rates are based on actual credit loss experience and past trends. Based on the historical data, loss on collection of receivable is not material hence no additional provision created.

The ageing analysis of trade receivables as of the reporting date is as follows:

Particulars	Less than 30 days	30 to 90 days	More than 90	Total
Trade receivables as of March 31, 2026	-	-	0.52	**0.52**
Trade receivables as of March 31, 2025	-	-	0.52	**0.52**

Receivables that were neither past due nor impaired relate to a number of customers for whom there was no recent history of default.

Movement in expected credit loss

Particulars	As at March 31, 2026	As at March 31, 2025
Balance at the beginning of the year	0.52	-
Written off/provided during the year	-	0.52
Balance at the end of the year	**0.52**	**0.52**

II) Other financials assets

For cash & cash equivalents and other bank balances - Since the Company deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents, other bank balances and bank deposits is evaluated as very low.

For security deposits - Credit risk is considered low because the Company is in possession of the underlying asset.

C. Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, maintain optimum levels of liquidity to meet its cash and collateral requirements. It maintains adequate sources of financing including loans from banks at an optimized cost.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

As at March 31, 2026	Less than 12 months	1 to 5 years	> 5 years	Total
Trade payables (refer note 16)	7.60	-	-	7.60
Borrowings (refer note 14)*	-	740.00	-	740.00
Other financial liabilities (refer note 17)	12.04	-	-	12.04
Total	**19.64**	**740.00**	**-**	**759.64**

As at March 31, 2025 restated	Less than 12 months	1 to 5 years	> 5 years	Total
Trade payables (refer note 16)	8.12	-	-	8.12
Borrowings (refer note 14)	-	-	740.00	740.00
Other financial liabilities (refer note 17)	12.83	-	-	12.83
Total	**20.95**	**-**	**740.00**	**760.95**

*Borrowing is the undiscounted value of 0.01% Non-convertible Non-cumulative redeemable preference shares.

Note 36: Revenue from contracts with customers

(i) Disaggregated revenue information

In the following table, revenue is disaggregated by major products/service lines and timing of revenue recognition:

Particulars	Timing of revenue recognition	Year ended March 31, 2026	Year ended March 31, 2025
Sale of Goods	At point in time	-	24.25
Other Operating Income	At point in time	-	0.36
		-	**24.61**

(ii) Contract Balances

Assets and liabilities related to contracts with customers:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Contract liability - Revenue received in advance (refer Note 18)	-	1.31

Reconciling the amount of revenue recognized in the statement of profit and loss with the contracted price

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Revenue as per contract	-	24.61
Revenue from contract with customers	-	**24.61**

Note 37 : Commitments and Contingencies

There is no contingent liability and capital commitments as at March 31, 2026.

Note 38: Employee Share Compensation Expense

On April 3, 2021, PDS Limited (the "Holding Company") established the PDS Multinational Fashions Limited – Employee Stock Option Plan 2021 – Plan A ('Plan A') in which entitles key managerial personnel and senior employees are entitled to purchase shares of the Company. On July 27, 2021, the Holding Company established the PDS Multinational Fashions Limited Employee stock option plan 2021 – Plan B ('Plan B') through Direct and through Trust route for other KMP and senior employees. The plans are designed to provide incentives to the employees of the Company to deliver long-term returns. Vesting of the options would be subject to continuous employment with the Company and hence the options would vest with passage of time. The fair value per share of ESOP is determined based on the closing price of Holding Company's share on the date of grant. The fair value of the options is estimated using the Black-Scholes-Merton option-pricing model.

Options granted under the plan are for no consideration and carry no dividend or voting rights. On exercise, each option is convertible into one equity share. The key terms and conditions related to the grants under these plans are as follows; all options are to be settled by the delivery of shares.

(i) Measurement of fair value

The Fair value of ESOPs granted under Plan A and Plan B have been measured using the Black-Scholes option-pricing model using the following assumptions, sorted according to their grant dates:

Particulars	As at March 31, 2026	As at March 31, 2025
Weighted average Grant date fair value, per share	NA	NA
Weighted average Exercise price, per share	NA	NA
Assumptions used:		
Volatility	NA	NA
Expected lives (in years)	NA	NA
Risk Free Interest rates	NA	NA
Dividend Yield Rate	NA	NA

Note 38 : Employee Share Compensation Expense (Cont'd)

(ii) Summarized Movement

Particulars	As at March 31, 2026		As at March 31, 2025	
	Number of Options	Weighted average exercise price (INR)	Number of Options	Weighted average exercise price (INR)
Opening balance	5,000	219.00	10,000	219.00
Granted / Transferred during the year	-	-	-	-
Exercised during the year	-	-	5,000	219.00
Forfeited/ Transfer In/ Out during the year	5,000	219.00	-	-
Closing balance	-	-	5,000	219.00

Expected volatility during the expected term of the options is based on historical volatility of the observed market prices of the Holding Company's publicly traded equity shares during 5 years before the date of Grant. The Group believes that such measure of volatility is currently the best available indicator of the expected volatility used in these estimates.
The expected life of the ESOP is estimated based on the vesting term and contractual term of the ESOP, as well as expected exercise behaviour of the employee who receives the ESOP.
Risk-free interest rates are determined using the implied yield currently available for India government issues with a remaining term equal to the expected life of the options.
Expected dividend yields are based on the annualised approved dividend rate and the market price of Holding Company's common stock at the time of grant. No assumption for a future dividend rate change is included unless there is an approved plan to change the dividend in the near term.
The fair value per share of ESOP is determined based on the closing price of Holding Company's share on the date of grant.
The Company's share based payment expense recognised in the statement of profit and loss in respect of the above plans in the current year is Nil (March 31, 2025 : ₹ 0.98)

Note 39 : Additional information, as required under Schedule III Companies Act, 2013

(a) The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.
(b) The Company does not have any transactions with companies struck off.
(c) The Company has not revalued its property, plant and equipment during the current or previous year.
(d) The Company has not been declared as willful defaulter by any bank or financial institution or government or any government authority.
(e) The Company has complied with the number of layers prescribed under the Companies Act, 2013.
(f) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

[This space has been left blank intentionally]

Note 40 : Ratio Analysis

Ratio	Numerator	Denominator	As at March 31, 2026	As at March 31, 2025	Variance
Current Ratio (in times)	Total current assets	Total current Liabilities	13.72	13.75	0%
Return on Equity Ratio (in %)^^	Profit for the year less Preference dividend (if any)	Average Total Equity	-8.86%	420.73%	-102%
Trade Receivables turnover ratio (in times)*	Revenue from operations	Average trade receivables	NA**	0.60	-100%
Trade Payable Turnover Ratio (in times)	Purchase of Stock in Trade	Average Trade Payables	3.52	2.98	18%
Inventory Turnover Ratio (in times)*	Revenue from operations	Average Inventory	NA**	9.57	-100%
Debt equity ratio (in times)^^	Total debt	Shareholder's equity	13.58	11.47	18%
Debt Service Coverage Ratio (in times)^^	Earning for Debt Service = Net Profit after taxes + Non-cash operating expenses + Interest + Other non-cash adjustments	Debt service = Interest payments + Principal repayments	0.92	2.17	-58%
Net capital turnover ratio (in times)*	Revenue from operations	Working capital (i.e. Total current assets less Total current liabilities)	NA**	0.07	-100%
Net profit ratio (in %)*	Profit for the year	Revenue from operations	NA**	171.82%	-100%
Return on Capital employed (in %)^^	Profit before tax and finance costs	Capital employed = Tangible net worth + Deferred tax liabilities + Total Debt	0.59%	5.03%	-88%

Note:-
* Due to no revenue in the curren year.
** Not applicable in current year
^^ Due to loss incurred during the year.

Note 40: Reconcillation of liabilities arising from Company's financing activities

Particulars	As at March 31, 2025	Cash flow		Non cash item	As at March 31, 2026
		Addition	Repayment	Others	
Borrowings	740.00	-	-	-	740.00
Total	**740.00**	-	-	-	**740.00**

Particulars	As at March 31, 2024	Cash flow		Non cash item	As at March 31, 2025
		Addition	Repayment	Others	
Borrowings	740.00	-	-	-	740.00
Total	**740.00**	-	-	-	**740.00**

Note 41: Leases

The Company has certain leases of office premises with lease terms of 12 months or less and leases of office equipment with low value amounting to ₹1.42 lakhs (March 31,2025: ₹1.63 lakhs). The Company applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for these leases as per Ind AS 116.

Note 42: Subsequent Events

No events have occurred between the balance sheet date to the date of issue of these financial statements that could affect the values stated in the financial statements as at March 31, 2026.

Note 43: Audit Trail

The Ministry of Corporate Affairs (MCA) has prescribed a requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted by the Companies (Accounts) Amendment Rules 2021 requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.

The Company uses an accounting software for maintaining its books of account. During the year ended March 31, 2026, the Company had not enabled the feature of recording audit trail (edit log) at the database level for the said accounting software to log any direct data changes as it would impact database performance significantly. Audit trail (edit log) is enabled at the application level as part of standard framework and the Company's users have access to perform transactions only from the application level.

Additionally, the audit trail has been preserved by the Company as per the statutory requirements for record retention where such feature was enabled.

Note 44: Transfer pricing

The Company has established a comprehensive system on maintenance of information and documents as required by the transfer pricing legislation under 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for the International transactions entered into with the associated enterprises during the year and expects such records to be in existence latest by the due date as required under law. The management is of the opinion that its international transactions are at arm's length and the aforesaid legislation will not have any impact on the financial statements.

Note 45: Comparatives

The previous year's figures have been regrouped/ rearranged wherever necessary, to make them comparable to those of current year.

Independent Auditor's Report

To the Members of Nexstyle Apparel Manufacturing Limited

Report on the Audit of the Financial Statements

Opinion

1. We have audited the accompanying financial statements of **Nexstyle Apparel Manufacturing Limited** ('the Company'), which comprise the Balance Sheet as at 31 March 2026, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2026, and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Directors' Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated

The Directors' report is not made available to us at the date of this auditor's report. We have nothing to report in this regard

Responsibilities of Management for the Financial Statements

5. The accompanying financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

   - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

   - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls

   - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;

- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

9. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

10. Based on our audit, we report that the Company has not paid or provided for any managerial remuneration during the year. Accordingly, reporting under section 197(16) of the Act is not applicable.

11. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act we give in the Annexure I a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

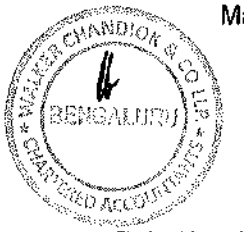
12. Further to our comments in Annexure I, as required by section 143(3) of the Act based on our audit, we report, to the extent applicable, that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying financial statements;

b) Except for the matters stated in paragraph 12(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The financial statements dealt with by this report are in agreement with the books of account;

d) In our opinion, the aforesaid financial statements comply with Ind AS specified under section 133 of the Act;



e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2026 from being appointed as a director in terms of section 164(2) of the Act;

f) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in paragraph 12(b), above on reporting under section 143(3)(b) of the Act and paragraph 12(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);

g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls, refer to our separate report in Annexure II wherein we have expressed an unmodified opinion; and

h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us :

i. The Company does not have any pending litigation which would impact its financial position as at 31 March 2026;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2026;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2026.

iv.

a. The management has represented that, to the best of its knowledge and belief, as disclosed in note 36(h) to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any person(s) or entity(ies), including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;

b. The management has represented that, to the best of its knowledge and belief, as disclosed in note 36(h) to the financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.

v. The Company has not declared or paid any dividend during the year ended 31 March 2026.

vi. As stated in note 37 to the financial statements and based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2025, has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has been operated throughout the year for all relevant transactions recorded in the software, except that, audit trail feature was not enabled at the database level for such accounting software to log any direct data changes. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with, where such feature is enabled. Furthermore, the audit trail has been preserved by the Company as per the statutory requirements for record retention where the audit trail feature was enabled.

Annexure I referred to in paragraph 11 of the Independent Auditor's Report of even date to the members of Nexstyle Apparel Manufacturing Limited on the financial statements for the year ended 31 March 2026

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we report that:

(i) The Company does not have any property, plant and equipment, intangible assets, right-of-use assets or investment property and accordingly, reporting under clause 3(i) of the Companies (Auditor's Report) Order, 2020 (hereinafter referred to as 'the Order') is not applicable to the Company.

(ii)(a) The Company does not hold any inventory. Accordingly, reporting under clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned working capital limits by banks or financial institutions on the basis of security of current assets at any point of time during the year. Accordingly, reporting under clause 3(ii)(b) of the Order is not applicable to the Company.

(iii) The Company has not provided any guarantee or security or granted any advances in the nature of loans to companies, firms and limited liability partnerships during the year. Further, the Company has made investments in and granted unsecured loans to companies during the year, in respect of which:

(a) The Company has provided loans to others during the year as per details given below:

(Amounts Rs. in lakhs)

Particulars	Guarantees	Security	Loans	Advances in the nature of loans
Aggregate amount granted during the year (Rs.): - Others (Holding company)	Nil	Nil	250.00	Nil
Balance outstanding as at balance sheet date (Rs.): - Others(Holding company)	Nil	Nil	Nil	Nil

(b) In our opinion, and according to the information and explanations given to us, the investments made and terms and conditions of the grant of all loans are, prima facie, not prejudicial to the interest of the Company.

(c) In respect of loans granted by the Company, the schedule of repayment of principal and payment of interest has been stipulated and the repayments/receipts of principal and interest are regular.

(d) There is no overdue amount in respect of loans granted to such companies, firms, LLPs or other parties.

(e) The Company has granted loan which had fallen due during the year and was repaid on or before the due date. Further, no fresh loans were granted to any party to settle the overdue loans.

(f) The Company has not granted any loan which is repayable on demand or without specifying any terms or period of repayment.

(iv) In our opinion, and according to the information and explanations given to us, the Company has complied with the provisions of section 186 of the Act in respect of loans and investments made. Further, the Company has not entered into any transaction covered under section 185 of the Act.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, reporting under clause 3(v) of the Order is not applicable to the Company.

(vi) The Central Government has not specified maintenance of cost records under sub-section (1) of section 148 of the Act, in respect of Company's business activities. Accordingly, reporting under clause 3(vi) of the Order is not applicable.

(vii)(a) In our opinion and according to the information and explanations given to us, the Company is regular in depositing undisputed statutory dues including goods and services tax, income-tax, cess and other material statutory dues, as applicable, with the appropriate authorities. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, we report that there are no statutory dues referred to in subclause (a) above that have not been deposited with the appropriate authorities on account of any dispute.

(viii) According to the information and explanations given to us, we report that no transactions were surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961) which have not been previously recorded in the books of accounts.

(ix)(a) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of its loans or borrowings or in the payment of interest thereon to any lender.

(b) According to the information and explanations given to us including representation received from the management of the Company, and on the basis of our audit procedures, we report that the Company has not been declared a willful defaulter by any bank or financial institution or government or any government authority

(c) In our opinion and according to the information and explanations given to us, the Company has not raised any money by way of term loans during the year and did not have any term loans outstanding at the beginning of the current year. Accordingly, reporting under clause 3(ix)(c) of the Order is not applicable to the Company.

(d) In our opinion and according to the information and explanations given to us, and on an overall examination of the financial statements of the Company, funds raised by the Company on short term basis have, prima facie, not been utilised for long term purposes.

(e) In our opinion and according to the information and explanations given to us and on an overall examination of the financial statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries.

(f) In our opinion and according to the information and explanations given to us, the Company has not raised any loans during the year on the pledge of securities held in its subsidiaries.

(x) (a) The Company has not raised any money by way of initial public offer or further public offer (including debt instruments), during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or (fully, partially or optionally) convertible debentures during the year. Accordingly, reporting under clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company or no fraud on the Company has been noticed or reported during the period covered by our audit.

(b) According to the information and explanations given to us including the representation made to us by the management of the Company, no report under sub-section 12 of section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014, with the Central Government for the period covered by our audit.

(c) According to the information and explanations given to us including the representation made to us by the management of the Company, there are no whistle-blower complaints received by the Company during the year.

(xii) The Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, reporting under clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, all transactions entered into by the Company, with the related parties are in compliance with section 188 of the Act. The details of such related party transactions have been disclosed in the standalone financial statements, as required under Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified in Companies (Indian Accounting Standards) Rules 2015 as prescribed under section 133 of the Act. Further, according to the information and explanations given to us, the Company is not required to constitute an audit committee under section 177 of the Act.

(xiv) According to the information and explanations given to us, the Company is not required to and consequently, does not have an internal audit system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanation given to us, the Company has not entered into any non cash transactions with its directors or persons connected with its directors and accordingly, reporting under clause 3(xv) of the Order with respect to compliance with the provisions of section 192 of the Act are not applicable to the Company.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, reporting under clauses 3(xvi)(a), (b) and (c) of the Order are not applicable to the Company.

(d) Based on the information and explanations given to us and as represented by the management of the Company, the Group (as defined in Core Investment Companies (Reserve Bank) Directions, 2016) does not have any CIC.

(xvii) The Company has not incurred cash losses in the current financial year but had incurred cash losses amounting to Rs. 48.43 lakhs in the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, reporting under clause 3(xviii) of the Order is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information in the standalone financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) According to the information and explanations given to us, the Company does not meet the criteria as specified under sub-section (1) of section 135 of the Act read with the Companies (Corporate Social Responsibility Policy) Rules, 2014 and according, reporting under clause 3(xx) of the Order is not applicable to the Company.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure II

Independent Auditor's Report on the internal financial controls with reference to the financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

1. In conjunction with our audit of the financial statements of Nexstyle Apparel Manufacturing Limited ('the Company') as at and for the year ended 31 March 2026, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ('the Guidance Note') issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements .

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2026, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the Institute of Chartered Accountants of India

Notes to the financial statements for the year ended March 31, 2026

Note 1: Corporate information

Nexstyle Apparel Manufacturing Limited is a Private Limited Company (hereinafter referred as 'the Company') domiciled in India was incorporated on February 12, 2025 and has its registered office at PDS Tower, 5th Floor, Plot No. 222, Udyog Vihar, Phase 1, Shankar Chowk Marg, Industrial Complex Dundahera, Gurgaon, Haryana, India, 122016. The Company is engaged in trading of ready to wear apparels, providing services to group companies engaged in the export of ready to wear apparels and sourcing & distribution of their products.

The financial statements of the Company for the year ended March 31, 2026 were approved by the Board of Directors and authorized for issue on September 1, 2026.

Note 2: Statement of compliance

The financial statements have been prepared as a going concern in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.
The accounting policies are applied consistently to all the periods presented in the financial statements.

Basis of preparation and presentation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the relevant accounting policies mentioned. The financial statements ar presented in ₹ and all values are rounded to the nearest Lakhs except where otherwise stated.

Recent accounting pronouncement

The Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

A. Amended Accounting Standards (Ind AS) and interpretations effective from the annual reporting periods beginning on or after April 01, 2025.

The MCA has notified below amendment which were effective from April 01,2025.

Amendment to Ind AS 21- "The Effects of Changes in Foreign Exchange Rates"

The amendment specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also requires the disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.
When applying the amendment, an entity cannot restate comparative information.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 1 - "Presentation of Financial Statements"

The Amendment elaborate on guidance set out in Ind AS 1 by:
• clarifying that the right to defer settlement of a liability for at least 12 months after the reporting period;
a) must have substance, and b) must exist at the end of the reporting period;
• stating that management's expectations around whether the settlement of a liability would be deferred or not, does not impact the classification of the liability;
• including requirements for liabilities that can be settled using an entity's own instruments; and
• stating that at the reporting date, the entity does not consider covenants that will need to be complied with in the future when considering the classification of the debt as current or non-current.
In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 7 and Ind AS 107 - Supplier Finance Arrangements

The Amendment introduced disclosure requirements with the objective to enable users of financial statements to assess how supplier finance arrangements affect an entity's liabilities, cashflows and exposure to liquidity risk.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 12 - International Tax Reform - Pillar Two Model Rules

The Amendment includes a temporary exception to the recognition and disclosure of deferred taxes arising from the implementation of the Pillar Two model rules; and additional disclosure requirements targeted at a reporting entity's exposure to income taxes in periods in which the Pillar Two Model legislation is enacted or substantively enacted but not yet in effect.
The amendments does not have a material impact on the Company's financial statements.

Note 2: Statement of compliance (Cont'd)

Recent accounting pronouncement (Cont'd)

B. Amendments effective from annual reporting periods beginning on or after April 01, 2026:
Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants - Amendments to Ind AS 1
Paragraph 74 of Ind AS 1 currently effective for the year ended 31 March 2026 requires the entity not to classify the liability as current, if there is a breach of a material covenant of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, however, the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

MCA vide notification dated August 13, 2025, has introduced amendment under Paragraph 74 of Ind AS 1 which requires the entity to classify the liability as current under the aforementioned situation because, at the end of the reporting period, it does not have the right to defer its settlement for at least twelve months after that date. Such amendment has been made effective for annual reporting periods beginning on or after April 1, 2026 retrospectively in accordance with Ind AS 8.

This amendment is not expected to have a material impact on the Financial Statements.

Note 3: Material accounting policy information

a) Material accounting judgements, estimates and assumptions
The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Judgements:
In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

i) Income taxes
The Company is subject to income tax laws as applicable in India. Significant judgment is required in determining provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

ii) Recoverability of deferred taxes
In assessing the recoverability of deferred tax assets, management considers whether it is probable that taxable profit will be available against which the losses can be utilised. The ultimate realisation of deferred tax assets is dependent upon the generation of future taxable income during the periods in which the temporary differences become deductible. Management considers the projected future taxable income and tax planning strategies in making this assessment.

iii) Contingencies
Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal and other claims. By virtue of their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgements and the use of estimates regarding the outcome of future events.

iv) Employee stock option plan
Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option or appreciation right, volatility and dividend yield and making assumptions about them. For the measurement of the fair value of equity-settled transactions with employees at the grant date, the Company uses a Black Scholes model. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 31.

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * CENGTLUBUI
Nexstyle Apparel Manufacturing Limited

Note 3: Material accounting policy information (Cont'd)

b) **Current versus non-current classification**

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

i) Expected to be realised or intended to be sold or consumed in normal operating cycle.

ii) Held primarily for the purpose of trading

iii) Expected to be realised within twelve months after the reporting period, or

iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

Liabilities:

A liability is current when:

i) It is expected to be settled in normal operating cycle

ii) It is held primarily for the purpose of trading

iii) It is due to be settled within twelve months after the reporting period, or

iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Operating cycle: The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. Based on the operation, the group has identified twelve months as its operating cycle.

c) **Revenue recognition**

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Company will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

The Company recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A 5-step approach is used to recognise revenue as below:

Step 1: Identify the contract(s) with a customer

Step 2: Identify the performance obligation in contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price to the performance obligations in the contract

Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

The Company recognises contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in its balance sheet. Similarly, if the Company satisfies a performance obligation before it receives the consideration, the Company recognises either a contract asset or a receivable in its balance sheet, depending on whether something other than the passage of time is required before the consideration is due.

Recognizing revenue from major business activities

(i) Rendering of services

Income from business support services rendered to group companies are recognized as the services are rendered based on a cost plus mark-up in accordance with the terms of respective arrangements.

'Unbilled revenue' included in other financial assets represent revenue in excess of billings as of the Balance Sheet date. 'Unearned revenues' included in financial liabilities represent billing in excess of revenue recognized.

d) **Other income**

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Any Other Income is recognized on an accrual basis.

Note 3: Material accounting policy information (Cont'd)

e) **Share based payments**

The Company has equity-settled share-based remuneration plans for its employees. Where employees are rewarded using share-based payments, the fair value of employees' services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions).

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest.

Upon exercise of share options, the proceeds received, net of any directly attributable transaction costs, are allocated to share capital up to the nominal (or par) value of the shares issued with any excess being recorded as share premium.

f) **Provisions, Contingent liabilities and Contingent assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability is disclosed in the case of;
i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle obligation;
ii) a present obligation arising from past events, when no reliable estimate is possible.

Contingent assets are neither recognised nor disclosed. However,when realisation of income is virtually certain, related asset is recognised.
Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date and adjusted where necessary to reflect the current best estimate of obligation or asset.

g) **Financial instruments**

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity.Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

(a) Financial assets

(i) **Initial recognition and measurement**

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially recognised at fair value. In case of financial assets which are recognised at fair value through profit or loss (FVTPL), its transaction cost are recognised in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

(ii) **Classification and subsequent measurement**

For purposes of subsequent measurement, financial assets are classified in following categories:
- Financial Asset carried at amortised cost
- Financial Asset at fair value through other comprehensive income (FVTOCI)
- Financial Asset at fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

•Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

•Financial asset at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

•Financial asset at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

• Equity investment

Investments representing equity interest in associates/ subsidiary are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

Note 3: Material accounting policy information (Cont'd)

g) Financial instruments (cont'd)

De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when:

(i) The contractual rights to receive cash flows from the asset has expired, or

(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, security deposits received etc.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at amortised cost
- Financial liabilities at fair value through profit or loss (FVTPL)

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

(c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously

h) Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks ofdefault occurring as the weights. Credit loss is the difference between all contractual cashflows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115 Revenue from contracts with customers, the Company applies simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected life time losses to be recognised after initial recognition of receivables. For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve months ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on twelve-months ECL.

i) Impairment of non-financial assets

Non- financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non- financial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognised are accordingly reversed in the statement of profit and loss.

Note 3: Material accounting policy information (Cont'd)

j) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

(a) In the principal market for the asset or liability, or

(b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

k) Taxes on income

Current Income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income (OCI) or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets are offset against current tax liabilities if, and only if, a legally enforceable right exists to set off the recognised amounts and there is an intention either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

l) Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

m) Earnings per share (EPS)

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra ordinary items.

i) Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

ii) For the purpose of calculating Diluted Earning per share, the number of shares comprises of weighted average shares considered for deriving basic earning per share and also the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. A transaction is considered to be antidilutive if its effect is to increase the amount of EPS, either by lowering the share count or increasing the earnings.

Note 25: Capital management

The Company aims to manage its capital efficiently so as to safeguard its ability to continue as a going concern and to optimize returns to our shareholders. The capital structure of the Company is based on management's judgement of the appropriate balance of key elements in order to meet its strategic and day-to-day needs. We consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares.

The Company policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. The Company will take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

The Company's capital and adjusted net debt position is given below:

Particulars	As at March 31, 2026	As at March 31, 2025
Borrowings (refer note 11)	251.28	-
Less: Cash and cash equivalents (refer note 6)	(2,072.56)	(4,435.00)
Adjusted net debt (A)	**(1,821.28)**	**(4,435.00)**
Equity share capital (refer note 9)	4,779.94	4,435.00
Other equity (refer note 10)	44.61	(48.43)
Total capital (B)	**4,824.55**	**4,386.57**
Capital and net debt (A+B)	**3,003.27**	**(48.43)**

a) No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2026 and March 31, 2025.
b) For the purpose of capital management, capital includes issued equity capital and all other reserves attributable to the equity holders of the Company.

Note 26: Segment Information

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). The CODM is considered to be the Board of Directors who makes strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.
The business activities of the Company consists of providing business Support Services to its step down subsidiary. The disclosures as required under Ind AS 108 on operating segment reporting has not been provided as the Company deals in one business segment.

Geographical information
As the Company exports its services and there is no secondary segment for the Company. Information on the geographic segment is as follows:

	Year ended March 31, 2026	From February 12, 2025 to March 31, 2025

Contract asset - unbilled revenue (refer note 5)	320.58	-

c) The terms of repayment for trade receivable is of 90 days from the date of invoice.

Particulars	As at March 31, 2026	As at March 31, 2025
Contract assets at the beginning of the year	-	-
Revenue recognised during the year	320.58	-
Revenue billed/ accrued during the year	-	-
Contract assets at the end of the year*	**320.58**	**-**
Contract liabilities at the beginning of the year	-	-
Advance received/ (adjusted) from customers during the year, net	-	-
Contract liabilities at the end of the year	**-**	**-**

Reconciling the amount of revenue recognized in the statement of profit and loss with the contracted price:

Revenue as per contract	320.58	-
Revenue from contract with customers	**320.58**	**-**

*Included in trade receivables, refer note 5.

[This page has been left blank intentionally]

Nexstyle Apparel Manufacturing Limited

(All amounts in ₹ in lakhs, unless otherwise stated)

Note 28 : Fair value disclosure

	As at March 31, 2026	As at March 31, 2025
a) The carrying amounts of financial assets by categories is as follows:		
Financial assets measured at cost		
Investment in subsidiaries (refer note 4)	4,089.77	-
Total (A)	4,089.77	-
Financial assets measured at amortised cost		
Trade receivables (refer note 5)	320.58	-
Cash and cash equivalents (refer note 6)	2,072.56	4,435.00
Other financial assets (refer note 7)	6.34	1.00
Total (B)	2,399.48	4,436.00
Total (A+B)	6,489.25	4,436.00
b) The carrying amounts of financial liabilities by categories is as follows:		
Financial liabilities measured at amortised cost		
Borrowings (refer note 11)	251.28	-
Trade payables (refer note 13)	0.91	-
Other financial liabilities (refer note 12)	0.13	49.43
Total (A)	252.32	49.43
Financial liabilities measured at fair value through profit and loss		
Contingent consideration payable (refer note 12)	1,399.00	-
Total (B)	1,399.00	-
Total (A+B)	1,651.32	49.43

The fair value of trade receivables, cash and bank balances, other financial assets, borrowings, trade payables and other financial liabilities are considered to be equal to the carrying amount of these items due to their short term nature.

Note 29 : Fair value Hierarchy

All financial instruments for which fair value is recognized or disclosed are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.
Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.

The fair value hierarchy of financial liability as at March 31, 2026 is as follows:

	As at March 31, 2026	Fair value measurement at end of the reporting period using		
		Level 1	Level 2	Level 3
Financial liabilities measured at fair value through profit and loss				
Contingent consideration payable (refer note 12)	1,399.00	-	-	1,399.00
	1,399.00	-	-	1,399.00

There were no financial assets or liabilities carried at fair value as at March 31, 2025.

The movements in fair value measurements within level 3 during the year are as follows:

Particulars	As at March 31, 2026	As at March 31, 2025
Financial liabilities measured at fair value through profit and loss:		
At the beginning of the year	-	-
Addition	1,421.44	-
Total gain recognised in statement of profit and loss	(22.44)	-
At the end of the year	1,399.00	-

There have been no transfer between level 1, level 2 and level 3 category during the year ended March 31, 2026 and March 31, 2025.

Contingent consideration payable: The fair value of contingent consideration payable is determined using Monte Carlo Simulation method under income approach.

Particulars	Level	Valuation technique	Unobservable input	Relationship of unobservable input
Financial liabilities at fair value through statement of profit and loss	Level 3	Income approach	Discount rate	Increase/decrease in discount rate would result in decrease/increase in fair value

Note 30 : Financial risk management objectives and policies

The Company's principal financial liabilities comprise borrowings, trade payables, dues to related party, contingent consideration payable, other and interest accrued but not due on borrowings. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantees to support its operations.
The Company's principal financial assets includes investment in subsidiaries, trade receivables, cash and cash equivalents and interest accrued but not due on fixed deposits, interest receivable from related party.
The Company is exposed to market risk, liquidity risk and credit risk. The Company's senior level personnel oversees the management of these risks.

A. Market risk
Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk applicable in case of the Company primarily includes interest rate risk, currency risk and equity price risk.

(i) Interest rate risk
Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's is not exposed to the risk of changes in market interest rates as it has only fixed rate borrowing.

(ii) Currency risk
Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in exchange rates. The Company's exposure to foreign currency risk at the end of the reporting period are as follows:

Particulars	Currency	As at March 31, 2026	As at March 31, 2025
Trade receivable	USD	320.58	-
Net exposure		320.58	-

The following tables demonstrate the USD sensitivity to a reasonably possible change in foreign exchange rate, with all other variables held constant.

Change in FC exchange rate by	Impact on profit or loss			
	Increase in FC exchange rates		Decrease in FC exchange rates	
	Year ended March 31, 2026	From February 12, 2025 to March 31, 2025	Year ended March 31, 2026	From February 12, 2025 to March 31, 2025
5%	16.03	-	(16.03)	-

Change in FC exchange rate by	Impact on other equity			
	Increase in FC exchange rates		Decrease in FC exchange rates	
	Year ended March 31, 2026	From February 12, 2025 to March 31, 2025	Year ended March 31, 2026	From February 12, 2025 to March 31, 2025
5%	11.99	-	(11.99)	-

(iii) Equity price risk
The price risk is the risk that the fair values of investment securities decrease as a result of changes in the levels of equity indices or the value of individual securities. The Company does not have any listed securities included in financial assets at fair value through profit or loss and hence is not exposed to any price risk.

[This page has been left blank intentionally]

Nexstyle Apparel Manufacturing Limited

Note 30 : Financial risk management objectives and policies (cont'd)

B. Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, maintain optimum levels of liquidity to meet its cash and collateral requirements. It maintains adequate sources of financing including loans from banks at an optimized cost.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

As at March 31, 2026	Less than 12 months	1 to 5 years	> 5 years	Total
Borrowings (refer note 11)	251.28	-	-	251.28
Interest accrued but not due on borrowings (refer note 12)	0.13	-	-	0.13
Trade payable (refer note 13)	0.91	-	-	0.91
Contingent consideration payable (refer note 12)	523.00	898.44	-	1,421.44
Total	775.32	898.44	-	1,673.76

As at March 31, 2025	Less than 12 months	1 to 5 years	> 5 years	Total
Due to related party(refer note 12)	48.43	-	-	48.43
Other payable(refer note 12)	1.00	-	-	1.00
Total	49.43	-	-	49.43

C. Credit risk

Credit risk is the risk that counterparty will default on its contractual obligations resulting in finance loss to the Company. The Company continuously monitors defaults of customers and other counterparties and incorporate this information into its credit risk control. The Company also uses expected credit loss model to assess the impairment loss in trade receivables and makes an allowance of doubtful trade receivables using this model.

(i)Trade receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored. The Company limits its exposure to credit risk from trade receivables by establishing a appropriate credit period for customer. Loss rates are based on actual credit loss experience and past trends. The Company creates provision for doubtful debts on case to case basis. The trade receivable outstanding as at March 31, 2026 includes only unbilled revenue and hence the company is not exposed to credit risk related to trade receivable.

(ii)Other financials assets

Credit risk related to the financial assets involving cash and cash equivalents, interest accrued on term deposits and interest receivable from related party. The Company does not anticipate any significant risk of default on these assets. To reduce this risk, the Company has concentrated as mentioned below:-

For cash and cash equivalents and interest accrued on fixed deposits- Since the Company deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents and bank deposits is evaluated as low.

For interest receivable from related party- The balance is from the related party which is the Holding company. Therefore, the credit risk is evaluated as low.

For the financial assets other than trade receivables:

1. The Company on the basis of historical analysis does not have any financial assets where there is a risk of defautt.
2. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets as at March 31, 2026 and March 31, 2025.

[This page has been left blank intentionally]

Note 31: Share based compensation

As on March 31, 2026, the Company had following share based payment arrangements:

A. NexStyle Apparel Manufacturing Limited - Employee Stock Option Plan 2025 ("NexStyle ESOP 2025")

(I) Brief description of the share based payment arrangement

On March 29, 2025 the Company has established the NexStyle Apparel Manufacturing Limited - Employee Stock Option Plan 2025 ("NexStyle ESOP 2025"). The plan are designed to incentivise Mr. Sanjay Jain for optimizing synergies across manufacturing operations. During the period from February 12, 2025 to March 31, 2025, the Company has granted 34,49,444 equity settled stock options (ESOPs) under this plan.

Options granted under the plan are for no consideration and carry no dividend or voting rights. On exercise, each option is convertible into one equity share. The key terms and conditions related to the grants under these plans are as follows; all options are to be settled by the delivery of shares.

Grant date	Number of instruments*	Exercise price*	Vesting period	Exercise period
FY 2025-26	-	-	NA	NA
	-			
FY 2024-25	3,449,444	₹ 10.00	1 year	4 years
	3,449,444			

ii) Summarized information about movement in NexStyle ESOP 2025

Particulars	March 31, 2026		March 31, 2025	
	Number of options*	Weighted average exercise price per share	Number of options*	Weighted average exercise price per share (₹)*
Outstanding at the beginning of the year	3,449,444	10.00	-	-
Granted during the year	-	-	3,449,444	10.00
Exercised during the year	(3,449,444)	10.00	-	-
Outstanding at the end of the year	-	-	3,449,444	10.00
Exercisable at the end of the year	-	-	-	-

The Company has charged ₹ 36.69 (March 31, 2025: ₹ Nil) to the profit and loss in respect of options granted under NexStyle ESOP 2025.

* The number of instrument and exercise price are in absolute figures.

iii) Fair value of option granted during the year

The Fair value of ESOPs granted under the plan have been measured using the Black-Scholes option-pricing model using the following assumptions, sorted according to their grant dates:

Particulars	31/03/2026	31/03/2025
Weighted average grant date fair value, per share (in ₹)	NA	10.09
Weighted average Exercise price, per share (in ₹)	NA	10.00
Weighted average assumptions used:		
Expected volatility	NA	0.10%
Expected lives (in years)	NA	1.50
Risk-free interest rates	NA	6.83%
Expected dividend yields	NA	0.00%

Expected volatility is based on the average Underlying Annualized Volatility as on March 29, 2025, of BSE 500. The Company believes that such measure of volatility is currently the best available indicator of the expected volatility used in these estimates.

The expected life of the ESOP is estimated based on the vesting term and contractual term of the ESOP, as well as expected exercise behavior of the employee who receives the ESOP.

Risk-free interest rates are determined using the implied yield currently available for India government issues with a remaining term equal to the expected life of the options.

Since, the subsidiary has no history of declaring dividend, the expected dividend yield is considered to be Nil.

The fair value per share of ESOP is determined using the face value per share of the subsidiary.

B. Grant of shares to non executive director

On November 28, 2025, the Company has granted 77,000* Shares of Knit Gallery India Private Limited (the "subsidiary") to Mr. Sanjay Jain at the consideration of ₹100.00*. Mr. Sanjay Jain, being the non executive director of the company falls under the scope of IND AS 102, Share based payment.

In accordance with the requirements of Ind AS 102, the fair value of the equity instruments granted, amounting to ₹344.95, has been recognized as employee share-based compensation expense in the financial statements for the year ended March 31, 2026.

*The number of shares and consideration mentioned is in absolute figures.

C. Share based payment expense recognised in the Statement of Profit and Loss in respect of the above plans are as follows:

Particulars	Year ended March 31,	From February 12, 2025 to March 31, 2025
Share based payment expense	381.64	-

Note 32 : Commitments and Contingencies
There is no contingent liability and capital commitments as at March 31, 2026 and March 31, 2025.

Note 33 : Transfer pricing
The Company has established a comprehensive system of maintenance of information and documents as required by the transfer pricing legislation under sections 92-92F of the Income Tax Act 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company regularly updates the documentation for the International transactions entered into with the associated enterprises during the period as required under law. The Management is of the opinion that its international transactions are at arm's length so that the aforesaid legislation will not have any impact on the financial statements, particularly on the amount of tax expense and that of provision for taxation.

Note 34 : Subsequent Events
No events have occurred between the balance sheet date to the date of issue of these financial statements that could affect the values stated in the financial statements as at March 31, 2026.

Note 35 : Ratio analysis

Ratio	Numerator	Denominator	As at March 31, 2026	As at March 31, 2025	Variation
Current ratio (in times)*	Total current assets	Total current liabilities	3.16	89.74	-96%
Debt-Equity Ratio (in times)**	Total debt	Shareholder's equity	0.05	-	100%
Debt service coverage ratio (in times)**	Earning for Debt Service = Net Profit after taxes + Non-cash operating expenses + Interest + Other non-cash adjustments	Debt service = Interest payments + Principal repayments	716.72	-	100%
Return on equity ratio (in %)***	Profit for the year less Preference dividend (if any)	Average Shareholder's equity	1.22%	-1.10%	-211%
Trade receivables turnover ratio (in times)****	Revenue from operations	Average trade receivables	2.00	-	100%
Trade payables turnover ratio(in times)*****	Other expenses	Average trade payables	13.93	-	100%
Net profit ratio (in %)#	Profit for the year	Revenue from operations	17.58%	0.00%	100%
Return on capital employed (in %)##	Earning before interest and Taxes	Capital employed = Tangible net worth + Total debt + Deferred Tax liability	1.49%	-1.10%	-235%
Return on Investment (in %)	Return on investment	Investment made	6.00%	6.00%	0%
Net capital turnover ratio (in times)#	Revenue from operations	Working capital (i.e. Total current assets less Total current liabilities)	19.49%	0.00%	100%

The company does not have any inventory, hence inventory Turnover Ratio is not applicable.

* Due to increase in current liabilities
** Due to borrowings in the current year
*** Due to increase in profit and average shareholder's fund
**** Due to unbilled revenue in the current year
***** Due to trade payables in the current year
Due to revenue during the year
Due to increase in profit and capital employed during the year

Nexstyle Apparel Manufacturing Limited
CIN : U47711MH2025PLC439875
Notes to the financial statements for the year ended March 31, 2026

Note 36: Additional information, as required under Schedule III to the Companies Act, 2013
(a) The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.
(b) The Company does not have any transactions with companies struck off.
(c) The Company has not revalued its property, plant and equipment (including right-of-use assets) or intangible assets or both during the current or previous year.
(d) The Company has not been declared as wilful defaulter by any bank or financial institution or government or any government authority.
(e) The Company have not traded or invested in crypto currency or virtual currency during the financial year.
(f) The Company does not have such transactio which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assesments under the Income Tax Act, 1961 (such as, survey or any other relevant provisions of the Income Tax Act, 1961.
(g) The Company has complied with the number of layers prescribed under the Companies Act, 2013.
(h) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party(s) (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

Note 37 : Audit trail
The Ministry of Corporate Affairs (MCA) has prescribed a requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted by the Companies (Accounts) Amendment Rules 2021 requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.
The Company uses an accounting software for maintaining its books of account. During the year ended March 31, 2026, the Company had not enabled the feature of recording audit trail (edit log) at the database level for the said accounting software to log any direct data changes as it would impact database performance significantly. Audit trail (edit log) is enabled at the application level as part of standard framework and the Company's users have access to perform transactions only from the application level.
Additionally, the audit trail has been preserved by the Company as per the statutory requirements for record retention where such feature was enabled.

Note 38: Prior year amounts have been regrouped / reclassified wherever necessary, to conform to the presentation in the current year, which are not material.

SIMPLE APPROACH HOME LIMITED
DIRECTOR'S REPORT
FOR THE YEAR ENDED 31st MARCH 2026

The directors present their annual report together with the audited financial statements for the year ended 31 March 2026.

PRINCIPAL ACTIVITY

The principal activity of the Company during the year ended 31 March 2026 was trading in home textiles and hard goods.

RESULTS

The Company's financial performance for the year ended 31 March 2026 and its financial position as at that date are set out in the financial statements on pages 6 to 14.

DIRECTORS

The directors of the Company during the period and up to the date of this report were:

Ashok Kumar Sanghi
Sandeep Malhotra

In accordance with the Company's articles of association, the directors retire and being eligible, will offer themselves for re-election.

PERMITTED INDEMNITY PROVISION

At no time during the financial year and up to the date of this director's report was there any permitted indemnity provision in force for the benefit of one or more directors of the Company (whether made by the Company or otherwise) or an associated company (if made by the Company).

DIRECTOR'S INTERESTS

At no time during the financial year or at the end of the financial year was the Company, or any of its holding or fellow subsidiaries a party to any arrangements to enable the Company's directors to acquire benefits from the Company by means of the acquisition of shares in or debentures of the Company or any other body corporate.

The directors had no material interest, either directly or indirectly, in any transactions, arrangements or contracts of significance to the business of the Company to which any of its holding companies or fellow subsidiaries were a party during the period.

MANAGEMENT CONTRACTS

The Company did not enter into any contract, other than the contracts of service with the directors or any person engaged in the full-time employment of the Company, whereby any individual, firm or body corporate undertakes the management and administration of the whole, or any substantial part of any business of the Company.

AUDITORS

The financial statements have been audited by Falcon Certified Public Accountants Limited, who retire and being eligible, offer themselves for re-appointment.

APPROVAL OF DIRECTOR'S REPORT

The report was approved by directors on 15th May 2026

INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF SIMPLE APPROACH HOME LIMITED
(Incorporated in Hong Kong with limited liability)

Opinion

We have audited the financial statements of SIMPLE APPROACH HOME LIMITED ("the Company") set out on pages 6 to 14, which comprise the statement of financial position as at 31st March 2026, and the statement of profit or loss, the statement of changes in equity, and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position as at 31st March 2026 and of its financial performance, and its cash flows for the year then ended, in accordance with the Hong Kong Financial Reporting Standard ("HKFRS") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditor's report thereon

The directors are responsible for the other information. The other information comprises all the information included in the reports of the directors but does not include the financial statements and our auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of directors for the financial statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRS issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The directors and those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body corporate, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors and those charged with governance, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

SIMPLE APPROACH HOME LIMITED
ACCOUNTING POLICIES AND EXPLANATORY NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH 2026

1. Corporate information

SIMPLE APPROACH HOME LIMITED ("the Company") is a company incorporated in Hong Kong with limited liability. The company's registered office is located at 7/F, Park Fook Industrial Building, 615-617 Tai Nan West Street, Cheung Sha Wan, Kowloon, Hong Kong. The principal activity of the Company is trading of home textiles and hard goods.

The immediate holding company is Simple Approach Ltd a limited liability company registered in Hong Kong.

2. Statement of compliance

The financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong, and the Hong Kong Companies Ordinance.

3. Basis of preparation

These financial statements have been prepared under historical cost convention. The financial statements are prepared in Hong Kong dollars, which is also the functional currency of the Company.

4. Changes in accounting policies and disclosures

a. HKICPA has issued several amendments to HKFRSs that are first effective for the current accounting period of the Company.

- HKSA 21 and HKFRS 1 (amendments) Lack of exchangeability

New and amended Standards and Interpretations issued that are not effective.

The Company has not early applied new and revised HKFRSs that have been issued but not yet effective for the financial year beginning on 1 April 2025. These new and revised HKFRS include the following which may be relevant to the Company.

3.a. Changes in accounting policies and disclosures (contd.)

	Effective for accounting periods beginning on or after
HKFRS 9 AND HKFRS 7 (amendments) Classification and measurements of financial instruments	1 January 2026
HKFRS 1, HKFRS 7, HKFRS 9, HKFRS 10 and HKFRS 7 annual improvements	1 January 2026
HKFRS 9 and HKFRS 7 (amendments) contracts Referencing nature dependent electricity	1 January 2026
HKFRS 18 (new standard) presentation and disclosure in financial statements	1 January 2026
HKFRS 19 (new standard) Subsidiaries without Public Accountability: Disclosures	1 January 2026
HKFRS 19 (amendments) Subsidiaries without Public Accountability: Disclosures	1 January 2027
HK Int 5 Hong Kong Interpretation 5 Presentation of Financial Statements (amendments) Classification by the Borrower of a Term Loan that contains a repayment on demand clause.	1 January 2027
HKFRS 10 and HKAS 28 (amendments) Sale or Contribution of Assets between an Investor and its	A date to be determined by the IASB

The Company is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial applications. So far it has been concluded that the adoption of them is unlikely to have a significant impact on the financial statements.

5. <u>Significant Accounting Policies</u>

(a) Revenue recognition

Revenue is recognized when it is probable that the economic benefit will flow to the Company and when the revenue can be measured reliably, on the following basis:

- Sale of goods is recognised when the goods are delivered, and the risks and rewards of ownership have passed to the customer.
- Interest income is recognised on a time proportion basis taking into account the principal outstanding and the interest applicable.

(b) Income tax

Income tax expense comprises current tax and deferred tax. Current tax comprises the estimated tax payable or receivable on the taxable income or loss for the year and any adjustments to the tax payable or receivable in respect of previous years. Deferred tax assets are recognised for unused tax losses, unused tax credits, and deductible temporary differences to the extent that is probable that future profits will be available against which they can be used.

5. Significant Accounting Policies (cont'd)

(c) Cash and cash equivalents.

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and other short-term highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the group's cash management are also included as a component of cash and cash equivalents.

(d) Translation of foreign currency

i. Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are prepared in Hong Kong dollars, which is also the functional currency of the Company.

ii. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

(e) Related parties

A party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and that person

- (i) has control or joint control over the Company;
- (ii) has significant influence over the Company; or
- (iii) is a member of the key management personnel of the Company or of a parent of the Company.

(b) the party is an entity where any of the following conditions applies:

- (i) the entity and the Company are members of the same group;
- (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the entity)
- (iii) the entity and the Company are joint ventures of the same third party.
- (iv) one entity is a joint venture of a third entity, and the other entity is an associate of the third entity

5. Significant Accounting Policies (contd.)

(v) the entity is a post-employment benefit plan for the benefit of the employees of either the Company or an entity related to the Company.
(vi) the entity is controlled or jointly controlled by a pension identified in (a);
(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
(viii) the entity or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

6. Profit / (Loss) before taxation.

The Company's profit / (loss) before tax is arrived at after charging / (crediting):

	01.04.2025 to 31.03.2026 HK$	28.09.2023 to 31.03.2025 HK$
Charging:		
Admin – group recharge	533,719	304,012
Consulting fees	479,917	-

7. Tax

At the end of the reporting period, the Company had unused tax losses of HK$ 1,235,930 (2025: HK$ 371,021), These tax losses are available for carry-forward and may be offset against the future taxable profits of the respective entity in which they originated. Deferred tax assets of HK$ 203,928 (2025: NIL) have been recognised in respect of these tax losses. Management considers it probable that sufficient tax profits will be available within next one to two year against which these unused tax losses to be utilised. Under current Hong Kong tax legislation, these losses do not expire and can be carried forward indefinitely.

8. Director's remuneration

No fees or other emoluments were paid or payable to the directors during the period.

9. Related party balances

The amount due from / to related companies is unsecured, interest-free and repayable on demand.

Walker Chandiok & Co LLP

Independent Auditor's Report

To the Members of Technocian Fashions Private Limited

Report on the Audit of the Financial Statements

Opinion

Walker Chandiok & Co LLP
5th Floor, No.65/2, Block "A",
Bagmane Tridib, Bagmane
Tech Park, C V Raman Nagar,
Bengaluru 560093

T +91 80 4243 0700
F +91 80 4126 1228

1. We have audited the accompanying financial statements of **Technocian Fashions Private Limited** ('the Company'), which comprise the Balance Sheet as at 31 March 2026, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2026, and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Directors' Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

The Director's report is not made available to us at the date of this auditor's report. We have nothing to report in this regard.

WALKER CHANDIOK & CO LLP * BENGALURU * CHARTERED ACCOUNTANTS

Walker Chandiok & Co LLP is registered with limited liability with identification number AAC-2085 and its registered office at L-41 Connaught Circus, New Delhi,

Responsibilities of Management for the Financial Statements

5. The accompanying financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

   - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

   - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls

   - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;

   - Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

   - Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

9. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

10. Based on our audit, we report that the Company has not paid or provided for any managerial remuneration during the year. Accordingly, reporting under section 197(16) of the Act is not applicable.

11. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act we give in the Annexure I a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

12. Further to our comments in Annexure I, as required by section 143(3) of the Act based on our audit, we report, to the extent applicable, that:

    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying financial statements;

    b) Except for the matter stated in paragraph 12(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

    c) The financial statements dealt with by this report are in agreement with the books of account;

    d) In our opinion, the aforesaid financial statements comply with Ind AS specified under section 133 of the Act;

    e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2026 from being appointed as a director in terms of section 164(2) of the Act;

    f) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in paragraph 12(b) above on reporting under section 143(3)(b) of the Act and paragraph 12(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);

    g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls, refer to our separate report in Annexure II wherein we have expressed an unmodified opinion; and

    h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us:

        i. The Company does not have any pending litigations which would impact its financial position as at 31 March 2026;

        ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2026;

        iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2026;

        iv.

            a. The management has represented that, to the best of its knowledge and belief, as disclosed in note 36 to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any person(s) or entity(ies), including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other

persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;

b. The management has represented that, to the best of its knowledge and belief, as disclosed in note 36 to the financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.

v. The Company has not declared or paid any dividend during the year ended 31 March 2026.

vi. As stated in Note 37 to the financial statements and based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2025, has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has been operated throughout the year for all relevant transactions recorded in the software, except that, audit trail feature was not enabled at the database level for such accounting software to log any direct data changes. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with, where such feature is enabled. Furthermore, the audit trail has been preserved by the Company as per the statutory requirements for record retention where the audit trail feature was enabled.

Annexure I referred to in paragraph 11 of the Independent Auditor's Report of even date to the members of Technocian Fashions Private Limited on the t financial statements for the year ended 31 March 2026

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment and relevant details of right-of-use assets.

(B) The Company does not have any intangible assets and accordingly, reporting under clause 3(i)(a)(B) of the Order is not applicable to the Company.

(b) The property, plant and equipment and relevant details of right-of-use assets have been physically verified by the management during the year and no material discrepancies were noticed on such verification. In our opinion, the frequency of physical verification programme adopted by the Company, is reasonable having regard to the size of the Company and the nature of its assets.

(c) The Company does not own any immovable property (including investment properties) (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee). Accordingly, reporting under clause 3(i)(c) of the Order is not applicable to the Company.

(d) The Company has not revalued its property, plant and equipment including right-of-use assets during the year.

(e) No proceedings have been initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 (as amended) and rules made thereunder.

(ii) (a) The Company does not hold any inventory. Accordingly, reporting under clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned working capital limits by banks or financial institutions on the basis of security of current assets at any point of time during the year. Accordingly, reporting under clause 3(ii)(b) of the Order is not applicable to the Company.

(iii) The Company has not made any investment in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured to companies, firms, Limited Liability Partnerships (LLPs) or any other parties during the year. Accordingly, reporting under clause 3(iii) of the Order is not applicable to the Company.

(iv) The Company has not entered into any transaction covered under sections 185 and 186 of the Act. Accordingly, reporting under clause 3(iv) of the Order is not applicable to the Company.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, reporting under clause 3(v) of the Order is not applicable to the Company.

(vi) The Central Government has not specified maintenance of cost records under sub-section (1) of section 148 of the Act, in respect of Company's products/ services / business activities. Accordingly, reporting under clause 3(vi) of the Order is not applicable.

(vii)(a) In our opinion and according to the information and explanations given to us, the Company is regular in depositing undisputed statutory dues including goods and services tax, provident fund, income-tax, cess and other material statutory dues, as applicable, with the appropriate authorities. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, we report that there are no statutory dues referred to in subclause (a) above that have not been deposited with the appropriate authorities on account of any dispute.

(viii) According to the information and explanations given to us, we report that no transactions were surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961) which have not been previously recorded in the books of accounts.

(ix) According to the information and explanations given to us, we report that the Company does not have any loans or other borrowings from any lender. Accordingly, reporting under clause 3(ix) of the Order is not applicable to the Company.

(x) (a) The Company has not raised any money by way of initial public offer or further public offer (including debt instruments), during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or (fully, partially or optionally) convertible debentures during the year. Accordingly, reporting under clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company or no fraud on the Company has been noticed or reported during the period covered by our audit.

(b) According to the information and explanations given to us including the representation made to us by the management of the Company, no report under sub-section 12 of section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014, with the Central Government for the period covered by our audit.

(c) According to the information and explanations given to us including the representation made to us by the management of the Company, there are no whistle-blower complaints received by the Company during the year.

(xii) The Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, reporting under clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, all transactions entered into by the Company, with the related parties are in compliance with section 188 of the Act. The details of such related party transactions have been disclosed in the financial statements, as required under Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified in Companies (Indian Accounting Standards) Rules 2015 as prescribed under section 133 of the Act. Further, according to the information and explanations given to us, the Company is not required to constitute an audit committee under section 177 of the Act.

(xiv) According to the information and explanations given to us, the Company is not required to and consequently, does not have an internal audit system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanation given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and accordingly, reporting under clause 3(xv) of the Order with respect to compliance with the provisions of section 192 of the Act are not applicable to the Company.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, reporting under clauses 3(xvi)(a), (b) and (c) of the Order are not applicable to the Company.

(d) Based on the information and explanations given to us and as represented by the management of the Company, the Group (as defined in Core Investment Companies (Reserve Bank) Directions, 2016) does not have any CIC.

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

(xvii) The Company has not incurred any cash losses in the current financial year as well as the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, reporting under clause 3(xviii) of the Order is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information in the standalone financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) According to the information and explanations given to us, the Company does not meet the criteria as specified under sub-section (1) of section 135 of the Act read with the Companies (Corporate Social Responsibility Policy) Rules, 2014 and according, reporting under clause 3(xx) of the Order is not applicable to the Company.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure II

Independent Auditor's Report on the Internal financial controls with reference to the financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

1. In conjunction with our audit of the financial statements of Technocian Fashions Private Limited ('the Company') as at and for the year ended 31 March 2026, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management for Internal Financial Controls

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2026, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

Summary of material accounting policy information and other explanatory information
(All amounts are in ₹ thousands unless otherwise specified)

1. Corporate information

Technocian Fashions Private Limited ('the Company') was incorporated on March 20, 2019. The business activities of the Company consists of providing sourcing support services to Fellow Subsidiaries. The registered office of the Company is situated at Gurgaon.

The accompanying financial statements reflect the results of the activities undertaken by the Company during the year ended March 31, 2026.
The financial statements of the company for the year ended March 31,2026 were approved by the Board of Directors and authorised for issue on May 15, 2026.

2. Statement of compliance

The financial statements have been prepared for the Company as a going concern in accordance with the Indian Accounting Standards (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Companies Act, 2013, as applicable.
The accounting policies are applied consistently to all the periods presented in the financial statements.

Basis of accounting and preparation of financial statements

The financial statements have been prepared on the historical cost convention on accrual basis. The financial statements are presented in ₹ and all values are rounded to the nearest thousands except where otherwise stated.

Recent accounting pronouncement

The Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

A. Amended Accounting Standards (Ind AS) and interpretations effective from the annual reporting periods beginning on or after April 01, 2025.

The MCA has notified below new standards / amendments which were effective from April 01, 2025.

Amendment to Ind AS 21- "The Effects of Changes in Foreign Exchange Rates"

The amendment specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also requires the disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows. When applying the amendment, an entity cannot restate comparative information.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 1 - "Presentation of Financial Statements"

The Amendment elaborate on guidance set out in Ind AS 1 by:
• clarifying that the right to defer settlement of a liability for at least 12 months after the reporting period;
a) must have substance, and b) must exist at the end of the reporting period;
• stating that management's expectations around whether the settlement of a liability would be deferred or not, does not impact the classification of the liability;
• including requirements for liabilities that can be settled using an entity's own instruments; and
• stating that at the reporting date, the entity does not consider covenants that will need to be complied with in the future when considering the classification of the debt as current or non-current.
In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 7 and Ind AS 107 - Supplier Finance Arrangements

The Amendment introduced disclosure requirements with the objective to enable users of financial statements to assess how supplier finance arrangements affect an entity's liabilities, cashflows and exposure to liquidity risk.
The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 12 - International Tax Reform - Pillar Two Model Rules

The Amendment includes a temporary exception to the recognition and disclosure of deferred taxes arising from the implementation of the Pillar Two model rules; and additional disclosure requirements targeted at a reporting entity's exposure to income taxes in periods in which the Pillar Two Model legislation is enacted or substantively enacted but not yet in effect.
The amendments does not have a material impact on the Company's financial statements.

B. Amendment effective for annual reporting periods beginning on or after April 01, 2026:

Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants - Amendments to Ind AS 1

Paragraph 74 of Ind AS 1 currently effective for the year ended 31 March 2026 requires the entity not to classify the liability as current, if there is a breach of a material covenant of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, however, the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

MCA vide notification dated 13 August 2025, has introduced amendment under Paragraph 74 of Ind AS 1 which requires the entity to classify the liability as current under the aforementioned situation because, at the end of the reporting period, it does not have the right to defer its settlement for at least twelve months after that date. Such amendment has been made effective for annual reporting periods beginning on or after 01 April 2026 retrospectively in accordance with Ind AS 8.

This amendment is not expected to have a material impact on the Company's Financial Statements.

WALKER CHANDIOK & CO LLP * BENGALURU * CHARTERED ACCOUNTANTS

Technocian Fashions Private Limited

Technocian Fashions Private Limited
CIN: U18100HR2019PTC096168
Summary of material accounting policy information and other explanatory information
(All amounts are in ₹ thousands unless otherwise specified)

3. Material accounting policies

3.1 Material accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that effect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Judgements:

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

Defined benefit obligation

Management estimates of these obligation is based on the number of critical underlying assumptions such as standard rates of inflation, medical cost trends, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the defined benefit obligation amount and the annual defined benefit expenses.

Income taxes

The Company is subject to income tax laws as applicable in India. Significant judgement is required in determining provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is difference from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Recognition of deferred tax assets

The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the Company's future taxable income against which the deferred tax assets can be utilized.

Property, plant and equipment

Measurement of useful life and residual values of property, plant and equipment.

Classification of leases

The Company enters into leasing arrangements for various premises. The assessment (including measurement) of the lease is based on several factors, including, but not limited to, transfer of ownership of leased asset at end of lease term, lessee's option to extend/ terminate etc. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to extend or to terminate.

Leases - Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects the Company "would have to pay", which requires estimation when no observable rates are available or when it needs to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

There are no assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year.

3.2 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

a) expected to be realised or intended to be sold or consumed in the company's normal operating cycle;
b) held primarily for the purpose of trading;
c) expected to be realised within twelve months after the reporting date; or
d) cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

Liabilities:

A liability is current when:

a) It is expected to be settled in the company's normal operating cycle;
b) It is held primarily for the purpose of trading;
c) It is due to be settled within twelve months after reporting date; or
d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Operating cycle: Based on the nature of products/ activities of the Company and the normal time between acquisition of assets and their realization in cash or cash equivalents , the Company has determined its operating cycle as 12 months for the purpose of classification of assets and liabilities as current and non-current.

Technocian Fashions Private Limited

3. Material accounting policies (Cont'd)

3.3 Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Company will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

The Company recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A 5-step approach is used to recognise revenue as below:

Step 1: Identify the contract(s) with a customer
Step 2: Identify the performance obligation in contract.
Step 3: Determine the transaction price.
Step 4: Allocate the transaction price to the performance obligations in contract.
Step 5: Recognise revenue when (or as) the entity satisfies the performance obligation.

The Company recognises contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in its balance sheet. Similarly, if the Company satisfies a performance obligation before it receives the consideration, the Company recognises either a contract asset or a receivable in its balance sheet, depending on whether something other than the passage of time is required before the consideration is due.

Other Income

i) Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income that can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

ii) Dividend income is recognized when the right to receive payment is established.

iii) Any other income is recognised on an accrual basis.

3.4 Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

The company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is measured at the present value of the lease payments to be made over the lease term, discounted using the interest rate implicit in the lease if that rate is readily available or the Company's incremental borrowing rate. The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance, fixed), and payments arising from options reasonably certain to be exercised. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest expenses. It is remeasured to reflect any reassessment or modification.

WALKER CHANDIOK & CO LLP * BENGALURU * CHARTERED ACCOUNTANTS

Technocian Fashions Private Limited

3. Material accounting policies (Cont'd)

3.4 Leases (Cont'd)

Lease payments included in the measurement of the lease liability comprise the following:
– Fixed payments, including in-substance fixed payments;
– Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
– Amounts expected to be payable under a residual value guarantee; and
– The exercise price under a purchase option that the company is reasonably certain to exercise, lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the company is reasonably certain not to terminate early.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Short-term leases and leases of low-value assets

The company has elected not to recognise right-of-use assets and lease liabilities for short term leases of real estate properties that have a lease term of 12 months. The company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

3.5 Foreign currency transactions and translations

Functional and presentation currency

The Company's financial statements are presented in Indian Rupees (₹) which is also the Company's functional currency. Functional currency is the currency of the primary economic environment in which a Company operates and is normally the currency in which the Company primarily generates and expends cash. All the financial information presented in ₹ in thousands except where otherwise stated.

Transactions in foreign currencies are translated into the functional currency of the Company at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Measurement at the reporting date

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured in terms of historical cost are not retranslated.

3.6 Employee benefits

Employee benefits include provident fund, gratuity and compensated absences.

Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a statutory authority and will have no legal or constructive obligation to pay further amounts. Provident Fund and Employee State Insurance Schemes are defined contribution plans and contributions paid / payable are recognized as an expense in the Statement of Profit and Loss during the year in which the employee renders the related service.

Other long term benefits

Long term compensated absences are provided for on the basis of actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/ losses, if any, are recognized immediately in the Statement of Profit and Loss.

Short-term employee benefits

All employee benefits expected to be settled wholly within twelve months of rendering the service are classified as short-term employee benefits. When an employee has rendered service to the Company during an accounting period, the Company recognizes the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service as an expense unless another Ind AS requires or permits the inclusion of the benefits in the cost of an asset. Benefits such as salaries, wages, bonus and ex-gratia etc. are recognized in Statement of profit and loss in the period in which the employee renders the related service.

Defined benefit Plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.
The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount based on the respective employee's salary and the tenure of employment. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation report using the projected unit credit method as at the year end.

The obligations are measured at the present value of the estimated future cash flows. The discount rate is generally based upon the market yields available on Government bonds at the reporting date with a term that matches that of the liabilities.
Re-measurements, comprising actuarial gains and losses including, the effect of the changes to the asset ceiling (if applicable), is reflected immediately in Other Comprehensive Income in the Statement of Profit and Loss. All other expenses related to defined benefit plans are recognized in Statement of Profit and Loss as employee benefit expenses. Gains or losses on the curtailment or settlement of any defined benefit plan are recognized when the curtailment or settlement occurs.

3. Material accounting policies (Cont'd)

3.7 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

(i) Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income (OCI) or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets are offset against current tax liabilities if, and only if, a legally enforceable right exists to set off the recognized amounts and there is an intention either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

(ii) Deferred Tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity).

Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

3.8 Property, plant and equipment

Recognition and measurement

(i) Property, plant and equipment, capital work in progress are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Such cost includes expenditure that is directly attributable to the acquisition of the asset.

An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss within other income or expense (as applicable).

Subsequent costs:

(ii) The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognized. The cost for day-to-day servicing of property, plant and equipment are recognized in statement of profit and loss as and when incurred.

Depreciation/Amortisation

(iii) Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values and is charged to Statement of Profit and Loss. Depreciation on all tangible fixed assets is provided on the straight line method over the estimated useful life of the assets at rates specified in Schedule II to the Companies Act, 2013.

Leasehold improvements are amortised over the period of lease. Leasehold improvements are amortised over the period of lease or estimated useful life, whichever is lower.

Depreciation on addition to property, plant and equipment is provided from the date, the asset is acquired/ installed. Depreciation on sale/deduction from property, plant and equipment is provided for upto the last day of sale, deduction, discardment as the case may be.

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. In respect of assets whose useful lives has been revised, the unamortized depreciable amount is charged over the revised remaining useful lives of the assets.

Useful lives of property, plant and equipment:

Furniture and fixtures	10 Years
Office equipments	5 Years
Computer hardware	3 Years
Motor Vehicles	8 Years

Leasehold improvements is depreciated over the period of lease.

(iv) An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of property, plant and equipment) is included in the Statement of Profit and Loss when property, plant and equipment is derecognized. The carrying amount of any component accounted as a separate component is derecognized, when replaced or when the property, plant and equipment to which the component relates gets derecognized.

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

Technocian Fashions Private Limited

3. Material accounting policies (Cont'd)

3.9 Impairment of non-financial assets

Non- financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non- financial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognized are accordingly reversed in the statement of profit and loss.

3.10 Segment reporting

The Company has the policy of reporting the segments in a manner consistent with the internal reporting provided to the chief operating decision maker. The Chief Operating Decision maker is considered to make strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.

3.11 Earnings per share

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra ordinary items.

- Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.
- For the purpose of calculating Diluted Earning per share, the number of shares comprises of weighted average shares considered for deriving basic earning per share and also the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. A transaction is considered to be antidilutive if its effect is to increase the amount of EPS, either by lowering the share count or increasing the earnings.

3.12 Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.13 Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets

Initial recognition and measurement

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

All financial assets are recognized initially at fair value, plus in the case of financial assets not recorded at fair value through profit or loss (FVTPL), transaction costs that are attributable to the acquisition of the financial assets. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Subsequent measurement

For the purpose of Subsequent measurement, the Company classifies financial assets in following categories:

(i) Financial assets at amortized cost
(ii) Financial assets at fair value through other comprehensive income (FVTOCI)
(iii) Financial assets at fair value through profit or loss (FVTPL)

Financial assets carried at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

Equity investment

Investments representing equity interest in associates/ subsidiary are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

Technocian Fashions Private Limited

3. Material accounting policies (Cont'd)

3.13 Financial instruments (Cont'd)

De-recognition of financial assets

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:
(i) The contractual rights to receive cash flows from the asset has expired, or
(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.
All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction cost.
The Company's financial liabilities include trade and other payables, lease liabilities, security deposits received etc.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:
- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit or loss

De-recognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

3.14 Impairment of financial assets

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortized cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.
Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115 Revenue from contracts with customers, the Company applies simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected life time losses to be recognized after initial recognition of receivables. For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve months ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on twelve-months ECL.

3.15 Business combination

Business combinations in the nature of common control transactions are accounted for using pooling of interest method as per Appendix C of IND AS 103 - Business combinations as follows:
i) The assets and liabilities of the combining entities are reflected at their carrying amounts.
ii) The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceeding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.
iii) The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee or is adjusted against general reserve.
iv) The value of the investment in the merged undertaking in the books of the Company shall be cancelled.
v) No adjustments are made to reflect fair values, or recognise any new assets or liabilities.
vi) The difference between the net assets of the merged undertaking transferred to Company, after making adjustment specified above shall be disclosed as 'Other equity/ Capital reserve' of the Company.

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

Technocian Fashions Private Limited

3. Material accounting policies (Cont'd)

3.16 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

(a) In the principal market for the asset or liability, or

(b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

24 Earnings per share

Earning per share (EPS) is determined based on the net profit attributable to the shareholder before other comprehensive income. Basic earning per share is computed using the weighted average number of equity shares outstanding during the year whereas diluted earning per share is computed using the weighted average number of common and dilutive equivalent shares except for the case where the result becomes anti-dilutive.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Profit attributable to equity holders(₹)	26,590.34	26,501.92
Weighted average number of equity shares outstanding during the year (in absolute number)	50,000	50,000
Basic earnings per share (₹)	531.81	530.04
Diluted earnings per share (₹)	531.81	530.04
Face value per share (₹)	10.00	10.00

25 Segment Information

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). The CODM is considered to be the Board of Directors who makes strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.

The business activities of the Company consists of providing sourcing support services to its fellow subsidiary. The disclosures as required under Ind AS 108 on operating segment reporting has not been provided as the Company deals in one business segment.

Geographical information

As the Company exports its services and there is no secondary segment for the Company. Information on the geographic segment is as follows:

	Revenue	
Location	Year ended March 31, 2026	Year ended March 31, 2025
Outside India	183,072.90	196,015.56
	183,072.90	**196,015.56**

The company is domiciled in India and all its non-current assets are located in/relates to India.

The amount of its revenue from major customers (more than 10% of the total) is shown in the table below:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Techno Design GmbH	183,072.90	196,015.56

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

Technocian Fashions Private Limited

26 Transfer pricing

The Company has established a comprehensive system on maintenance of information and documents as required by the transfer pricing legislation under 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for the international transactions entered into with the associated enterprises during the year and expects such records to be in existence latest by the due date as required under law. The management is of the opinion that its international transactions are at arm's length and the aforesaid legislation will not have any impact on the financial statements.

27 Employee benefits

(a) **Defined contribution plans**

The Company makes contribution towards Employees Provident Fund and Employee's State Insurance scheme. Under the rules of these schemes, the Company is required to contribute a specified percentage of payroll costs. The Company during the year recognised ₹ 5,767.68 (March 31, 2025: ₹ 6,130.10) in the Statement of Profit and Loss under Company's contribution to defined contribution plans. The contribution payable to these schemes by the Company are at the rates specified in the rules of the schemes.

(b) **Other long-term benefits**

Long term compensated absences are provided for on the basis of actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/ losses, if any, are recognized immediately in the Statement of Profit and Loss.

(c) **Defined benefit plans**

The Company's gratuity scheme provide for lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days basic salary for each completed year of service or part thereof in excess of six months in terms of provisions of Gratuity Act, 1972. Vesting occurs upon completion of five years of service.

As per Ind AS 19 "Employee benefits", the present value of defined benefit obligation and the related current service cost were measured using the projected unit credit method with actuarial valuations being carried out at each Balance Sheet date.

The following table summarises the components of net benefit expense recognised in the Statement of Profit and Loss and the amounts recognised in the balance sheet:

(i) Amount recognised in Statement of Profit and Loss and other comprehensive income:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Current service cost	1,666.74	1,320.68
Past service cost*	1,661.53	-
Interest expense	684.99	297.70
Amount recognised in Statement of profit and loss	**4,013.26**	**1,618.38**
Remeasurement of defined benefit liability:		
Actuarial loss	(410.10)	1,018.82
Amount recognised in other comprehensive income	**(410.10)**	**1,018.82**
Total	**3,603.16**	**2,637.20**

*The Government of India, on November 21, 2025, notified implementation of four new labour codes — Code on Wages (2019), Industrial Relations Code (2020), Code on Social Security (2020), and Occupational Safety, Health and Working Conditions Code (2020) (hereinafter referred to as "the New Labour Codes").

The New Labour Codes prescribe an uniform definition of the term 'wages', which is also relevant for determination of post-employment benefits including gratuity to all employees. In accordance with the definition, wages means all remuneration including basic pay, dearness allowance and retaining allowance but does not include certain specified items forming part of remuneration and in the event the quantum of those specified items exceed 50% of total remuneration, such excess is deemed to be considered as wages.

The revised definition of wages has resulted in an increase in gratuity obligation of ₹ 64.61 in respect of services rendered in prior periods, and the Company has treated such incremental impact as past service cost and recognised as expense immediately in the statement of profit and loss in the current year in accordance with Ind AS 19, Employee Benefits.

The Company will continue to monitor finalisation of rules and clarifications from government and would provide appropriate accounting effect on the basis of such developments as needed.

(ii) Bifurcation of actuarial loss on gratuity:

Particulars		Year ended March 31, 2026	Year ended March 31, 2025

Fair value of plan assets at the beginning of the year	-	416.36
Benefits paid	-	(416.36)
Fair value of plan assets at the end of the year	-	-

(vii) The significant assumptions used in determining obligations for the Company's plan are shown below:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Discount rate (in %)	7.70%	6.93%
salary escalation rate (in %)	5.00%	5.00%
Demographic Assumptions		
(a) *Attrition*		
Upto 30 years	60.0%	33.0%
31-44 years	23.0%	37.0%
Above 44 years	12.0%	79.0%
(b) Mortality	100% of IALM (2012-14)	100% of IALM (2012-14)
(c) Retirement age	58 years	58 years

(d) The discount rate is based on the prevailing market yields of Government of India securities as at the Balance Sheet date for the estimated term of obligations. The estimate of salary escalation rate considered, takes into account the inflation, seniority, promotion, increments and other relevant factors.

(viii) Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined obligation are discount rate, salary escalation rate and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Effect of +50 basis points in rate of discounting	(251.41)	(98.15)
Effect of -50 basis points in rate of discounting	261.42	100.39
Effect of +50 basis points in rate of salary escalation rate	266.97	101.77
Effect of -50 basis points in rate of salary escalation rate	(258.96)	(100.41)

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Technocian Fashions Private Limited

27 Employee benefits (Cont'd)

(c) **Defined benefit plans (Cont'd)**

(viii) **Sensitivity Analysis (Cont'd)**

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

(ix) **Risk exposure:**

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:

Investment Risk: If Plan is funded then assets liabilities mismatch & actual investment return on assets lower than the discount rate assumed at the last valuation date can impact the liability.
Discount Rate: Reduction in discount rate in subsequent valuations can increase the plan's liability.
Salary Escalation Risk: Actual salary escalation rate will increase the Plan's liability. Increase in salary increase rate assumption in future valuations will also increase the liability.
Mortality Risk: Actual deaths & disability cases proving lower or higher than assumed in the valuation can impact the liabilities.
Withdrawals: Actual withdrawals proving higher or lower than assumed withdrawals and change of withdrawal rates at subsequent valuations can impact Plan's liability.

(x) The weighted average duration of the defined obligation as at March 31, 2026 is 4.23 years. (March 31, 2025: 2.06 years)

(xi) **Maturity profile of defined benefit obligation is as follows:**

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
0-2 year	3,083.39	7,541.66
2 to 6 years	5,207.58	1,953.95
More than 6 years	3,754.45	388.87

29 Income taxes (cont'd)

(c) **Deferred tax assets /liabilities**
Movement in deferred tax assets (net)

	As at April 1, 2025	Recognised in statement of Profit & loss	Recognised in statement of other comprehensive income	As at March 31, 2026
Deferred tax assets relates to the following:				
Provision for gratuity and compensated absences	4,144.39	(532.91)	(103.21)	3,508.27
Property, plant and equipment	5,555.92	147.67	-	5,703.59
Total deferred tax assets (net)	**9,700.31**	**(385.24)**	**(103.21)**	**9,211.86**

	As at April 1, 2024	Recognised in statement of Profit & loss	Recognised in statement of other comprehensive income	As at March 31, 2025
Deferred tax assets relates to the following:				
Provision for gratuity and compensated absences	3,920.49	(32.52)	256.42	4,144.39
Property, plant and equipment	4,216.37	1,339.55	-	5,555.92
Total deferred tax assets (net)	**8,136.86**	**1,307.03**	**256.42**	**9,700.31**

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities related to income taxes levied by the same tax authority.

30 Financial risk management objectives and policies

The Company's principal financial liabilities comprises lease liabilities, trade payables and dues to employees. The main purpose of these financial liabilities is to finance the Company's operations.
The Company's principal financial assets includes trade receivables, security deposits and cash and cash equivalents.
The Company is exposed to market risk, liquidity risk and credit risk. The Company's senior level personnel oversees the management of these risks.

(a) **Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk applicable in case of the Company primarily includes currency risk, interest risk and other price risks.

(i) **Foreign currency risk**

The Company's exposure to foreign currency risk at the end of the reporting period is as follows:

Particulars	Currency	As at March 31, 2026	As at March 31, 2025
Trade receivables	USD	72,984.05	18,942.33
Net exposure		**72,984.05**	**18,942.33**

Foreign currency Sensitivity

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in exchange rates. The following table demonstrate the sensitivity to a reasonably possible change in foreign exchange rate, with all other variables held constant.

Impact on Profit and loss	Change in rate	As at March 31, 2026	As at March 31, 2025
USD	+5%	(3,649.20)	(947.12)
	-5%	3,649.20	947.12

Impact on total equity	Change in rate	As at March 31, 2026	As at March 31, 2025
USD	+5%	(2,730.77)	(708.75)
	-5%	2,730.77	708.75

(ii) **Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The exposure to the risk of changes in market interest rates relates primarily to the debt obligations with floating interest rates. The Company does not have any debt obligations and hence does not have exposure to interest rate risk.

(iii) **Price risk**

The price risk is the risk that the fair values of investment securities decrease as a result of changes in the levels of equity indices or the value of individual securities. The Company does not have any listed securities included in financial assets at fair value through profit or loss and hence is not exposed to any price risk.

WALKER CHANDIOK & CO LLP * BENGALURU * CHARTERED ACCOUNTANTS

Technocian Fashions Private Limited

30 Financial risk management objectives and policies (Cont'd)

(b) **Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

As at March 31, 2026	Trade payable	Lease liabilities	Other financial liabilities
Financial Liabilities			
Less than 12 months	2,453.41	6,860.89	9,325.81
1 to 5 years	-	9,901.43	-
Total contracted cash flows	**2,453.41**	**16,762.32**	**9,325.81**

As at March 31, 2025	Trade payable	Lease liabilities	Other financial liabilities (Restated)
Financial Liabilities			
Less than 12 months	3,805.33	9,065.68	12,662.93
1 to 5 years	-	17,494.13	-
Total contracted cash flows	**3,805.33**	**26,559.81**	**12,662.93**

(c) **Credit risk**

Credit risk is the risk that counterparty will default on its contractual obligations resulting in finance loss to the Company. The Company continuously monitors defaults of customers and other counterparties and incorporate this information into its credit risk control. The Company also uses expected credit loss model to assess the impairment loss in trade receivables and makes an allowance of doubtful trade receivables using this model.

(i) **Trade receivables**

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored. The Company limits its exposure to credit risk from trade receivables by establishing a appropriate credit period for customer. Loss rates are based on actual credit loss experience and past trends. Based on the historical data, there is no loss on collection of receivable, hence no provision is created.

The ageing analysis of trade receivables as of the reporting date is as follows:

Particulars	Less than 30 days	30 to 90 days	More than 90 days	Total
Trade receivables as of March 31, 2026	48,303.36	24,680.69	-	72,984.05
Trade receivables as of March 31, 2025	18,942.33	-	-	18,942.33

(ii) **Other financial assets**

For cash & cash equivalents - Since the group deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents, is evaluated as very low.

For other financial assets - Credit risk is considered low because the Company is in possession of the underlying asset.

For the financial assets other than trade receivables:

1. On the basis of historical analysis, the Company does not have any financial assets where there is a risk of default.
2. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets as at March 31, 2026 and March 31, 2025.

Technocian Fashions Private Limited

31 Capital management

The Company aims to manage its capital efficiently so as to safeguard its ability to continue as a going concern and to optimize returns to our shareholders. The capital structure of the Company is based on management's judgement of the appropriate balance of key elements to meet its strategic and day-to-day needs. We consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares. The Company policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. The Company will take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

The Company's capital and adjusted net debt position is given below:

Particulars	As at March 31, 2026	As at March 31, 2025
Less: Cash and cash equivalents (refer note 9)	(25,136.03)	(32,531.02)
Adjusted net debt (A)	**(25,136.03)**	**(32,531.02)**
Equity share capital (refer note 11)	500.00	500.00
Other equity (refer note 12)	113,126.23	86,228.99
Total capital (B)	**113,626.23**	**86,728.99**
Capital and net debt	**88,490.20**	**54,197.97**

a) No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2026 and March 31, 2025.
b) For the purpose of capital management, capital includes issued equity capital and all other reserves attributable to the equity holders of the Company.

32 Fair values disclosure

(a) **The carrying amounts of financial assets by categories is as follows:**

Particulars	As at March 31, 2026	As at March 31, 2025
Financial assets measured at cost		
Investment in subsidiaries (refer note 6)	-	19,047.68
Total (A)	**-**	**19,047.68**
Financial assets measured at amortised cost		
Other financial assets (refer note 5)	3,691.95	3,511.98
Trade receivables (refer note 8)	72,984.05	18,942.33
Cash and cash equivalents (refer note 9)	25,136.03	32,531.02
Total (B)	**101,812.03**	**54,985.33**
Total Financial assets (A+B)	**101,812.03**	**74,033.01**

(b) **The carrying amounts of financial liabilities by categories is as follows:**

Financial Liabilities measured at amortised cost		
Trade payables (refer note 15)	2,453.42	3,805.33
Lease liabilities (refer note 34)	15,035.08	23,098.27
Other financial liabilities (refer note 14)	9,325.81	12,662.93
Total Financial liabilities	**26,814.31**	**39,566.53**

The cash and cash equivalent, trade receivables, other financial assets, trade payable, lease liabilities, other financial liabilities are considered to be equal to the carrying amount of these items due to their short term nature.

33 Fair Value Hierarchy

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.
Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:
Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.
Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.
When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company does not have any financial instruments measured at fair value.

36 (i) Additional Information, as required under Schedule III Companies Act, 2023

(a) The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

(b) The Company does not have any transactions with companies struck off under Section 248 of the Companies Act, 2013 or Section 560 of the Companies Act, 1956 during the year ended March 31, 2026 (March 31, 2025: Nil).

(c) The Company has not revalued its property, plant and equipment (including right-of-use assets) or intangible assets or both during the current or previous year.

(d) The Company does not comprise of any entity which is declared as a wilful defaulter by any bank or financial institution or other lender.

(e) The Company has complied with the number of layers prescribed under clause (87) of section 2 of the Act read with Companies (Restriction on number of Layers) Rules, 2017 during the year ended March 31, 2026 (March 31, 2025: Nil).

(f) The Company does not have any transaction not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 during the year ended March 31, 2026 (March 31, 2025: Nil).

(g) The Company have not traded or invested in crypto currency or virtual currency during the year ended March 31, 2026 (March 31, 2025: Nil).

(ii) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

37 Audit Trail

The Ministry of Corporate Affairs (MCA) has prescribed a requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted by the Companies (Accounts) Amendment Rules 2021 requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.

The Company uses an accounting software for maintaining its books of account. During the year ended March 31, 2026, the Company had not enabled the feature of recording audit trail (edit log) at the database level for the said accounting software to log any direct data changes as it would impact database performance significantly. Audit trail (edit log) is enabled at the application level as part of standard framework and the Company's users have access to perform transactions only from the application level.

Additionally, the audit trail has been preserved by the Company as per the statutory requirements for record retention where such feature was enabled.

38 Subsequent events

No events have occurred between the balance sheet date to the date of issue of these financial statements that could affect the values stated in the financial statements as at March 31, 2026.

39 Ratio Analysis

Ratio	Numerator	Denominator	As at March 31, 2026	As at March 31, 2025	Variation

Independent Auditor's Report

To the Members of DBS Lifestyle India Private Limited

Report on the Audit of the Financial Statements

Opinion

1. We have audited the accompanying financial statements of DBS Lifestyle India Private Limited('the Company'), which comprise the Balance Sheet as at 31 March 2026, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information,

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2026, and its loss (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Director's report, but does not include the financial statements and our auditor's report thereon.

   Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

   In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the

WALKER CHANDIOK & CO LLP * CHARTERED ACCOUNTANTS * BENGALURU

financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

The Director's Report is not made available to us at the date of this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

5. The accompanying financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

   - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

   - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;

   - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;

- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

9. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

10. As required by section 197(16) of the Act, based on our audit, we report that the Company has paid remuneration to its directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.

11. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act we give in the Annexure I a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

12. Further to our comments in Annexure I, as required by section 143(3) of the Act based on our auditwe report, to the extent applicable, that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying financial statements;

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The financial statements dealt with by this report are in agreement with the books of account;

d) In our opinion, the aforesaid financial statements comply with Ind AS specified under section 133 of the Act;

e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2026 from being appointed as a director in terms of section 164(2) of the Act;

f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2026 and the operating effectiveness of such controls, refer to our separate report in Annexure II wherein we have expressed an unmodified opinion; and

g) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us

i. The Company does not have any pending litigation which would impact its financial position as at 31 March 2026.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2026.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2026.

iv.

a. The management has represented that, to the best of its knowledge and belief, as disclosed in note 41 to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any persons or entities, including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;

b. The management has represented that, to the best of its knowledge and belief, as disclosed in note 41 to the financial statements, no funds have been received by the Company from any persons or entities, including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.

v. The Company has not declared or paid any dividend during the year ended 31 March 2026.

vi. As stated in note 43 to the financial statements and based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2025, has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has been operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with, where such feature is enabled. Furthermore, the audit trail has been preserved by the Company as per the statutory requirements for record retention from the date the audit trail was enabled for the accounting software.

Annexure I referred to in paragraph 11 of the Independent Auditor's Report of even date to the members of DBS Lifestyle India Private Limited on the financial statements for the year ended 31 March 2026

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we report that:

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment and relevant details of right-of-use assets.

(B) The Company has not maintained proper records showing full particulars of intangible assets.

(b) The Company has a regular programme of physical verification of its property, plant and equipment and relevant details of right-of-use assets under which the assets are physically verified in a phased manner over a period of two years, which in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. In accordance with this programme, certain property, plant and equipment and relevant details of right-of-use assets were verified during the year and no material discrepancies were noticed on such verification.

(c) The Company does not own any immovable property (including investment properties) (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee). Accordingly, reporting under clause 3(i)(c) of the Order is not applicable to the Company.

(d) The Company has not revalued its property, plant and equipment (including right-of-use assets) or intangible assets during the year.

(e) No proceedings have been initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 (as amended) and rules made thereunder.

(ii) (a) The Company does not hold any inventory. Accordingly, reporting under clause 3(ii)(a) of the Order is not applicable to the Company.

(b) As disclosed in Note 16 to the financial statements, the Company has been sanctioned a working capital limit in excess of Rs. 5 crores, by banks and/or financial institutions on the basis of security of current assets. Pursuant to the terms of the sanction letters, the Company is not required to file any quarterly return or statement with such banks or financial institutions.

(iii) The Company has not provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured to companies, firms, Limited Liability Partnerships (LLPs) or any other parties during the year. Further, the Company has made investments in company during the year, in respect of which:

(b) The Company has not provided any guarantee or given any security or granted any loans or advances in the nature of loans during the year. However, the Company has made investment in 1 entity amounting to Rs. 0.47 lakhs (year-end balance Rs. 0.47 lakhs) and in our opinion, and according to the information and explanations given to us, such investments made are, prima facie, not prejudicial to the interest of the Company.

(c) In respect of loans granted by the Company, the schedule of repayment of principal and payment of interest has been stipulated and principal amount and interest are not due for repayment/ receipt currently.

(d) There is no overdue amount in respect of loans granted to such company.

Annexure I referred to in Paragraph 11 of the Independent Auditor's Report of even date to the members of DBS Lifestyle India Private Limited on the financial statements for the year ended 31 March 2026

(e) The Company has not granted any loans which has fallen due during the year. Further, no fresh loans were granted to any party to settle the overdue loans/advances in nature of loan that existed as at the beginning of the year.

(f) The Company has not granted any loans or advances in the nature of loans, which is repayable on demand or without specifying any terms or period of repayment.

(iv) In our opinion, and according to the information and explanations given to us, the Company has complied with the provisions of section 186 of the Act in respect of investments made and loans granted as applicable. Further, the Company has not entered into any transaction covered under section 185 and section 186 of the Act in respect of guarantees and security provided by it.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits or there are no amounts which have been deemed to be deposits within the meaning of sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, reporting under clause 3(v) of the Order is not applicable to the Company.

(vi) The Central Government has not specified maintenance of cost records under sub-section (1) of section 148 of the Act, in respect of Company's products/ services / business activities. Accordingly, reporting under clause 3(vi) of the Order is not applicable.

(vii)(a) In our opinion and according to the information and explanations given to us, undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, cess and other material statutory dues, as applicable, have generally been regularly deposited with the appropriate authorities by the Company, though there have been slight delays in a few cases. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, we report that there are no statutory dues referred to in subclause (a) above that have not been deposited with the appropriate authorities on account of any dispute.

(viii) According to the information and explanations given to us, we report that no transactions were surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961) which have not been previously recorded in the books of accounts.

(ix) (a) In our opinion and according to the information and explanations given to us the Company has not defaulted in repayment of its loans or borrowings or in the payment of interest thereon to any lender.

(b) According to the information and explanations given to us including representation received from the management of the Company, and on the basis of our audit procedures, we report that the Company has not been declared a willful defaulter by any bank or financial institution or government or any government authority.

(c) In our opinion and according to the information and explanations given to us, the Company has not raised any money by way of term loans during the year and did not have any term loans outstanding at the beginning of the current year. Accordingly, reporting under clause 3(ix)(c) of the Order is not applicable to the Company.

(d) In our opinion and according to the information and explanations given to us, and on an overall examination of the financial statements of the Company, funds raised by the Company on short term basis have, prima facie, not been utilised for long term purposes.

(e) In our opinion and according to the information and explanations given to us and on an overall examination of the financial statements of the Company, the Company has not taken

Annexure I referred to in Paragraph 11 of the Independent Auditor's Report of even date to the members of DBS Lifestyle India Private Limited on the financial statements for the year ended 31 March 2026

any funds from any entity or person on account of or to meet the obligations of its subsidiaries or associate.

(f) In our opinion and according to the information and explanations given to us, the Company has not raised any loans during the year on the pledge of securities held in its subsidiaries or associate.

(x) (a) The Company has not raised any money by way of initial public offer or further public offer (including debt instruments), during the year. Accordingly, reporting under clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or (fully, partially or optionally) convertible debentures during the year. Accordingly, reporting under clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company or no fraud on the Company has been noticed or reported during the period covered by our audit.

(b) According to the information and explanations given to us including the representation made to us by the management of the Company, no report under sub-section 12 of section 143 of the Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014, with the Central Government for the period covered by our audit.

(c) According to the information and explanations given to us including the representation made to us by the management of the Company, there are no whistle-blower complaints received by the Company during the year.

(xii) The Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, reporting under clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, all transactions entered into by the Company, with the related parties are in compliance with section 188 of the Act. The details of such related party transactions have been disclosed in the financial statements, as required under Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified in Companies (Indian Accounting Standards) Rules 2015 as prescribed under section 133 of the Act. Further, according to the information and explanations given to us, the Company is not required to constitute an audit committee under section 177 of the Act.

(xiv) According to the information and explanations given to us, the Company is not required to and consequently, does not have an internal audit system as per the provisions of section 138 of the Act. Accordingly, reporting under clause 3(xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanation given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and accordingly, reporting under clause 3(xv) of the Order with respect to compliance with the provisions of section 192 of the Act are not applicable to the Company.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, reporting under clauses 3(xvi)(a), (b) and (c) of the Order are not applicable to the Company.

(d) Based on the information and explanations given to us and as represented by the management of the Company, the Group (as defined in Core Investment Companies (Reserve Bank) Directions, 2016) does not have any CIC .

(xvii) The Company has incurred cash losses in the current financial year and in the immediately preceding financial years amounting to Rs. 955.71 and Rs. 363.52 respectively.

Annexure I referred to in Paragraph 11 of the Independent Auditor's Report of even date to the members of DBS Lifestyle India Private Limited on the financial statements for the year ended 31 March 2026

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, reporting under clause 3(xviii) of the Order is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information in the financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) According to the information and explanations given to us, the Company does not meet the criteria as specified under sub-section (1) of section 135 of the Act read with the Companies (Corporate Social Responsibility Policy) Rules, 2014 and according, reporting under clause 3(xx) of the Order is not applicable to the Company.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure II

Independent Auditor's Report on the internal financial controls with reference to the standalone financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

1. In conjunction with our audit of the financial statements of DBS Lifestyle India Private Limited ('the Company') as at and for the year ended 31 March 2026, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail,

Annexure II to the Independent Auditor's Report of even date to the members of DBS Lifestyle India Private Limited on the financial statements for the year ended 31 March 2026

accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2026, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India

DBS Lifestyle India Private Limited
CIN: U17299DL2021PTC389431
Summary of material accounting policy information and other explanatory information
(All amounts are in ₹ lakhs unless otherwise specified)

1. General information

DBS Lifestyle India Private Limited is a Private Limited Company (hereinafter referred to as the "Company" or "DBS Lifestyle") incorporated in India on November 5, 2021 having a CIN U17299DL2021PTC389431 and registered office situated at A-161, 3rd Floor New Friends Colony, New Delhi, 110057 India. The Company is actively engaged in designing and manufacturing cloth apparel, including sourcing services to clients in India and outside India. Apart from providing design services, the entity is also involved in selling designs made in-house and as per customer requirements

The accompanying financial statements reflect the results of the activities undertaken by the Company during the year ended March 31, 2026

The financial statements of the company for the year ended March 31, 2026 was approved by the Board of Directors and authorised for issue on September 30, 2026.

2. Statement of compliance

The financial statements have been prepared as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015 (as amended), the Companies (Indian Accounting Standards) (Amendment) Rules 2016 and other relevant provisions of the Act.

Basis of accounting and preparation of financial statements

The financial statements have been prepared on accrual basis under the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

Recent accounting pronouncement

The Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

A. Amended Accounting Standards (Ind AS) and interpretations effective from the annual reporting periods beginning on or after April 01, 2025

The MCA has notified below amendment which were effective from April 01,2025.

Amendment to Ind AS 21- "The Effects of Changes in Foreign Exchange Rates"

The amendment specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also requires the disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

When applying the amendment, an entity cannot restate comparative information.

The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 1 - "Presentation of Financial Statements"

The Amendment elaborate on guidance set out in Ind AS 1 by:

clarifying that the right to defer settlement of a liability for at least 12 months after the reporting period;

a) must have substance, and

b) must exist at the end of the reporting period;

- stating that management's expectations around whether the settlement of a liability would be deferred or not, does not impact the classification of the liability;
- including requirements for liabilities that can be settled using an entity's own instruments; and
- stating that at the reporting date, the entity does not consider covenants that will need to be complied with in the future when considering the classification of the debt as current or non-current.

In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.

The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 7 and Ind AS 107 - Supplier Finance Arrangements

The Amendment introduced disclosure requirements with the objective to enable users of financial statements to assess how supplier finance arrangements affect an entity's liabilities, cashflows and exposure to liquidity risk

The amendments does not have a material impact on the Company's financial statements.

Amendments to Ind AS 12 - International Tax Reform - Pillar Two Model Rules

The Amendment includes a temporary exception to the recognition and disclosure of deferred taxes arising from the implementation of the Pillar Two model rules; and additional disclosure requirements targeted at a reporting entity's exposure to income taxes in periods in which the Pillar Two Model legislation is enacted or substantively enacted but not yet in effect.

The amendments does not have a material impact on the Company's financial statements.

BENGALURU

2. Statement of compliance (Cont'd)

Recent accounting pronouncement

B. Amendments effective from annual reporting periods beginning on or after April 01, 2026:

Classification of Liabilities as Current or Non current and Non-current Liabilities with Covenants - Amendments to Ind AS 1

Paragraph 74 of Ind AS 1 currently effective for the year ended 31 March 2026 requires the entity not to classify the liability as current, if there is a breach of a material covenant of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, however, the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

MCA vide notification dated August 13, 2025, has introduced amendment under Paragraph 74 of Ind AS 1 which requires the entity to classify the liability as current under the aforementioned situation because, at the end of the reporting period, it does not have the right to defer its settlement for at least twelve months after that date. Such amendment has been made effective for annual reporting periods beginning on or after April 1, 2026 retrospectively in accordance with Ind AS 8.

This amendment is not expected to have a material impact on the Financial Statements.

3. Material accounting policy information

3.1 Material accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Judgements:

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

Recognition of deferred tax assets: The extent to which deferred tax assets can be recognized is based on the assessment of the probability of the Company's future taxable income against which the deferred tax assets can be utilized.

Classification of leases: The Company enters into leasing arrangements for various premises. The assessment (including measurement) of the lease is based on several factors, including, but not limited to, transfer of ownership of leased asset at the end of lease term, lessee's option to extend/ terminate etc. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to extend or to terminate.

Leases - Estimating the incremental borrowing rate: The Company cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use assetin a similar economic environment. The IBR therefore reflects what the Company "would have to pay", which requires estimation when no observable rates are available or when it needs to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

There are no assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year.

3.2 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on a current/ non-current classification.

Assets:

An asset is treated as current when it is:

a) Expected to be realised or intended to be sold or consumed in normal operating cycle,
b) Held primarily for the purpose of trading;
c) Expected to be realised within twelve months after reporting p
d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

3. Material accounting policy information (Cont'd)

3.2 Current versus non-current classification (Cont'd)

Liabilities:

A liability is current when it is:

a) Expected to be settled in normal operating cycle;
b) Held primarily for the purpose of trading;
c) Due to be settled within twelve months after reporting period;
d) The company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

3.3 Operating cycle

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. Based on the operation, the group has identified twelve months as its operating cycle.

3. Material accounting policy information (Cont'd)

3.4 Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Company will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

The Company recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A 5-step approach is used to recognise revenue as below:
Step 1: Identify the contract(s) with a customer
Step 2: Identify the performance obligation in contract
Step 3: Determine the transaction price
Step 4: Allocate the transaction price to the performance obligations in the contract
Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation"

The Company recognises contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in its balance sheet. Similarly, if the Company satisfies a performance obligation before it receives the consideration, the Company recognises either a contract asset or a receivable in its balance sheet, depending on whether something other than the passage of time is required before the consideration is due.

Sale of Goods

Revenue generated from the sale of goods is recognised at the point in time when control of the promised goods is transferred to the customer which satisfies the performance obligation. The recognition of the said revenue is based on the probable flow of the economic benefits to the Company and the reliable measurement of income with no uncertainty for the ultimate revenue collection.

Sale of Services

Revenue from sale of services has been recognised upon satisfaction of the performance obligation under the service contract. For retainership services, revenue is recognised based on terms agreed upon when entering into the agreement with parties.

For services other than retainership, revenue recognition occurs when the sole or final act takes place, and the rendered service becomes chargeable.

Other Income

i) Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income that can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

ii) Any income or expense on account of exchange difference either on settlement or on translation is recognised as revenue or loss in the statement of Profit & loss.

iii) Any other income is recognised on an accrual basis

3.5 Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

a) Right-of-use assets

Right-of-use assets are recognized at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease terms and the estimated useful lives of the assets.

b) Lease liabilities

Lease liabilities are recognized at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for termination of a lease, if the lease term reflects the Company exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

3. Material accounting policy information (Cont'd)

3.5 Leases (Cont'd)

Short-term leases and leases of low-value assets

The company has elected not to recognise right-of-use assets and lease liabilities for short term leases of real estate properties that have a lease term of 12 months. The company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

3.6 Foreign currency transactions and translations

Functional and presentation currency

The Company's financial statements are presented in Indian Rupees (₹) which is also the Company's functional currency. Functional currency is the currency of the primary economic environment in which a Company operates and is normally the currency in which the Company primarily generates and expends cash. All the financial information presented in ₹ in lakhs except where otherwise stated.

Initial recognition

Transactions in foreign currencies are translated into the functional currency of the Company at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Measurement at the reporting date

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured in terms of historical cost are not retranslated.

3.7 Employee benefits

Employee benefits include provident fund, gratuity and compensated absences.

Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a statutory authority and will have no legal or constructive obligation to pay further amounts. Provident Fund and Employee State Insurance Schemes are defined contribution plans and contributions paid / payable are recognized as an expense in the Statement of Profit and Loss during the year in which the employee renders the related service.

Other long term benefits

Long term compensated absences are provided for on the basis of actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/ losses, if any, are recognized immediately in the Statement of Profit and Loss.

Short-term employee benefits

All employee benefits expected to be settled wholly within twelve months of rendering the service are classified as short-term employee benefits. When an employee has rendered service to the Company during an accounting period, the Company recognizes the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service as an expense unless another Ind AS requires or permits the inclusion of the benefits in the cost of an asset. Benefits such as salaries, wages, bonus and ex-gratia etc. are recognized in Statement of profit and loss in the period in which the employee renders the related service.

Defined benefit Plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount based on the respective employee's salary and the tenure of employment. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation report using the projected unit credit method as at the year end.

The obligations are measured at the present value of the estimated future cash flows. The discount rate is generally based upon the market yields available on Government bonds at the reporting date with a term that matches that of the liabilities.

Re-measurements, comprising actuarial gains and losses including, the effect of the changes to the asset ceiling (if applicable), is reflected immediately in Other Comprehensive Income in the Statement of Profit and Loss. All other expenses related to defined benefit plans are recognized in Statement of Profit and Loss as employee benefit expenses. Gains or losses on the curtailment or settlement of any defined benefit plan are recognized when the curtailment or settlement occurs.

3. Material accounting policy information (Cont'd)

3.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax

(i) Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income (OCI) or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets are offset against current tax liabilities if, and only if, a legally enforceable right exists to set off the recognized amounts and there is an intention either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

(ii) Deferred Tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity).

Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

(iii) Recoverability of deferred taxes

In the process of evaluating the recoverability of deferred tax assets, the management of the Company assesses the probability of available taxable profit against which losses can be utilised. The realisation of deferred tax assets ultimately depends on future taxable income generated during the periods in which temporary differences become deductible. To make this determination, managements considers projected future taxable income and tax planning strategies.

3.9 Property, plant and equipment

Recognition and measurement

(i) Property, plant and equipment, capital work in progress are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Such cost includes expenditure that is directly attributable to the acquisition of the asset.

An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss within other income or expense (as applicable)

Subsequent costs:

(ii) The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognized. The cost for day-to-day servicing of property, plant and equipment are recognized in statement of profit and loss as and when incurred.

Depreciation/Amortisation

(iii) Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values and is charged to Statement of Profit and Loss. Depreciation on all tangible fixed assets is provided on the straight line method over the estimated useful life of the assets at rates specified in Schedule II to the Companies Act, 2013.

Leasehold improvements are amortised over the period of lease. Leasehold improvements are amortised over the period of lease or estimated useful life, whichever is lower.

Depreciation on addition to property, plant and equipment is provided from the date, the asset is acquired/ installed. Depreciation on sale/deduction from property, plant and equipment is provided for upto the last day of sale, deduction, discardment as the case may be.

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. In respect of assets whose useful lives has been revised, the unamortized depreciable amount is charged over the revised remaining useful lives of the assets.

3. Material accounting policy information (Cont'd)

3.9 Property, plant and equipment (Cont'd)

Useful lives of property, plant and equipment:

Furniture and fixtures	10 Years
Office equipments	5 Years
Computers	3 Years
Plant and Machinery	15 Years
Building Improvement	10 Years

(iv) An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of property, plant and equipment) is included in the Statement of Profit and Loss when property, plant and equipment is derecognized. The carrying amount of any component accounted as a separate component is derecognized, when replaced or when the property, plant and equipment to which the component relates gets derecognized

3.10 Impairment of non-financial assets

Non- financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non- financial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognized are accordingly reversed in the statement of profit and loss.

3.11 Segment reporting

The Company has the policy of reporting the segments in a manner consistent with the internal reporting provided to the chief operating decision maker. The Chief Operating Decision maker is considered to make strategic decisions and is responsible for allocating resources and assessing performance of the operating segments.

3.12 Earnings per share

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra ordinary items.

- Basic earning per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

- For the purpose of calculating Diluted Earning per share, the number of shares comprises of weighted average shares considered for deriving basic earning per share and also the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. A transaction is considered to be antidilutive if its effect is to increase the amount of EPS, either by lowering the share count or increasing the earnings.

3.13 Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash balance on hand, cash balance at banks and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.14 Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets

Initial recognition and measurement

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

All financial assets are recognized initially at fair value, plus in the case of financial assets not recorded at fair value through profit or loss (FVTPL), transaction costs that are attributable to the acquisition of the financial assets. However, trade receivables that do not contain a significant financing component are measured at transaction price.

3. Material accounting policy information (Cont'd)

3.14 Financial instruments (Cont'd)

Subsequent measurement

For the purpose of Subsequent measurement, the Company classifies financial assets in following categories

(i) Financial assets at amortized cost
(ii) Financial assets at fair value through other comprehensive income (FVTOCI)
(iii) Financial assets at fair value through profit or loss (FVTPL)

Financial assets carried at amortized cost
A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income
A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss
A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss

Equity investment
Investments representing equity interest in associates/ subsidiary are carried at cost less any provision for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable.

De-recognition of financial assets
A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:
(i) The contractual rights to receive cash flows from the asset has expired, or
(ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.
All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The Company's financial liabilities include trade and other payables, security deposits received etc.

Subsequent measurement
For purposes of subsequent measurement, financial liabilities are classified in two categories:
- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit or loss

De-recognition of financial liabilities
A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

3. Material accounting policy information (Cont'd)

3.15 Impairment of financial instruments

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortized cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial asset(s). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115 Revenue from contracts with customers, the Company applies simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected life time losses to be recognized after initial recognition of receivables. For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve months ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on twelve-months ECL.

3.16 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

(a) In the principal market for the asset or liability, or

(b) In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

3.17 Impairment of goodwill

Goodwill recognized on business combination are tested for impairment at least annually and when events occur or changes in circumstances indicate that the recoverable amount of the asset or the cash generating unit to which these pertain is less than the carrying value. The recoverable amount of the asset or the cash generating units is higher of value-in-use and fair value less cost of disposal. The calculation of value in use of an asset or a cash generating unit involves use of significant estimates and assumptions which include turnover, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.

Balance as at March 31, 2025	983.40
Acquisition of an entity	-
Balance as at March 31, 2026	983.40

Impairment testing of goodwill

Goodwill is tested for impairment at least annually in accordance with the Company's procedure for determining the recoverable value of the company. The recoverable amount of the company is determined on the basis of higher of value in use or fair value less cost of disposal (FVLCD). The recoverable amount of the company is determined based on the discounted cash flow approach, using the discount rate and terminal income growth rate from unobservable market data by an accredited independent valuer for the year ended March 31, 2026. The discount rate applied to the cash flow projections is within the range of 17.5% (March 31, 2025: 19%) and cash flows beyond the five-year period were extrapolated using a growth rate of 6.5% (March 31, 2025: 6.5%).

As at March 31, 2026, the estimated recoverable amount of the CGU exceeded its carrying amount. Reasonable sensitivities in key assumptions is unlikely to cause the carrying amount to exceed the recoverable amount of the cash generating units.

PDS Limited ("PDS") has acquired 51% stake in the Company on October 27, 2022 from the promoters of the Company. Subsequent to the year end, PDS has sold its existing stake of 51% to the Promoters of the Company on September 21, 2026.

Consequently, the Company reassessed the recoverability of the deferred tax asset recognized on brought forward business losses. In view of the anticipated change in shareholding and the consequential applicability of Section 79 of the Income-tax Act, 1961, the Company determined that the underlying tax losses may not be available for future utilization. Accordingly, previously recognized deferred tax asset amounting to ₹ 379.44 has been reversed and recognized as a tax expense in the Statement of Profit and Loss.

Note 10: Non-current tax asset (net)

Note 28: Earnings per share (EPS)

Earning per share (EPS) is determined based on the net profit attributable to the shareholder before other comprehensive income. Basic earnings per share is computed using the weighted average number of equity shares outstanding during the year whereas diluted earnings per share is computed using the weighted average number of common and dilutive equivalent shares except for the case where the result becomes anti- dilutive.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Loss attributable to the equity holders	(1,367.90)	(291.24)
Weighted average number of equity shares for basic and diluted EPS*	20,409	20,409
Earning per Equity share (in ₹)		
Basic and diluted earnings per share (in ₹) (face value ₹10/- per share)	(6,702.41)	(1,427.04)

*The number of shares are given in absolute numbers

Note 29: Employee benefit plans

a) Defined contribution plans

The Company makes contribution towards Employees Provident Fund and Employee's State Insurance scheme. Under the rules of these schemes, the Company is required to contribute a specified percentage of payroll costs. The Company during the year recognized the following amounts in the Statement of Profit and Loss under Company's contribution to defined contribution plans.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Employer's contribution to provident fund/ pension fund	11.46	14.64
Employer's contribution to employee state insurance	1.40	1.80
Total	12.86	16.44

The contribution payable to these schemes by the Company are at the rates specified in the rules of the schemes

b) Defined benefit plans

In accordance with Ind AS 19 "Employee benefits", an actuarial valuation on the basis of "Projected unit credit method" was carried out, through which the Company is able to determine the present value of obligations. "Projected unit credit method" recognizes each period of service as giving rise to additional unit of employees benefit entitlement and measures each unit separately to built up the final obligation.

i) Gratuity scheme

The Company has defined benefit gratuity plan. Gratuity is calculated as 15 days salary for every completed year of service or part thereof in excess of 6 months and is payable on retirement/ termination/ resignation. The benefit vests on completing 5 years of service by the employee. The Company makes provision of such gratuity liability in the books of account on the basis of actuarial valuation as per projected unit credit method.

a) The following tables summarize the components of net benefit expense recognized in the Statement of Profit and Loss and amounts recognized in the Balance Sheet for the defined benefit plan (viz. gratuity). These have been provided on accrual basis, based on year end actuarial valuation.

Particulars	As at March 31, 2026	As at March 31, 2025
Change in benefit obligation		
Opening defined benefit obligation	55.86	31.02
Add: Interest cost	3.90	2.24
Add: Current service cost	9.61	14.44
Add: Past Service cost*	15.32	
Less: Benefits paid	(0.87)	(2.64)
Actuarial (gain)/ loss	(17.27)	10.80
Present value of obligation as at the end of the year	66.55	55.86

*The Government of India, on November 21, 2025, notified implementation of four new labour codes — Code on Wages (2019), Industrial Relations Code (2020), Code on Social Security (2020), and Occupational Safety, Health and Working Conditions Code (2020) (hereinafter referred to as "the New Labour Codes").

The New Labour Codes prescribe an uniform definition of the term 'wages', which is also relevant for determination of post-employment benefits including gratuity to all employees. In accordance with the definition, wages means all remuneration including basic pay, dearness allowance and retaining allowance but does not include certain specified items forming part of remuneration and in the event the quantum of those specified items exceed 50% of total remuneration, such excess is deemed to be considered as wages.

The revised definition of wages has resulted in an increase in gratuity obligation of ₹ 15.32 in respect of services rendered in prior periods, and the Company has treated such incremental impact as past service cost and recognised as expense immediately in the statement of profit and loss in the current year in accordance with Ind AS 19, Employee Benefits.

The Company will continue to monitor finalisation of rules and clarifications from government and would provide appropriate accounting effect on the basis of such developments as needed.

Note 29: Employee benefit plans (cont'd)

b) The following tables summarise the net benefit expense recognized in the Statement of Profit and Loss:

Particulars	As at March 31, 2026	Year ended March 31, 2025
Service cost	9.61	14.44
Past service cost	15.32	-
Interest cost	3.90	2.24
Components of defined benefit costs recognized in statement of profit and loss	28.83	16.68
Actuarial (gain)/ loss on defined benefit plans	(17.27)	10.80
Components of defined benefit costs recognized in other comprehensive income	(17.27)	10.80
Total	11.56	27.48

c) Bifurcation of actuarial loss on gratuity:

Particulars	As at March 31, 2026	Year ended March 31, 2025
Remeasurement due to:		
Effect of change in financial assumptions	(3.68)	1.19
Effect of experience adjustment	(13.59)	9.61
Total amount recognized in other comprehensive loss	(17.27)	10.80

d) Significant actuarial assumptions at the Balance Sheet date are as follows::

Particulars	As at March 31, 2026	Year ended March 31, 2025
Economic assumptions		
1) Discount rate	7.78%	6.99%
2) Future salary escalation rate	5.00%	5.00%
Demographic assumptions		
1) Retirement age	58 years	58 years
2) Mortality rate	100% of IALM (2012 - 14)	100% of IALM (2012 - 14)
3) Employee turnover/ attrition rate		
Ages up to 30	5.00%	5.00%
Ages from 31-44	3.00%	3.00%
Above 44	2.00%	2.00%

e) Net liabilities recognized in the Balance Sheet for benefit obligation:

Particulars	As at March 31, 2026	As at March 31, 2025
Present value of obligation	66.55	55.86
Net liability	66.55	55.86

f) A quantitative sensitivity analysis for significant assumption as is as shown below:

Particulars	As at March 31, 2026	Year ended March 31, 2025
A. Discount rate		
0.5% increase in discount rate	(2.94)	(2.68)
0.5% decrease in discount rate	3.17	2.88
B. Salary escalation rate		
0.5% increase in salary escalation rate	2.58	2.86
0.5% decrease in salary escalation rate	(2.43)	(2.74)

The sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period. Sensitivities due to morality and withdrawals are not expected to be significant

g) Description of Risk Exposures:

Salary escalation rate	Actual salary increases will increase the Plan's liability. Increase in salary increase rate assumption in future valuations will also increase the liability.
Discount rate	Reduction in discount rate in subsequent valuations can increase the plan's liability.
Mortality & disability	Actual deaths & disability cases proving lower or higher than assumed in the valuation can impact the liabilities.
Withdrawals	Actual withdrawals proving higher or lower than assumed withdrawals and change of withdrawal rates at subsequent valuations can impact Plan's liability.

h) The weighted average duration of the defined obligation as at March 31, 2026 on an average is 13.67 years (March 31, 2025: 13.92 years)

Note 29: Employee benefit plans (cont'd)

i) Maturity profile of defined benefit obligation is as follows:

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
	5.30	3.18
1 year	10.85	7.80
2 to 6 years	50.40	44.88
More than 6 years		

j) The estimates of future salary increases considered in actuarial valuation take account of factors, such as supply and demand in the employment market

k) The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period

Note 30: Related party disclosures

Disclosures in accordance with the requirements of Ind AS 24 on Related Party Disclosures, as identified and certified by the management, are set out as below:

a) Details of related parties:

(ii) Remuneration and outstanding balances of KMP does not include long term benefits by way of gratuity and compensated absences, which are currently not payable and are provided on the basis of actuarial valuation by the Company

Note 31: Capital management

The Company aims to manage its capital efficiently so as to safeguard its ability to continue as a going concern and to optimize returns to our shareholders.

The capital structure of the Company is based on management's judgement of the appropriate balance of key elements in order to meet its strategic and day-to-day needs. We consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares.

The Company policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. The Company will take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

The Company's capital and adjusted net debt position is given below:

Net loss on remeasurements of defined benefit plans	(4.35)	2.72
Net amount charged to other comprehensive income	**(4.35)**	**2.72**

(This page has been left blank intentionally)

Note 33: Fair value disclosure

a) The carrying amounts of financial assets by categories is as follows:

	As at March 31, 2026	As at March 31, 2025
Financial assets measured at cost		
Investment in subsidiaries (refer note 6)	55.00	55.00
Investment in associate (refer note 6)	0.47	-
Total (A)	**55.47**	**55.00**
Financial assets measured at amortized cost		
Trade receivables (refer note 11)	662.44	1,366.88
Cash and cash equivalents (refer note 12)	0.10	4.60
Loans (refer note 7)	31.00	31.00
Other financial assets (refer note 8)	10.10	9.66
Total (B)	**703.64**	**1,412.14**
Total (A+B)	**759.11**	**1,467.14**

b) The carrying amounts of financial liabilities by categories is as follows:

	As at March 31, 2026	As at March 31, 2025
Financial liabilities measured at amortized cost		
Borrowings (refer note 16)	1,866.81	1,108.80
Trade payables (refer note 18)	776.24	1,023.77
Lease liability (refer note 38)	115.29	131.74
Other financial liabilities (refer note 19)	218.05	204.90
Total	**2,976.39**	**2,469.21**

The fair value of trade receivables, cash and cash equivalents, loans, other financial assets, borrowings, lease liabilities, trade payables and other financial liabilities are considered to be equal to the carrying amount of these items due to their short term nature.

Note 34: Fair value hierarchy

All financial instruments for which fair value is recognized or disclosed are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.
Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.

The Company does not have any financial instruments measured at fair value as at March 31, 2026 and March 31, 2025.

OBS Lifestyle India Private Limited
CIN: U17299DL2021PTC389431
Notes to financial statements for the year ended March 31, 2026
(All amounts are in ₹ lakhs unless otherwise specified)

Note 35: Financial risk management objectives and policies

The Company's principal financial liabilities comprises of trade payables, borrowings, lease liability, interest accrued on borrowings, dues to employees and dues to related parties. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets includes investment in subsidiaries, loans, security deposits, trade receivables, dues from related parties and cash and cash equivalents

The Company is exposed to credit risk, liquidity risk and market risk. The Company's senior level personnel oversees the management of these risks and advises on the appropriate financial risk governance framework.

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk applicable in case of the Company primarily includes interest rate risk, currency risk and price risk.

i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's interest bearing debt obligations.

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Variable rate borrowings	738.52	245.70
Fixed rate borrowings	821.81	556.62
Total	1,560.32	802.32

Particulars	Increase or decrease in basis points	Effect on equity	Effect on profit before tax
March 31, 2026			
₹	+50	(2.76)	(3.69)
	-50	2.76	3.69
March 31, 2025			
₹	+50	(0.92)	(1.23)
	-50	0.92	1.23

ii) Foreign currency risk

The Company's exposure to foreign currency risk at the end of the reporting period are as follows:

Particulars	Currency	Year ended March 31, 2026	Year ended March 31, 2025
Trade receivable	USD	194.73	302.25
Trade receivable	EUR	46.17	73.62
Trade receivable	YEN	1.09	0.40
Trade payable	USD	(195.45)	(314.81)
Trade payable	EUR	(11.73)	(11.75)
Net exposure		35.41	49.71

Senstivity

Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in exchange rates. The following tables demonstrate the sensitivity to a reasonably possible change in foreign exchange rate, with all other variables held constant.

Particulars	Change in foreign currency exchange rate by	Impact on profit or loss			
		Increase in FC exchange rates		Decrease in FC exchange rates	
		Year ended March 31, 2026	Year ended March 31, 2025	Year ended March 31, 2026	Year ended March 31, 2025
USD senstivity	5%	(0.04)	(0.63)	0.04	0.63
EUR senstivity	5%	1.72	3.09	(1.72)	(3.09)
YEN senstivity	5%	0.08	0.02	(0.08)	(0.02)

Particulars	Change in foreign currency exchange rate by	Impact on equity			
		Increase in FC exchange rates		Decrease in FC exchange rates	
		Year ended March 31, 2026	Year ended March 31, 2025	Year ended March 31, 2026	Year ended March 31, 2025
USD senstivity	5%	(0.03)	(0.47)	0.03	0.47
EUR senstivity	5%	1.29	2.32	(1.29)	(2.32)
YEN senstivity	5%	0.06	0.01	(0.06)	(0.01)

Note 35: Financial risk management objectives and policies (cont'd)

A. Market risk(Cont'd)

iii. Price risk

The price risk is the risk that the fair values of investment securities decrease as a result of changes in the levels of equity indices or the value of individual securities. The Company does not have any listed securities included in financial assets at fair value through profit or loss and hence is not exposed to any price risk.

B. Credit risk

Credit risk is the risk that counterparty will default on its contractual obligations resulting in finance loss to the Company. The Company continuously monitors defaults of customers and other counterparties and incorporate this information into its credit risk control. The Company also uses expected credit loss model to assess the impairment loss in trade receivables and makes an allowance of doubtful trade receivables using this model.

i) Trade receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored. The Company limits its exposure to credit risk from trade receivables by establishing a appropriate credit period for customer. Loss rates are based on actual credit loss experience and past trend. . The Company creates provision for doubtful debts on case to case basis.

The ageing analysis of trade receivables as of the reporting date is as follows:

Particulars	Less than 30 days	30 - 90 days	More than 90 days	Total
Trade receivables as of March 31, 2026	369.99	14.31	310.57	694.87
Trade receivables as of March 31, 2025	1,218.96	67.35	113.00	1,399.31

Receivables that were neither past due nor impaired relate to a number of customers for whom there was no recent history of default.

Movement in expected credit loss

Particulars	As at March 31, 2026	As at March 31, 2025
Balance at the beginning of the year	32.43	40.89
Written off/provided during the year		(8.46)
Balance at the end of the year	32.43	32.43

ii) Other financial assets

Credit risk related to the financial assets involving cash and cash equivalents, security deposits, loans and dues from related party. On the historical basis, the Company does not anticipate any significant risk of default on these assets. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets as at March 31, 2026 and March 31, 2025. To reduce this risk, the Company has concentrated as mentioned below:

For cash & cash equivalents - Since the Company deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents is evaluated as low.

For security deposits - Credit risk is considered low because the Company is in possession of the underlying asset.

Loans, interest accrued but not due on loan and dues from related party - These balances are from related party which is the subsidiary company or Enterprise over which KMP exercise control or significant influence. Therefore, the credit risk is evaluted as low.

C. Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, maintain optimum levels of liquidity to meet its cash and collateral requirements. It maintains adequate sources of financing including loans from banks at an optimized cost.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

As at March 31, 2026	Less than 12 months	1 to 5 years	> 5 years	Total
Borrowings	1,866.81	-	-	1,866.81
Lease liability	24.96	144.79	1.33	171.08
Trade payables	776.23	-	-	776.23
Other financial liabilities	218.05	-	-	218.05
Net exposure	2,886.05	144.79	1.33	3,032.17

As at March 31, 2025	Less than 12 months	1 to 5 years	> 5 years	Total
Borrowings	1,108.80	-	-	1,108.80
Lease liability	31.81	137.89	33.18	202.88

(f) The Company does not have any transaction not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 during the year ended March 31, 2026 (March 31, 2025: Nil).

(g) The Company have not traded or invested in crypto currency or virtual currency during the year ended March 31, 2026 (March 31, 2025: Nil).

(h) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries") with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries). The Company has not received any fund from any party (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries

Note 42: Transfer pricing

The Company has established a comprehensive system on maintenance of information and documents as required by the transfer pricing legislation under 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for the international transactions entered into with the associated enterprises during the year and expects such records to be in existence latest by the due date as required under law. The management is of the opinion that its international transactions are at arm's length and the aforesaid legislation will not have any impact on the financial statements.

(This page has been left blank intentionally)

Note 43: Audit trail

The Ministry of Corporate Affairs (MCA) has prescribed a new requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted by the Companies (Accounts) Amendment Rules 2021 requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.

The Company uses an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log). Further, the audit trail feature was enabled and retained throughout the year.

Note 44: Subsequent events

PDS Limited ("PDS") has acquired 51% stake in the Company on October 27, 2022 from the promoters of the Company. Subsequent to the year end, PDS has sold its existing stake of 51% to the Promoters of the Company on September 21, 2026.

Note 45: Prior year amounts have been regrouped / reclassified wherever necessary, to confirm to the presentation in the current year, which are not material.
